Phaeodaria. — Rohrstrahllinge.

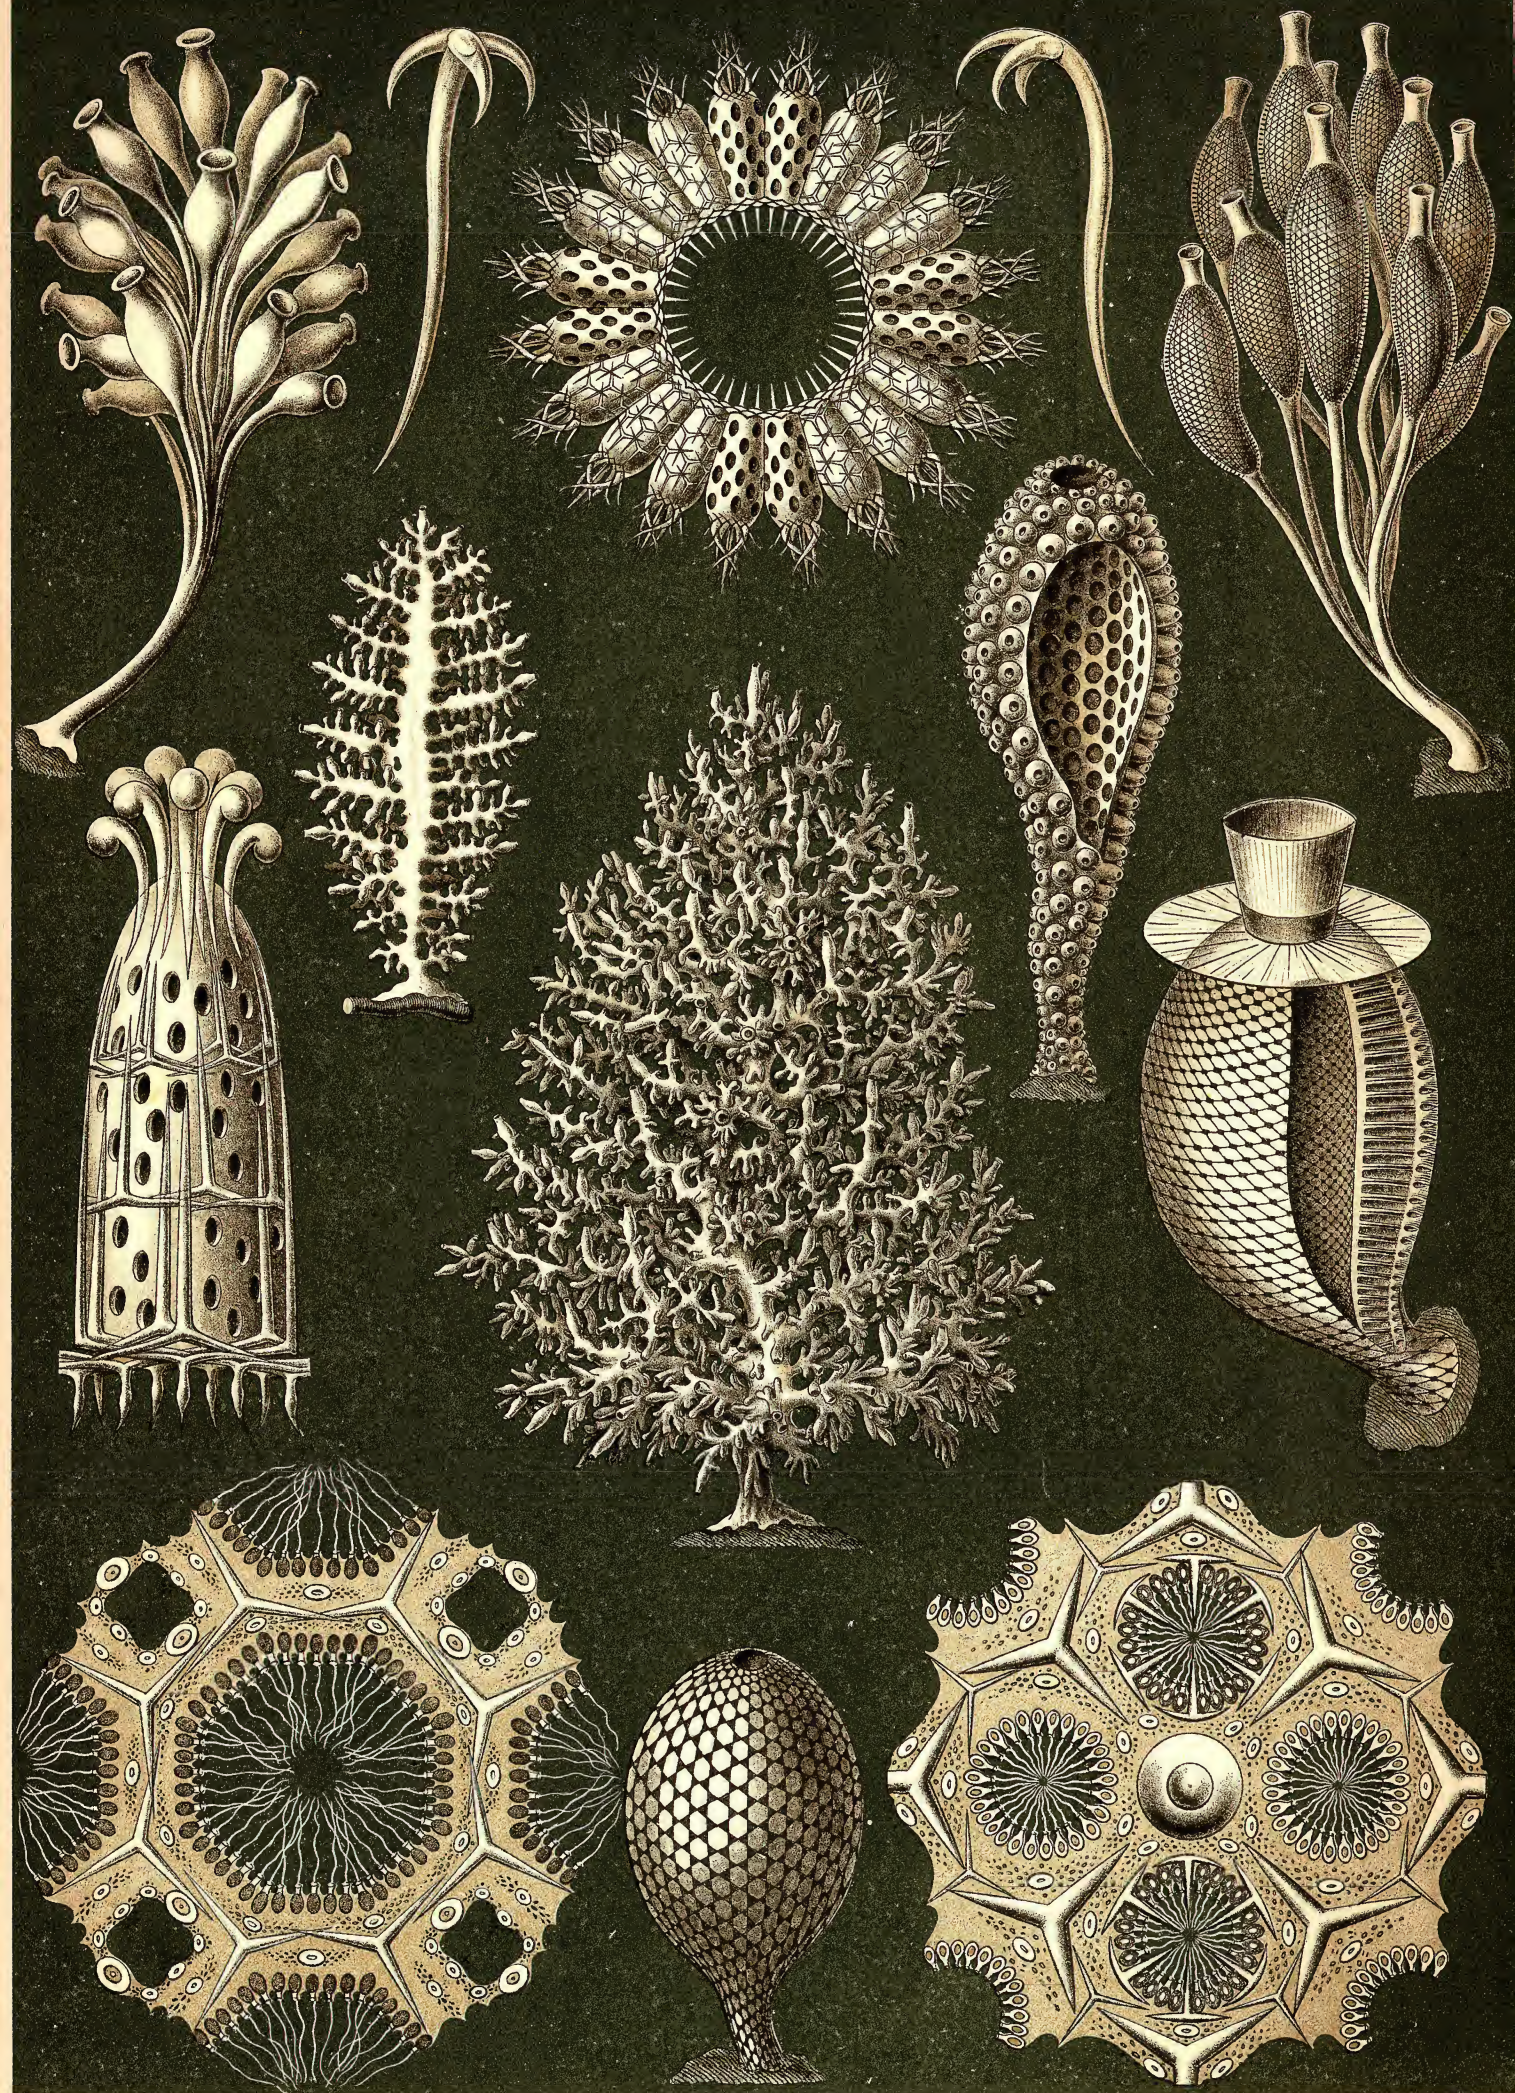

Thalamophora. — Stammerlinge.

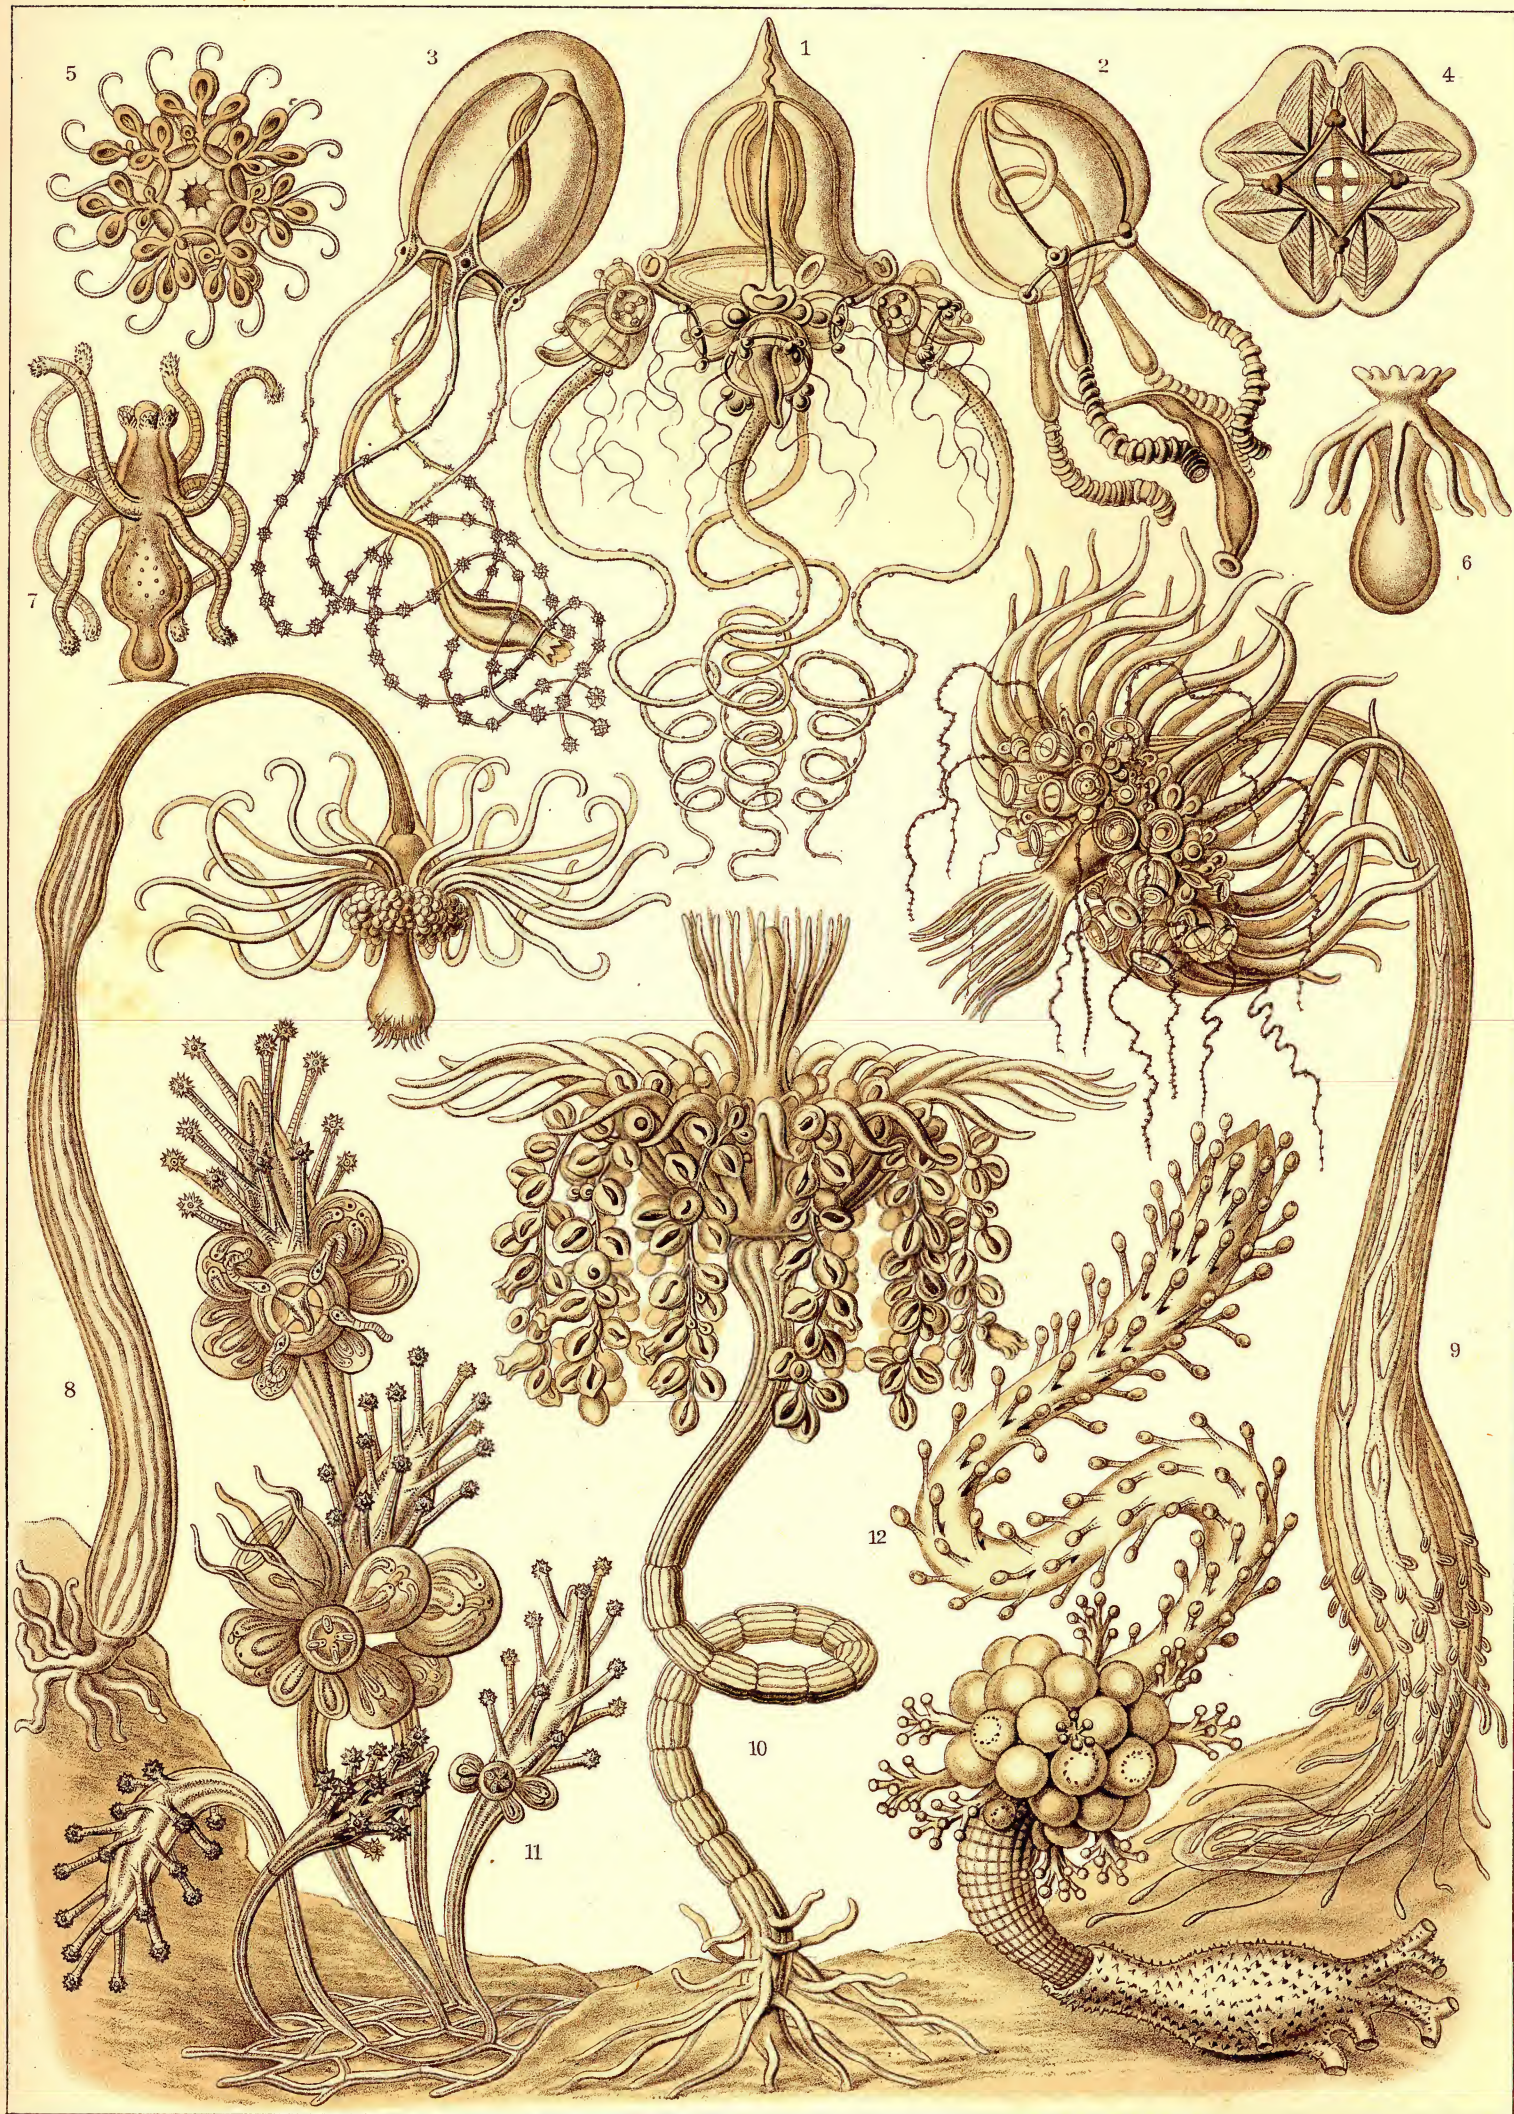

Ciliata. — Wimperlinge.

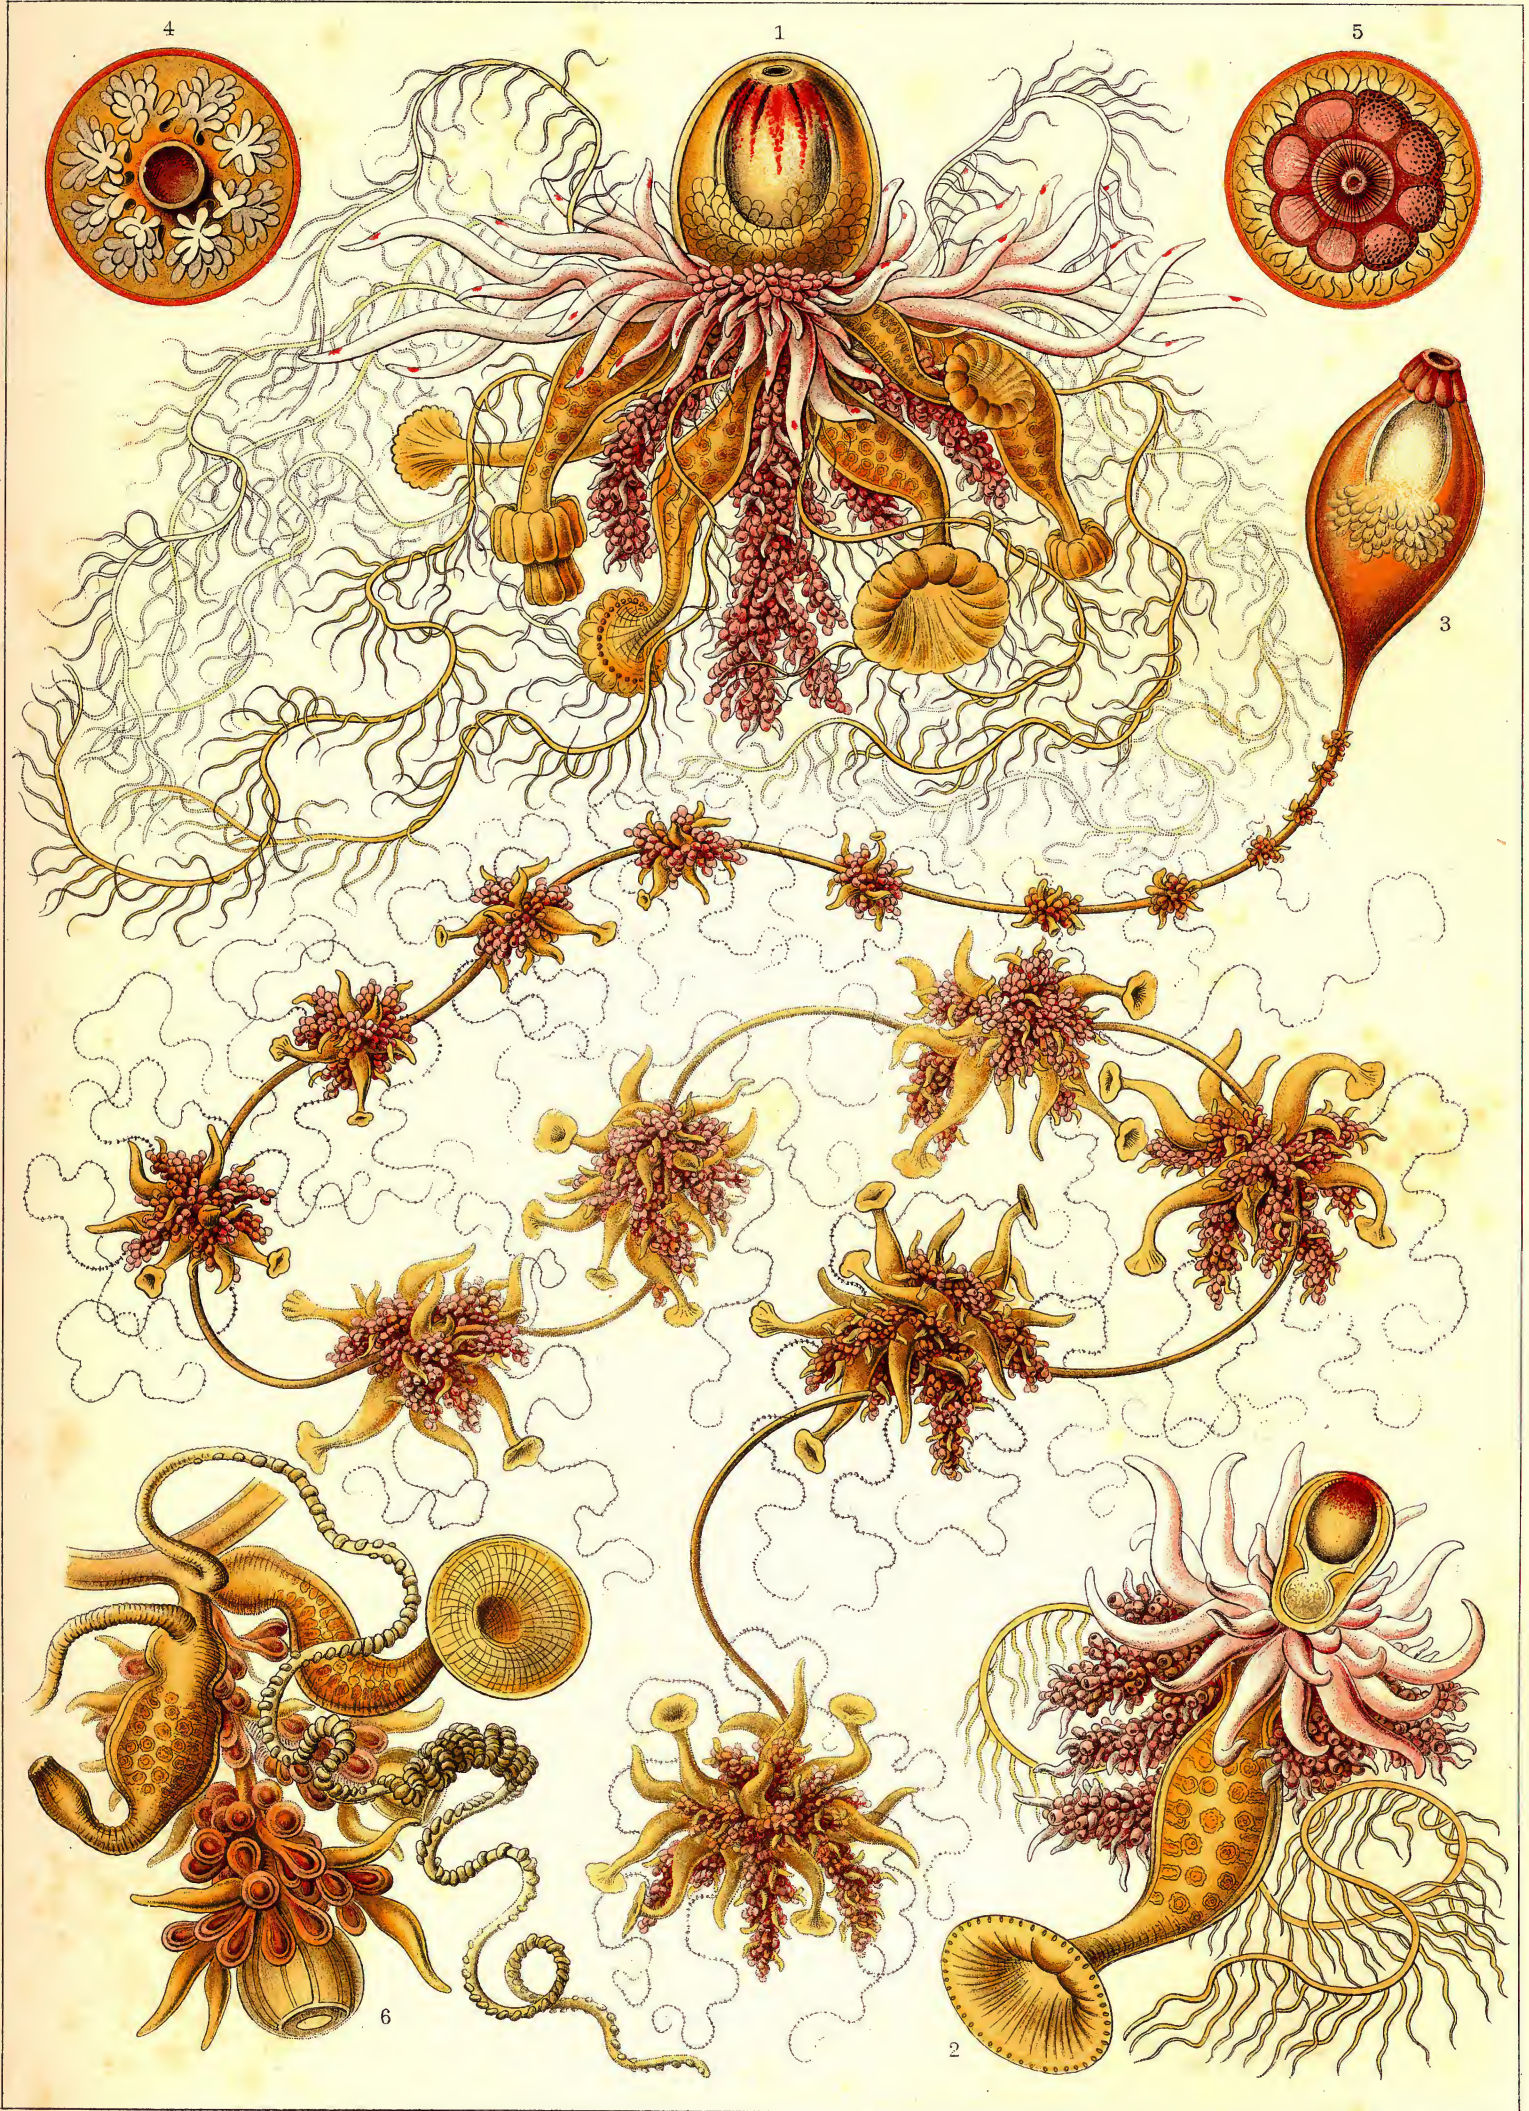

Diatomea. — Schachtellinge.

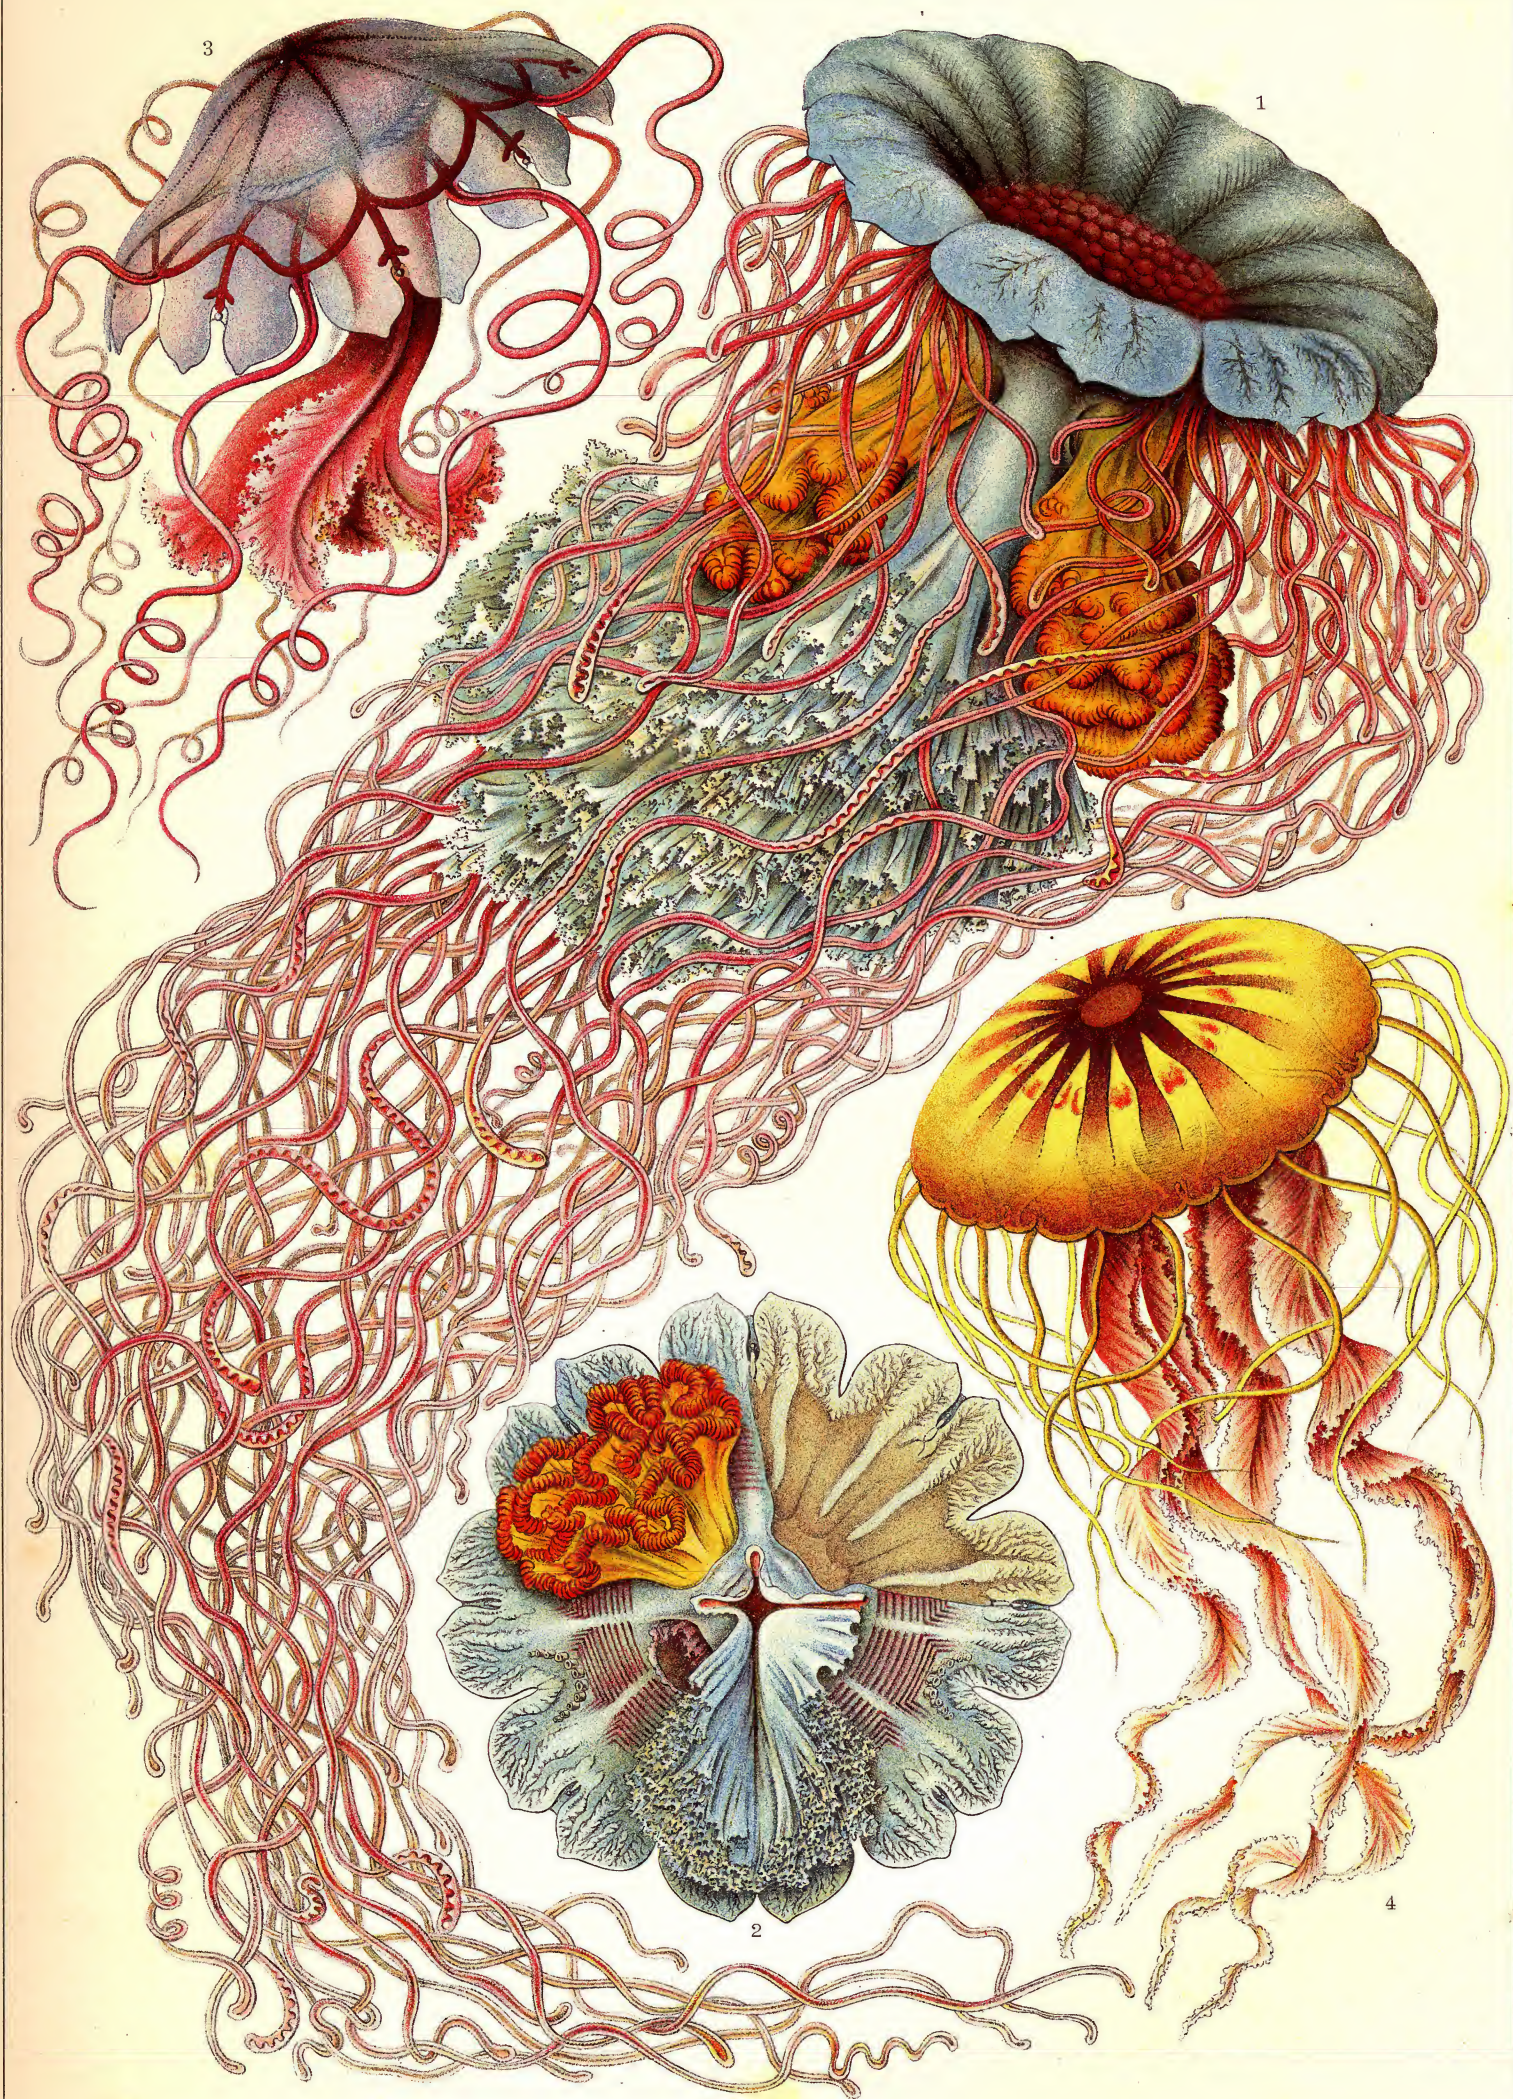

Calcispongiae. — Kalkschwämme.

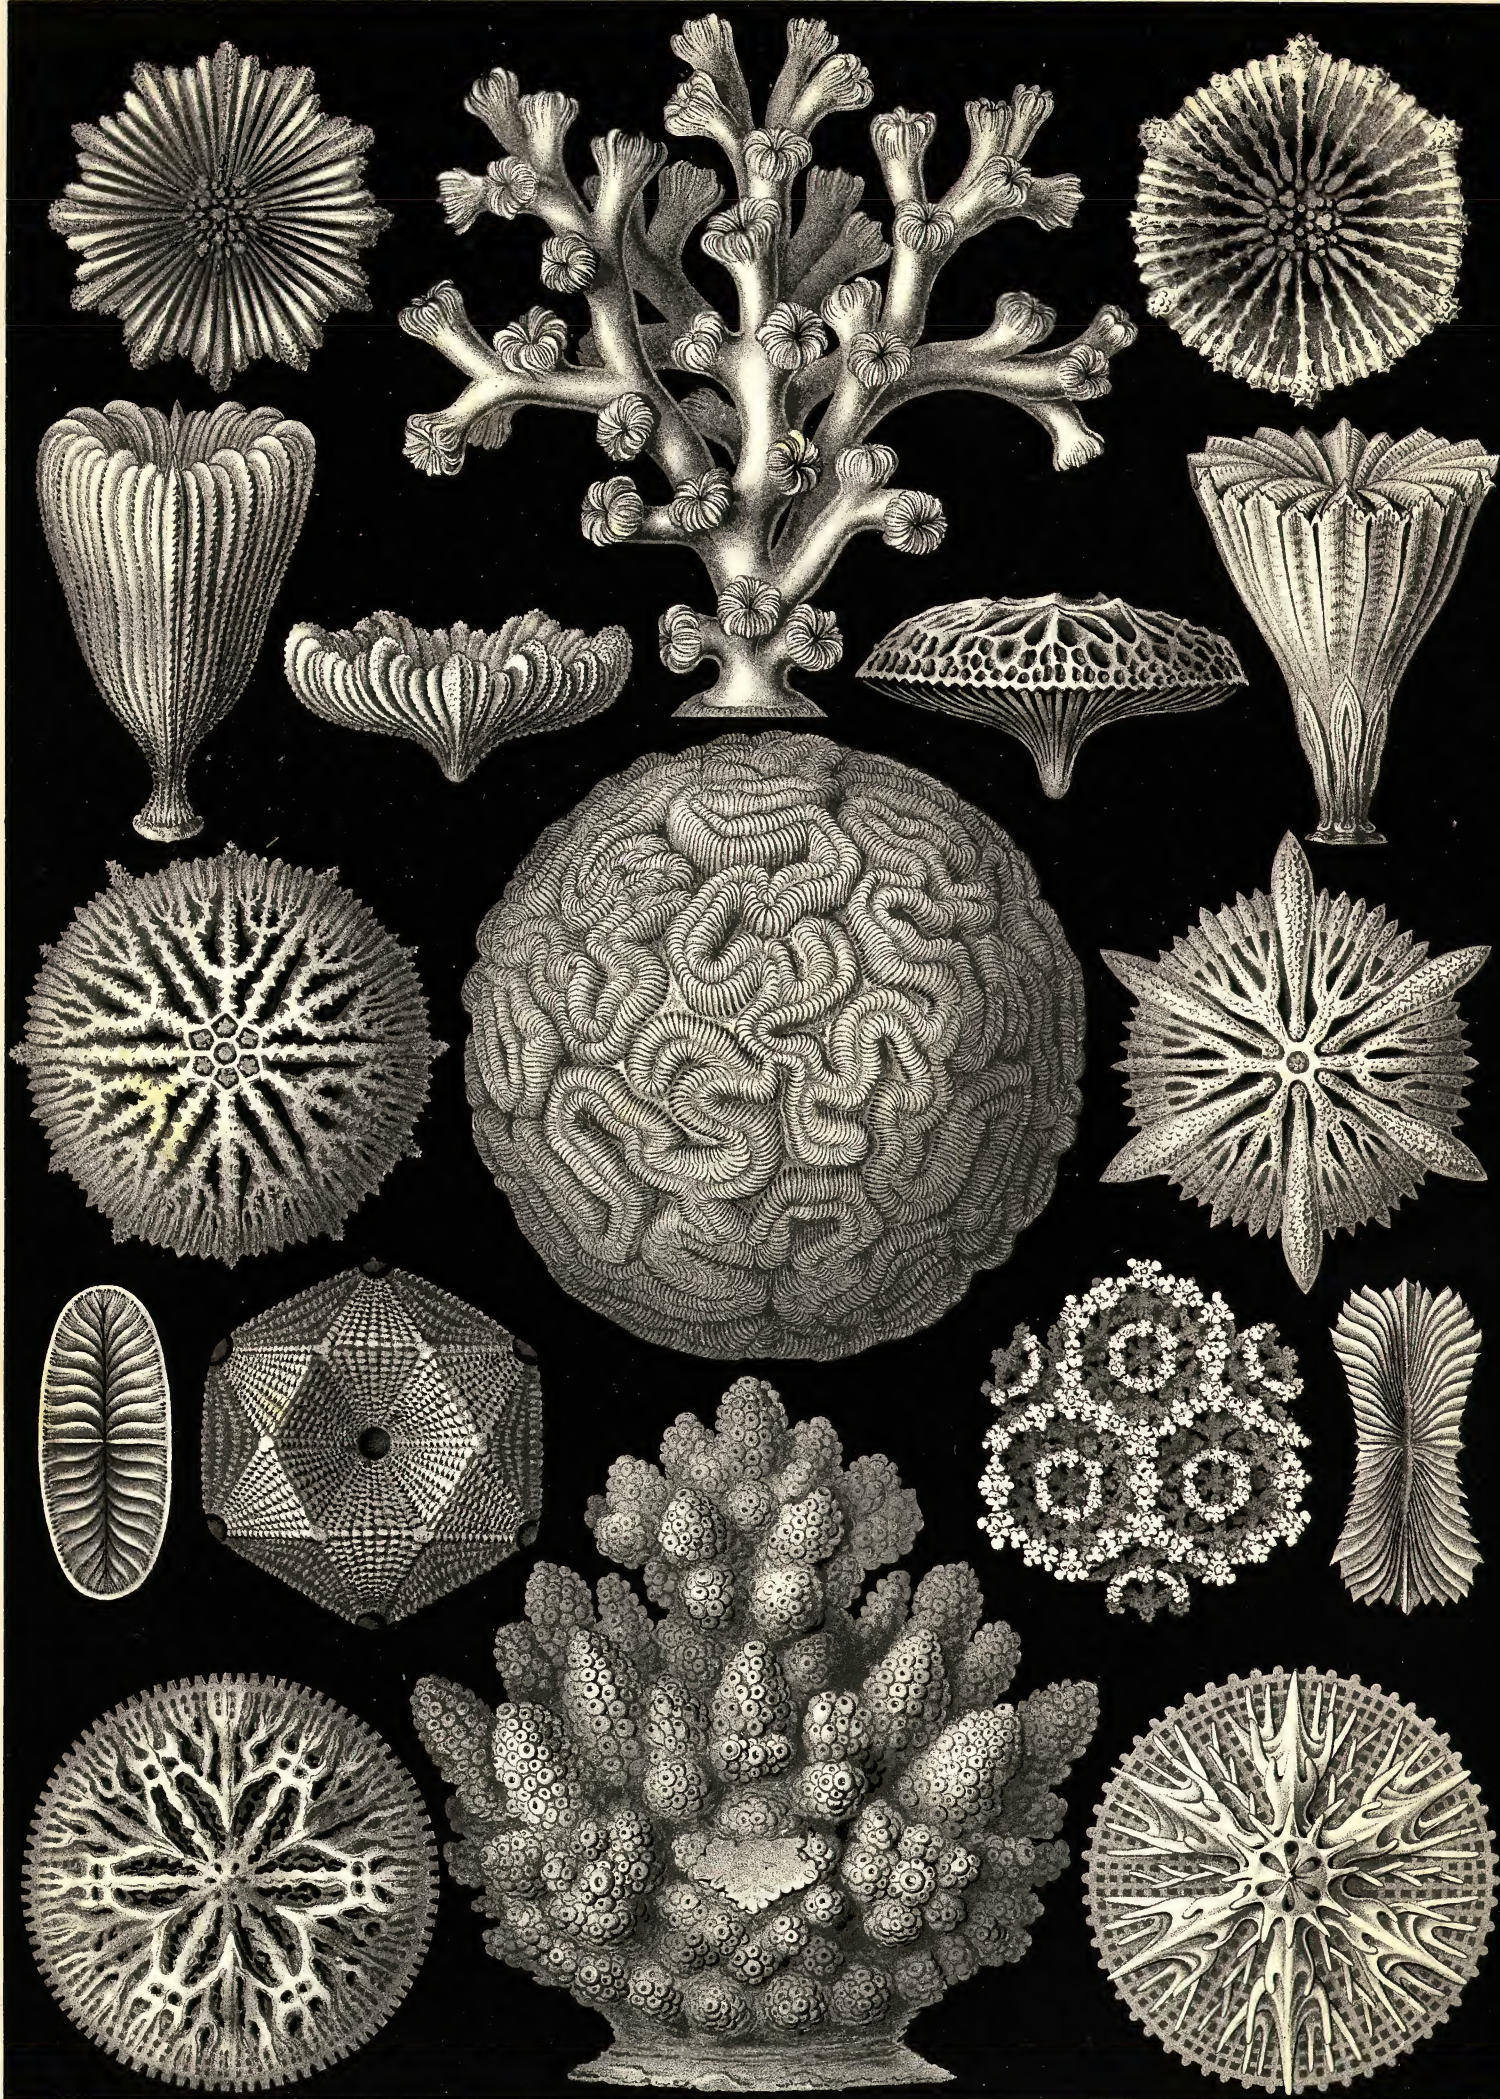

Tubulariae. — Röhrenpolypen.

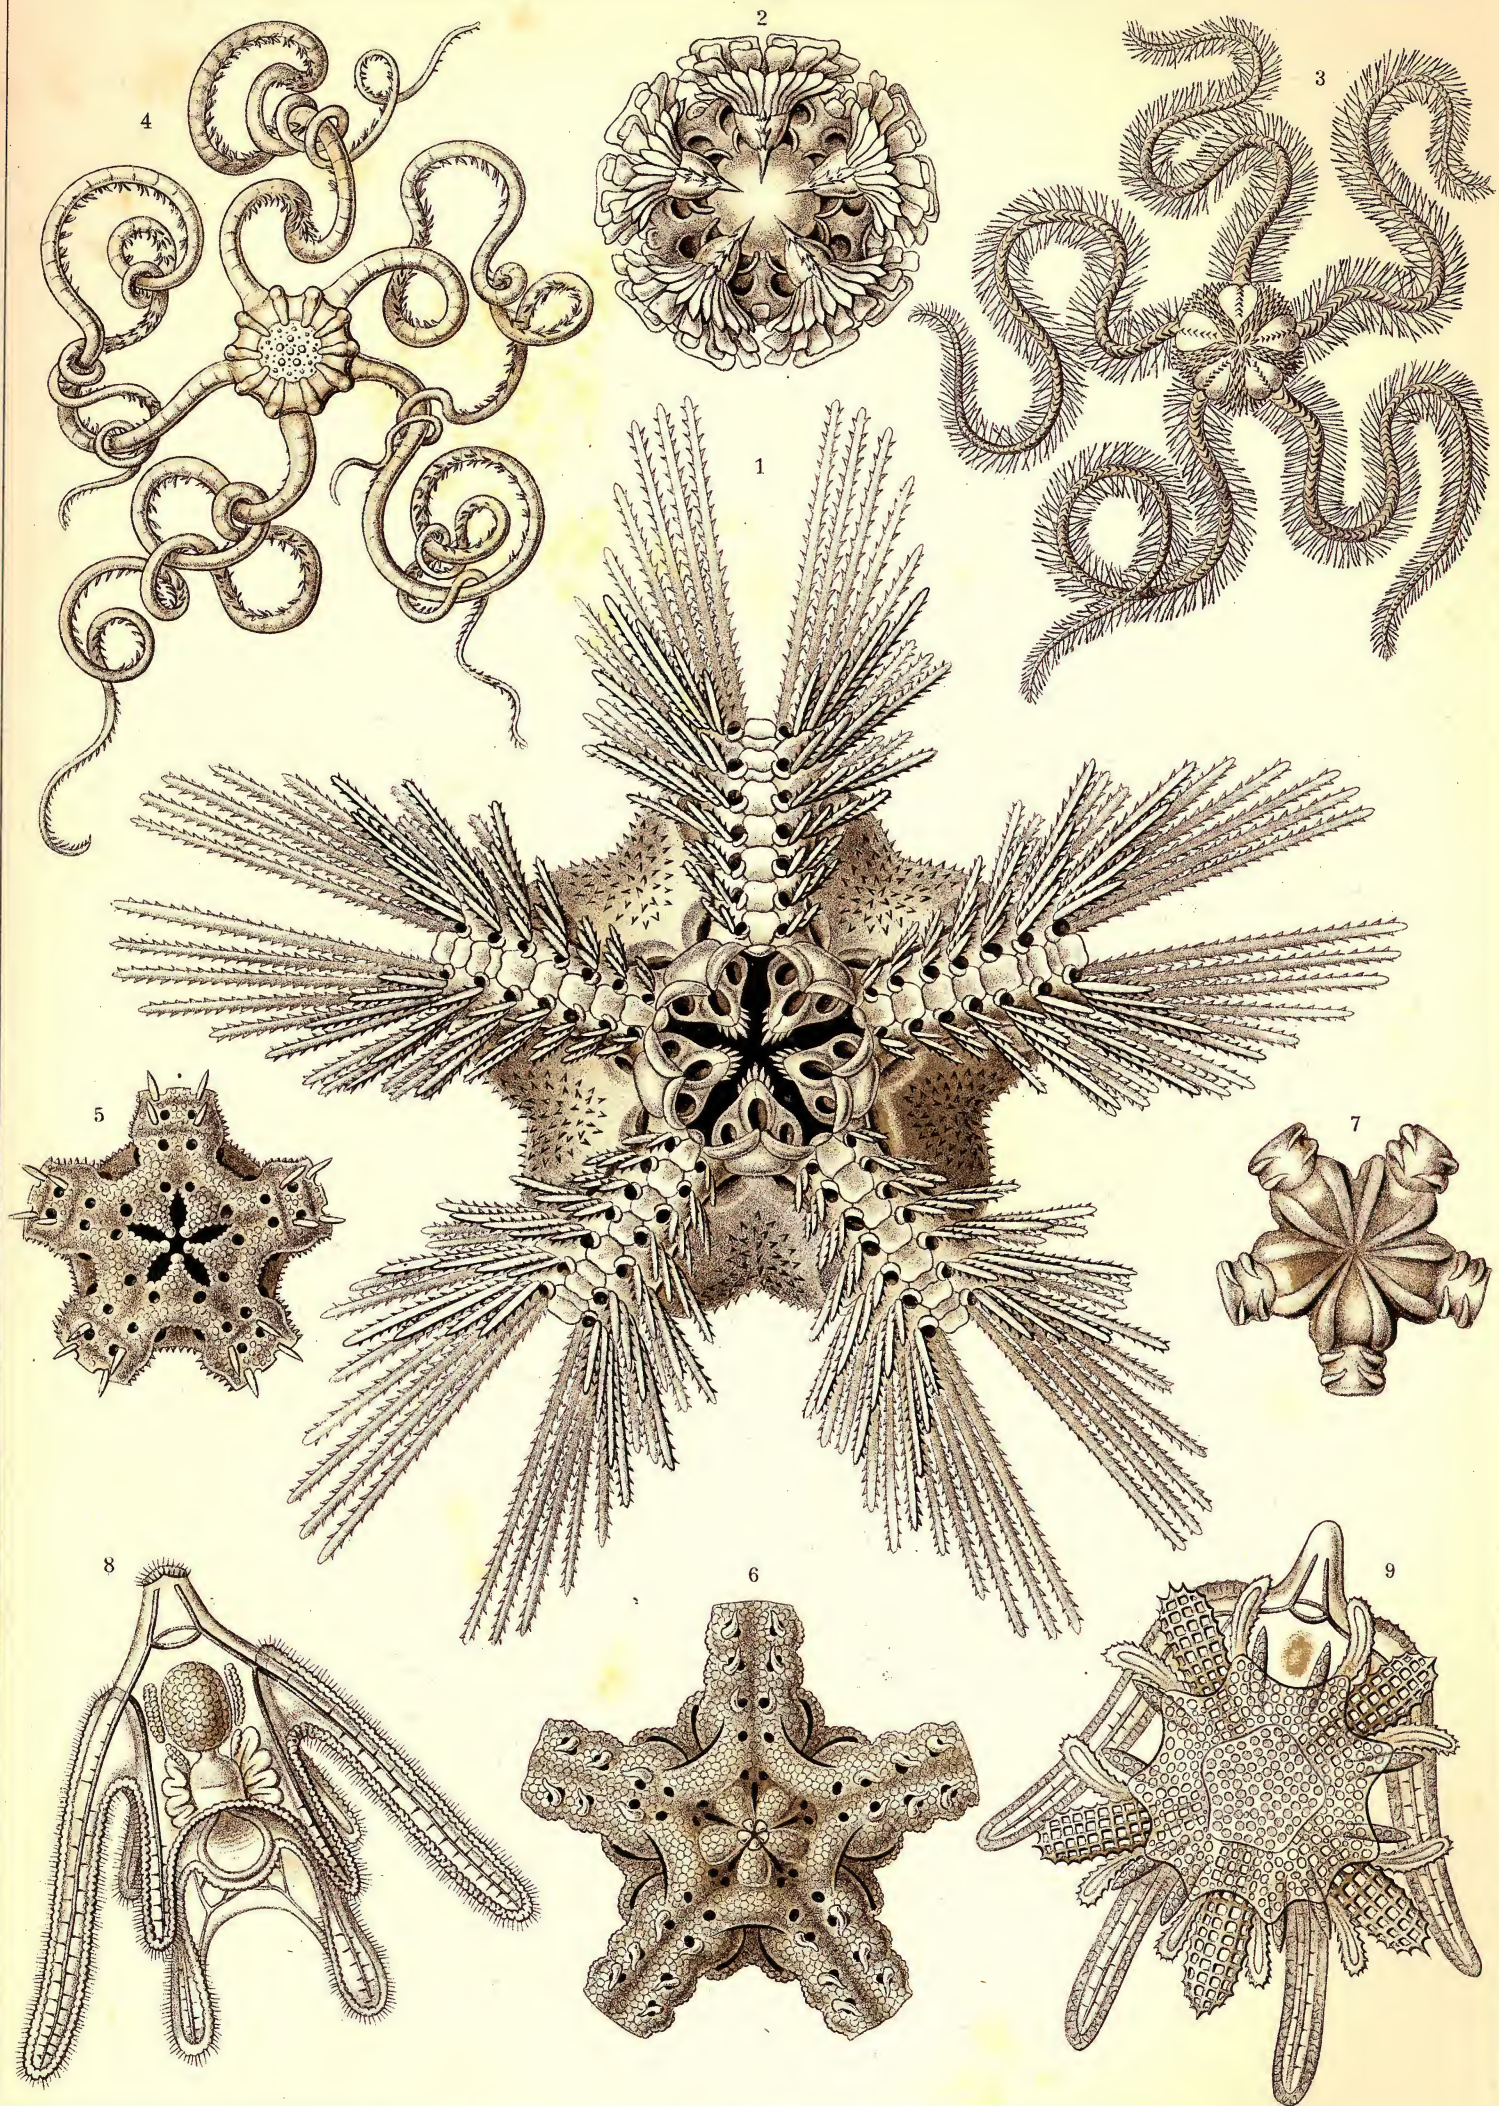

Siphonophorae. — Staatsquallen.

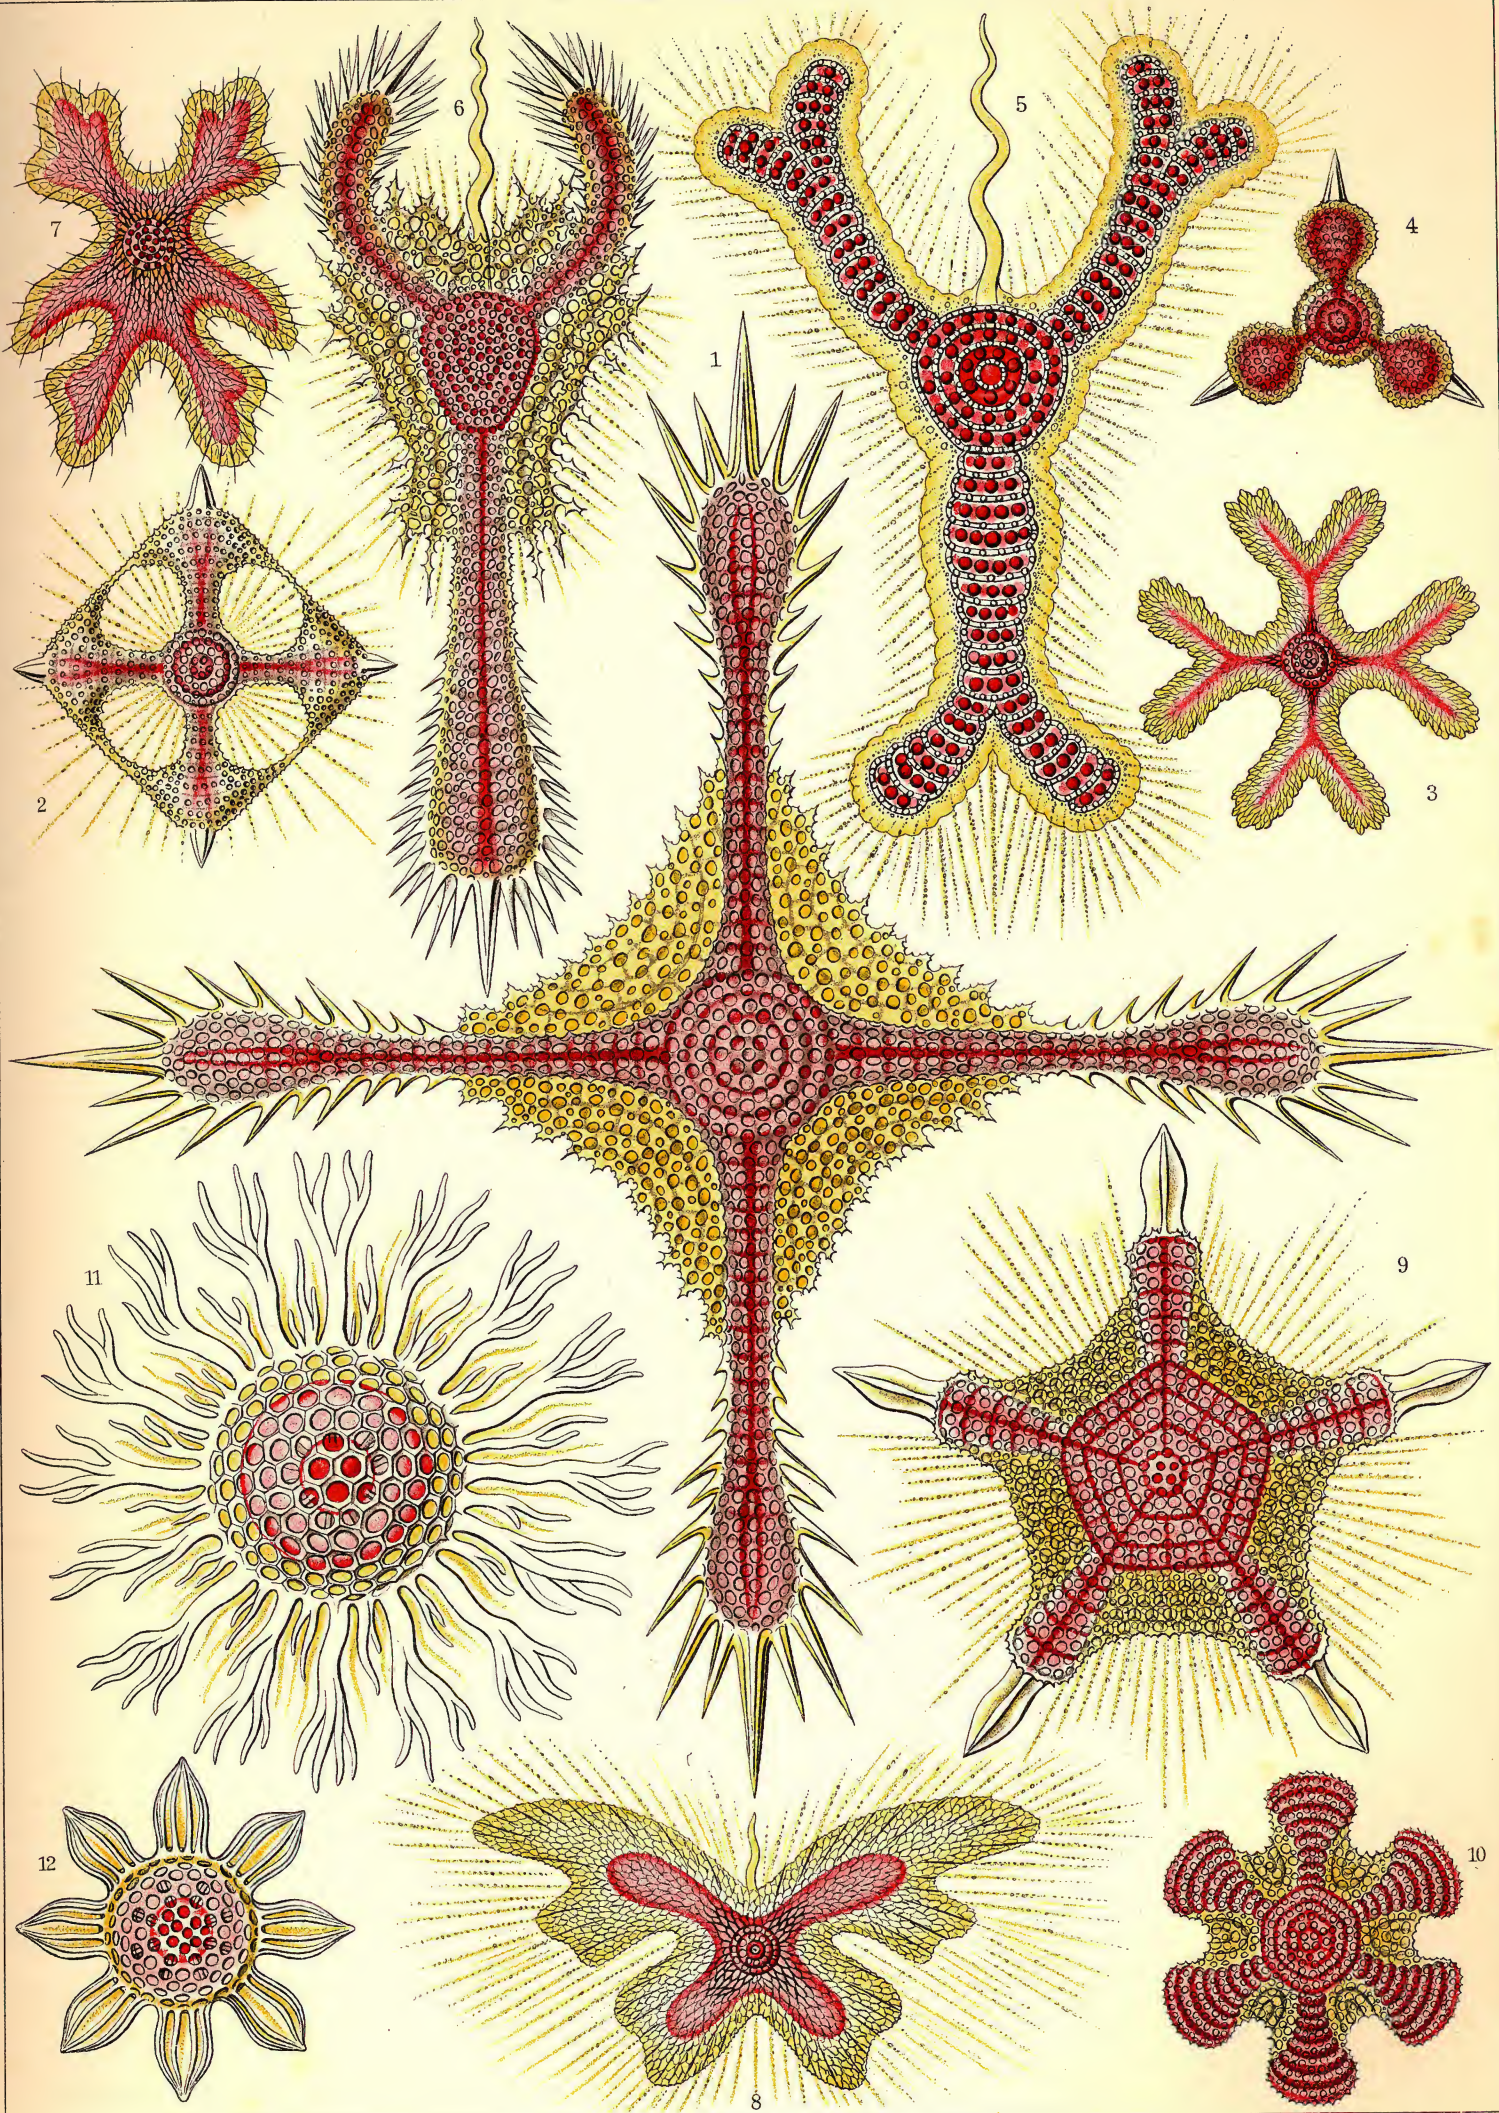

Discomedusae. — Scheibenquallen.

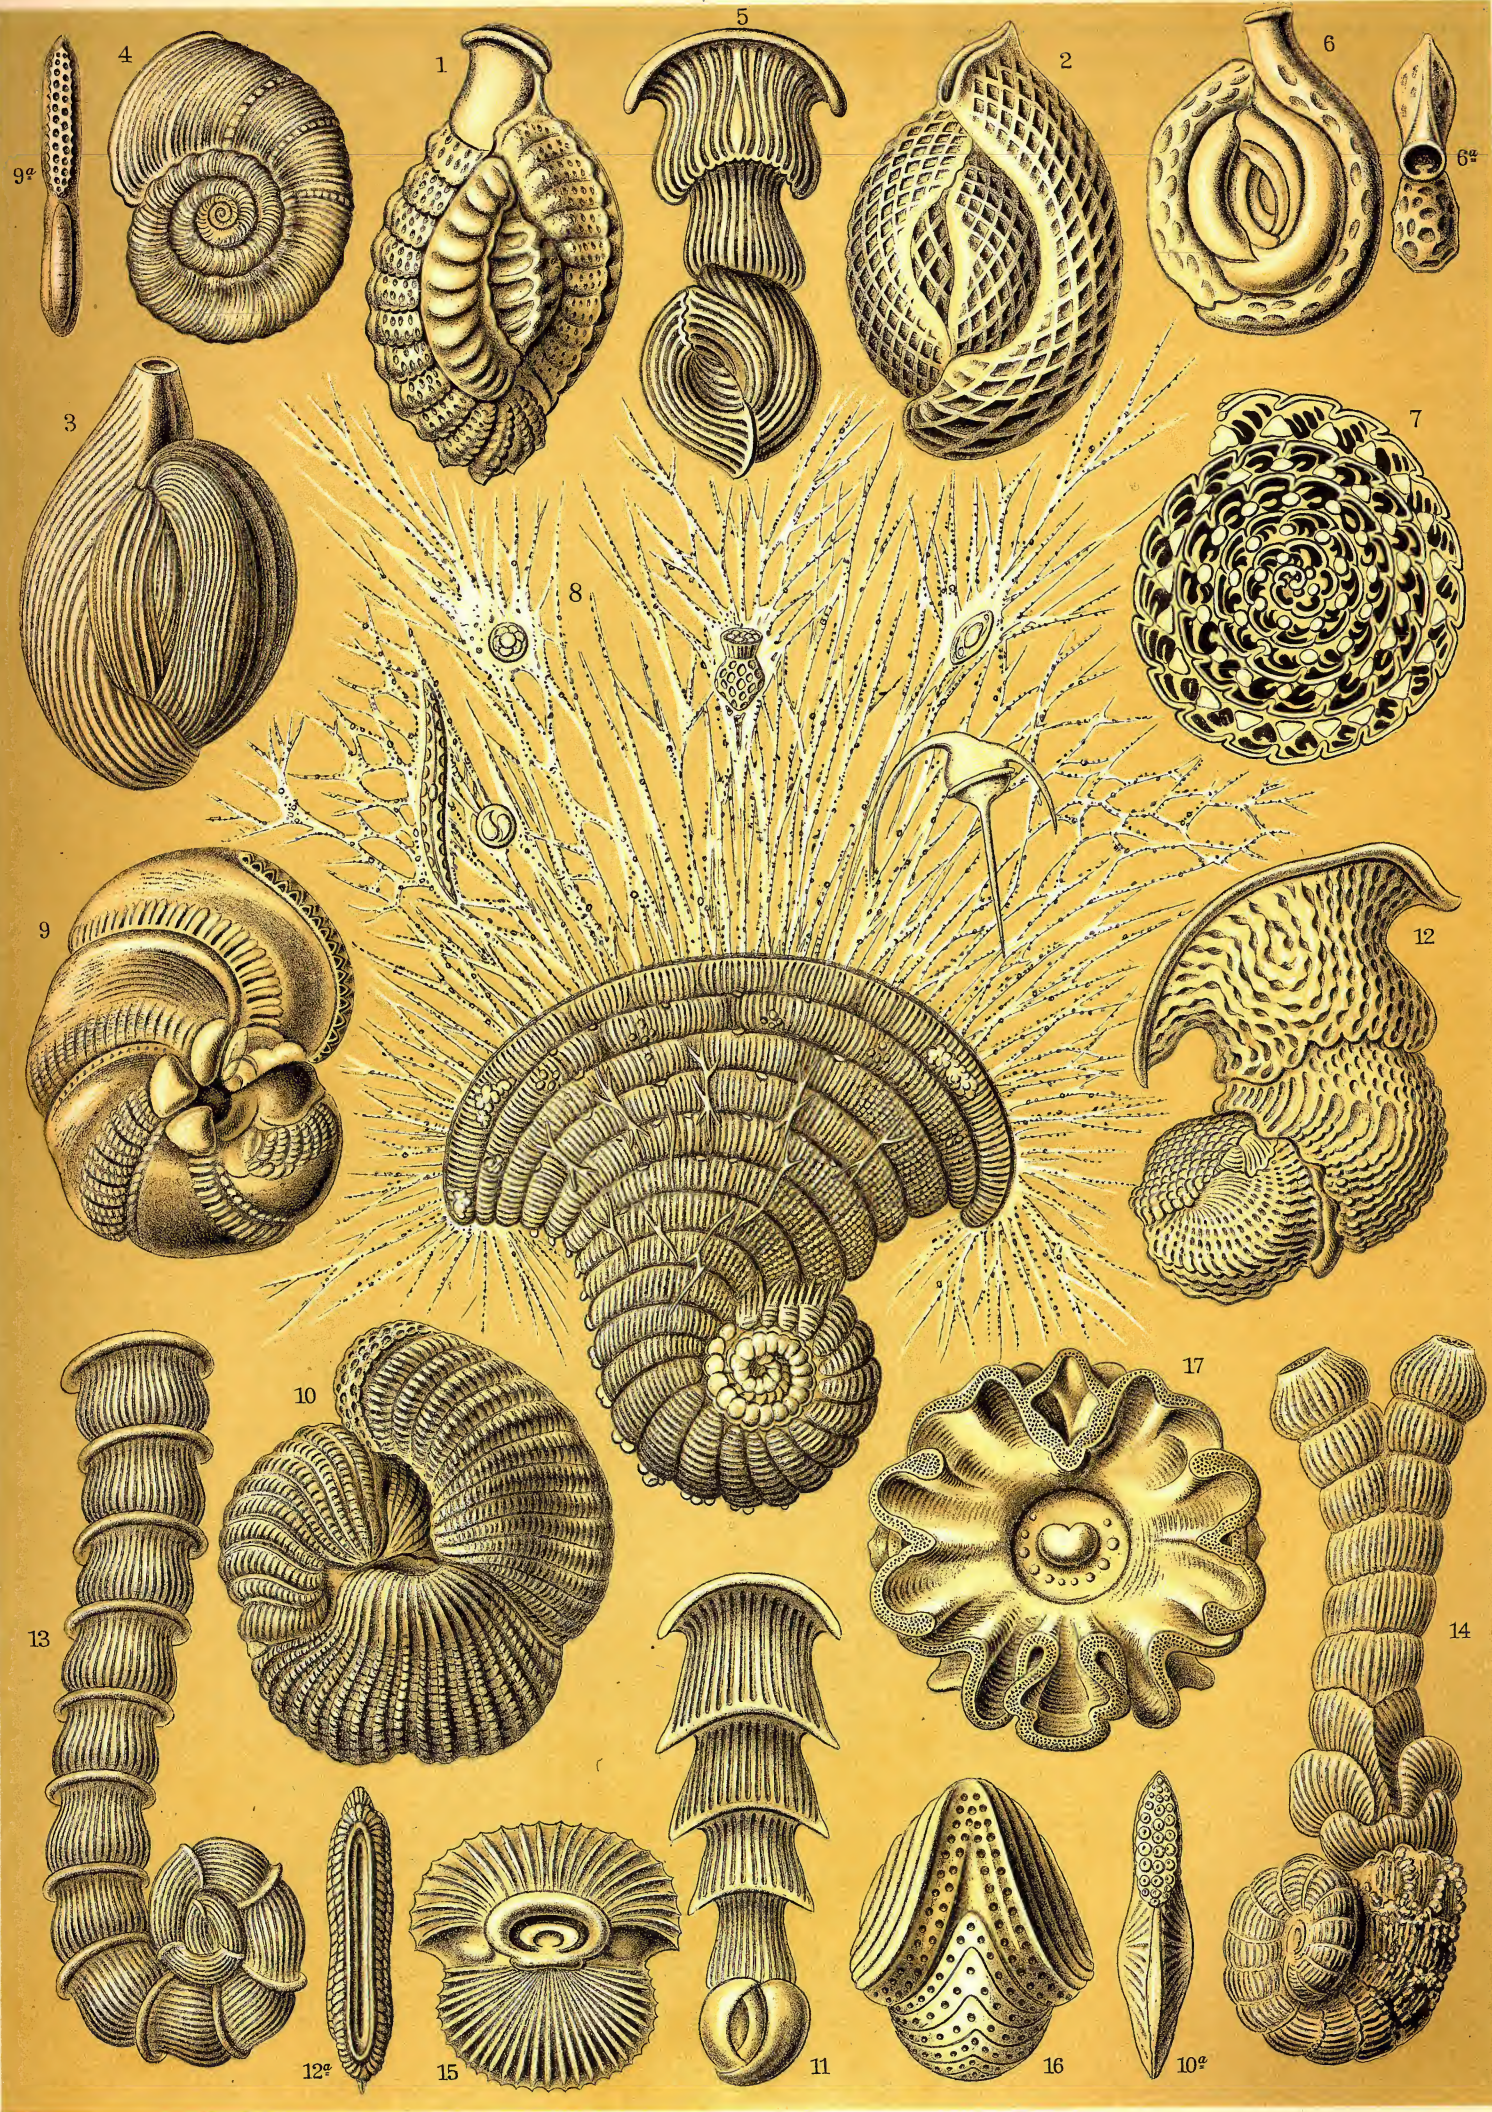

Hexacoralla. — Sechsstrahlige Sternkorallen.

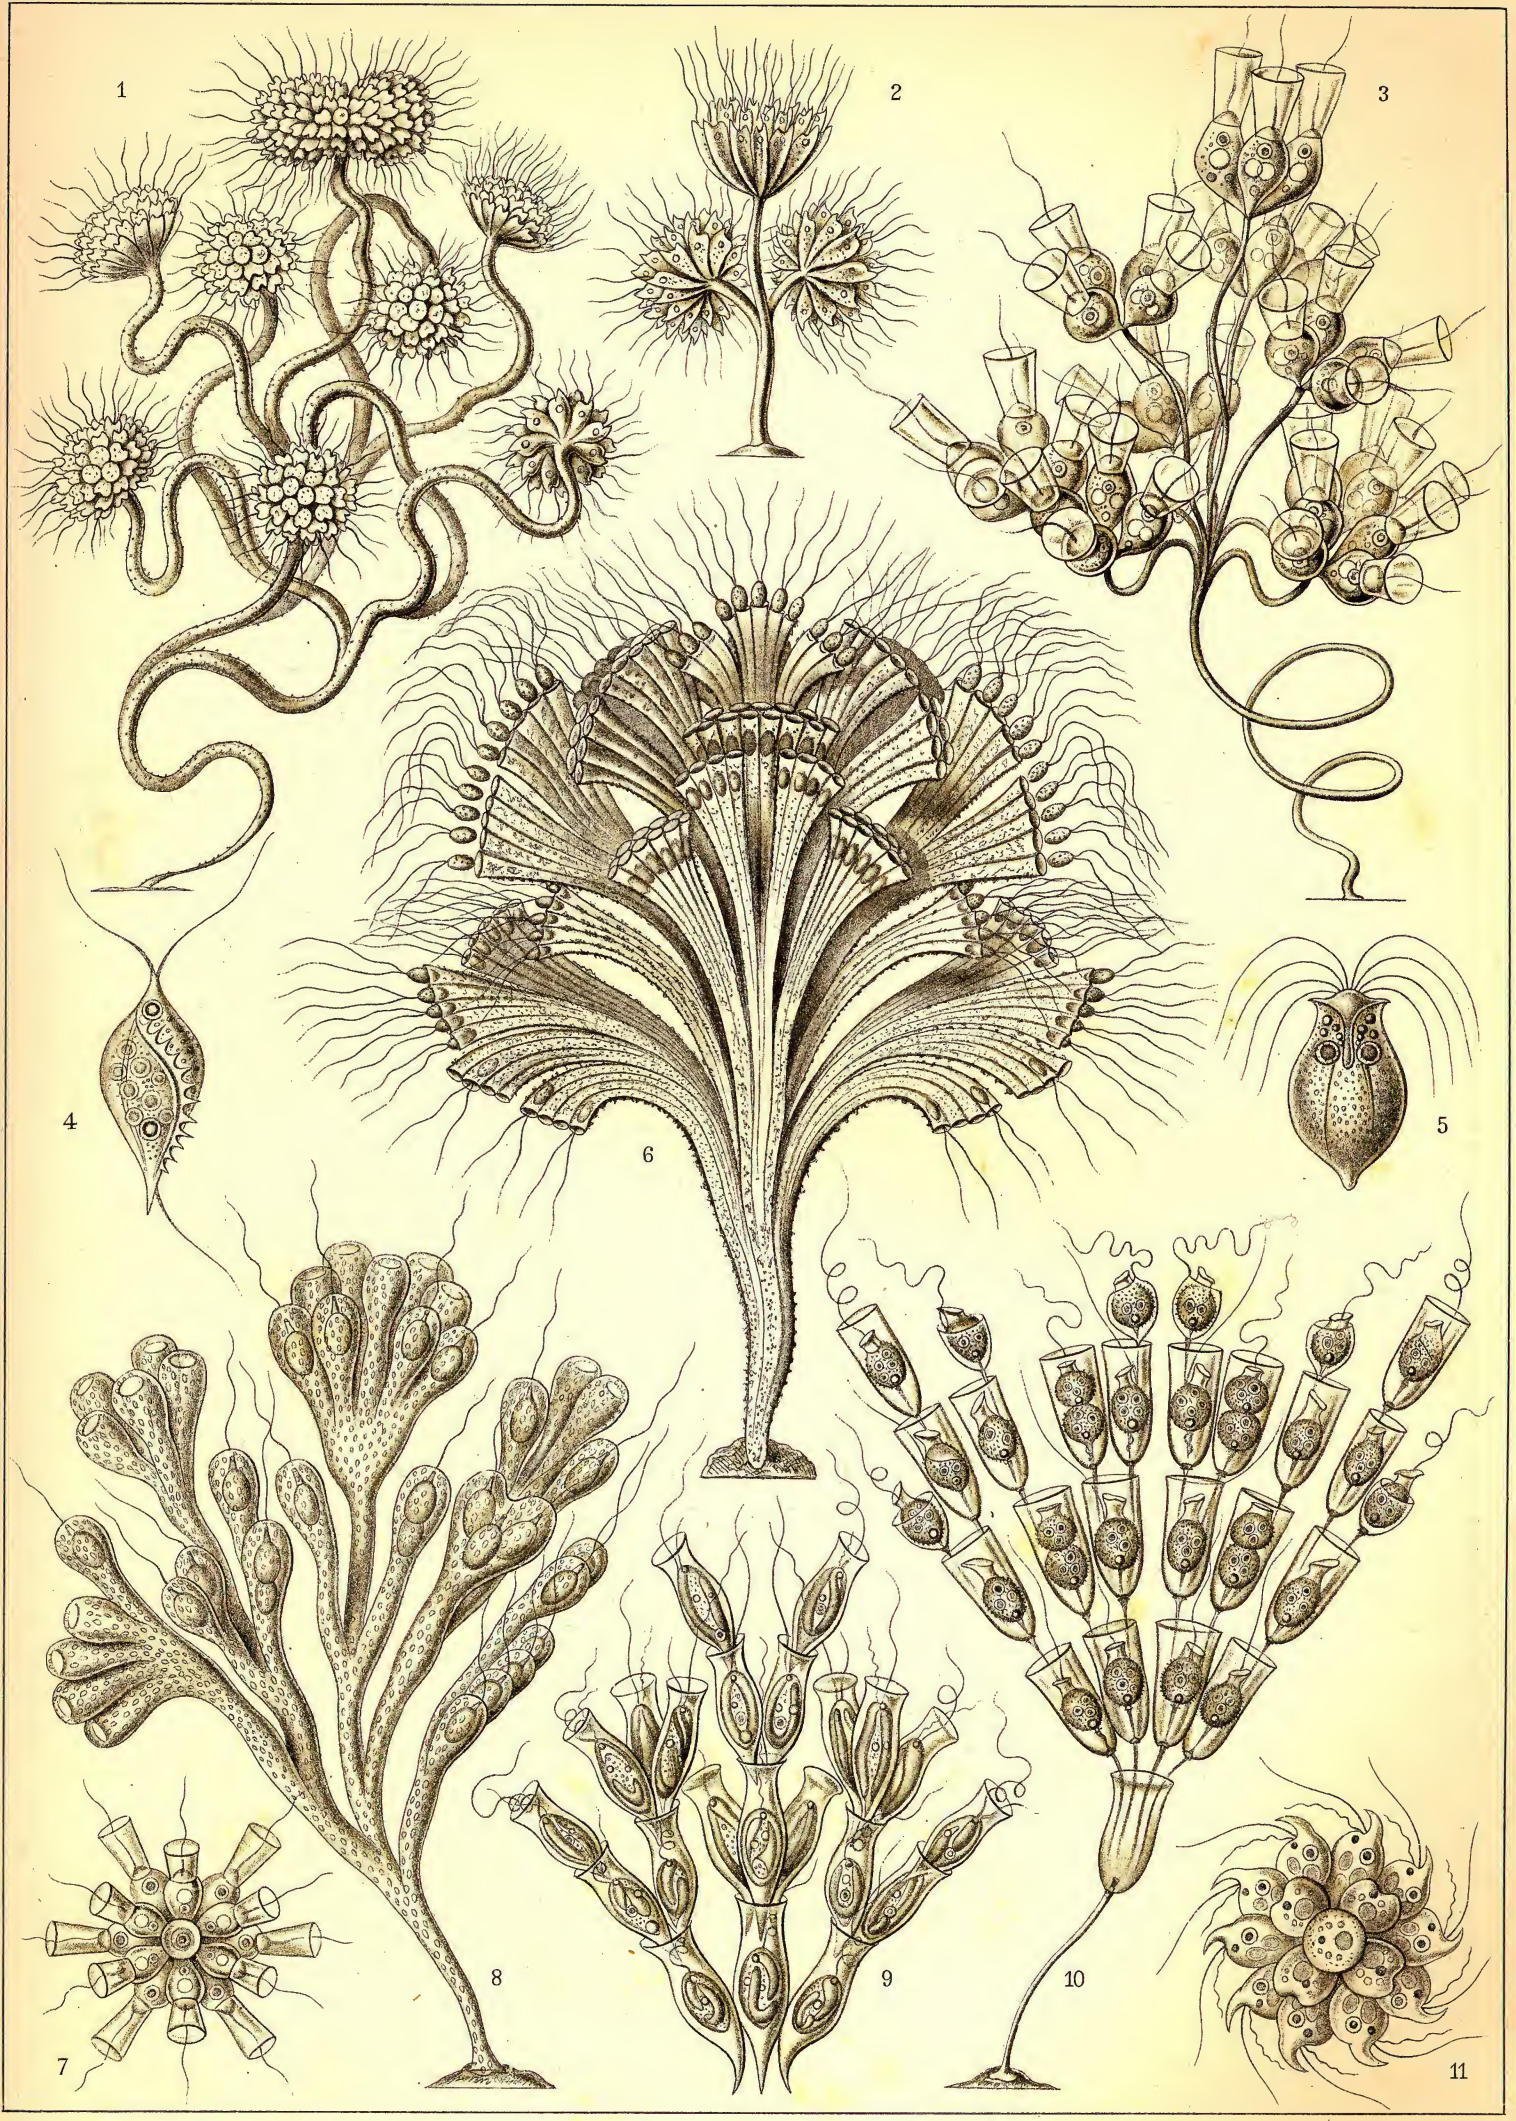

Ophiodea. — Schlangensterne.

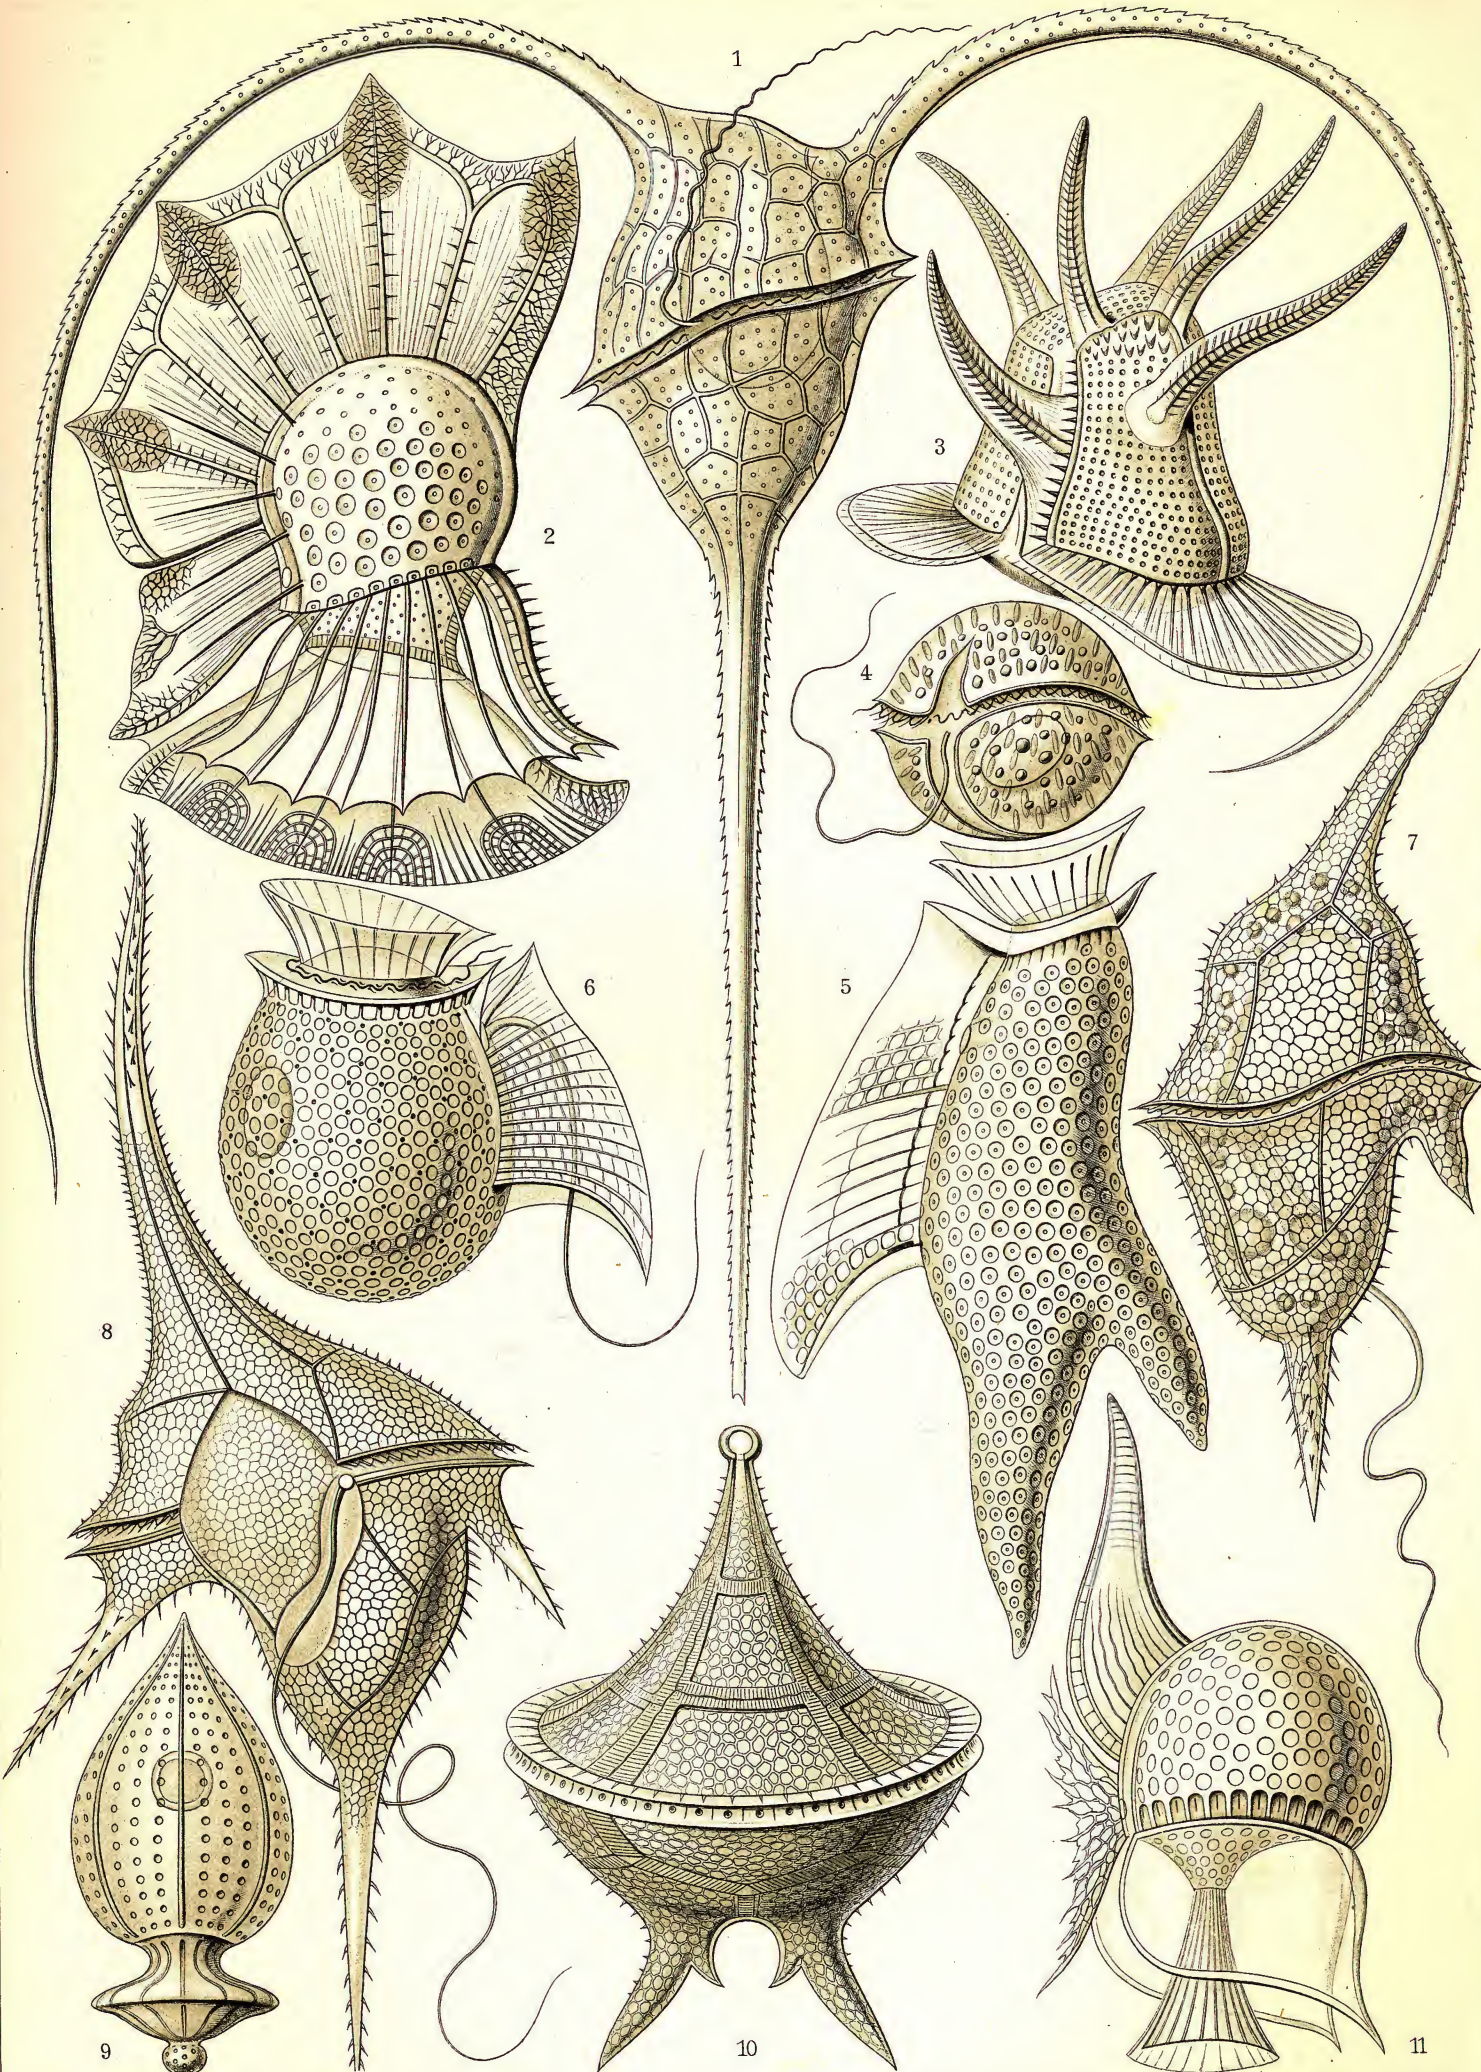

Discoidea. — Scheiben-Strahllinge.

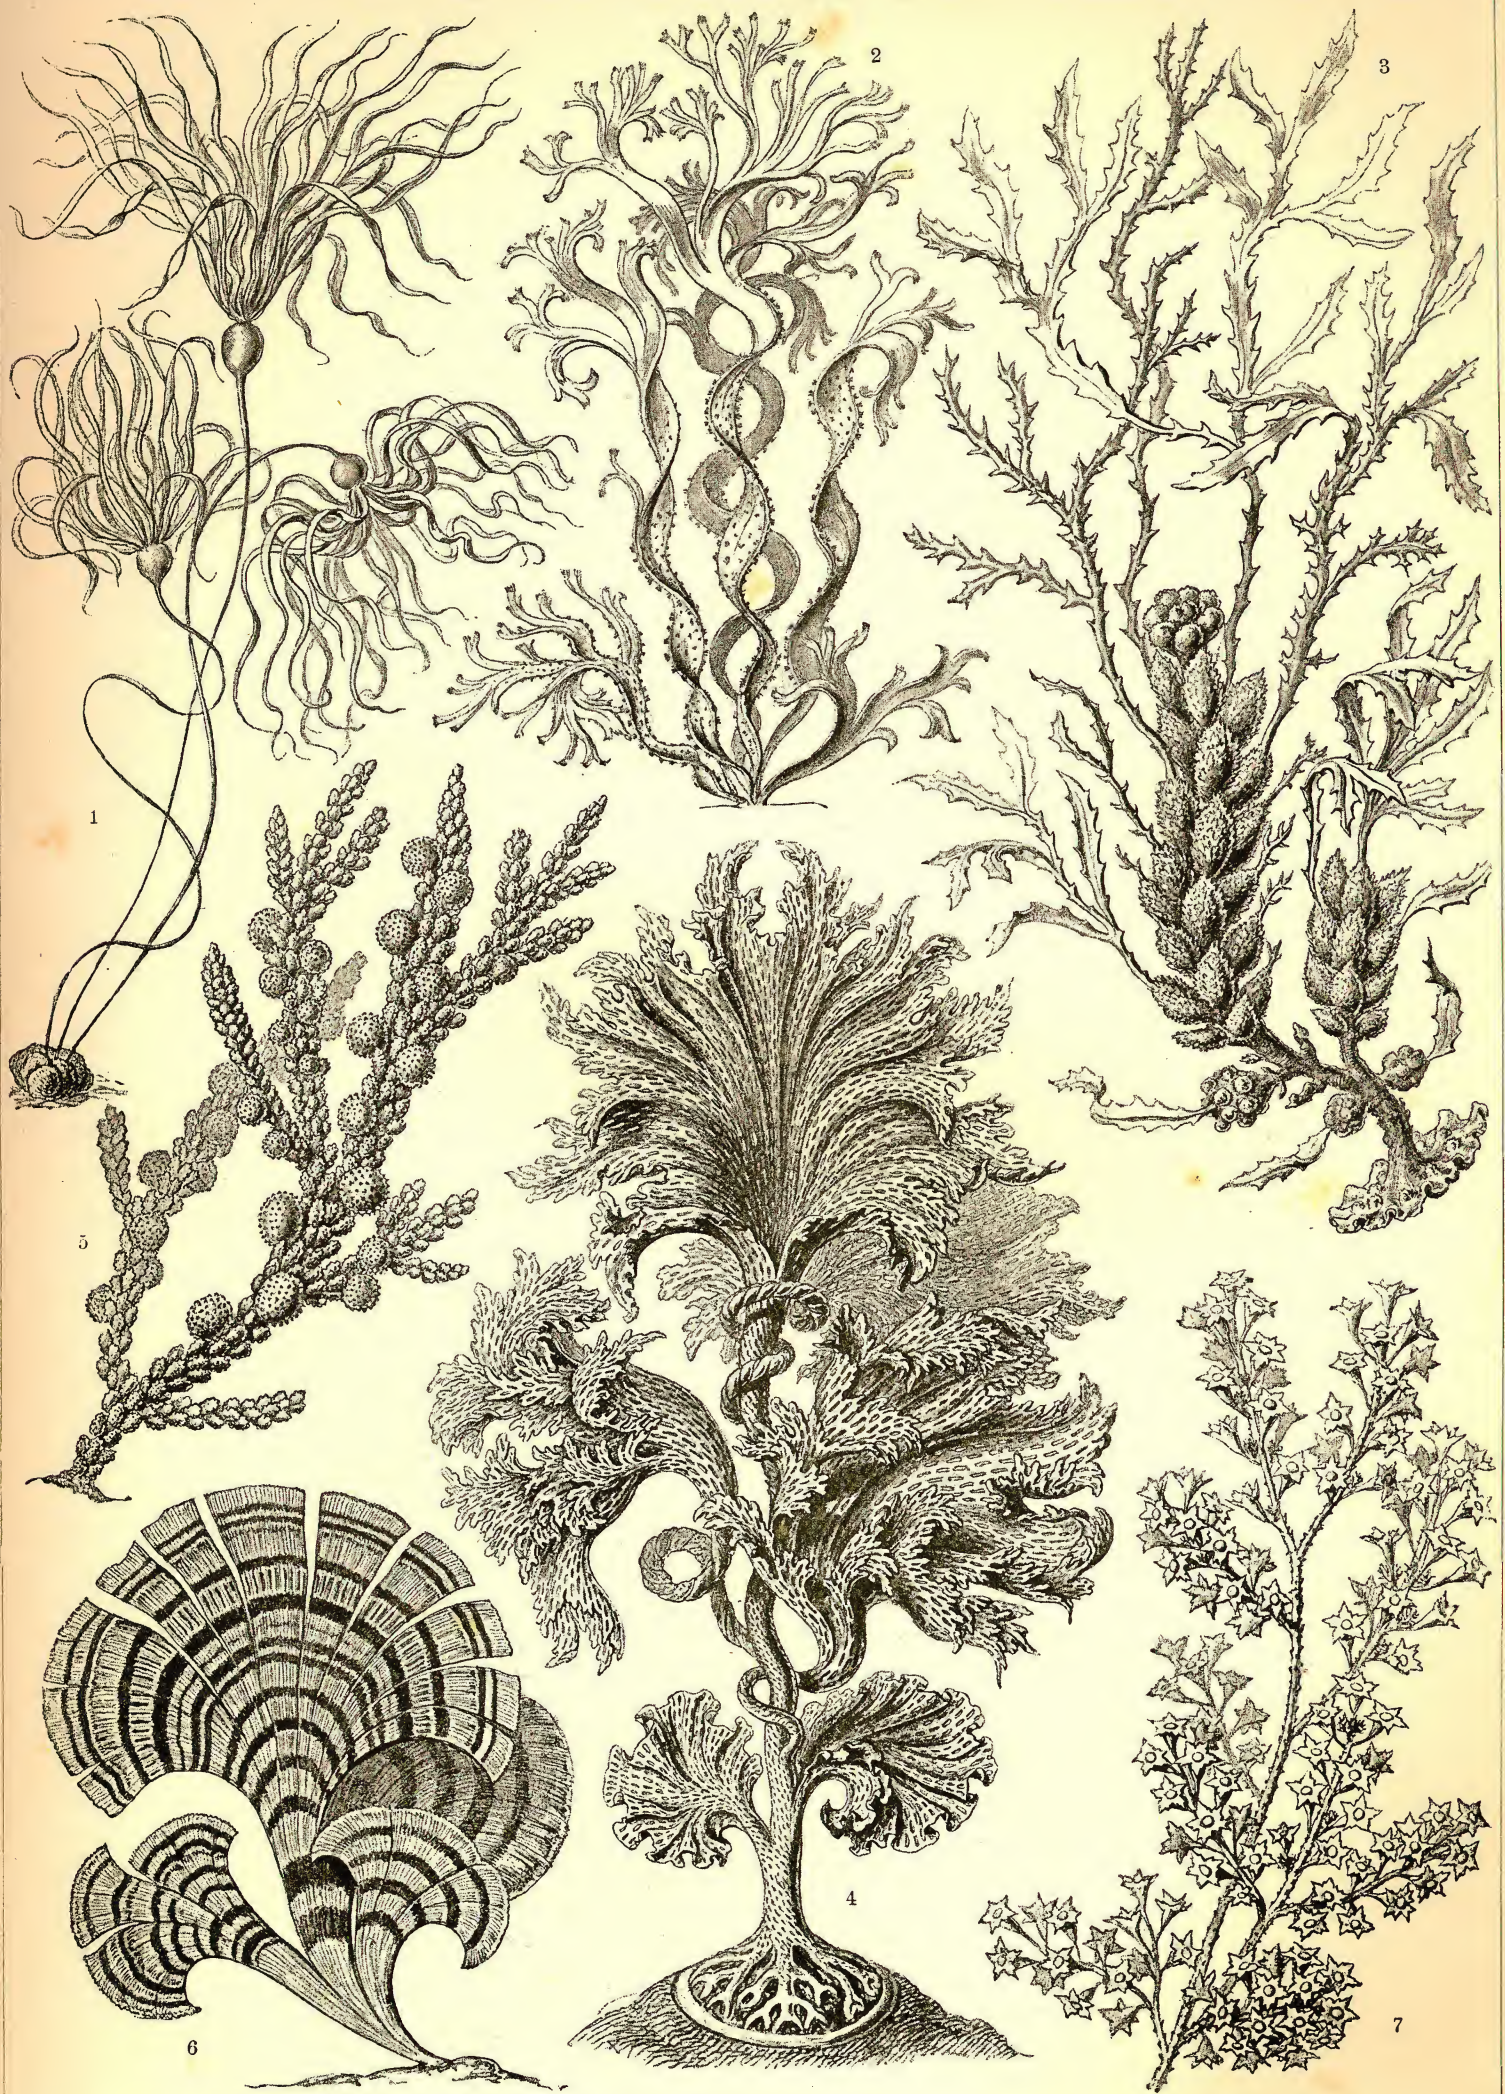

Talamophora. — Kammerlinge.

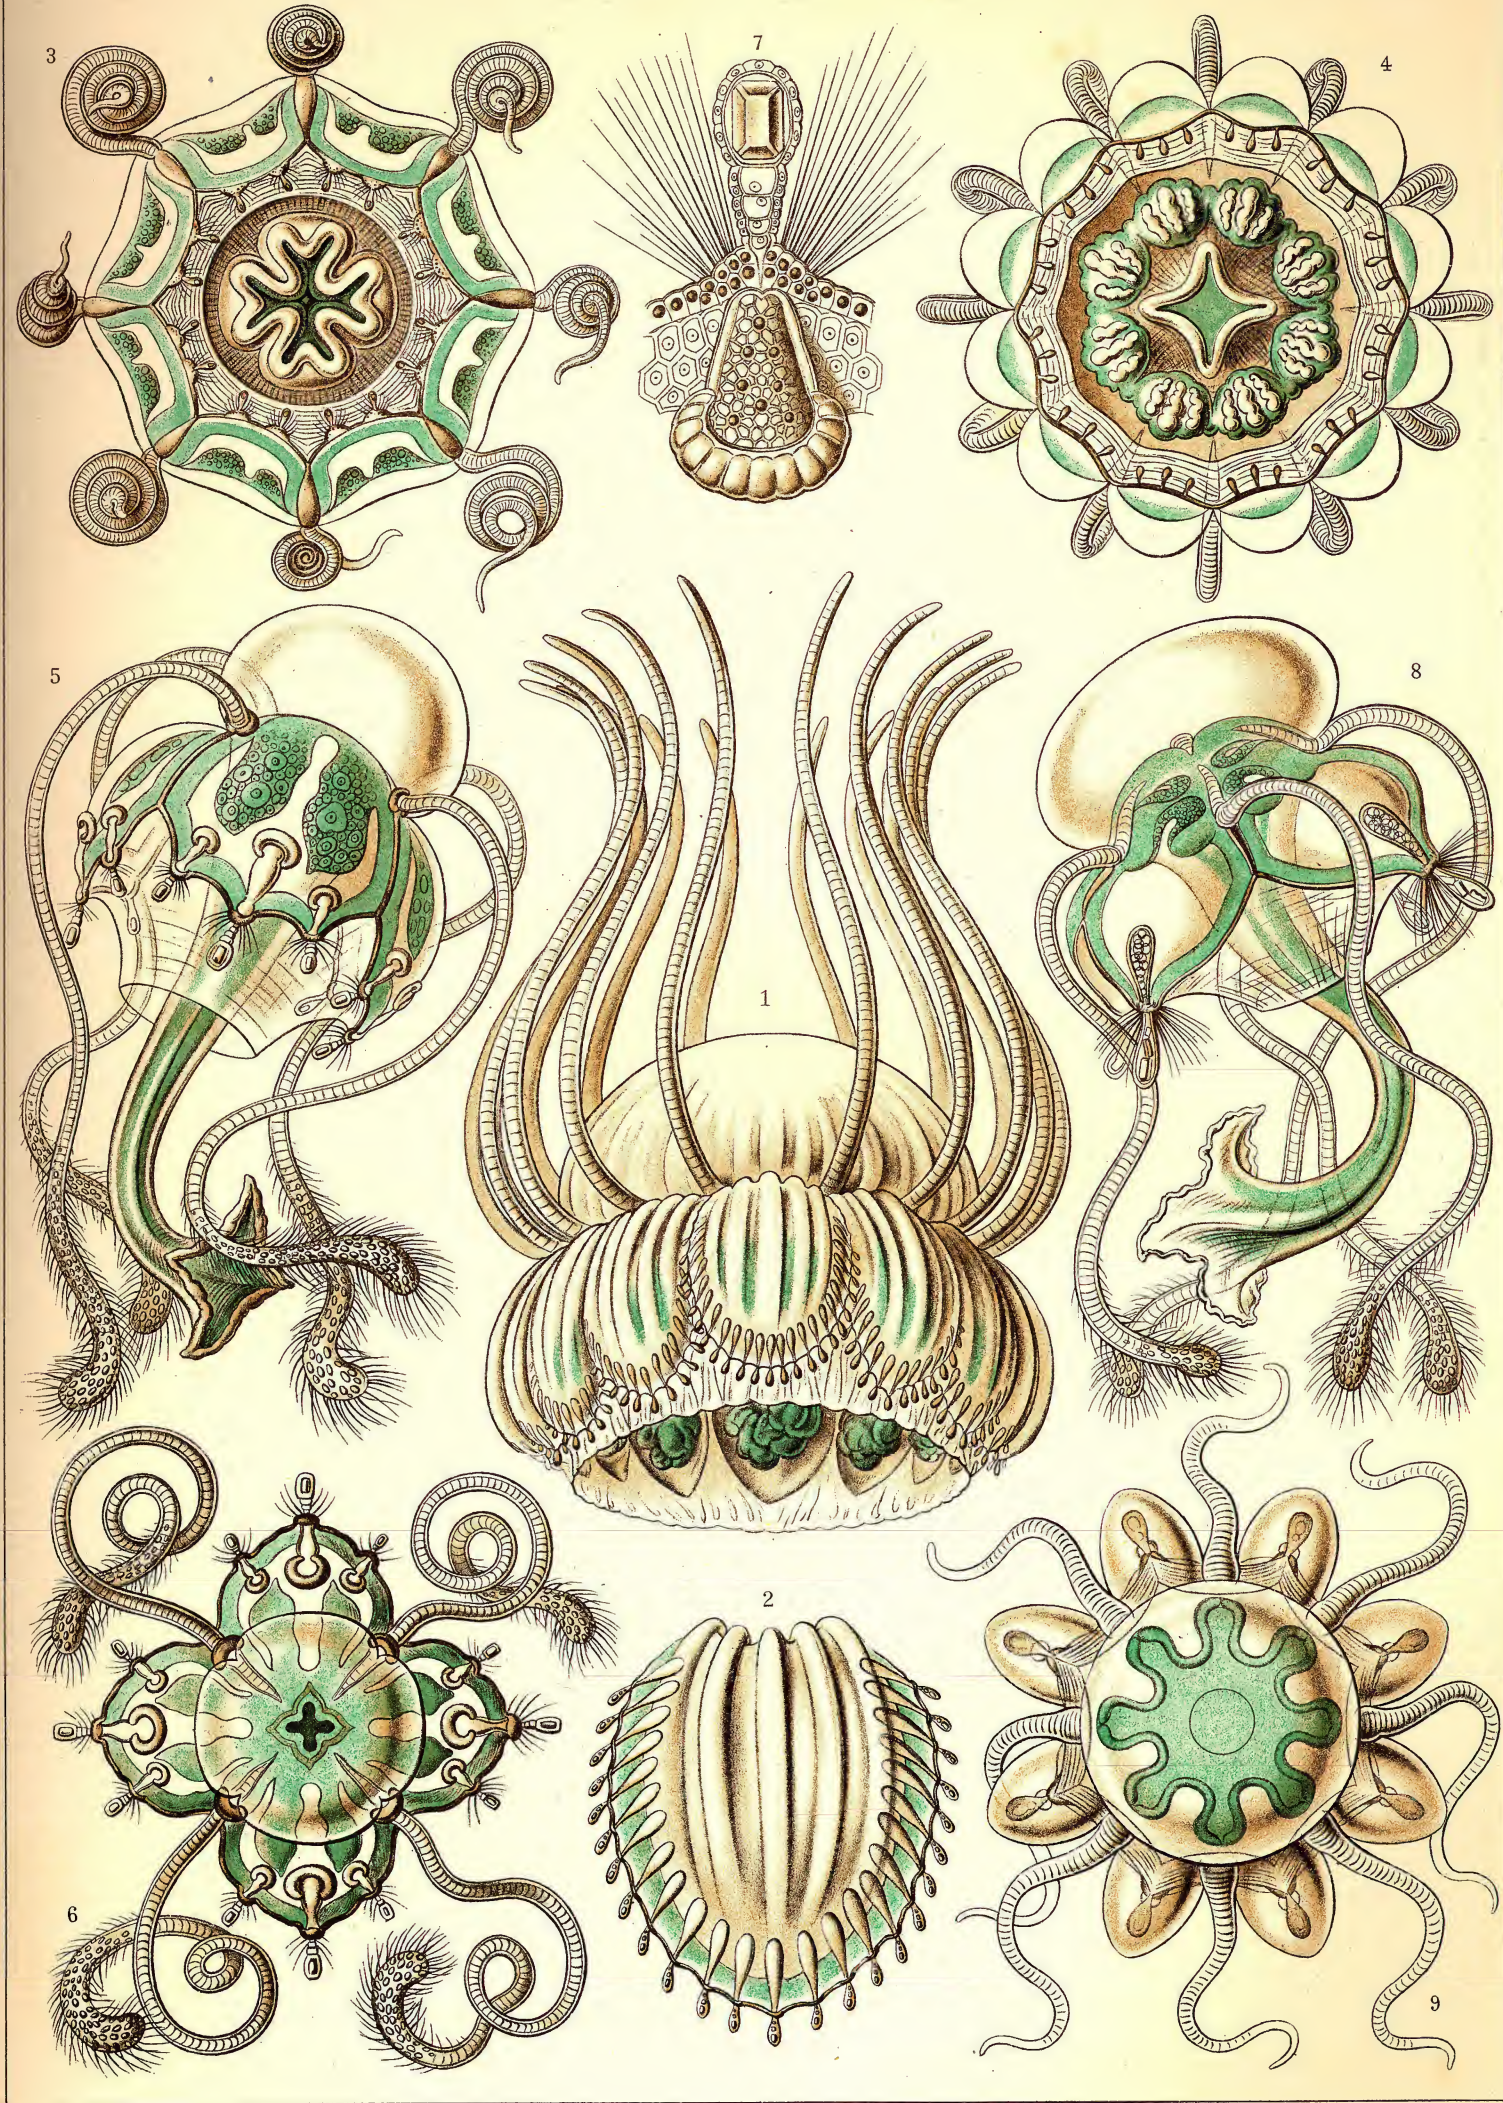

Flagellata. — Geißlinge.

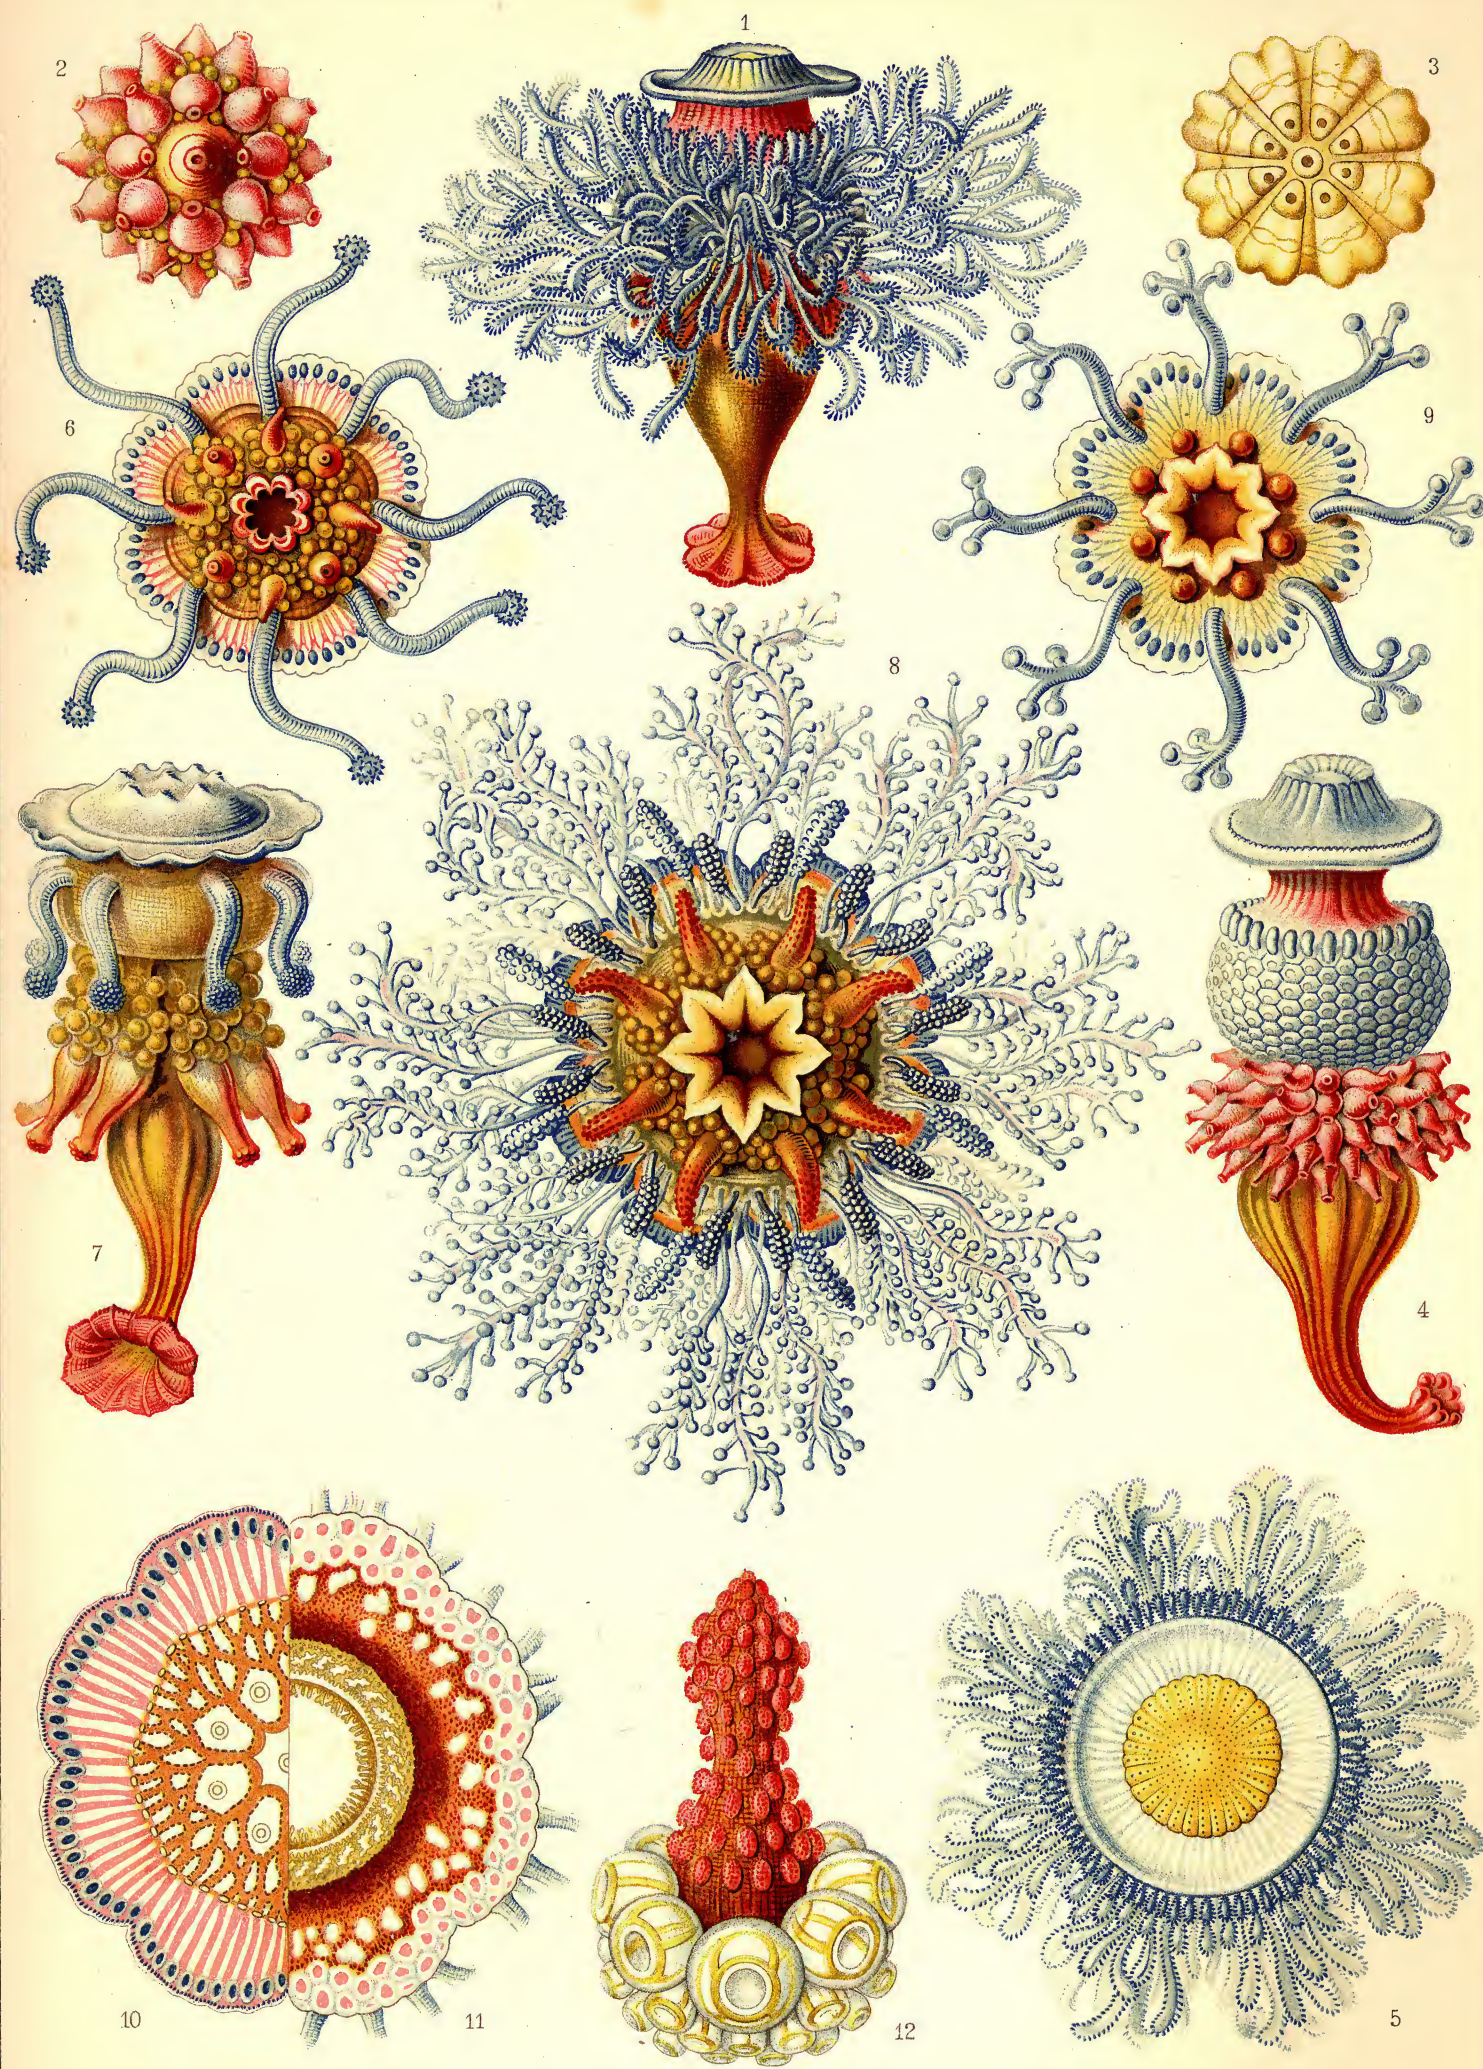

Peridinea. — Geißelhütchen.

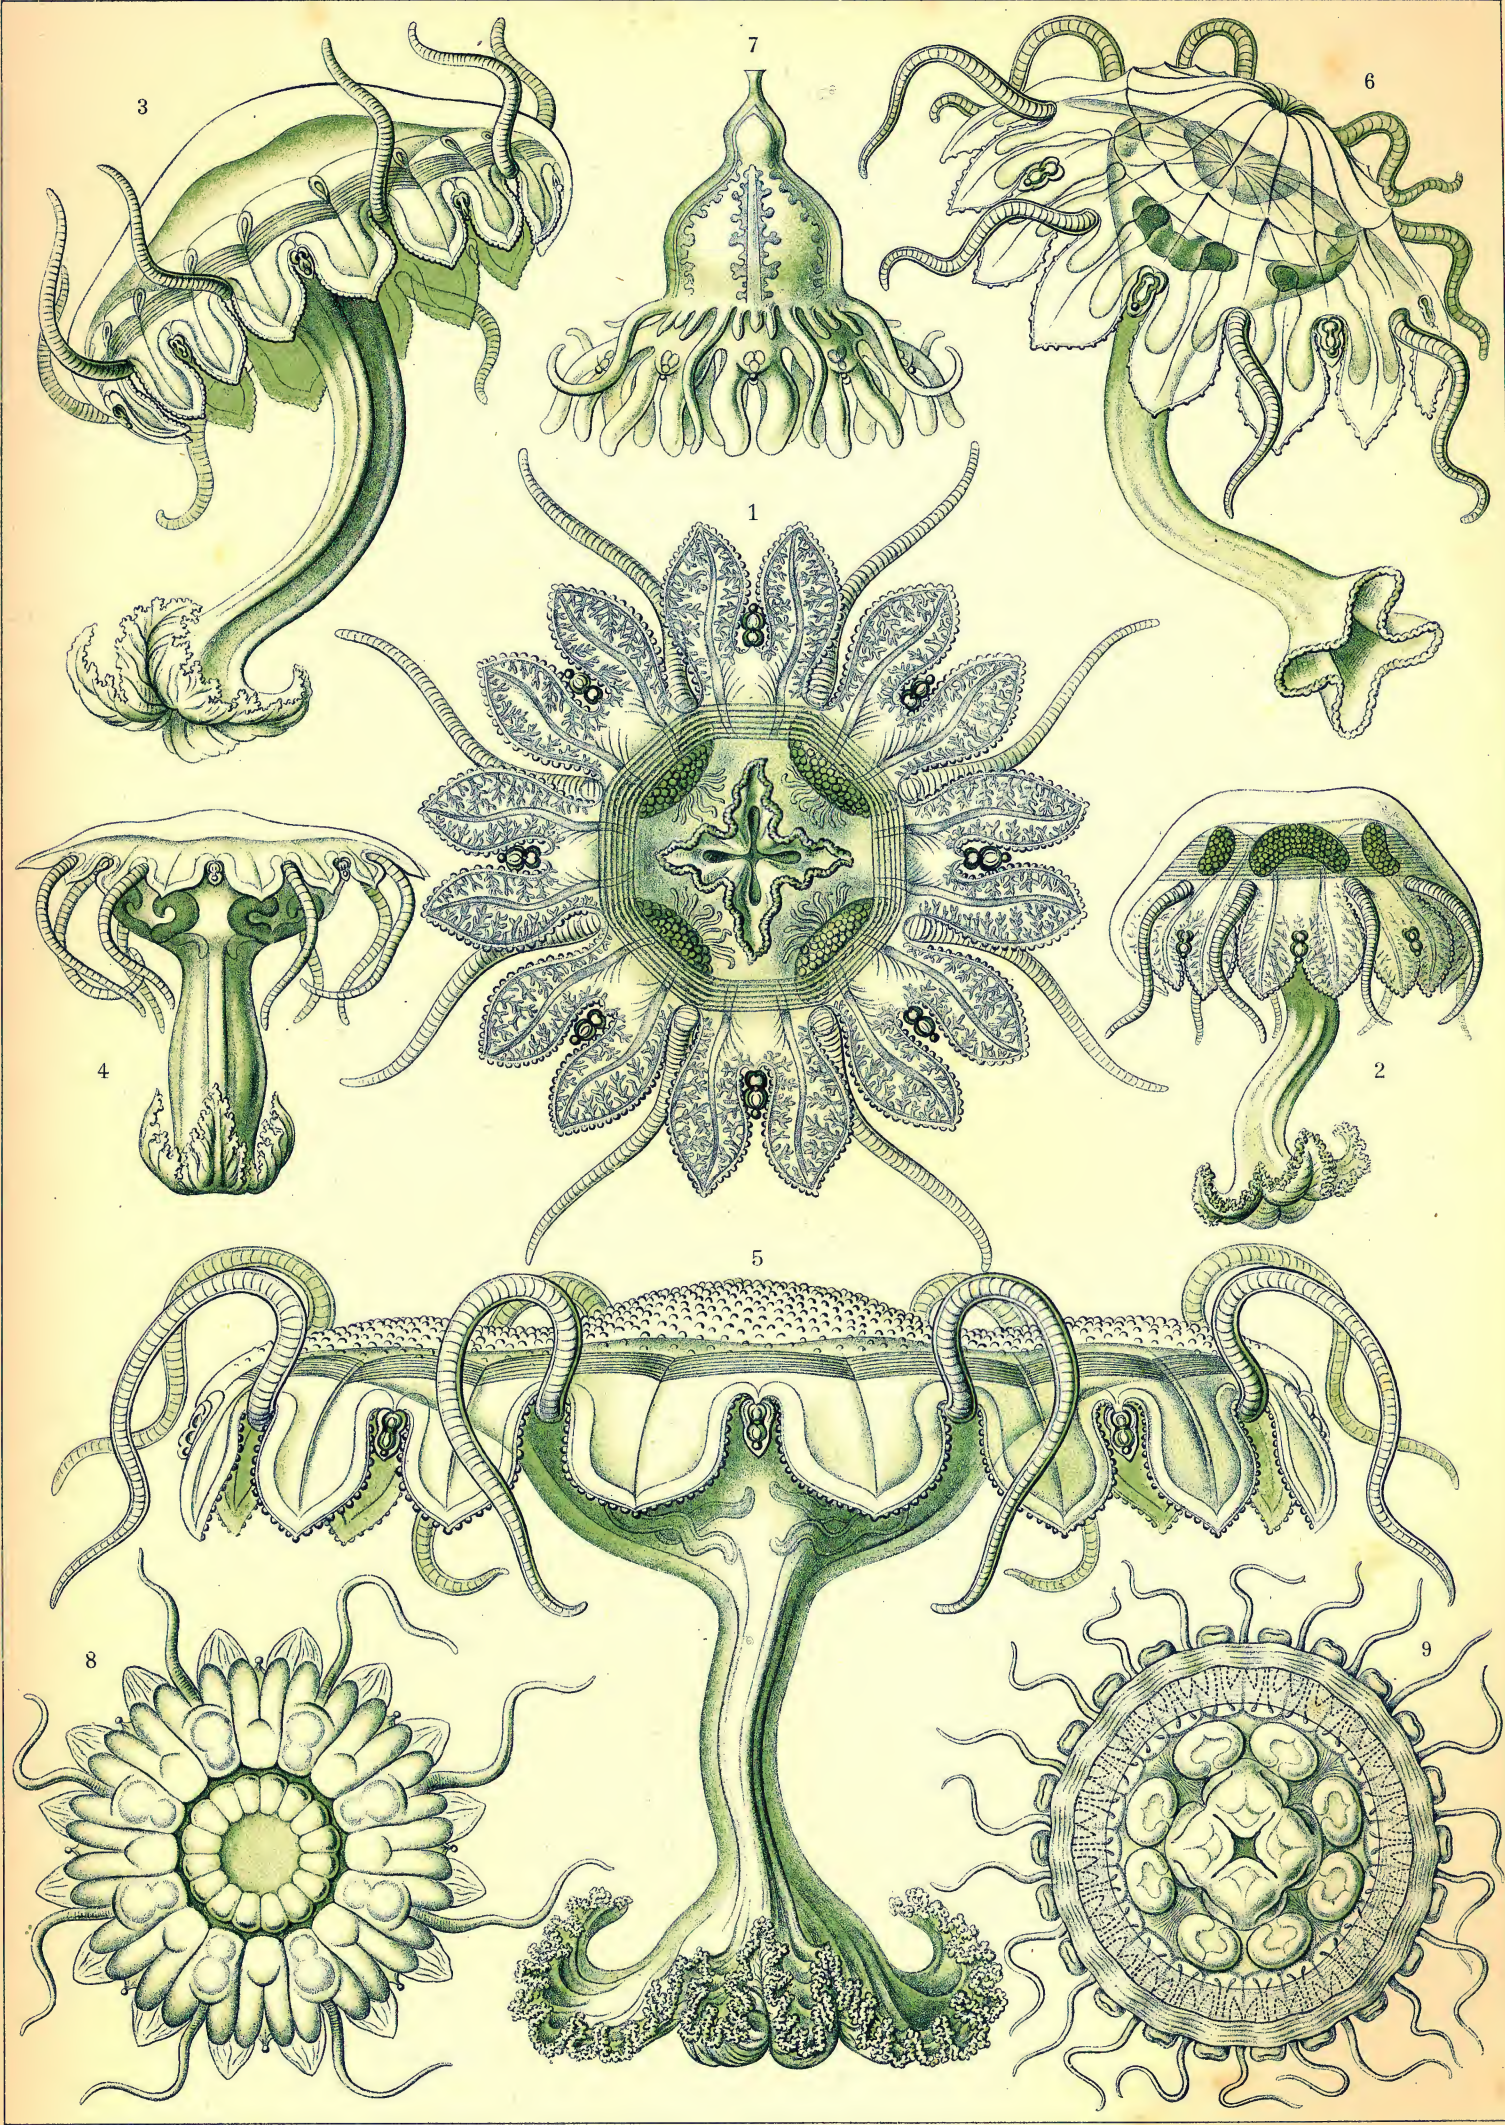

Fucoideae. — Brauntange.

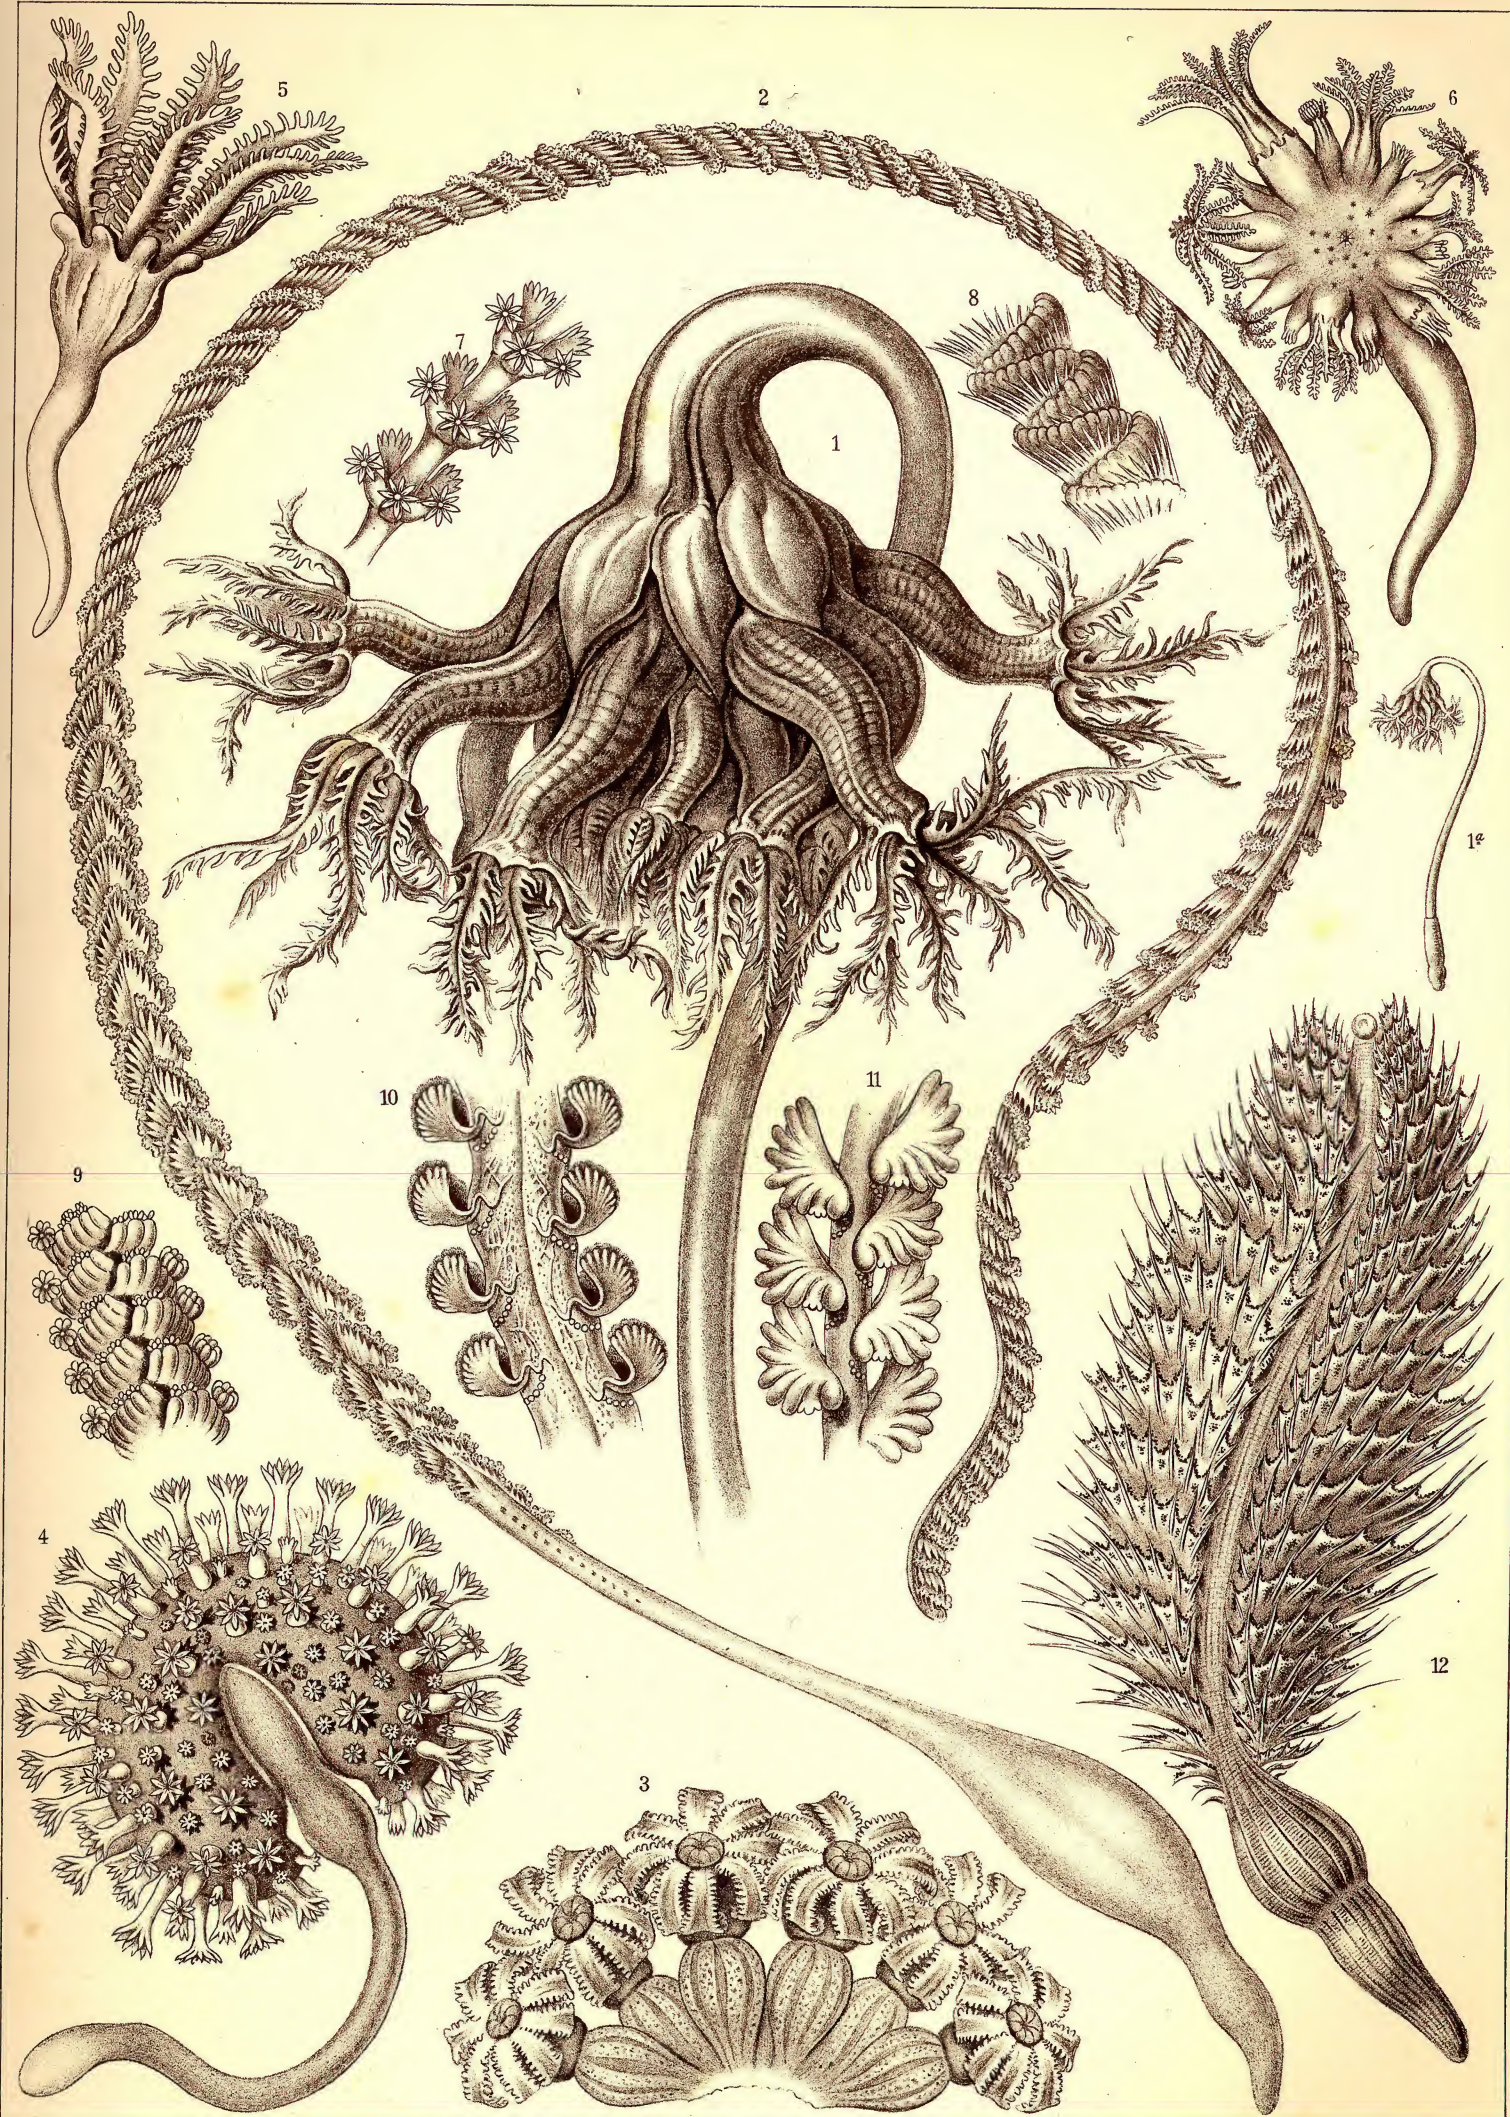

Narcomedusae. — Spangenquassen.

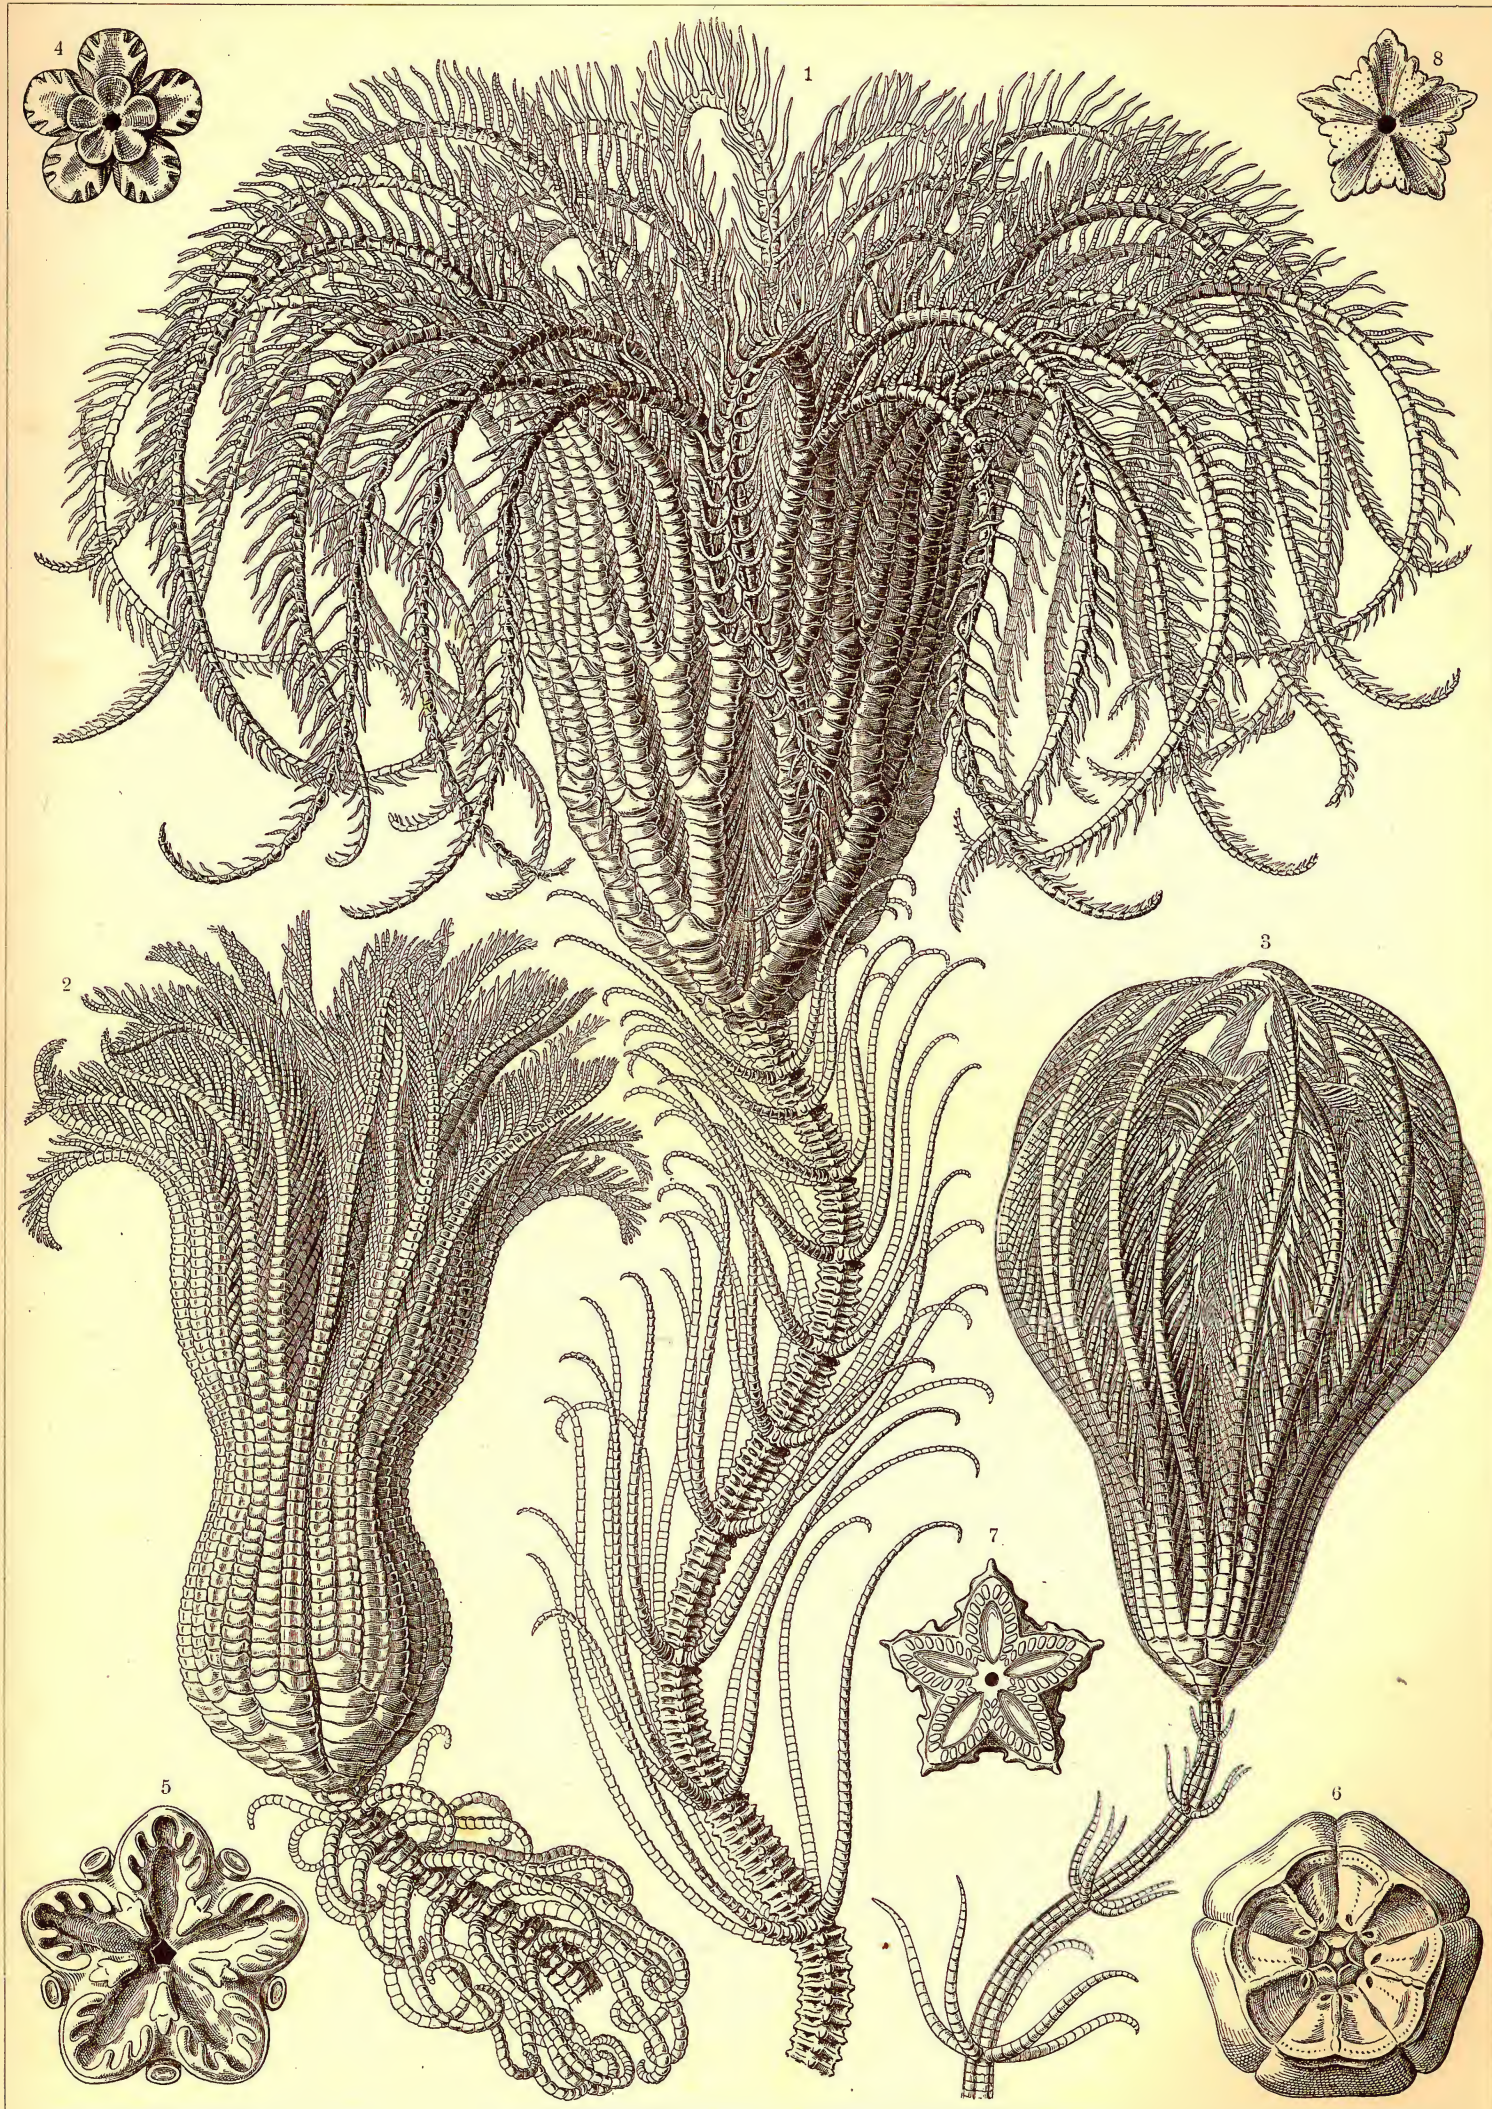

Siphonophorae. — Staatsquassen.

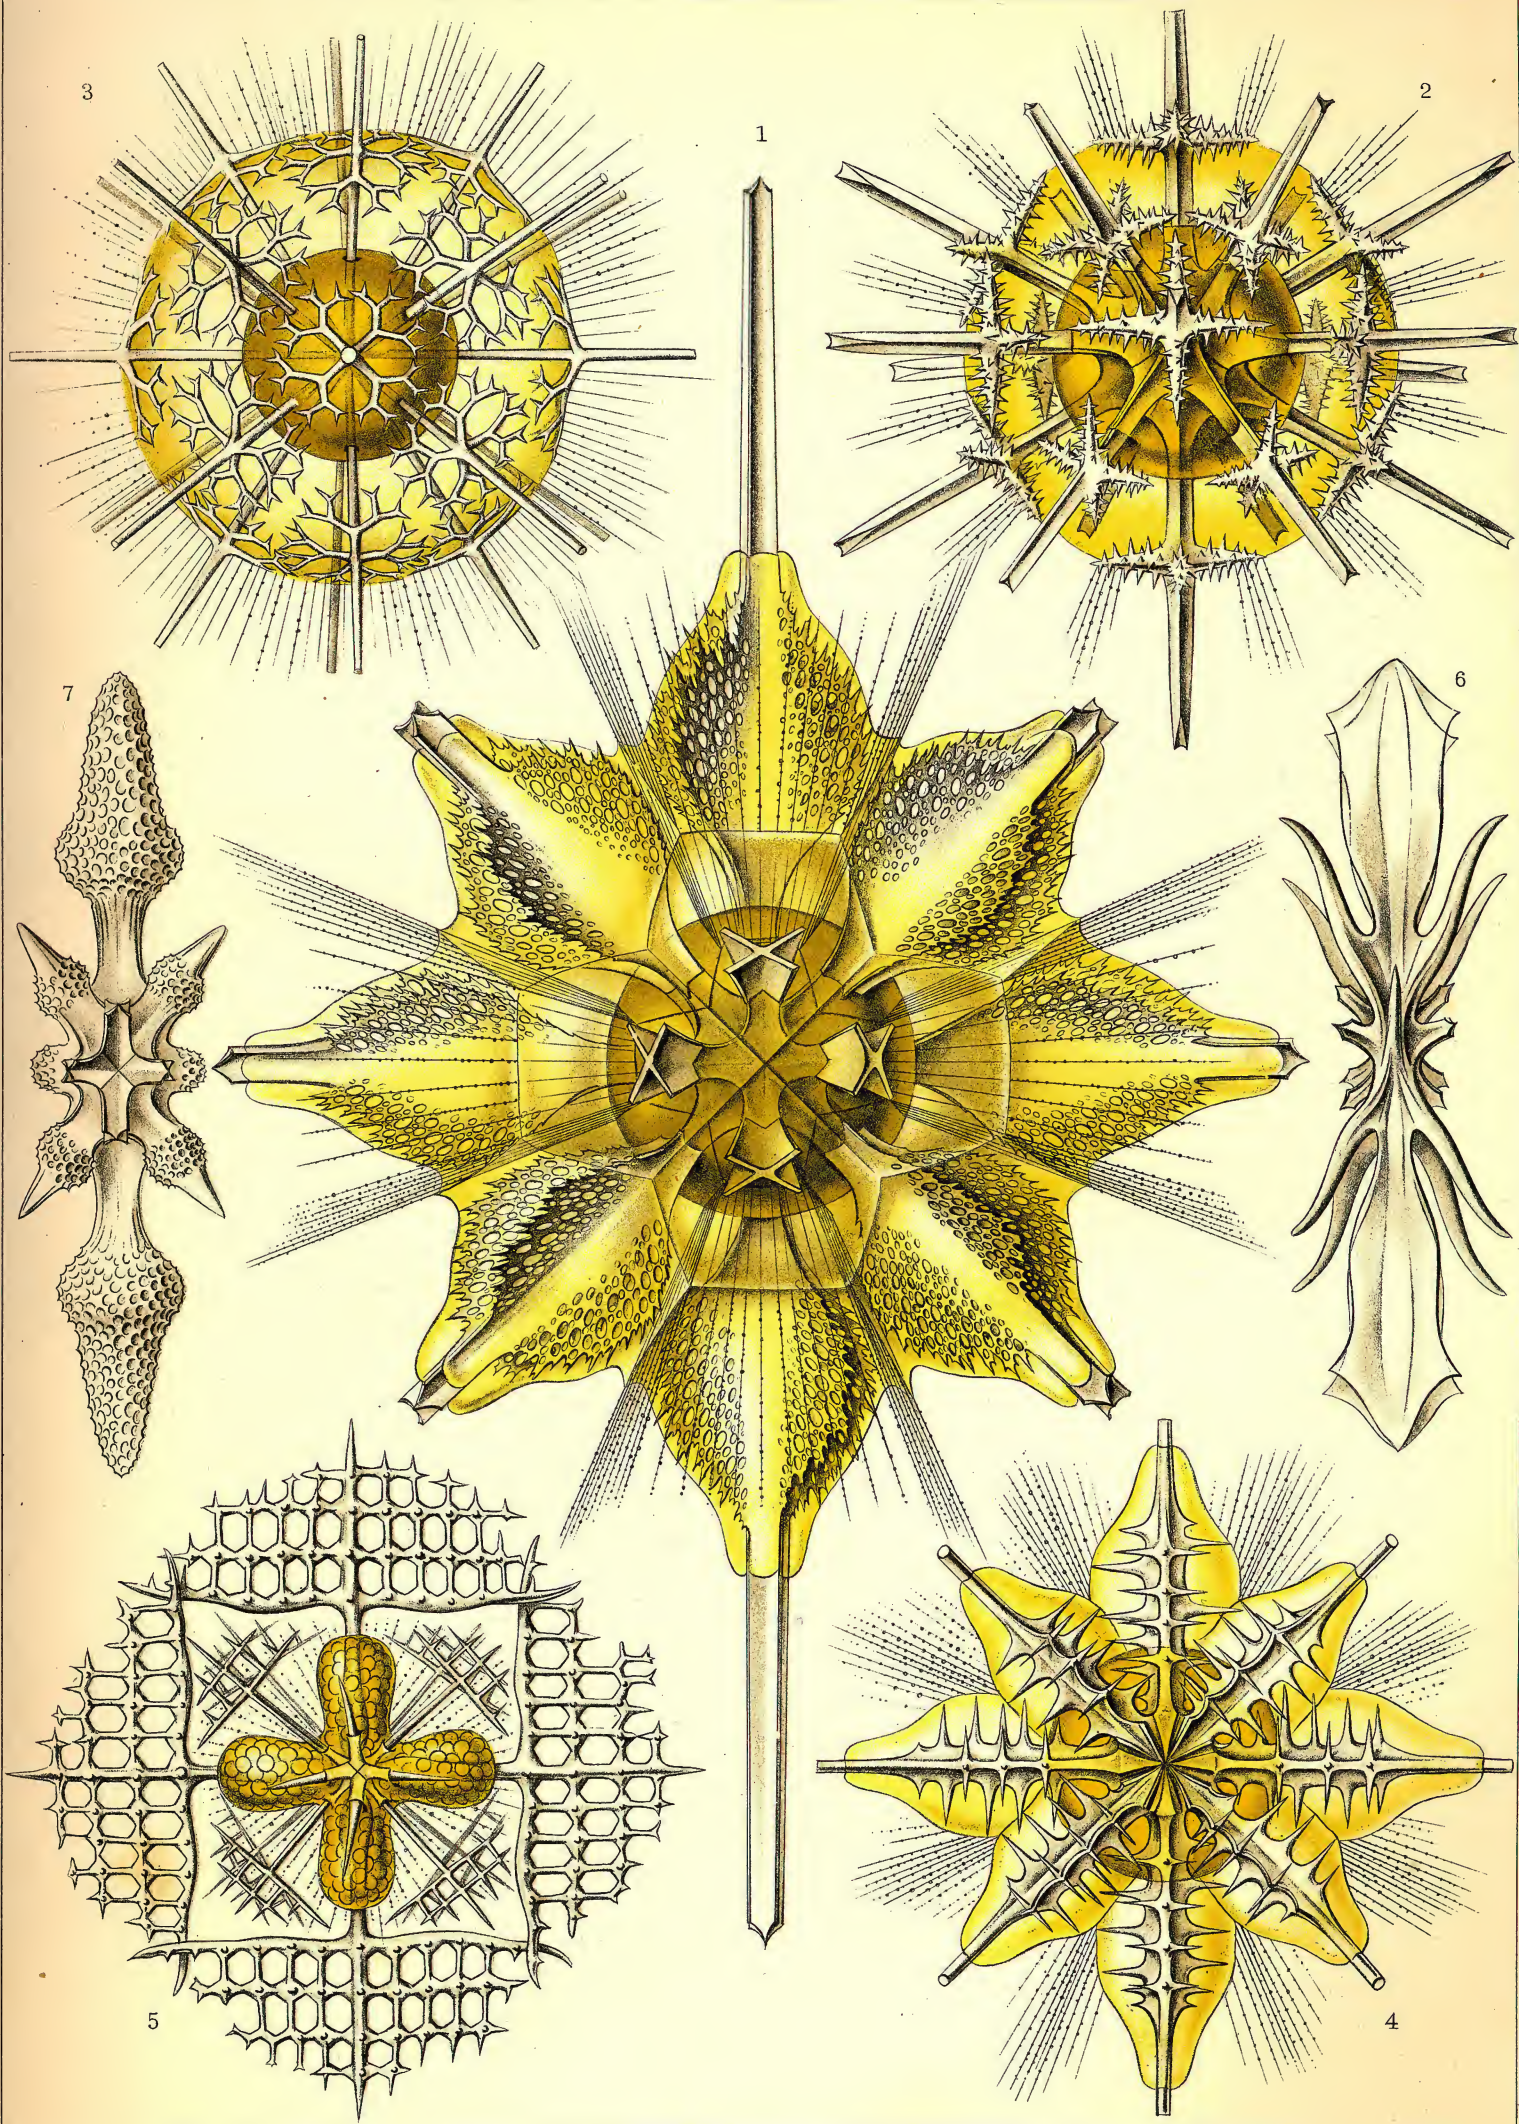

Discomedusae. — Scheibenquallen.

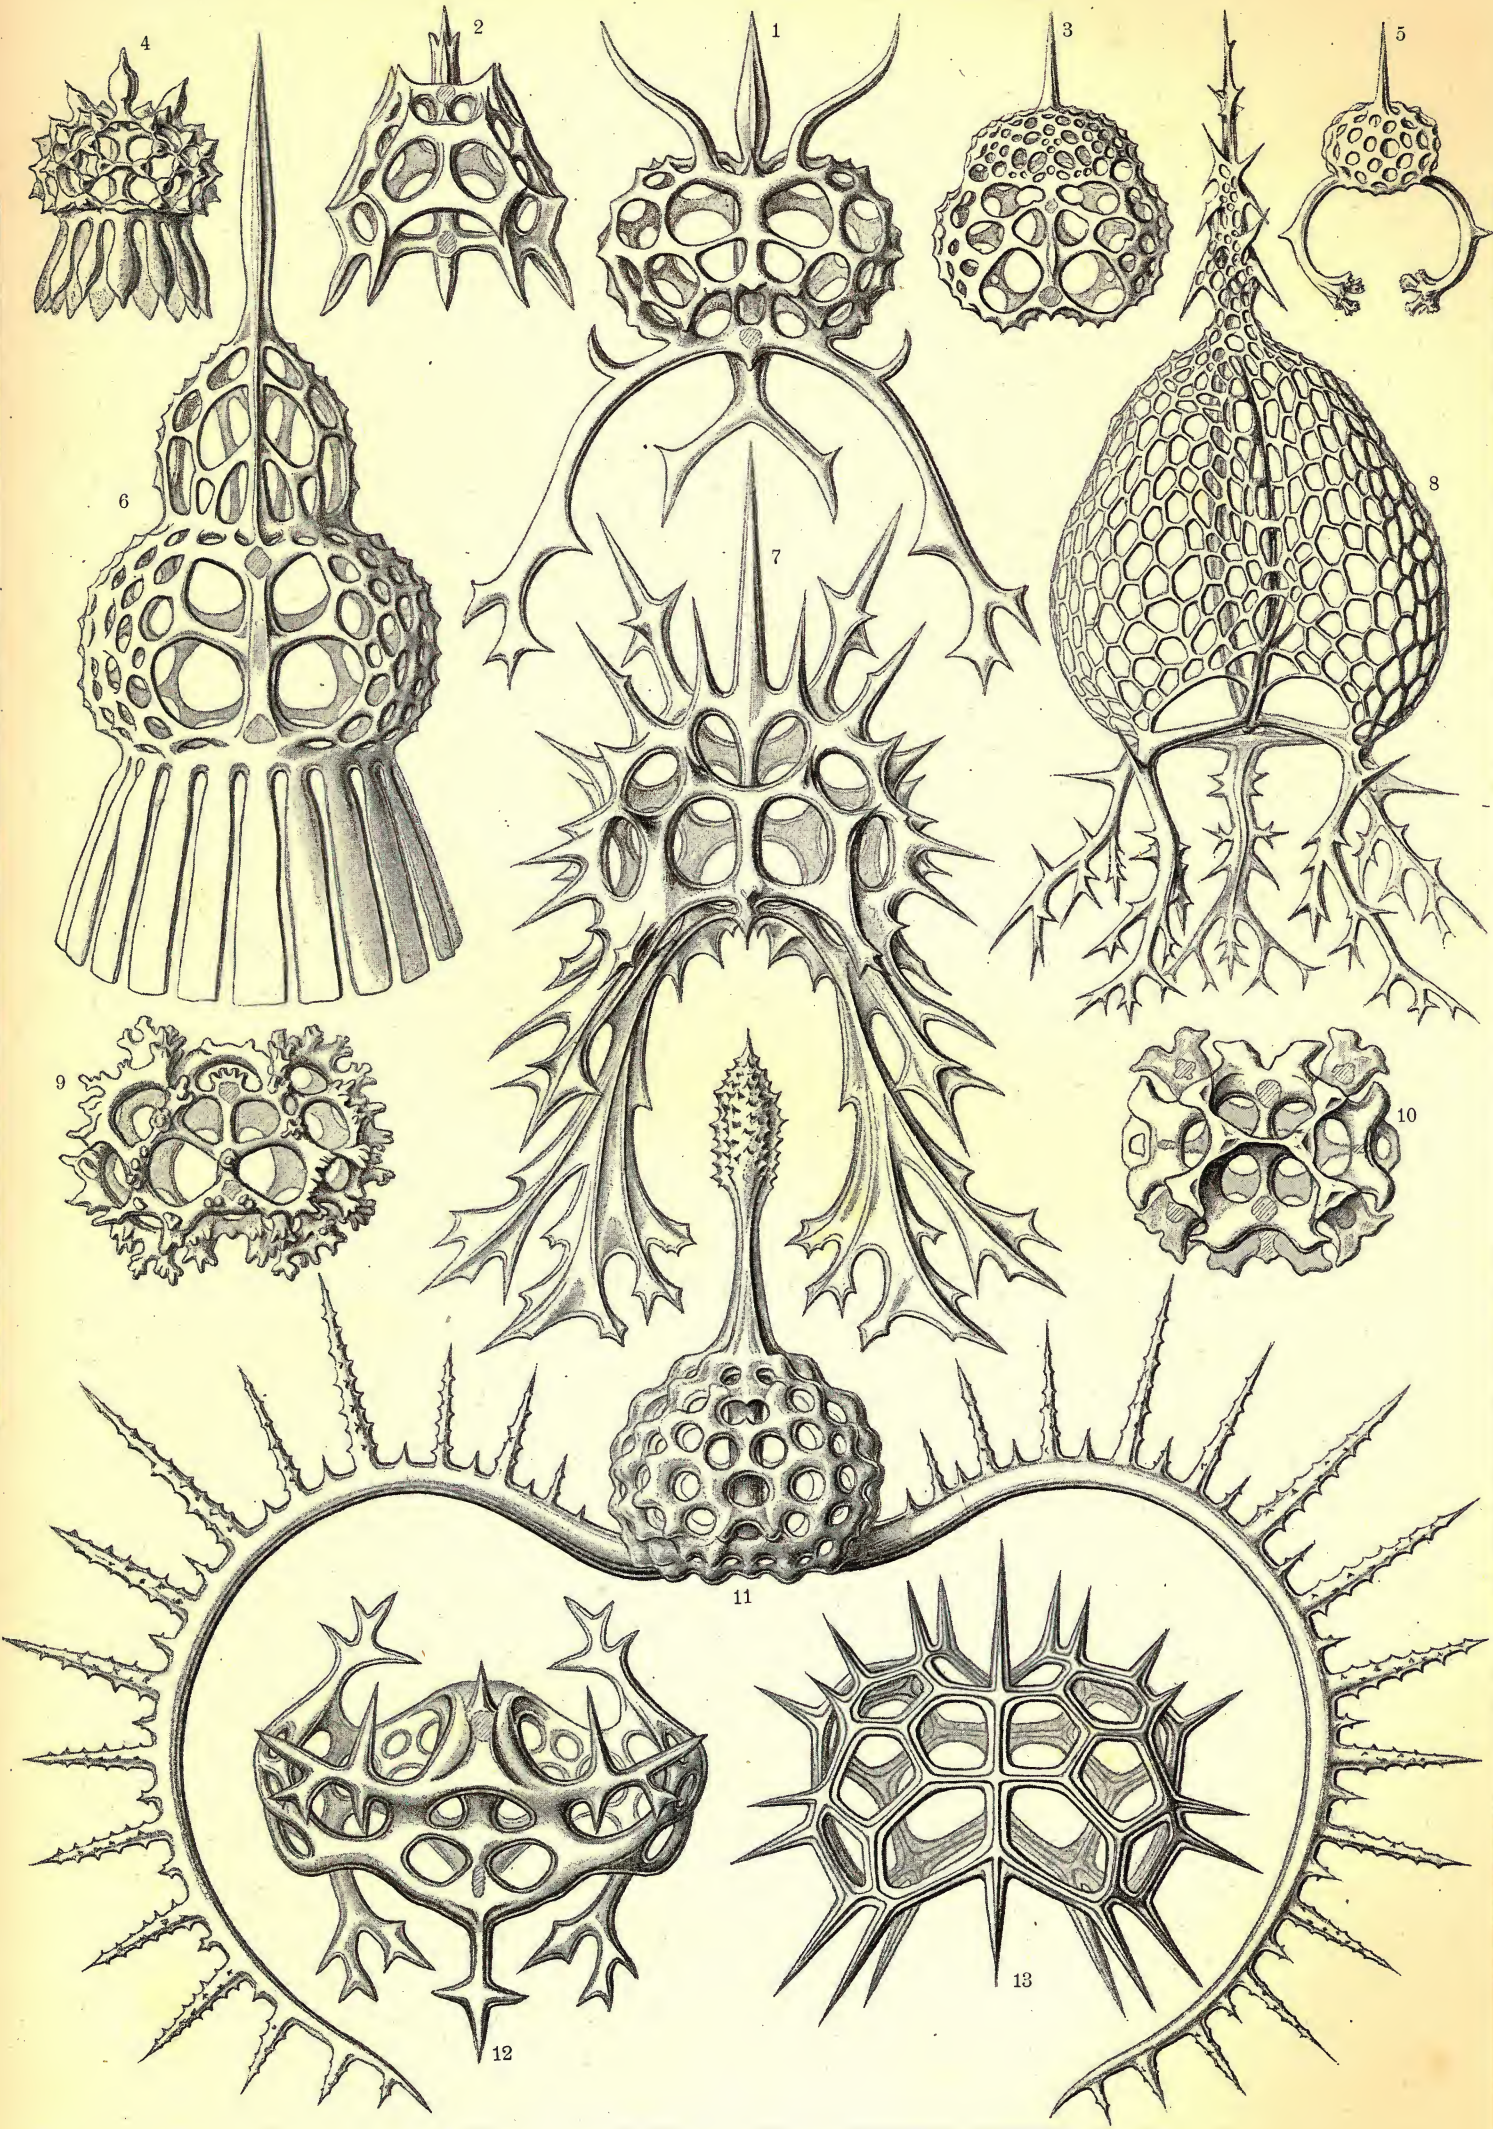

Pennatulida. — Federkorallen.

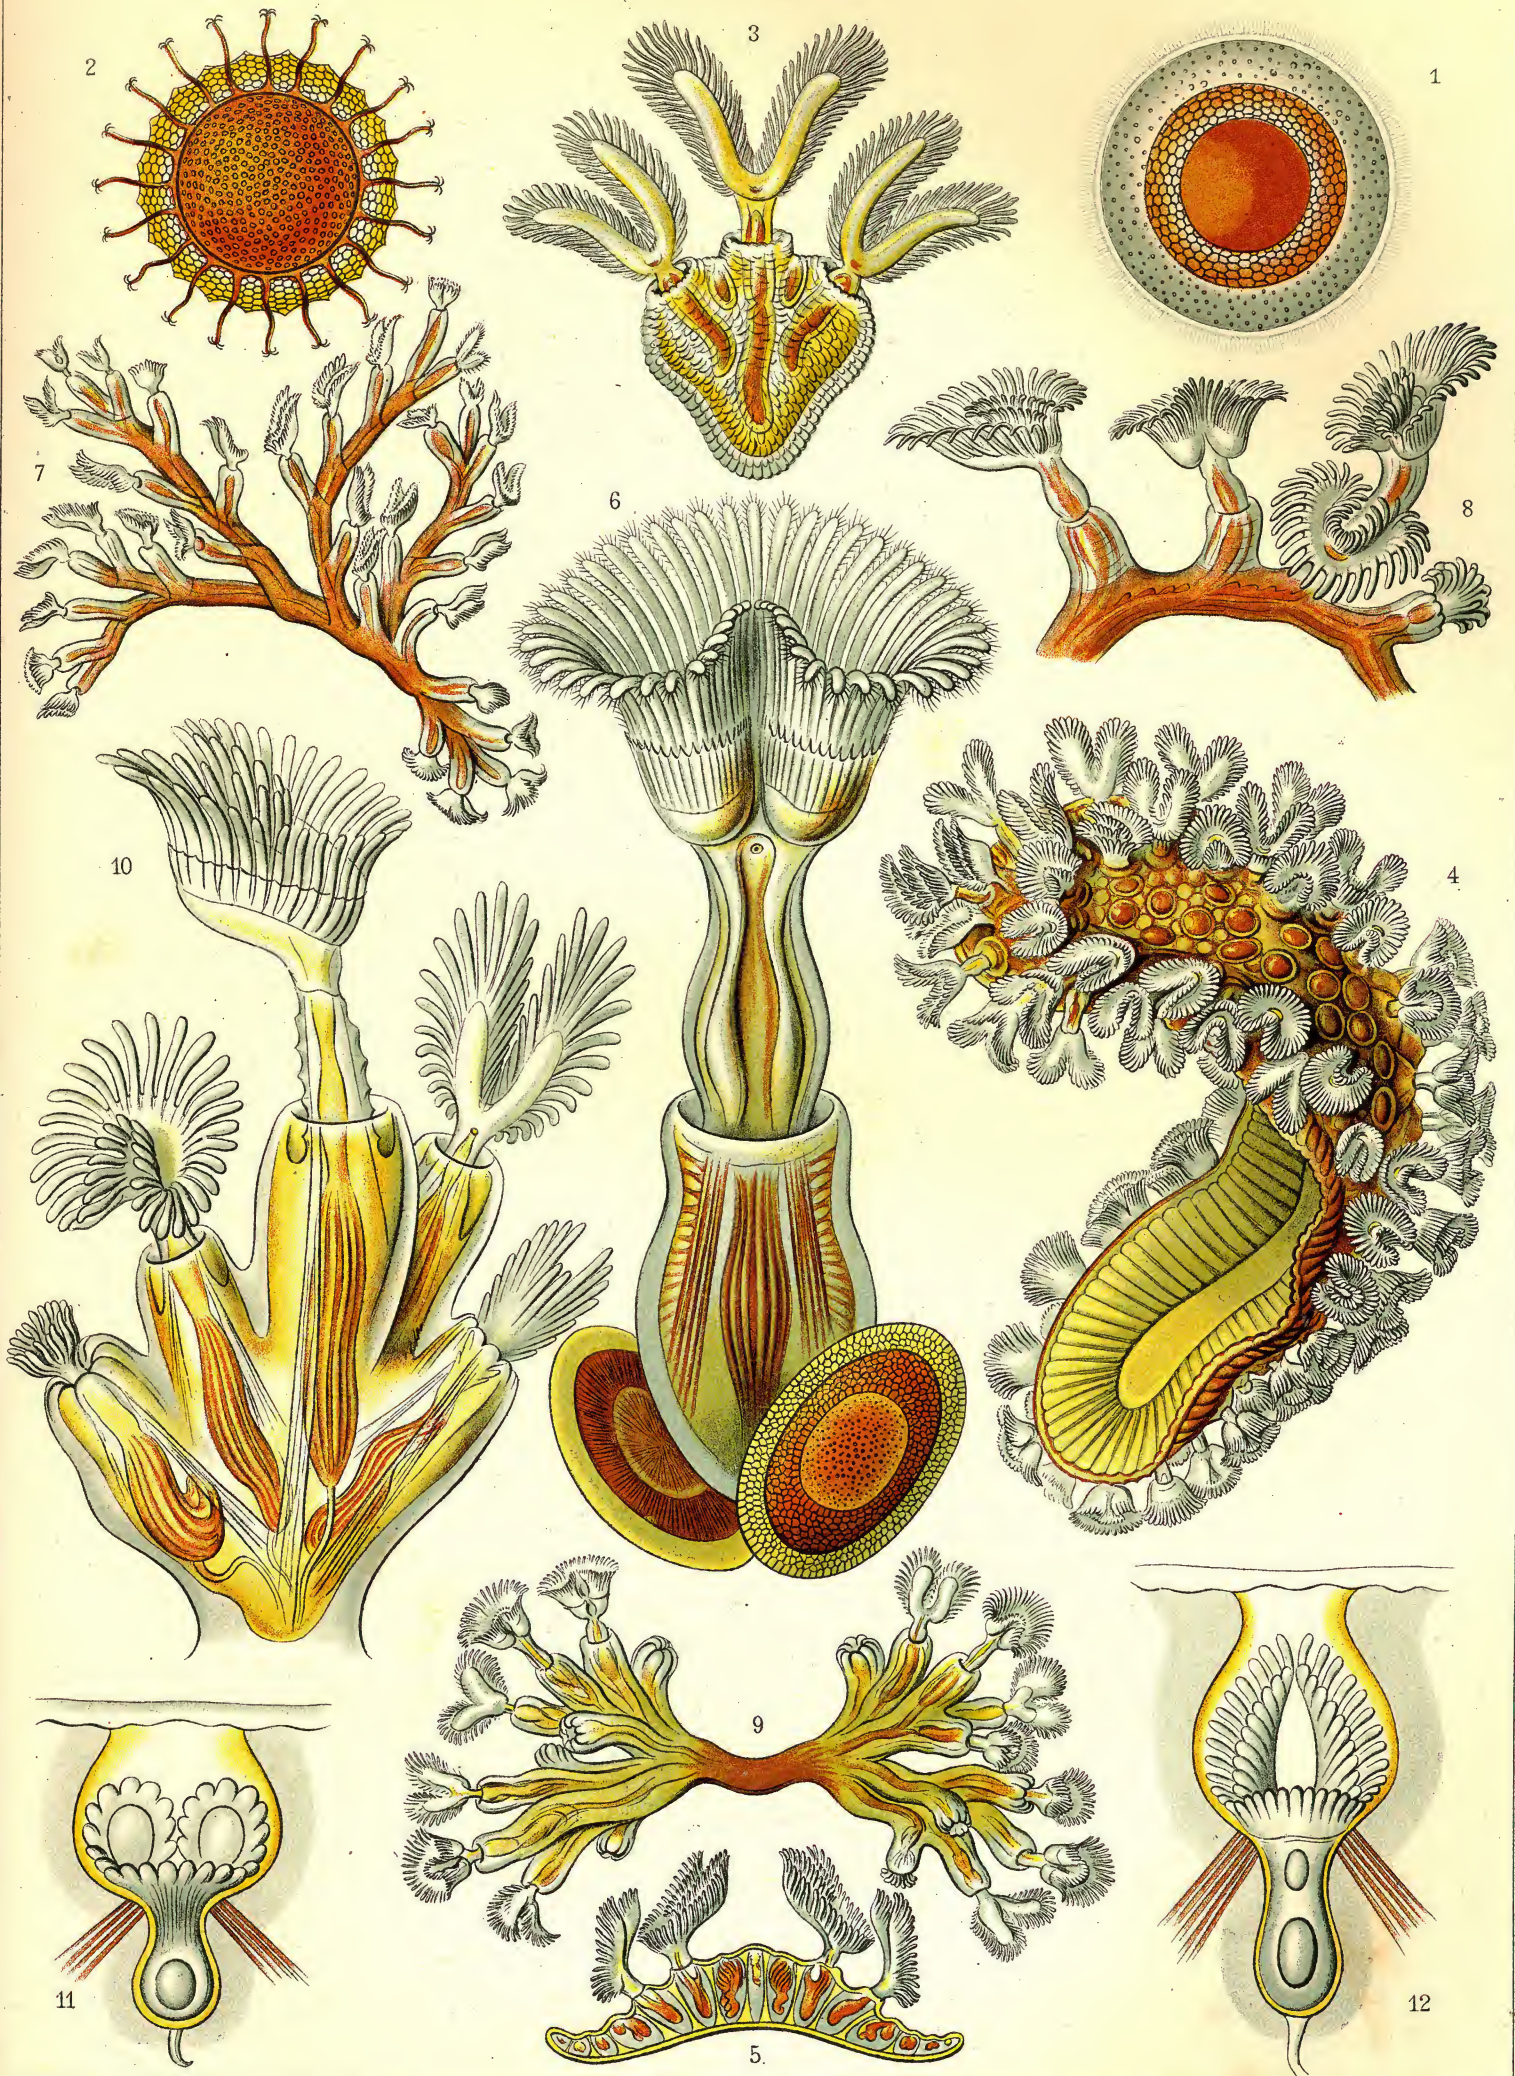

Crinoidea. — Palmensterne.

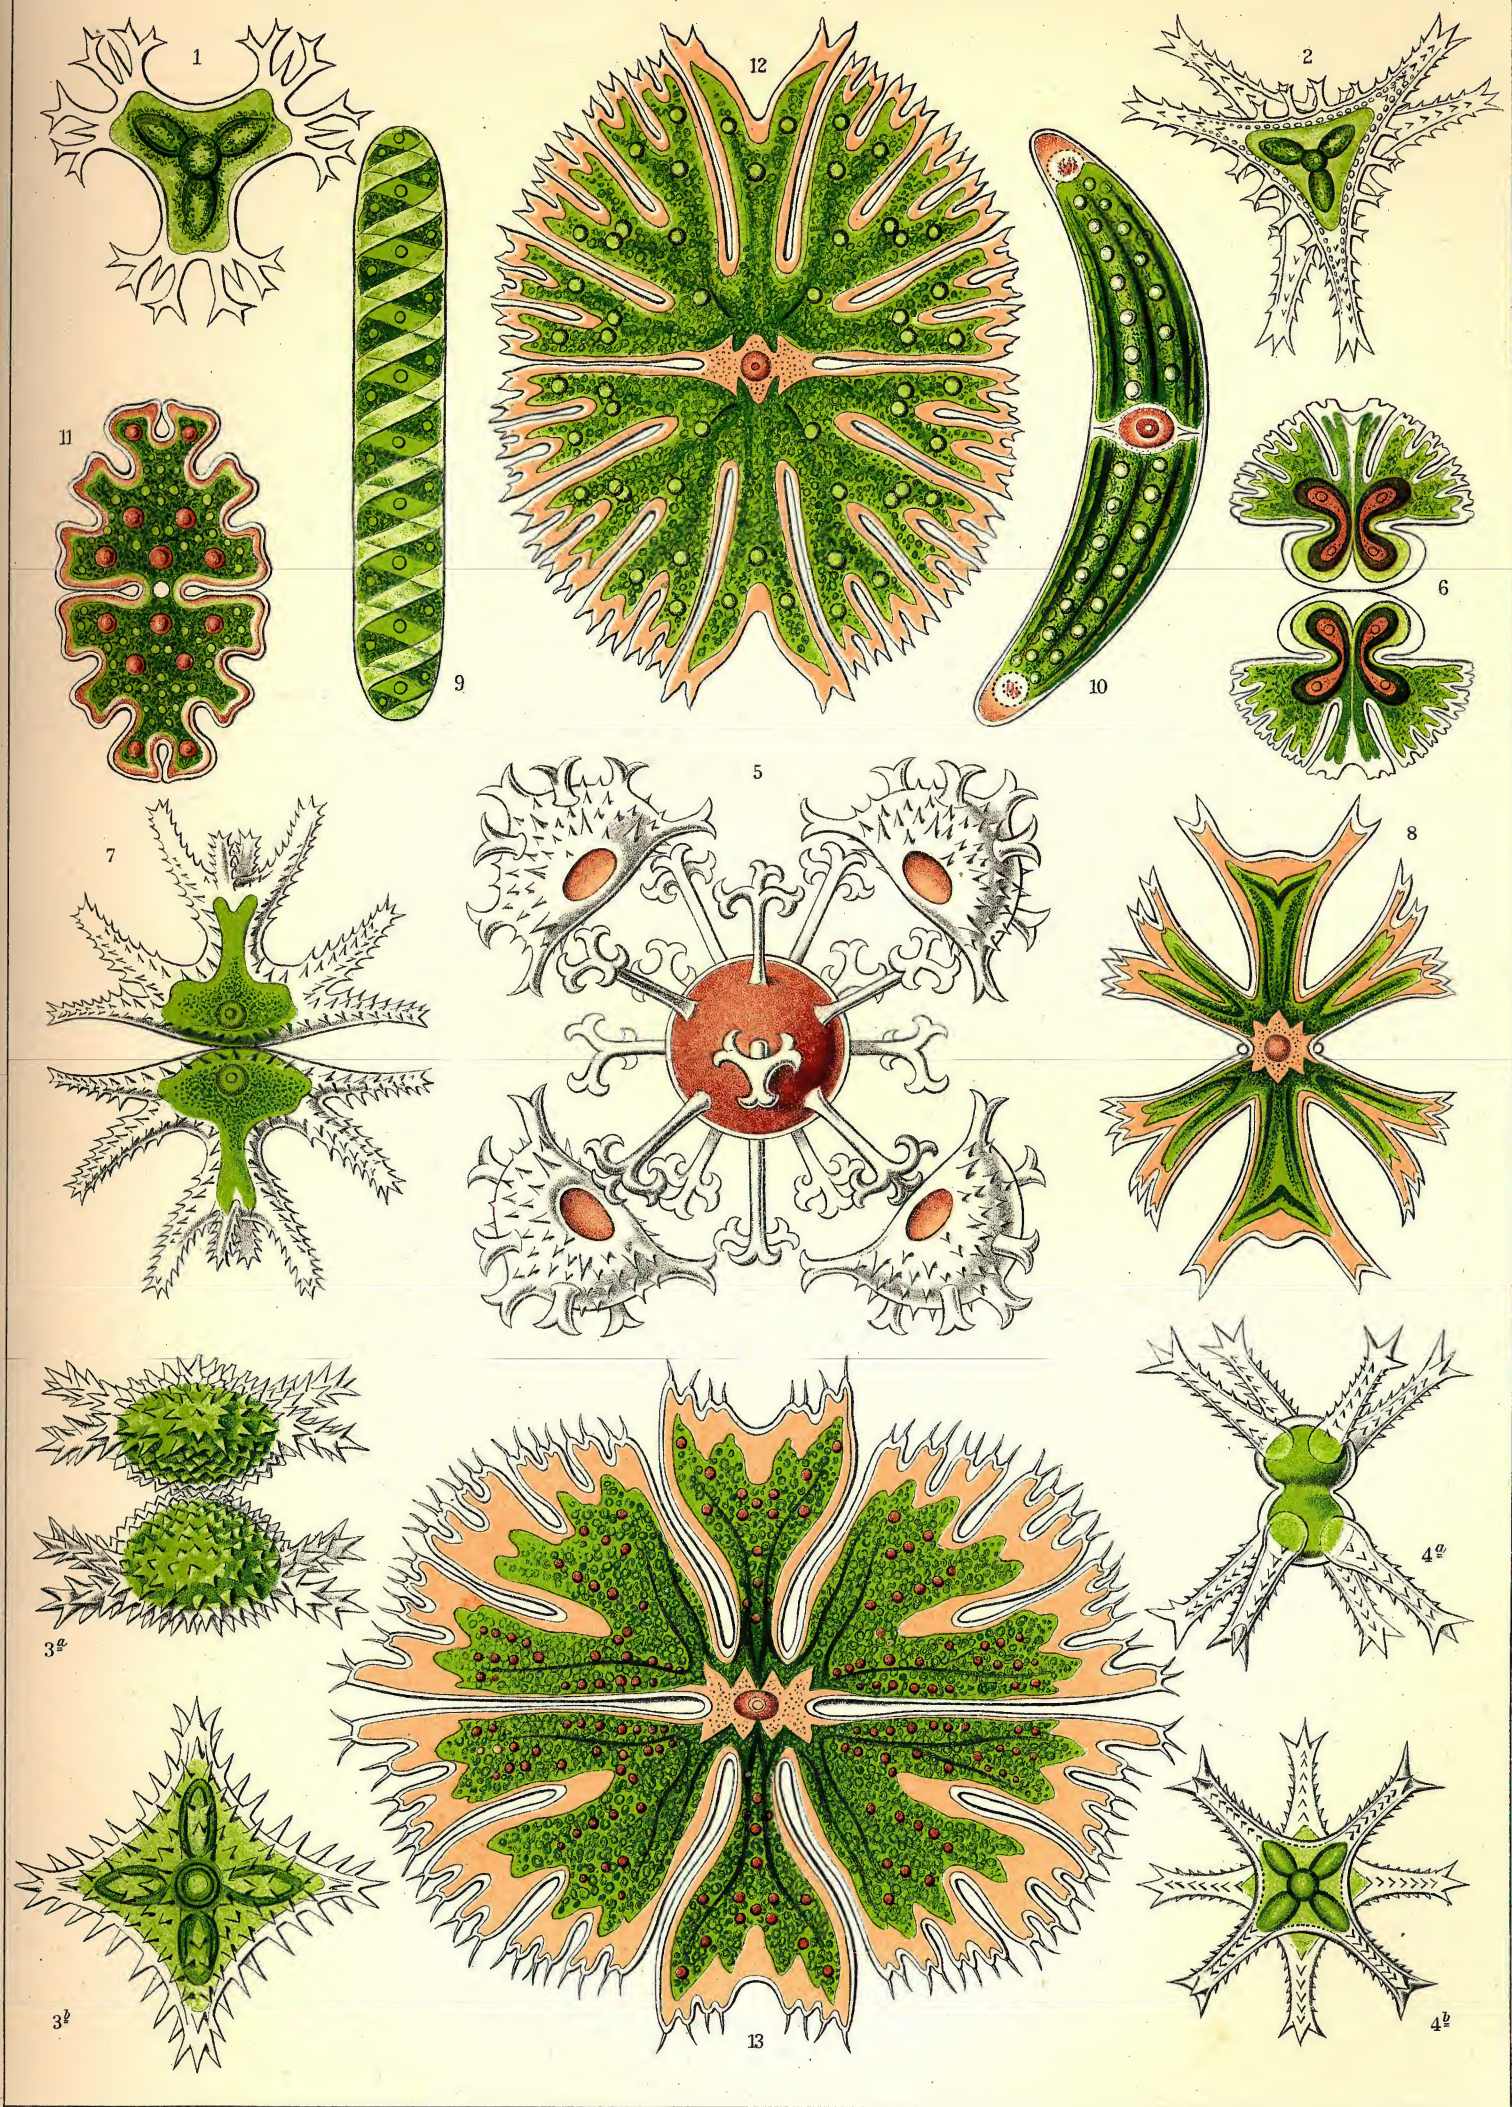

Acanthometra. — Stachelstrahlunge.

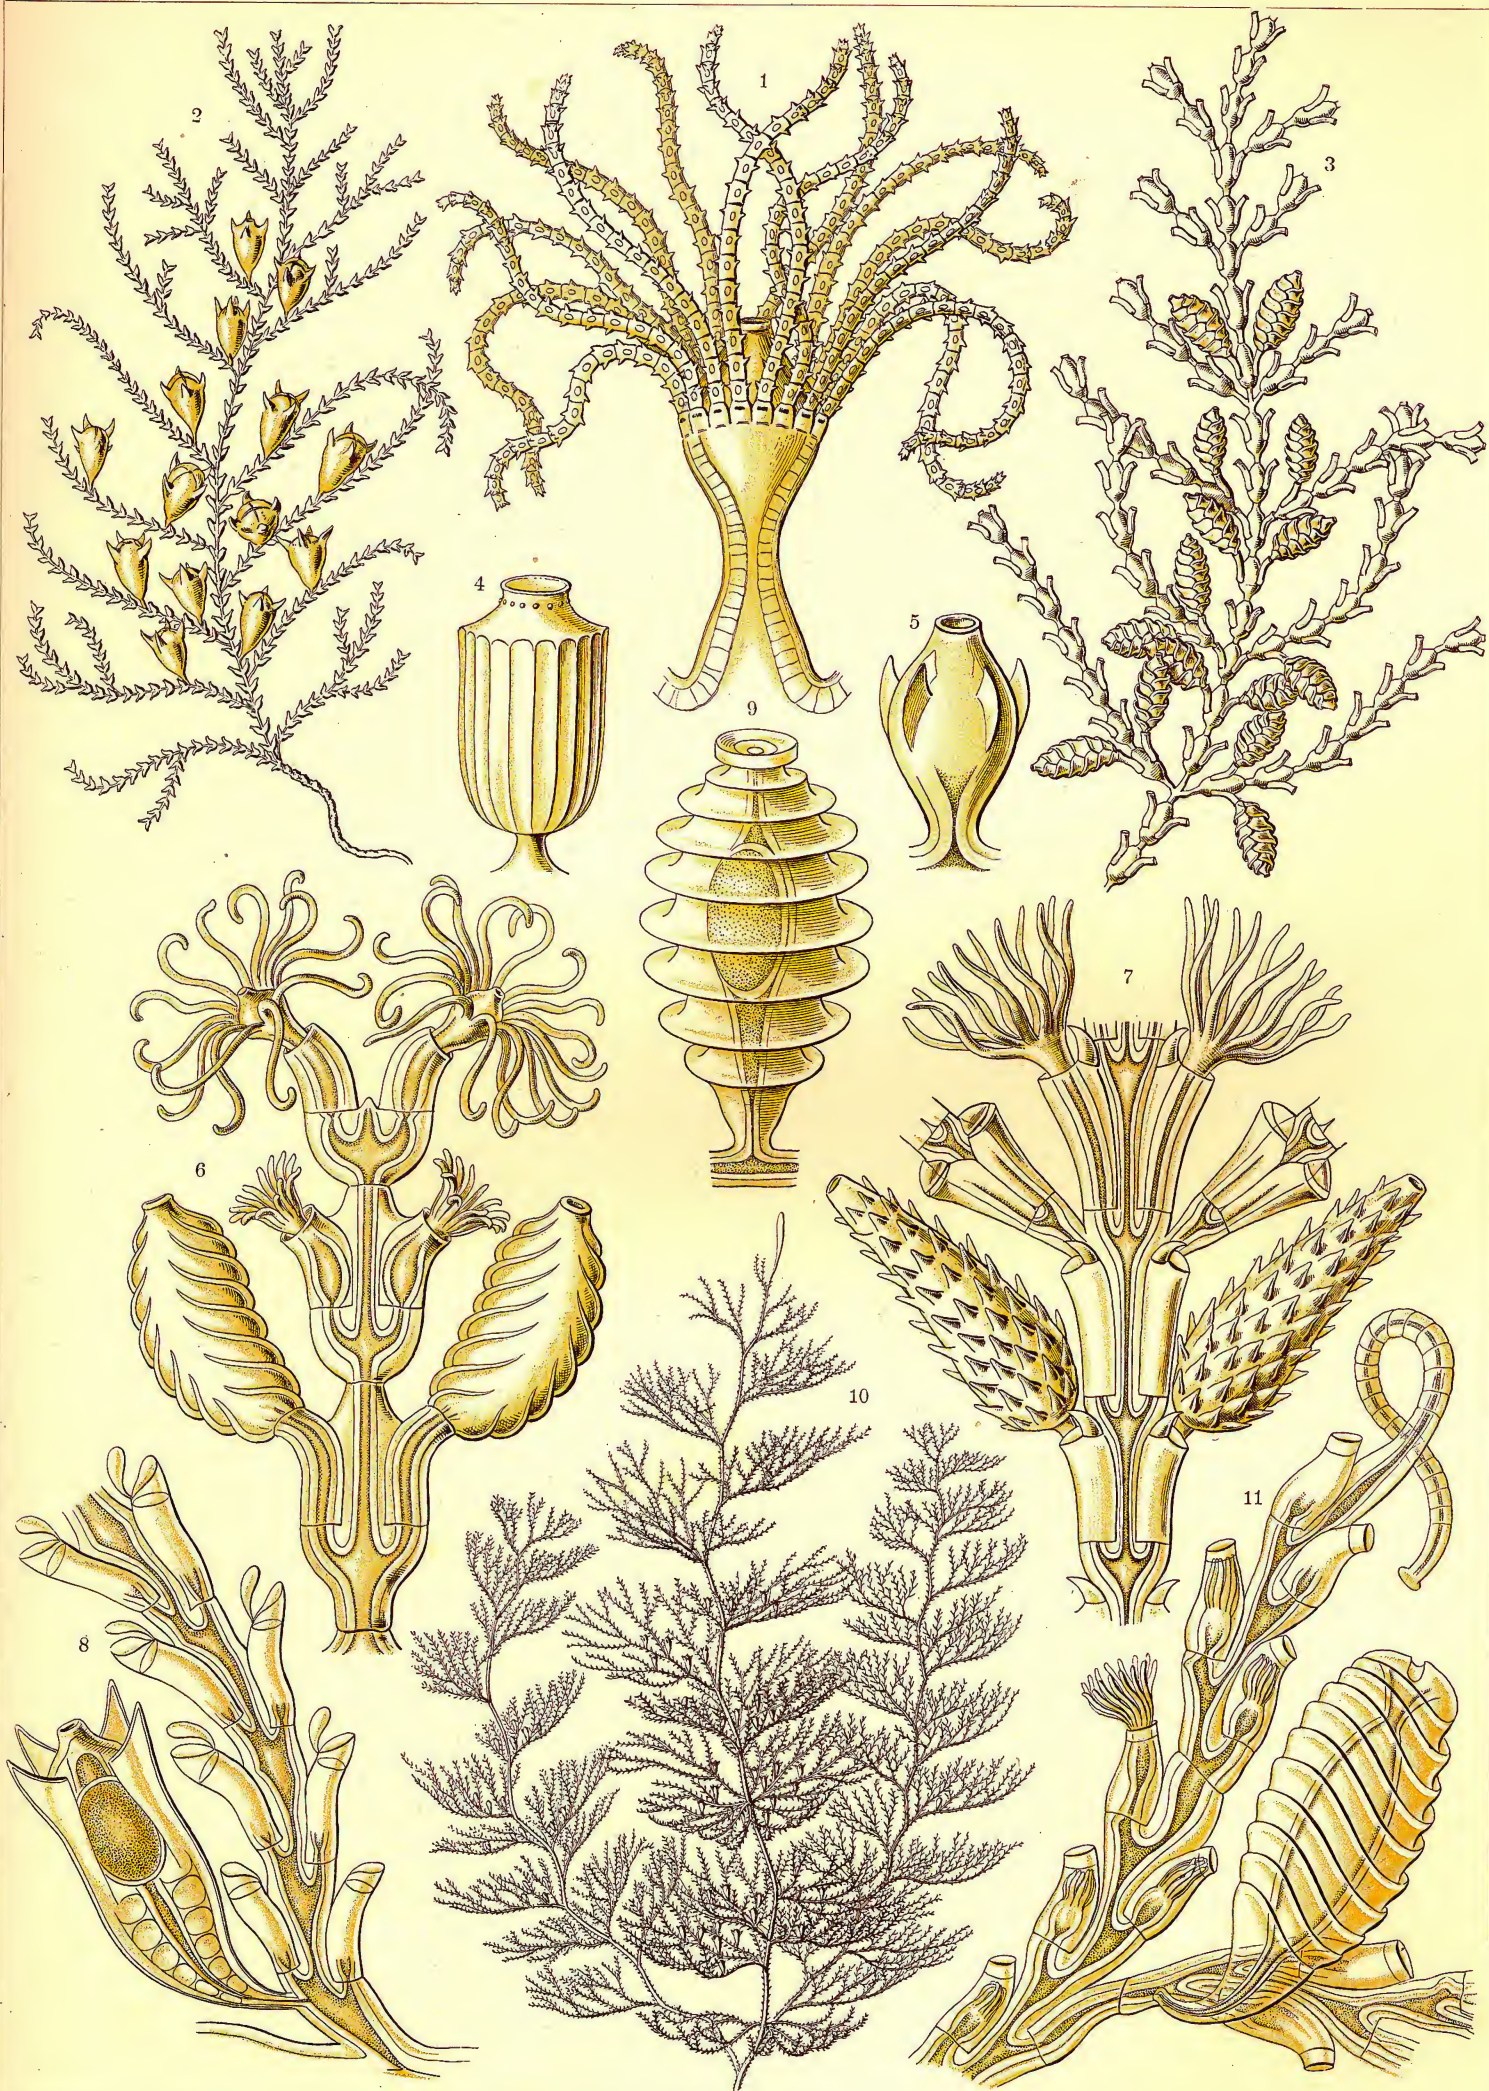

Spyroidea. — Nüßchenstrahllinge.

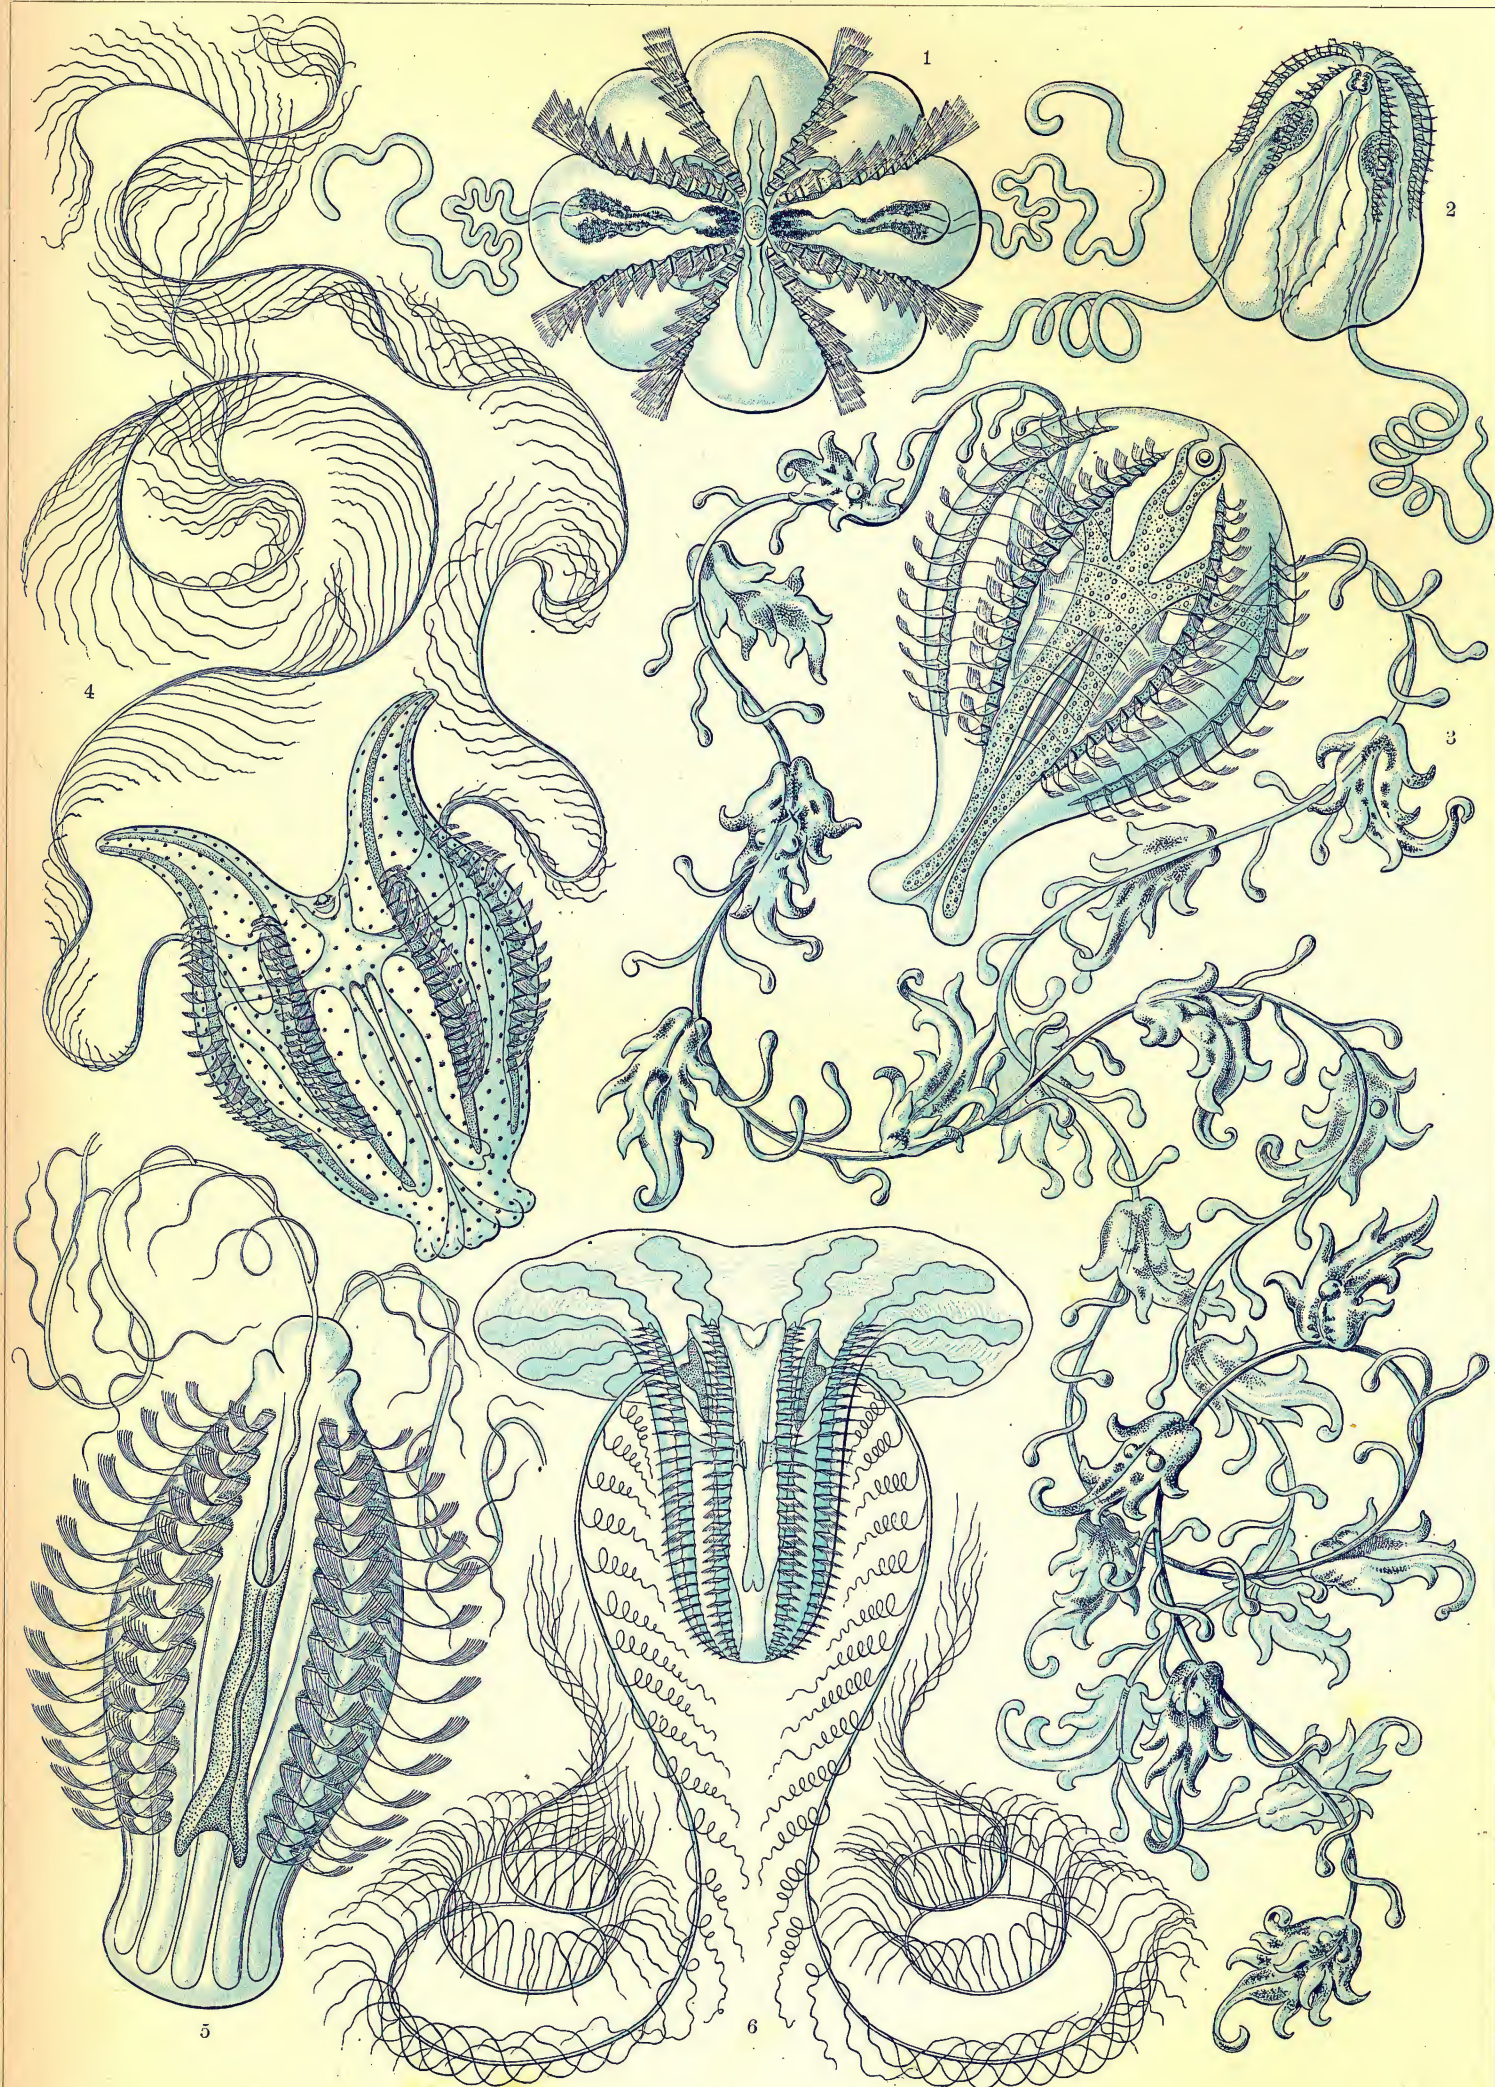

Desmidiæa. — Bierdinge.

Sertulariae. — Reihenspolypen.

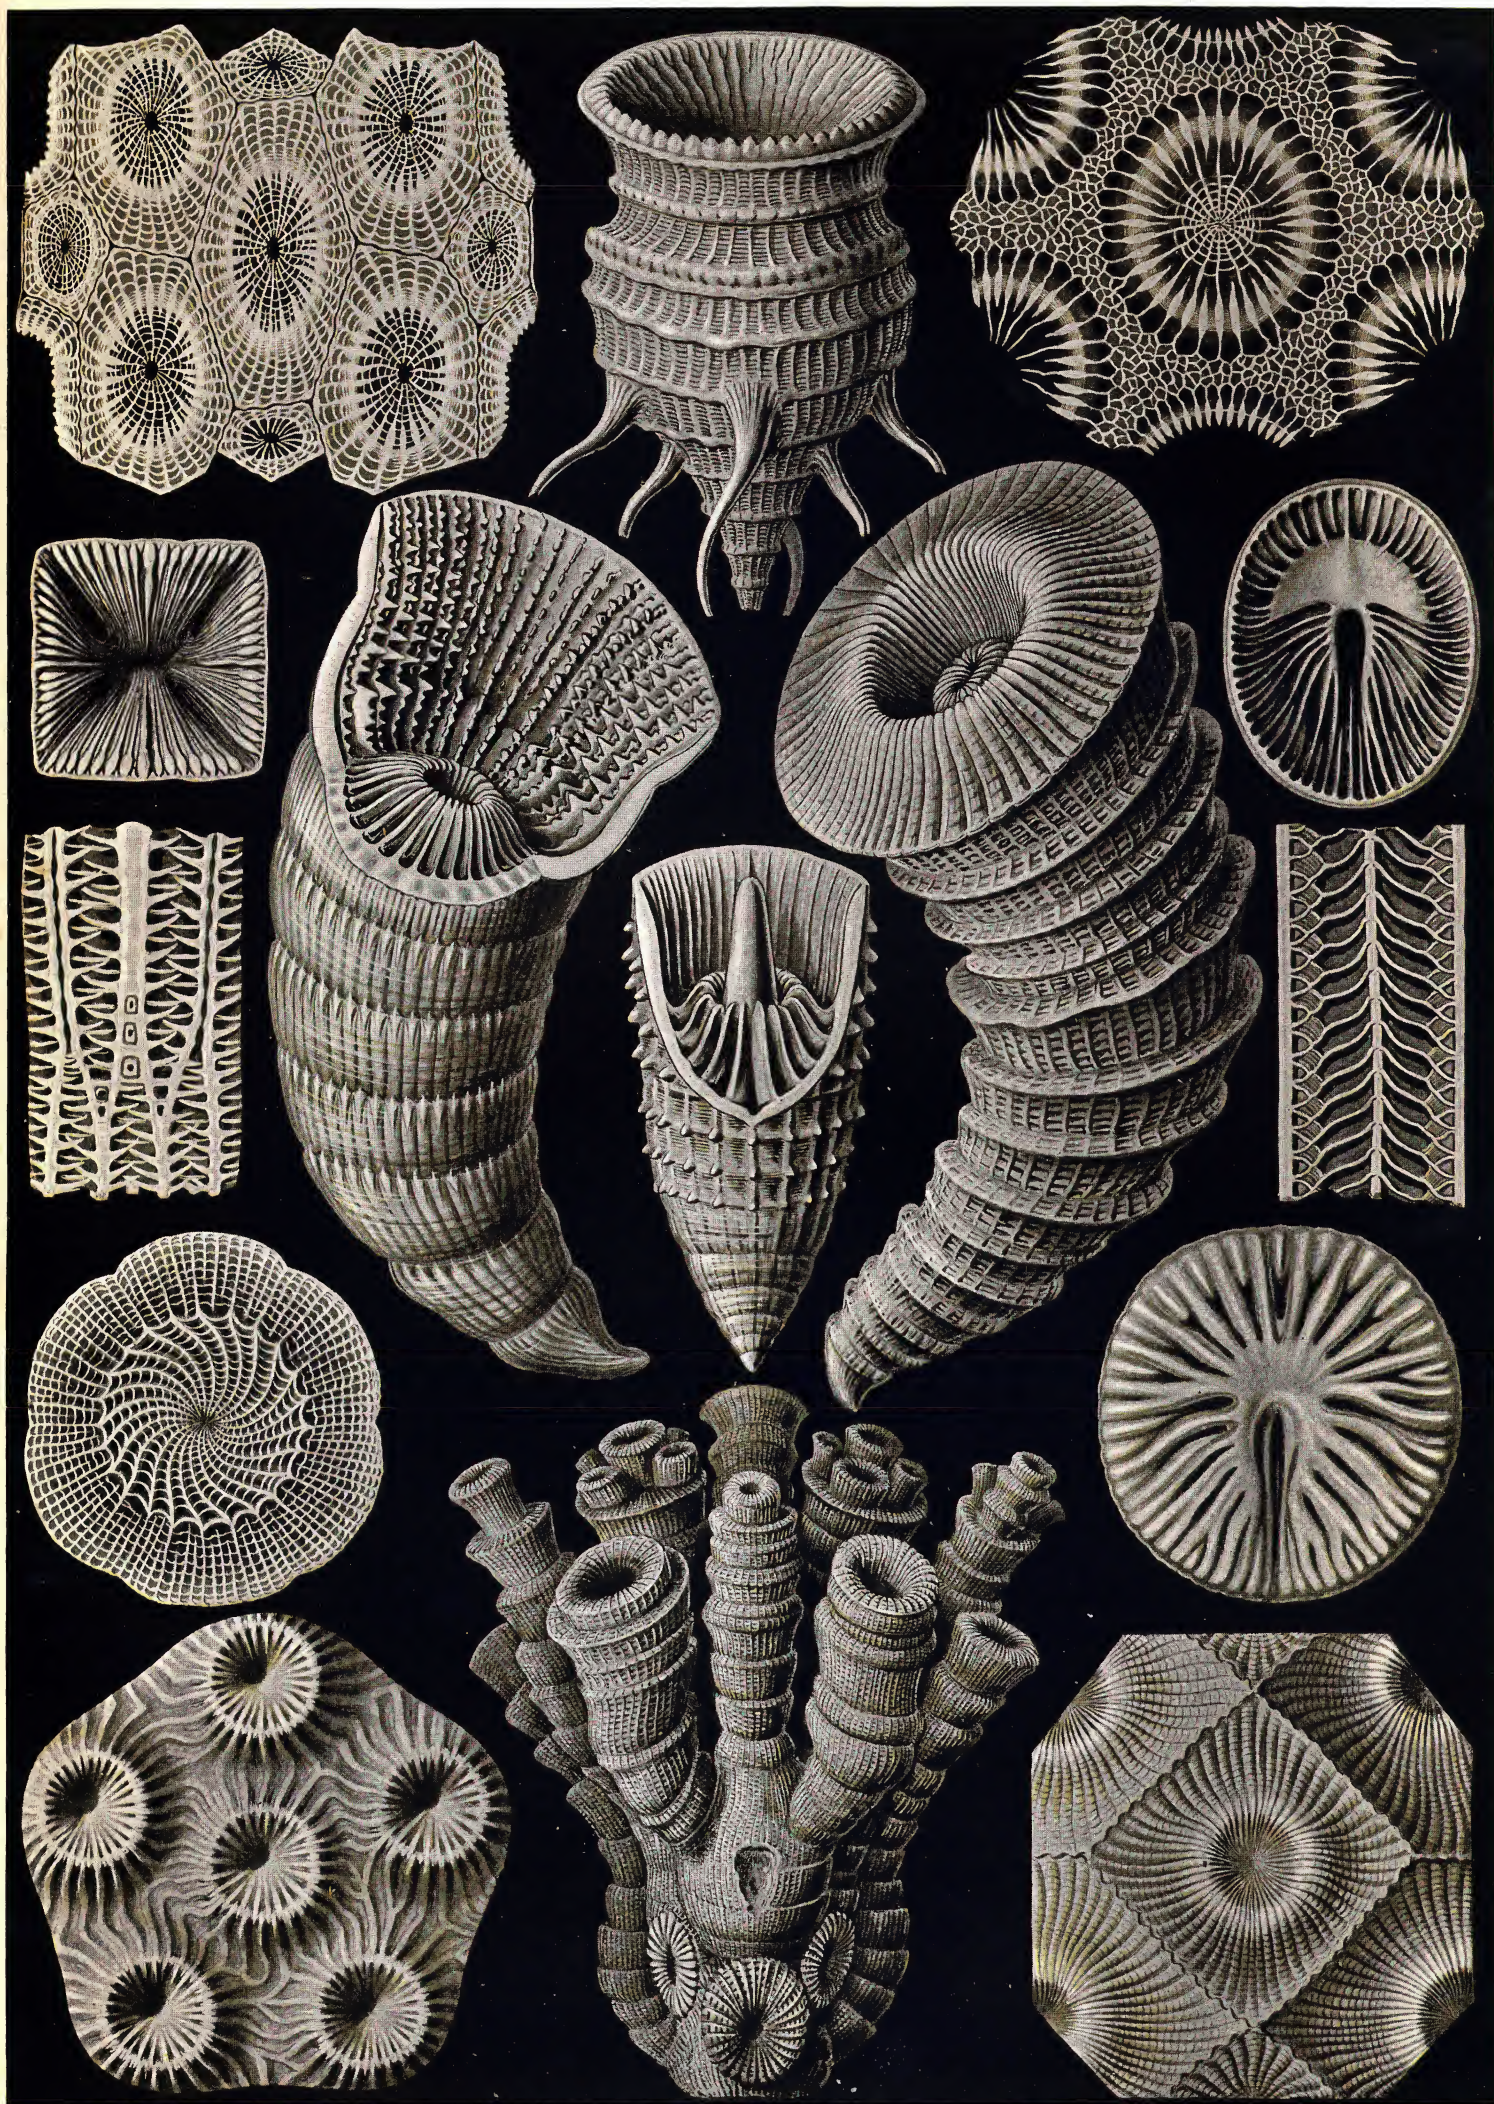

Trachomedusae. — Kolbenquassen.

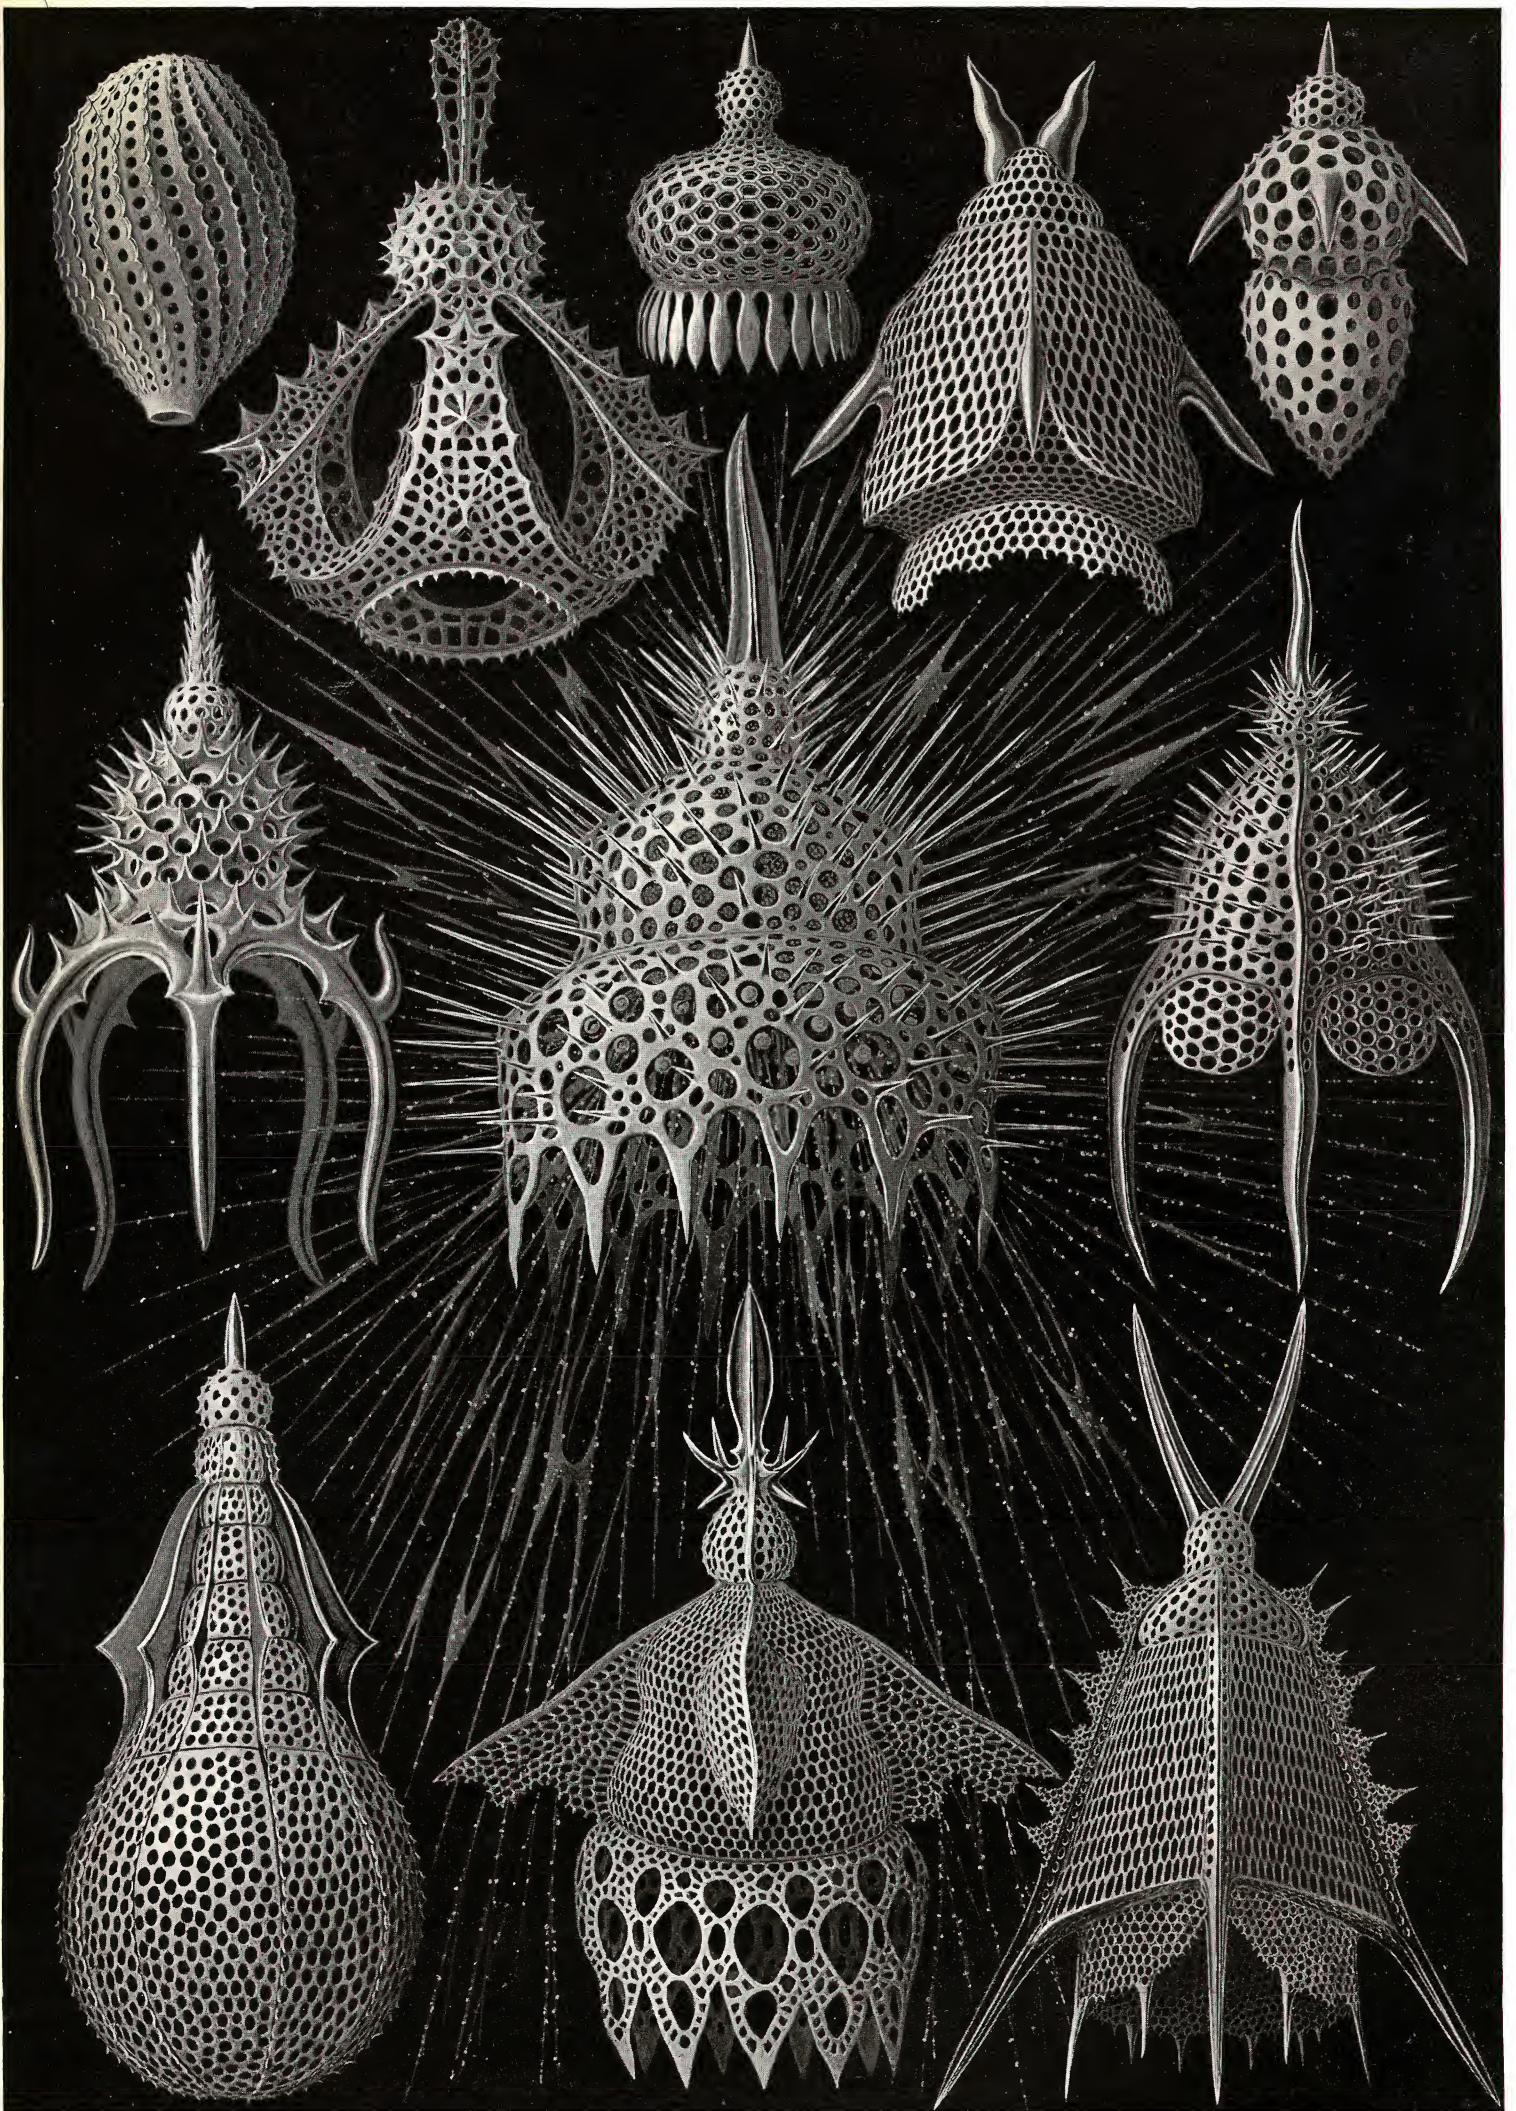

Discomedusae. — Scheibenquassen.

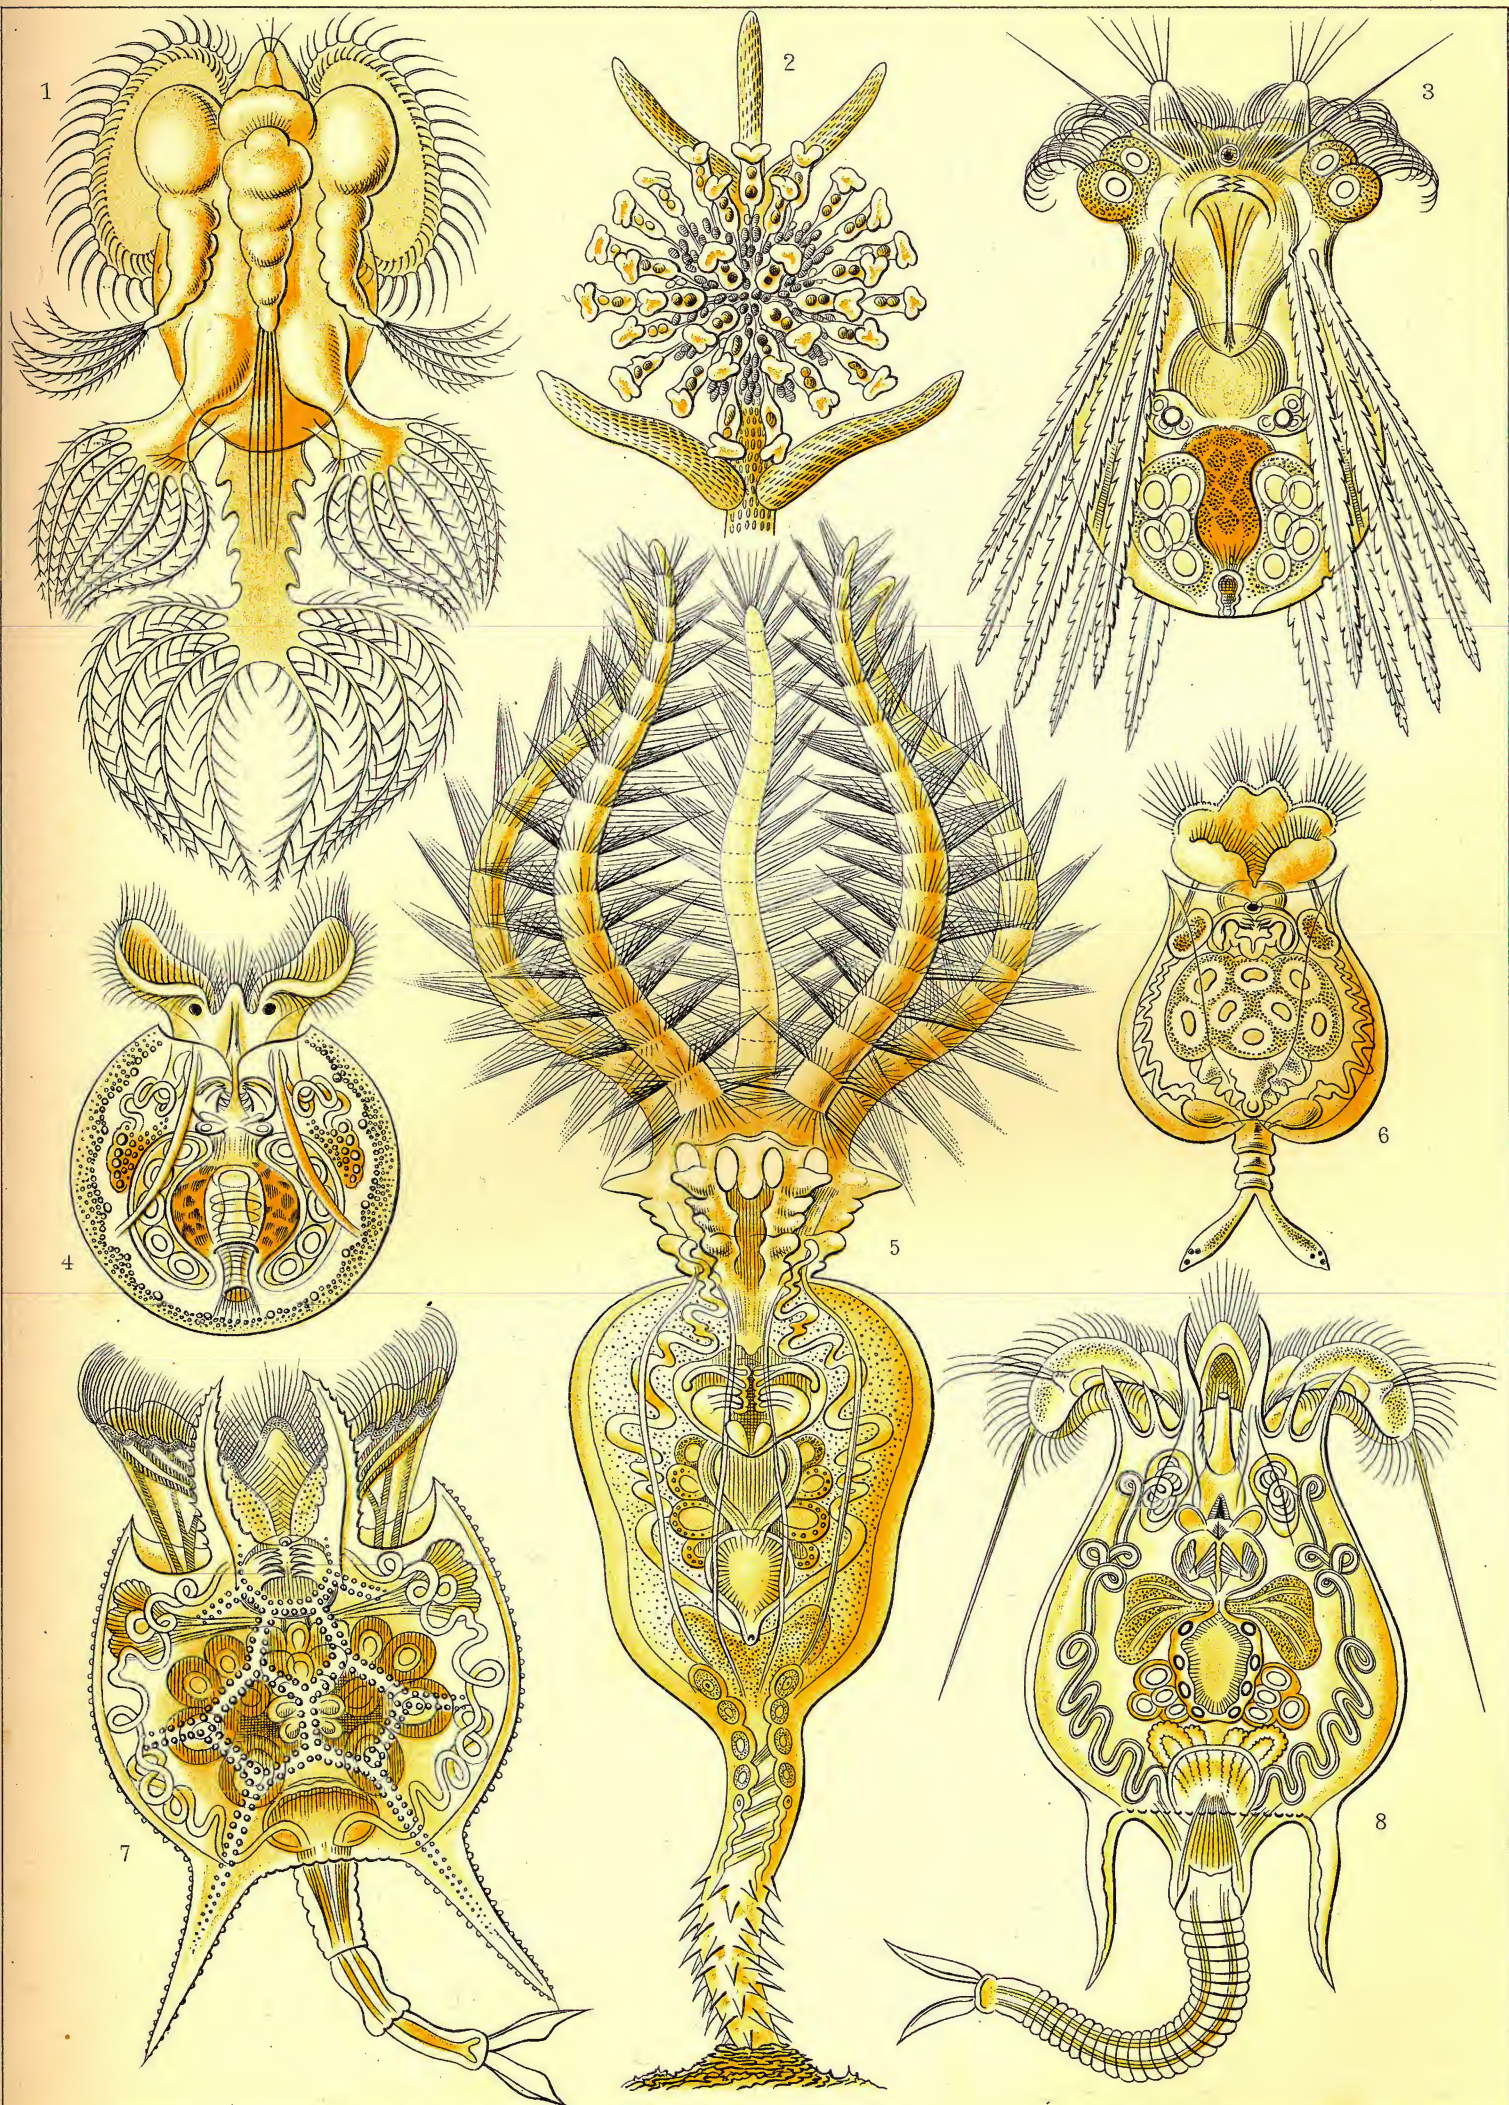

Tetracoralla. — Vierstrahlige Sternkorallen.

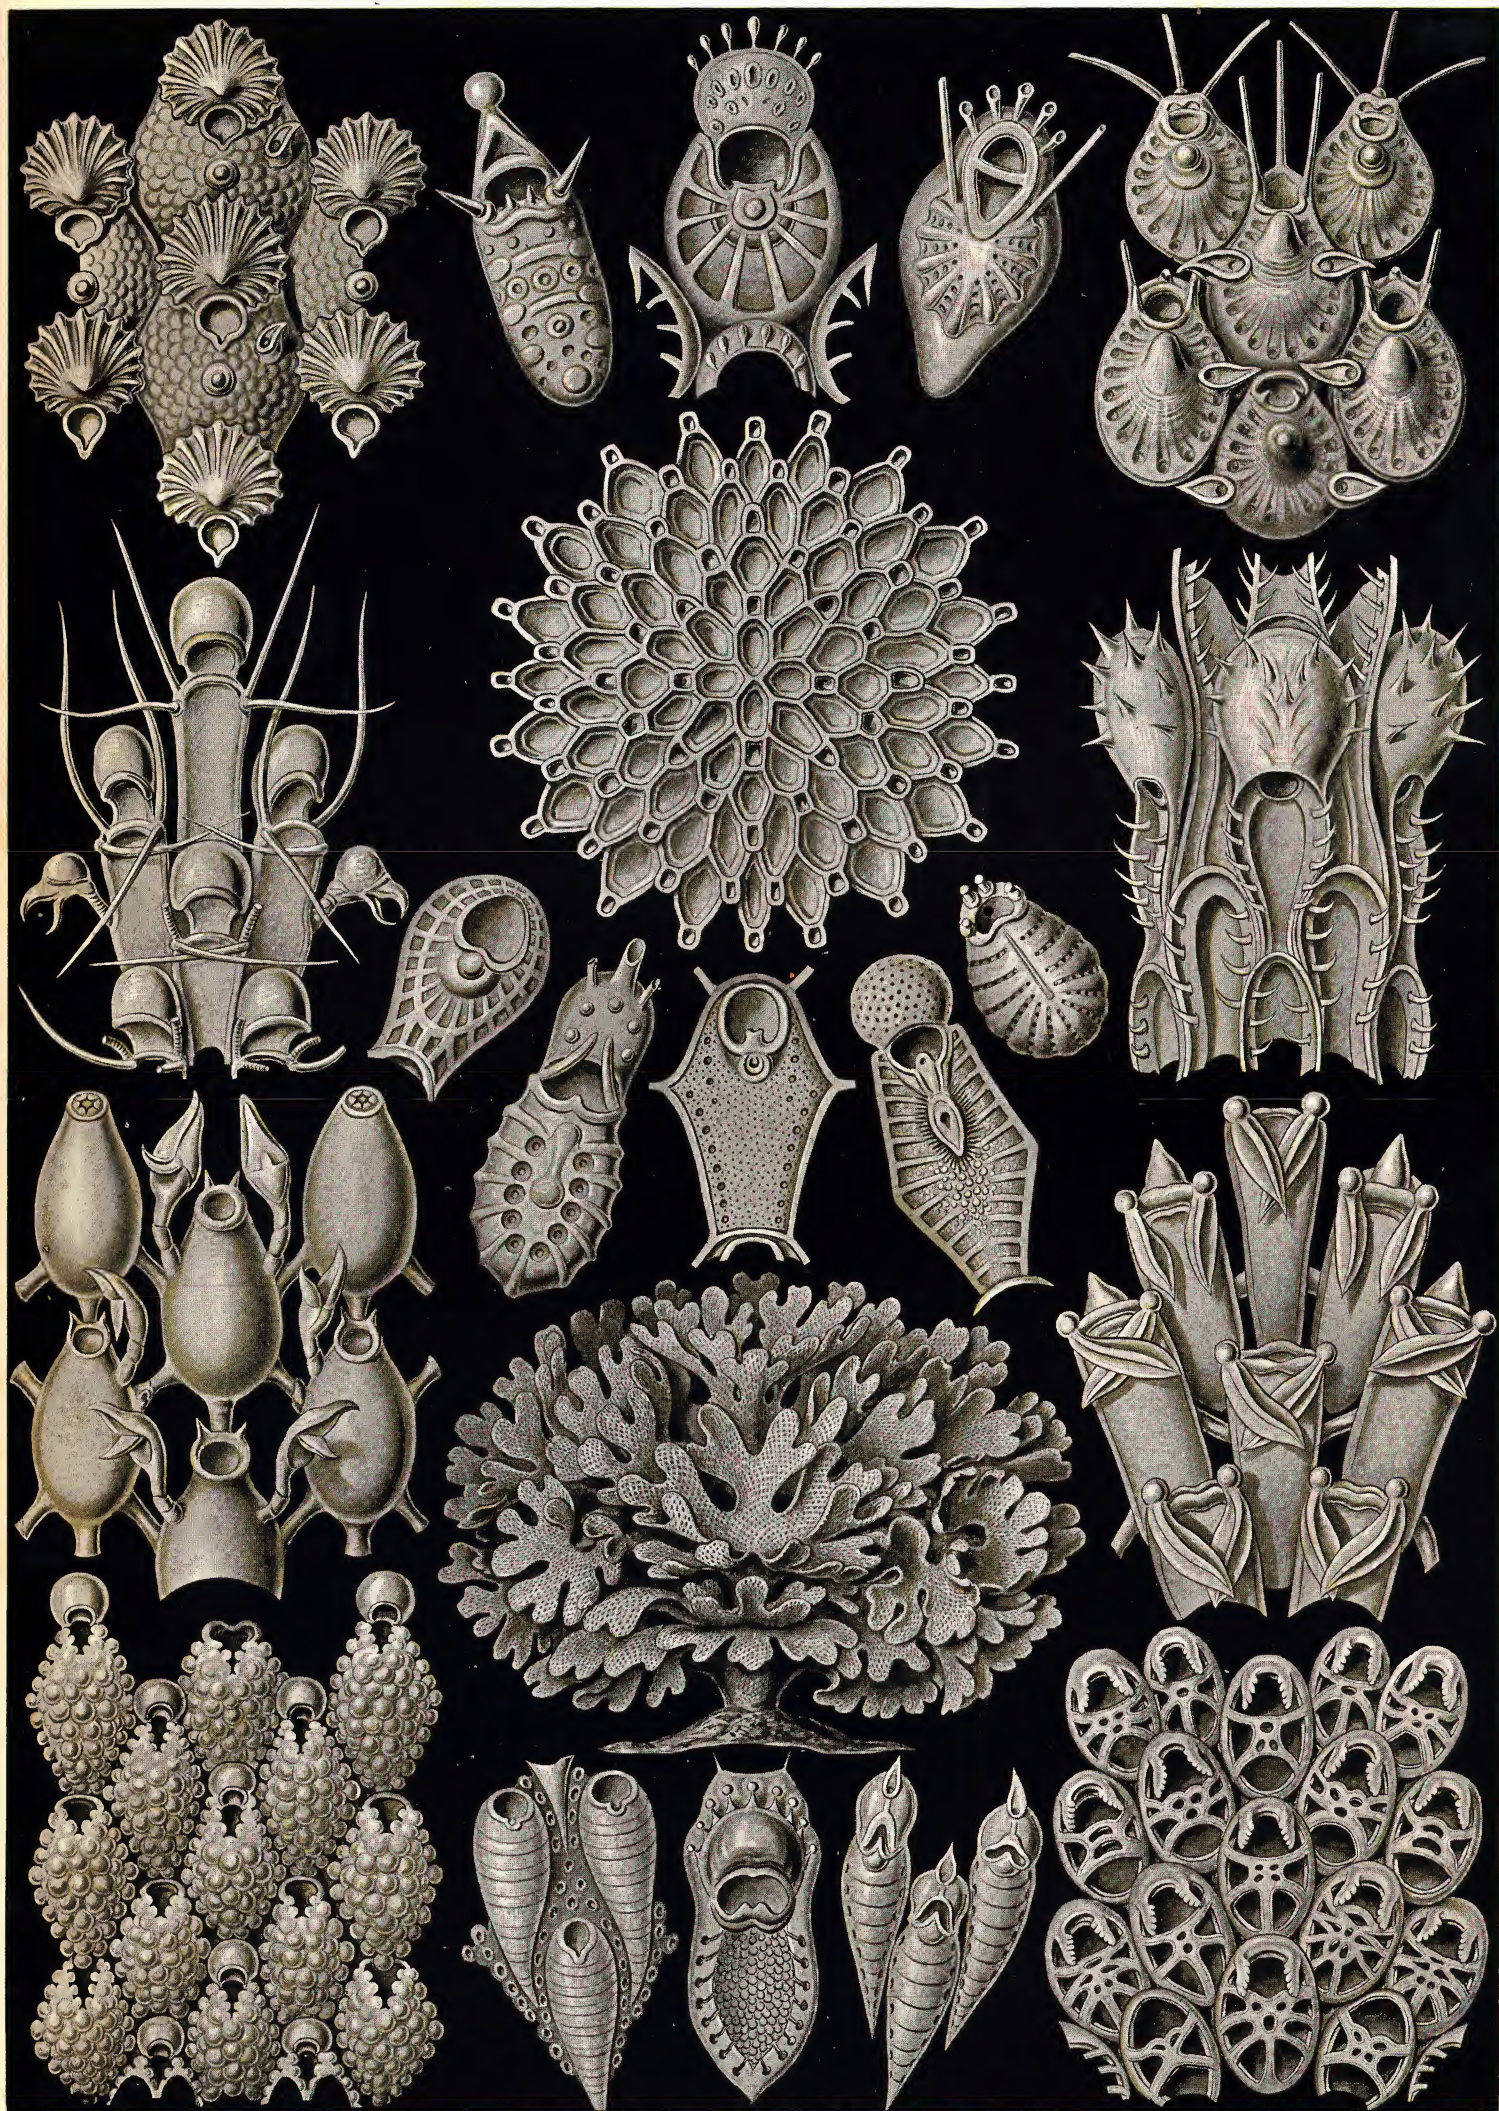

Echinidea. — Igelsterne.

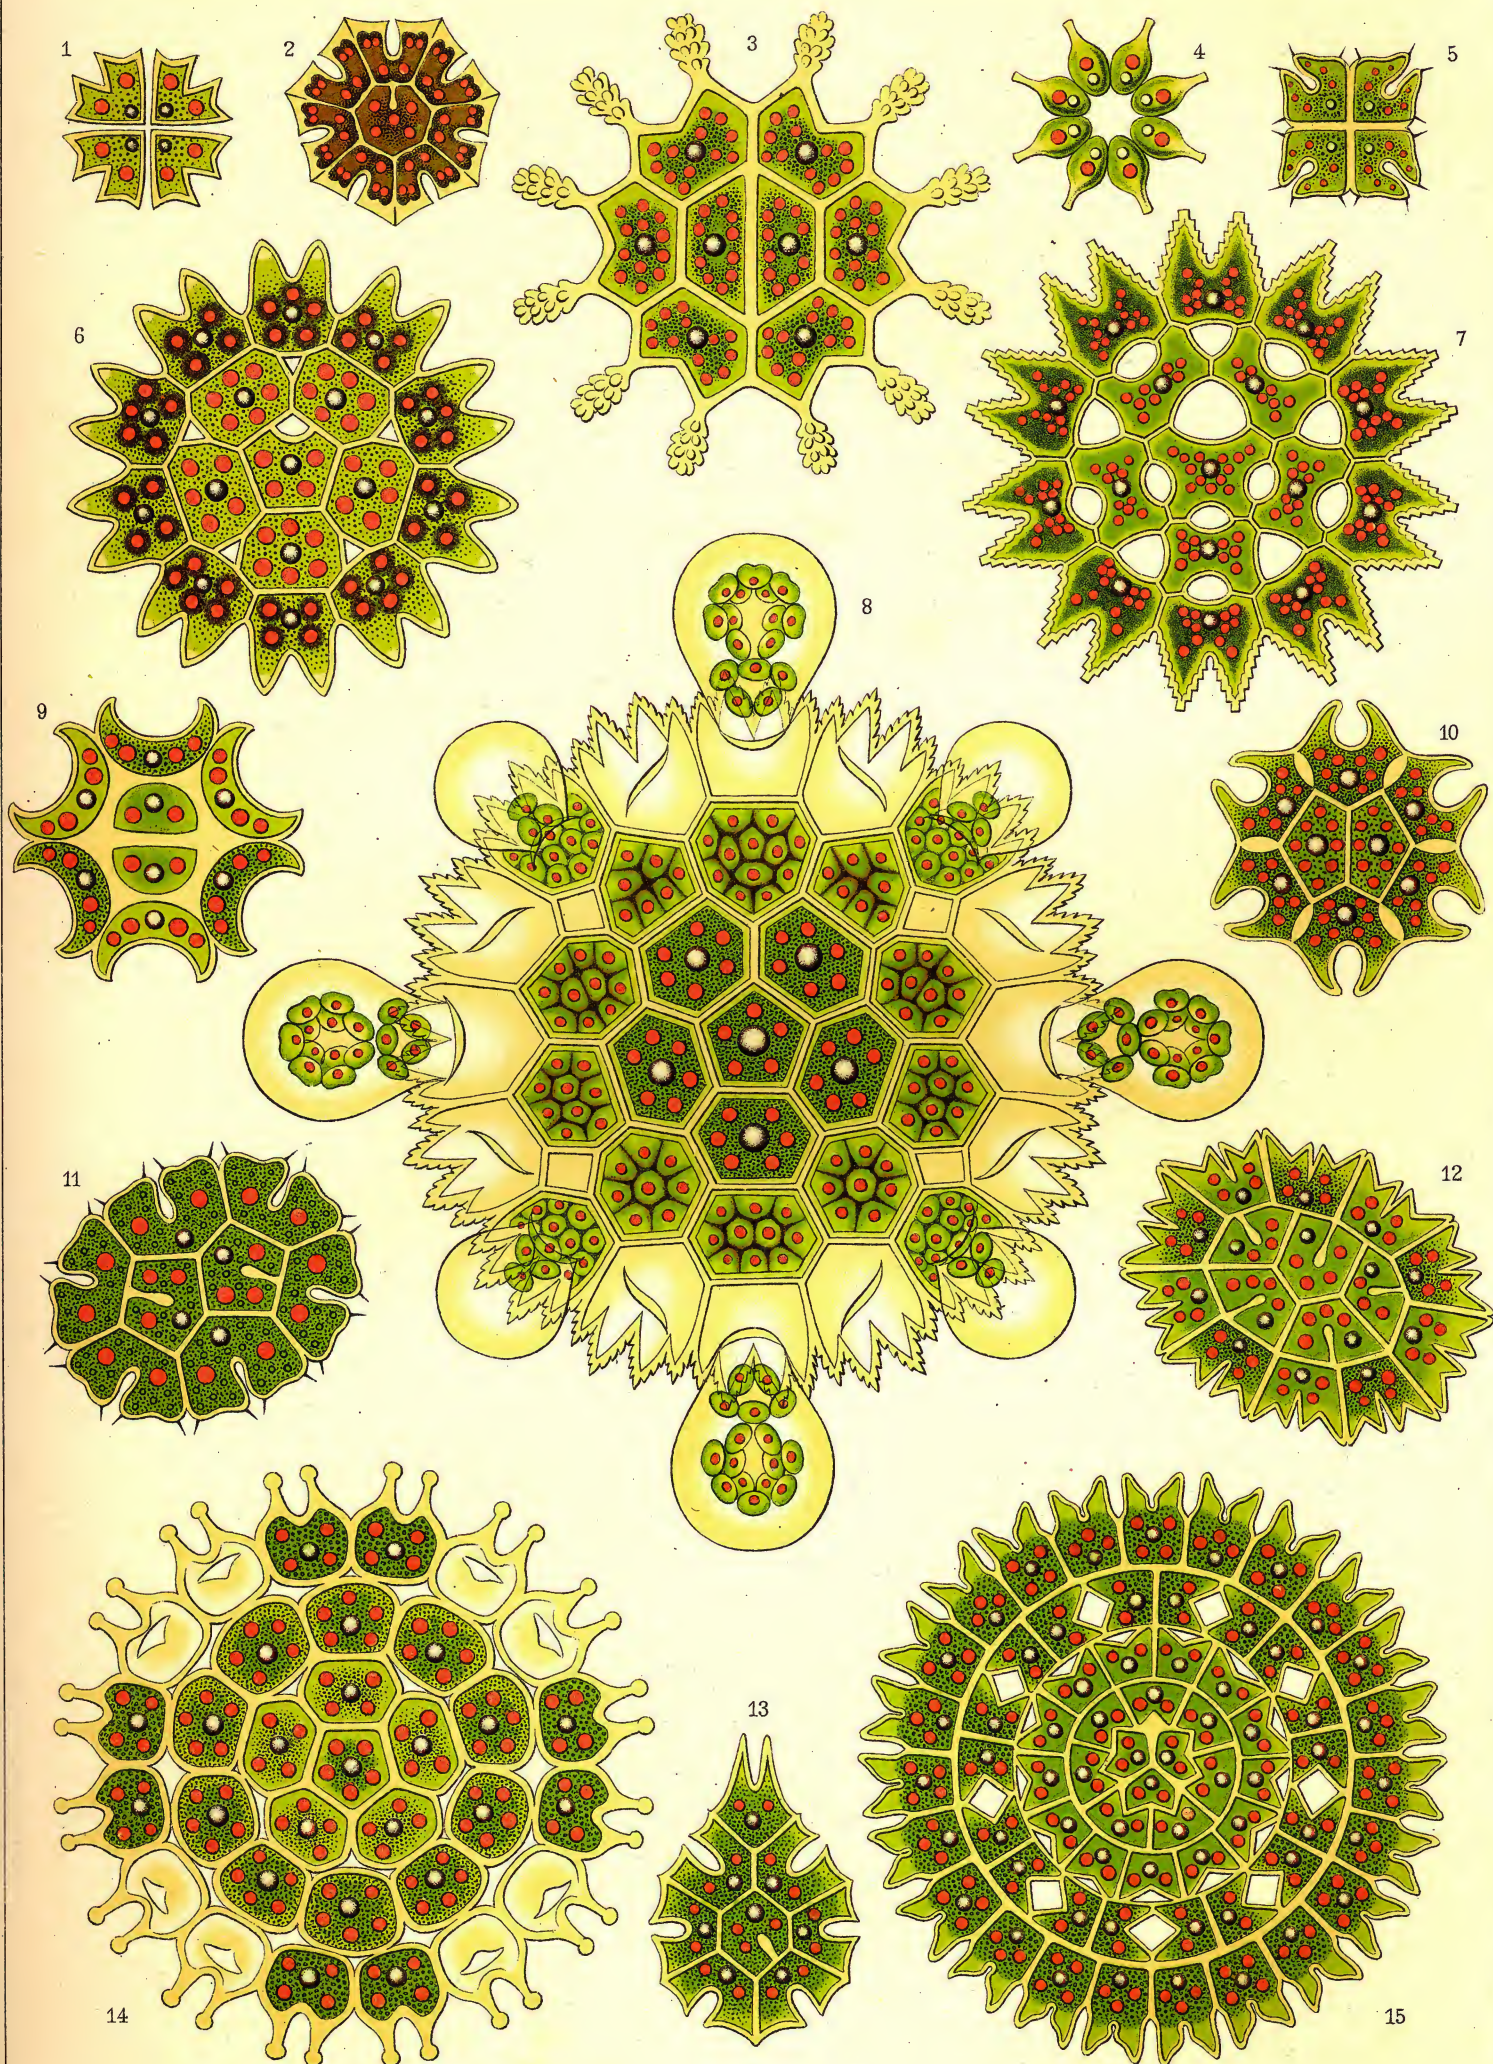

Cyrtoidea. — Flaschenstrahlringe.

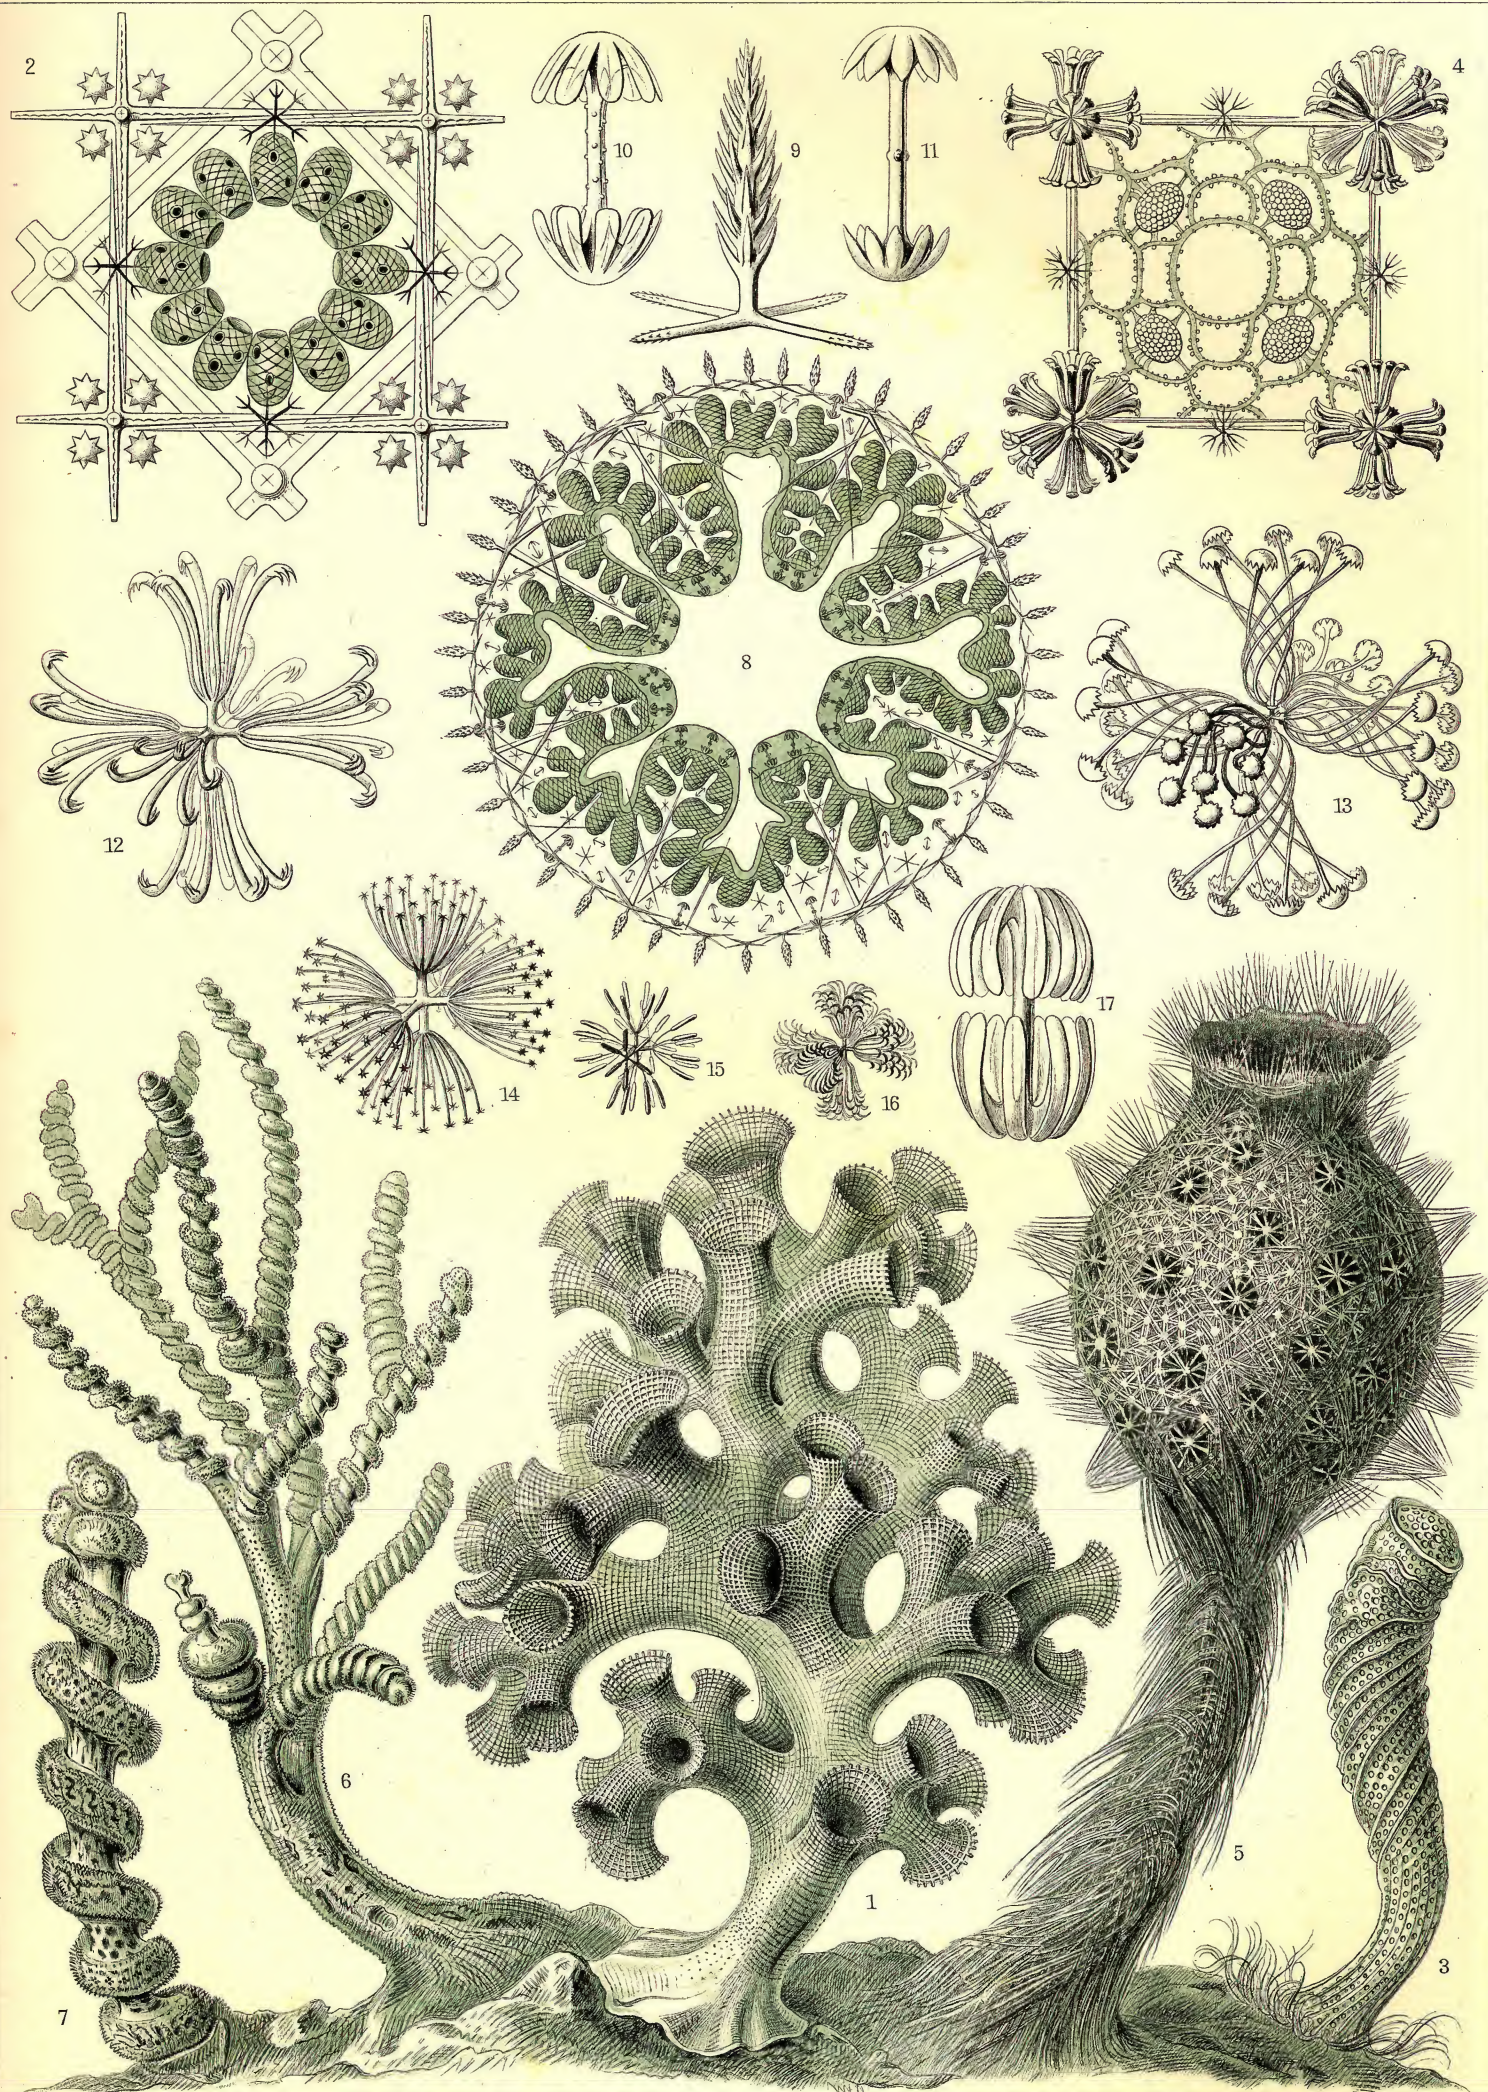

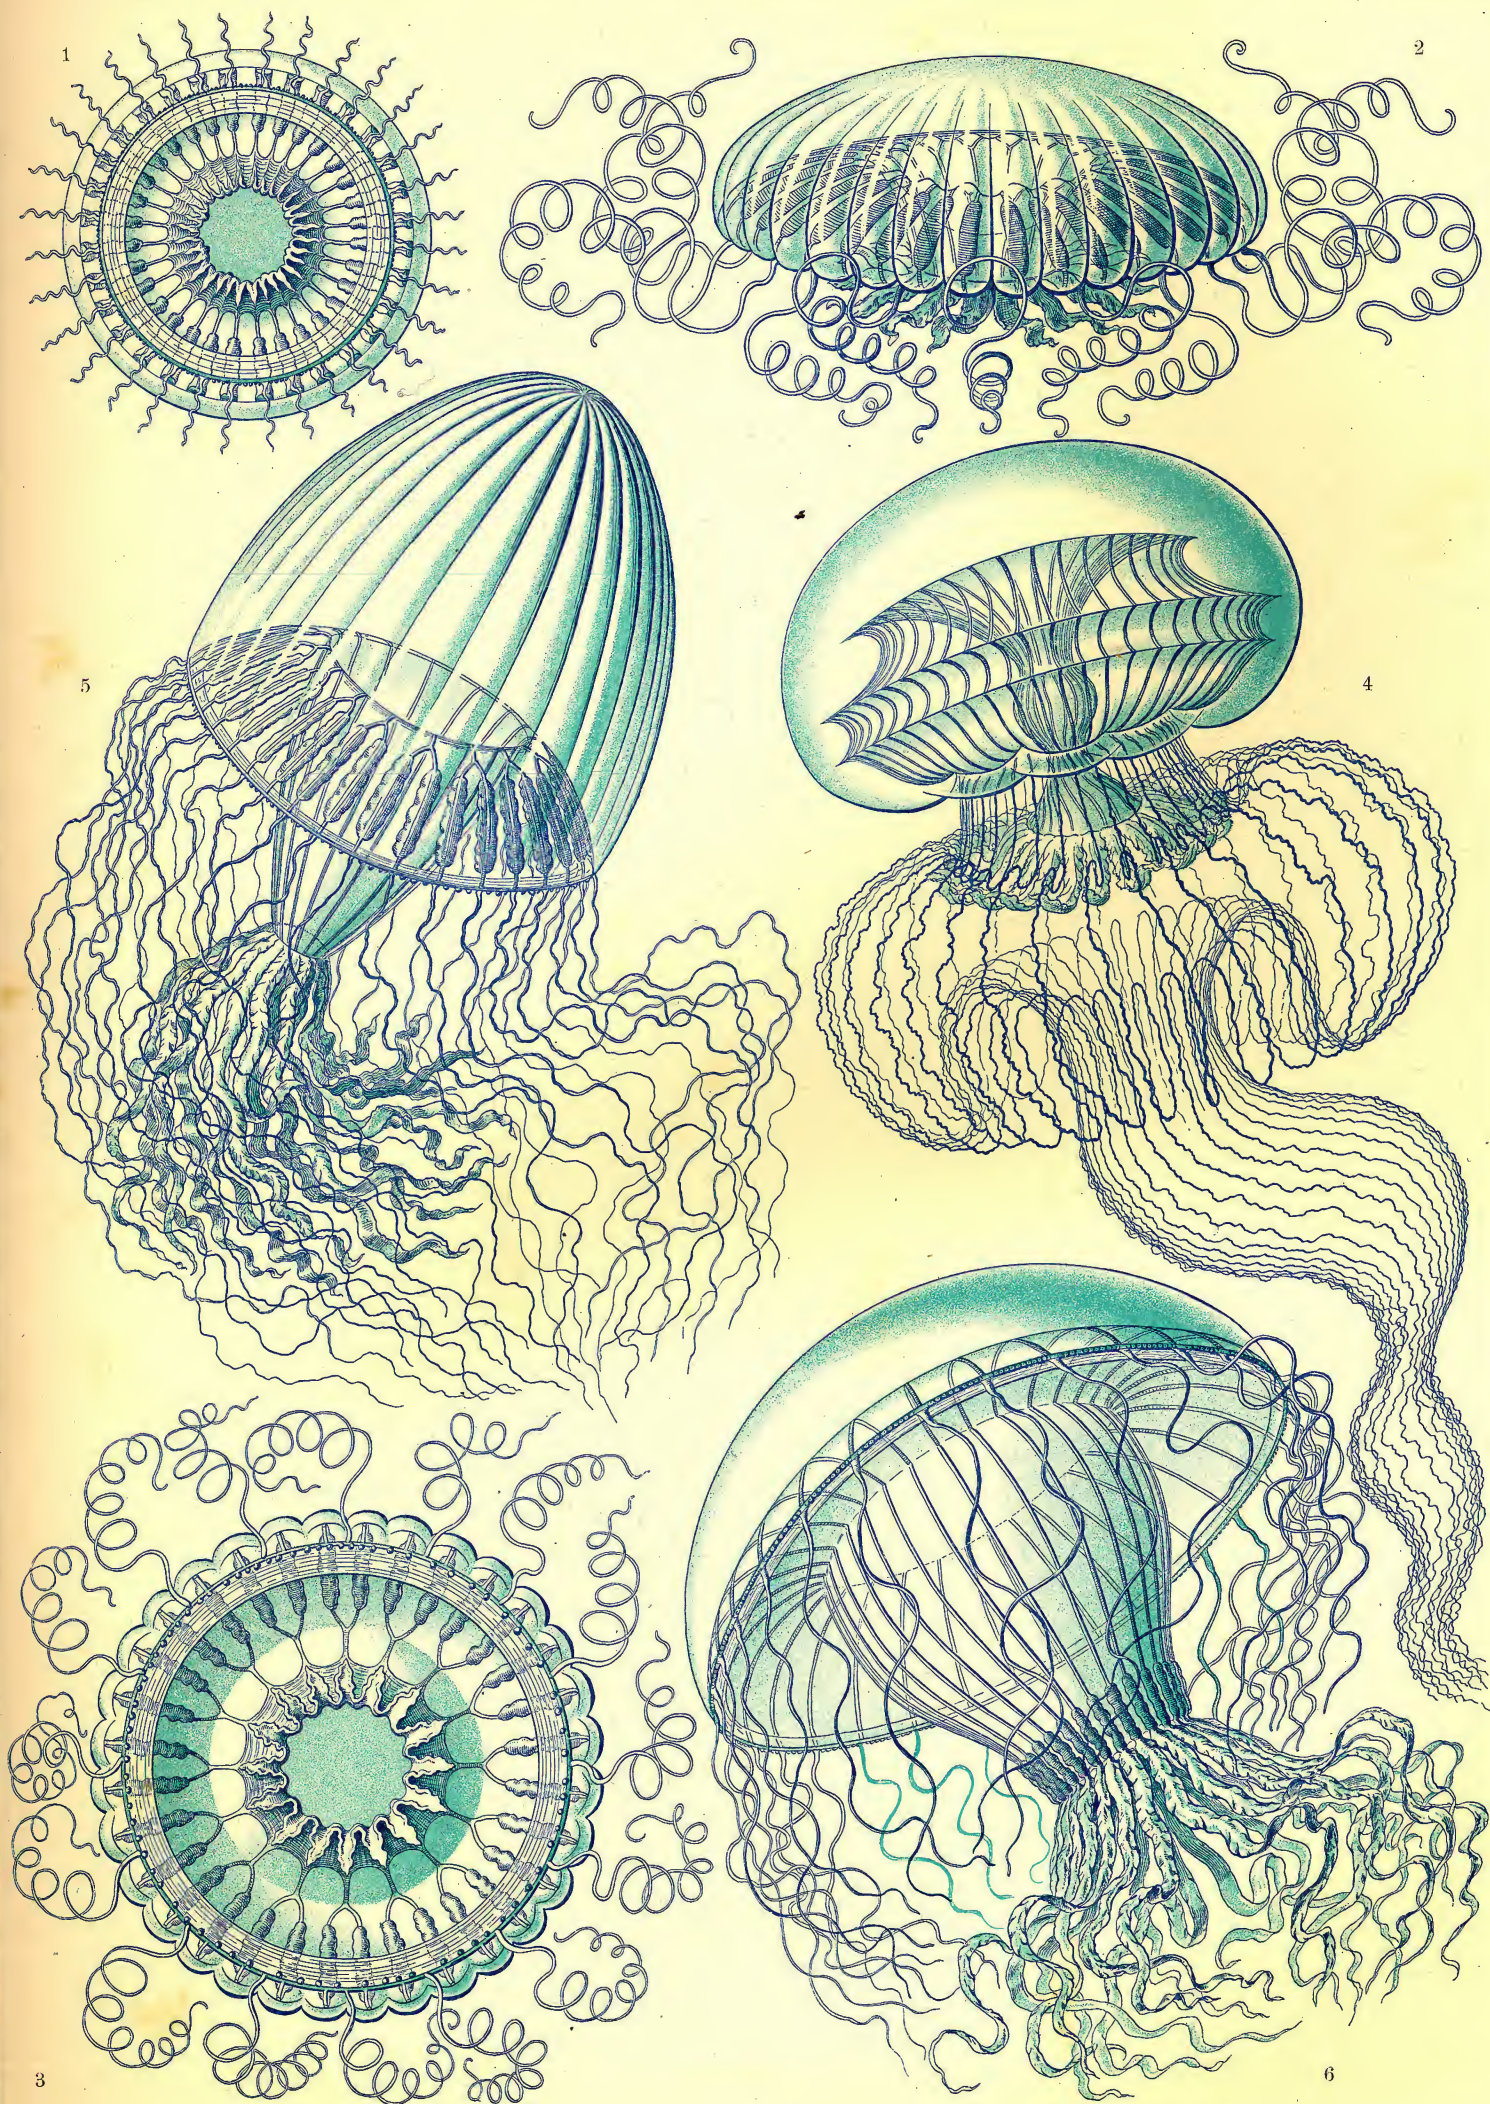

Bryozoa. — Moostiere.

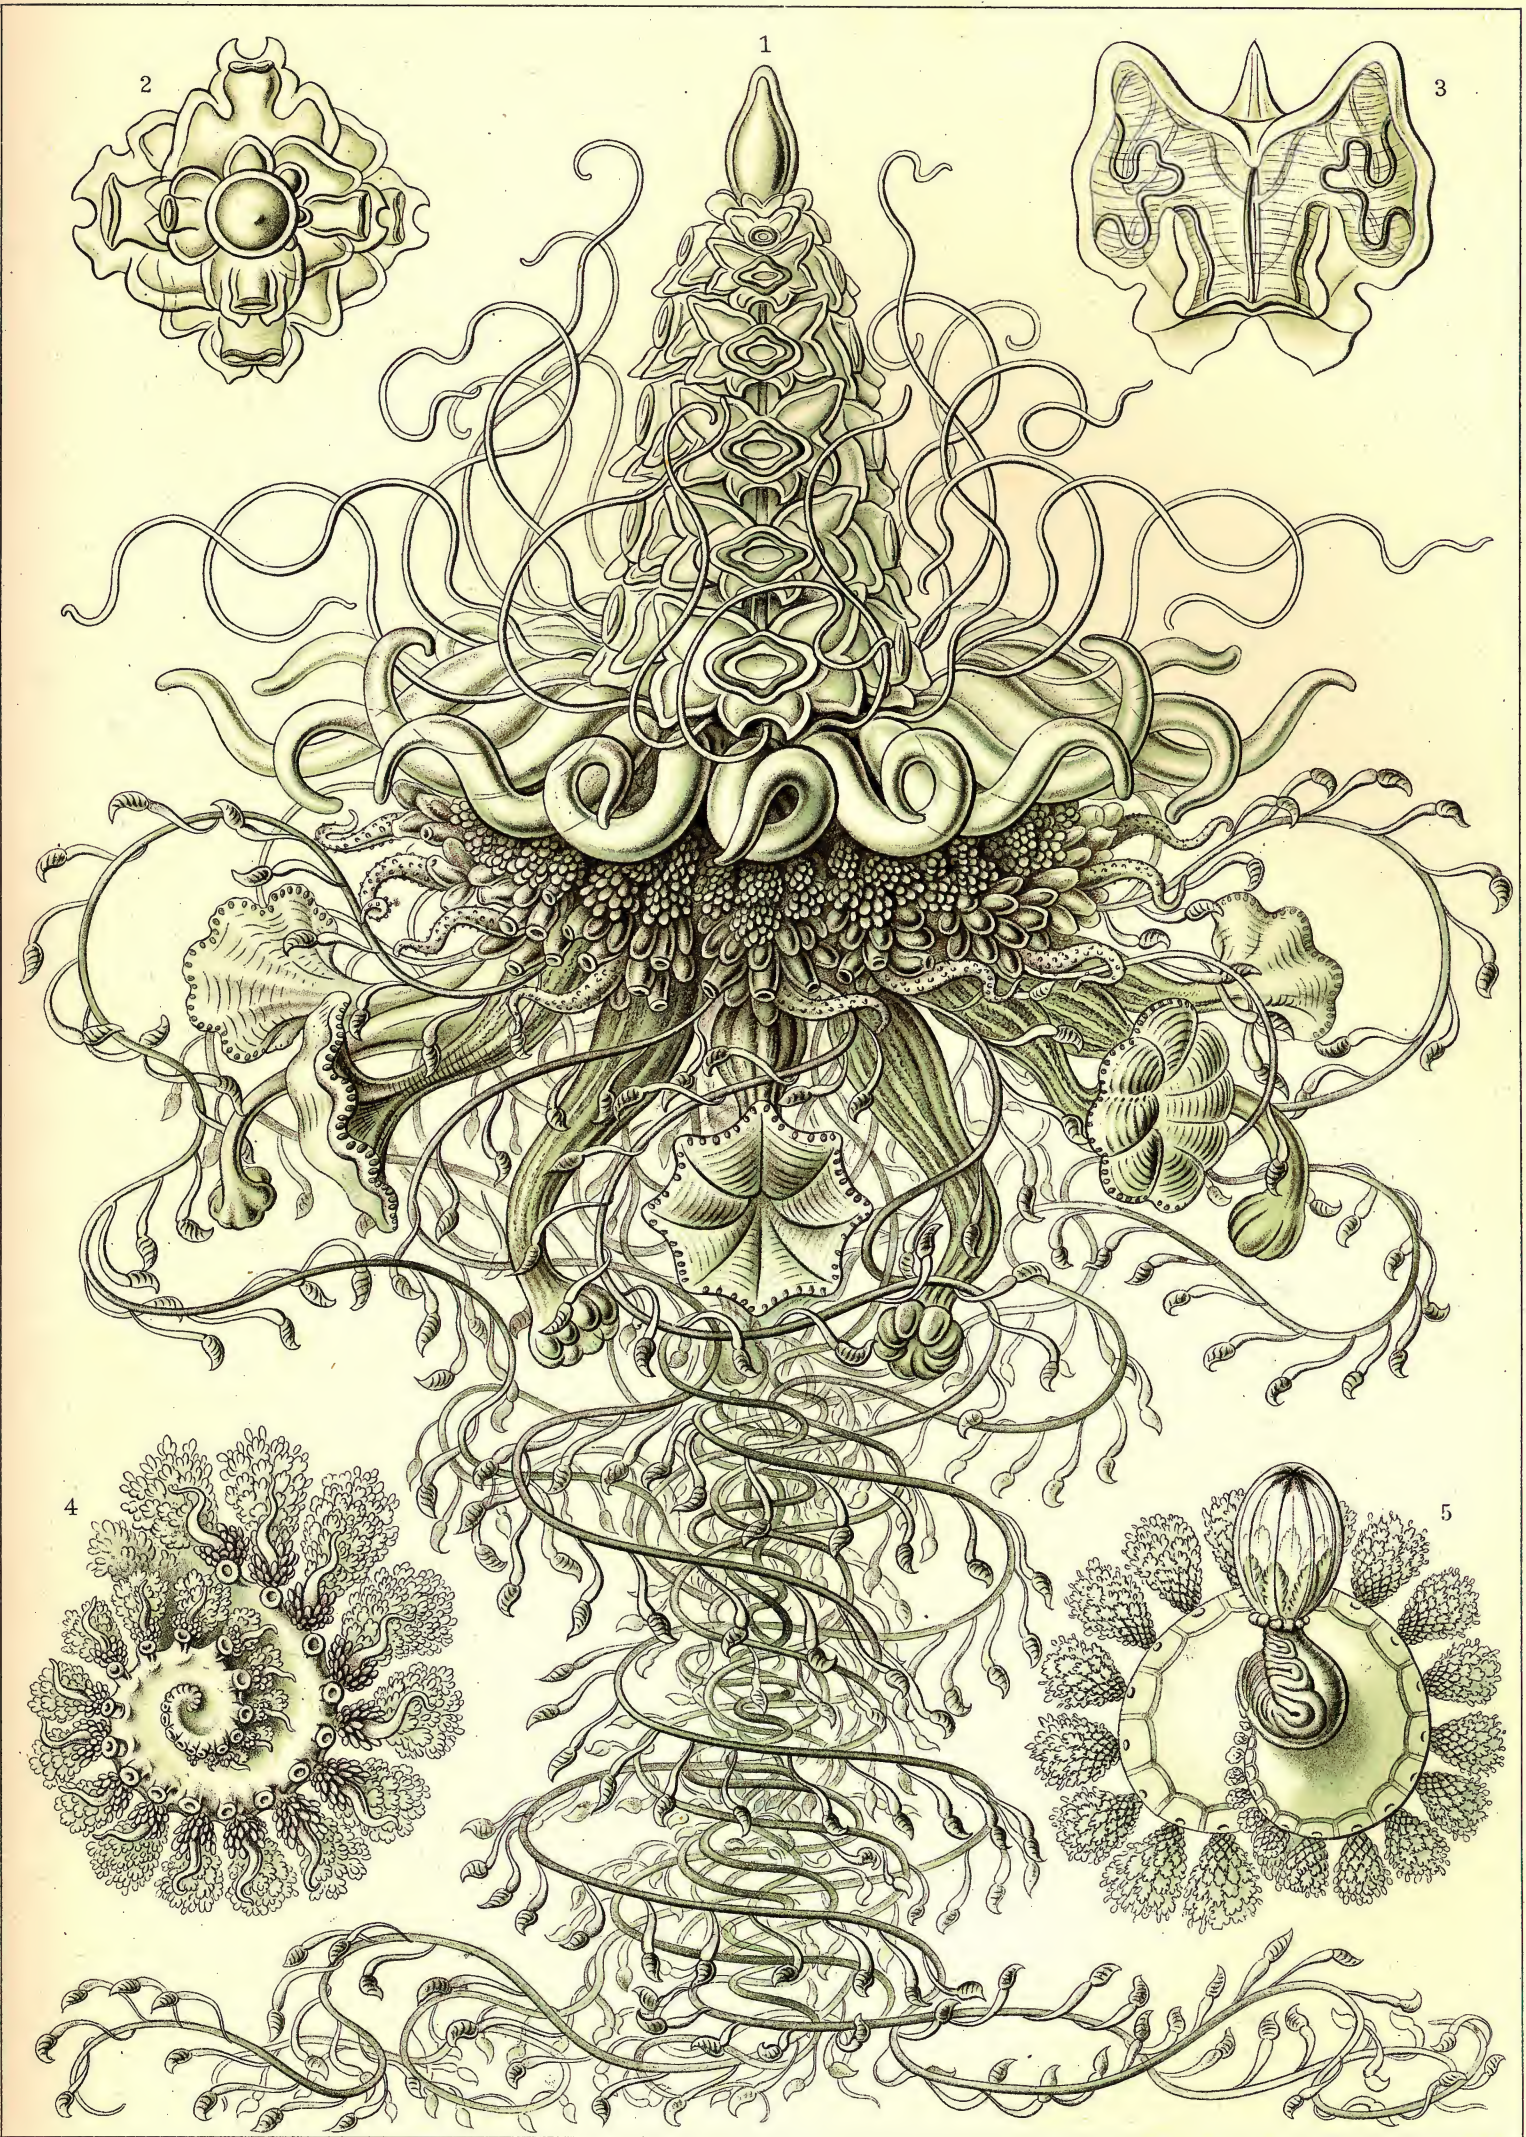

Melethallia. — Gesellige Algetten.

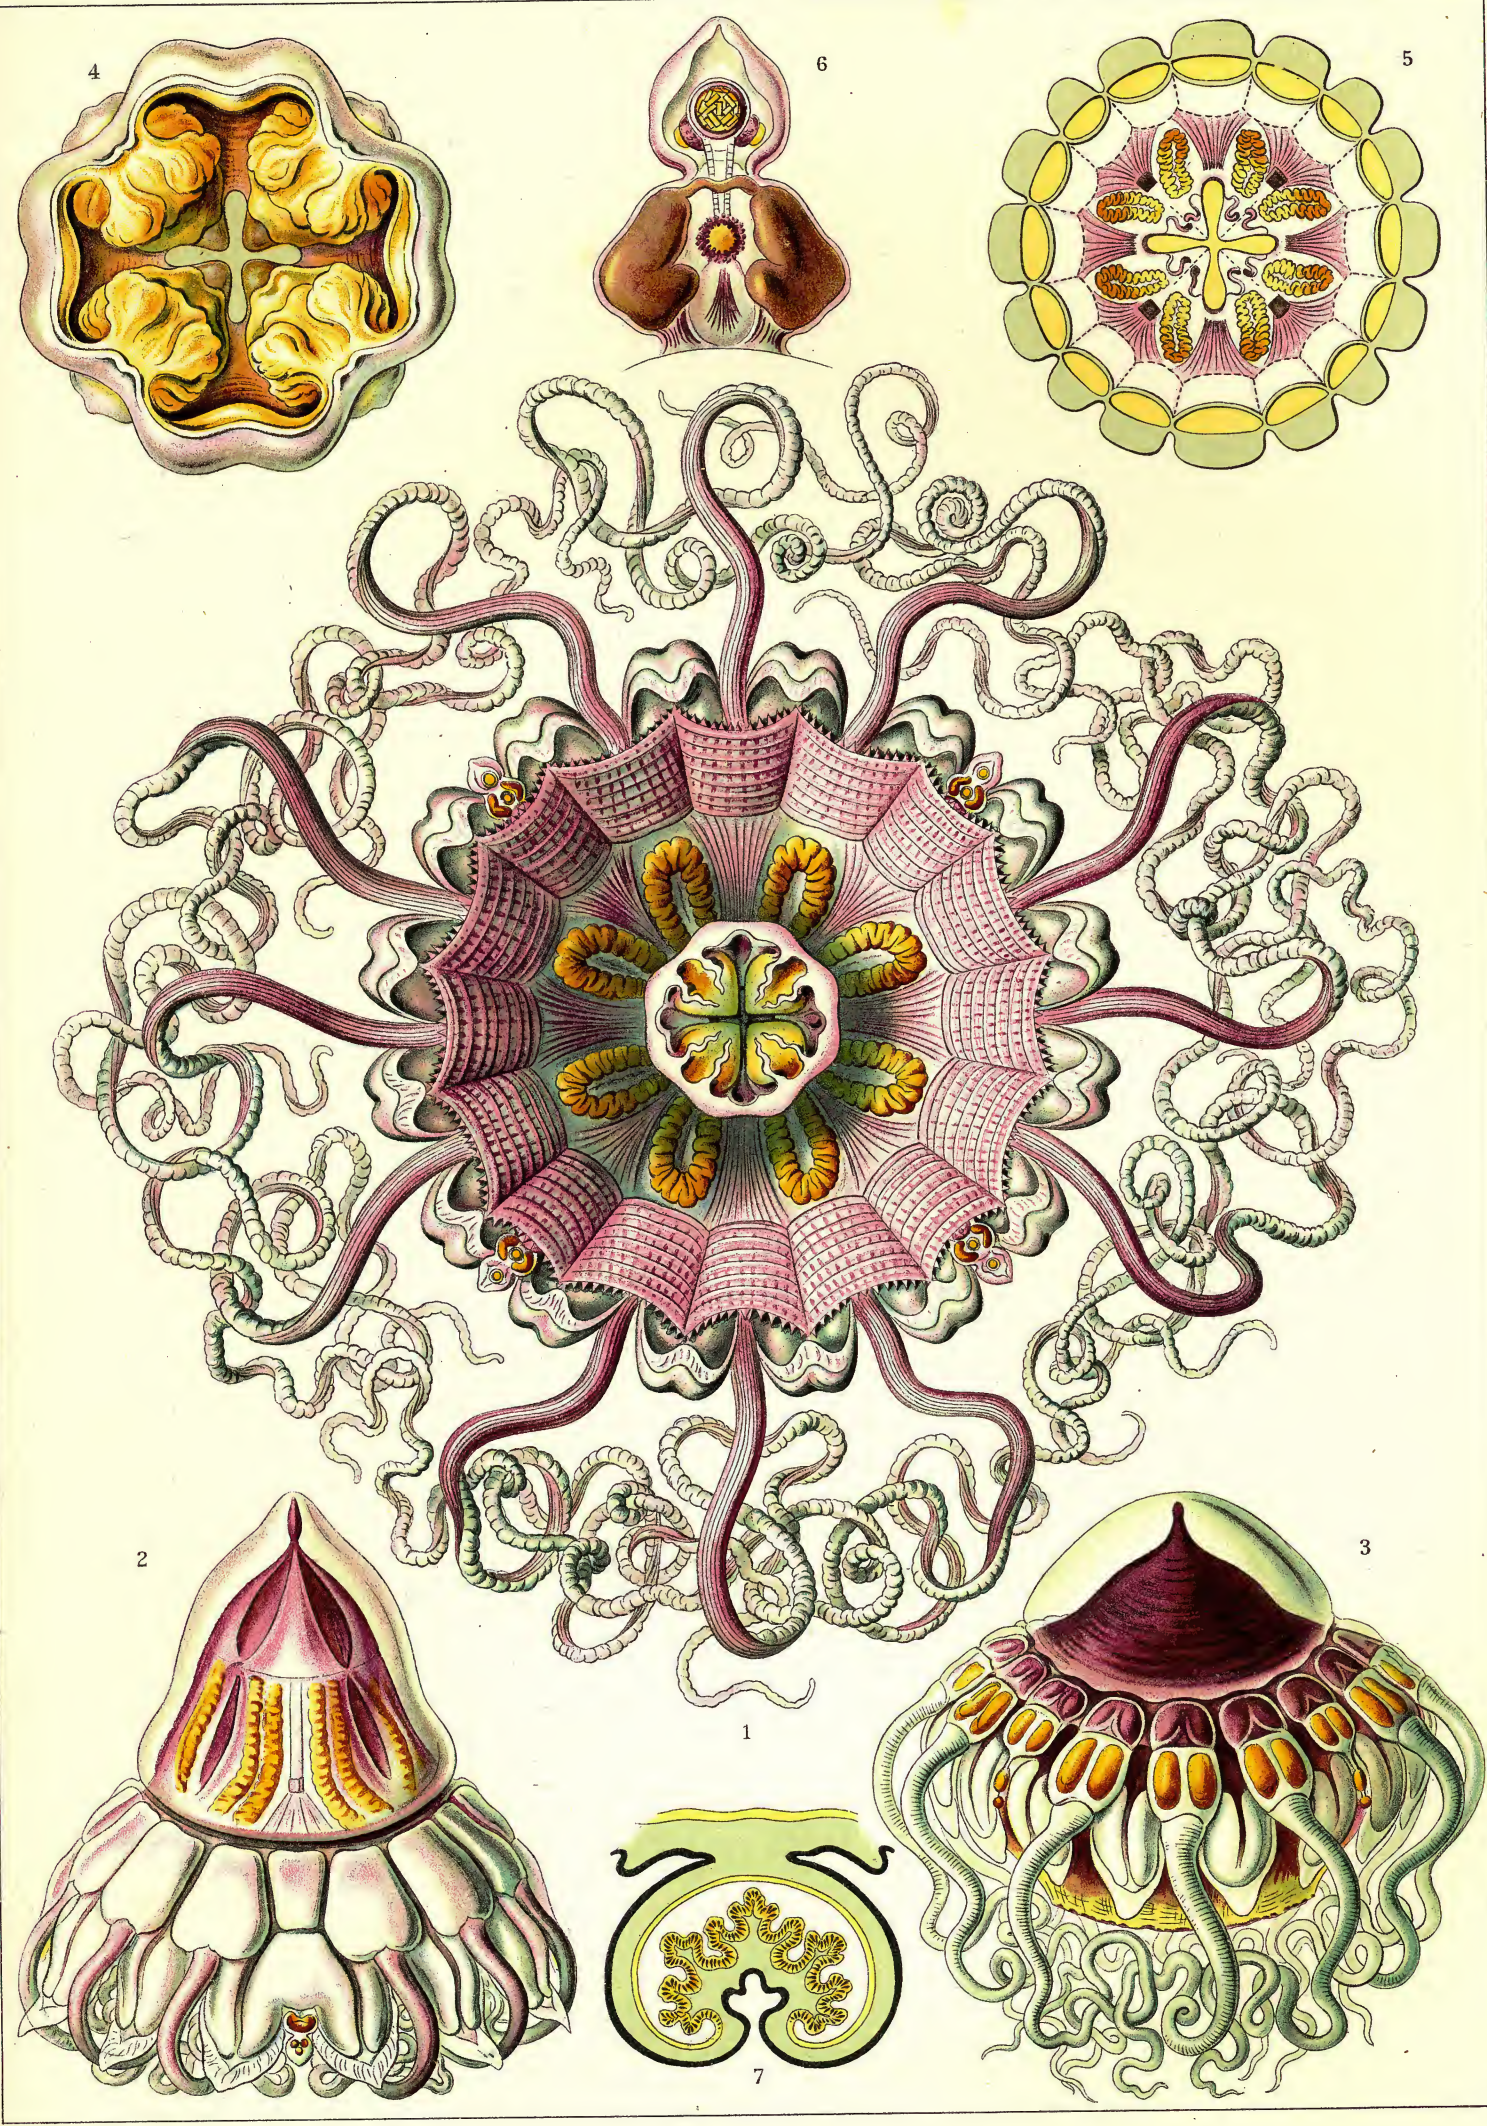

Hexactinellae. — Glaschwämme.

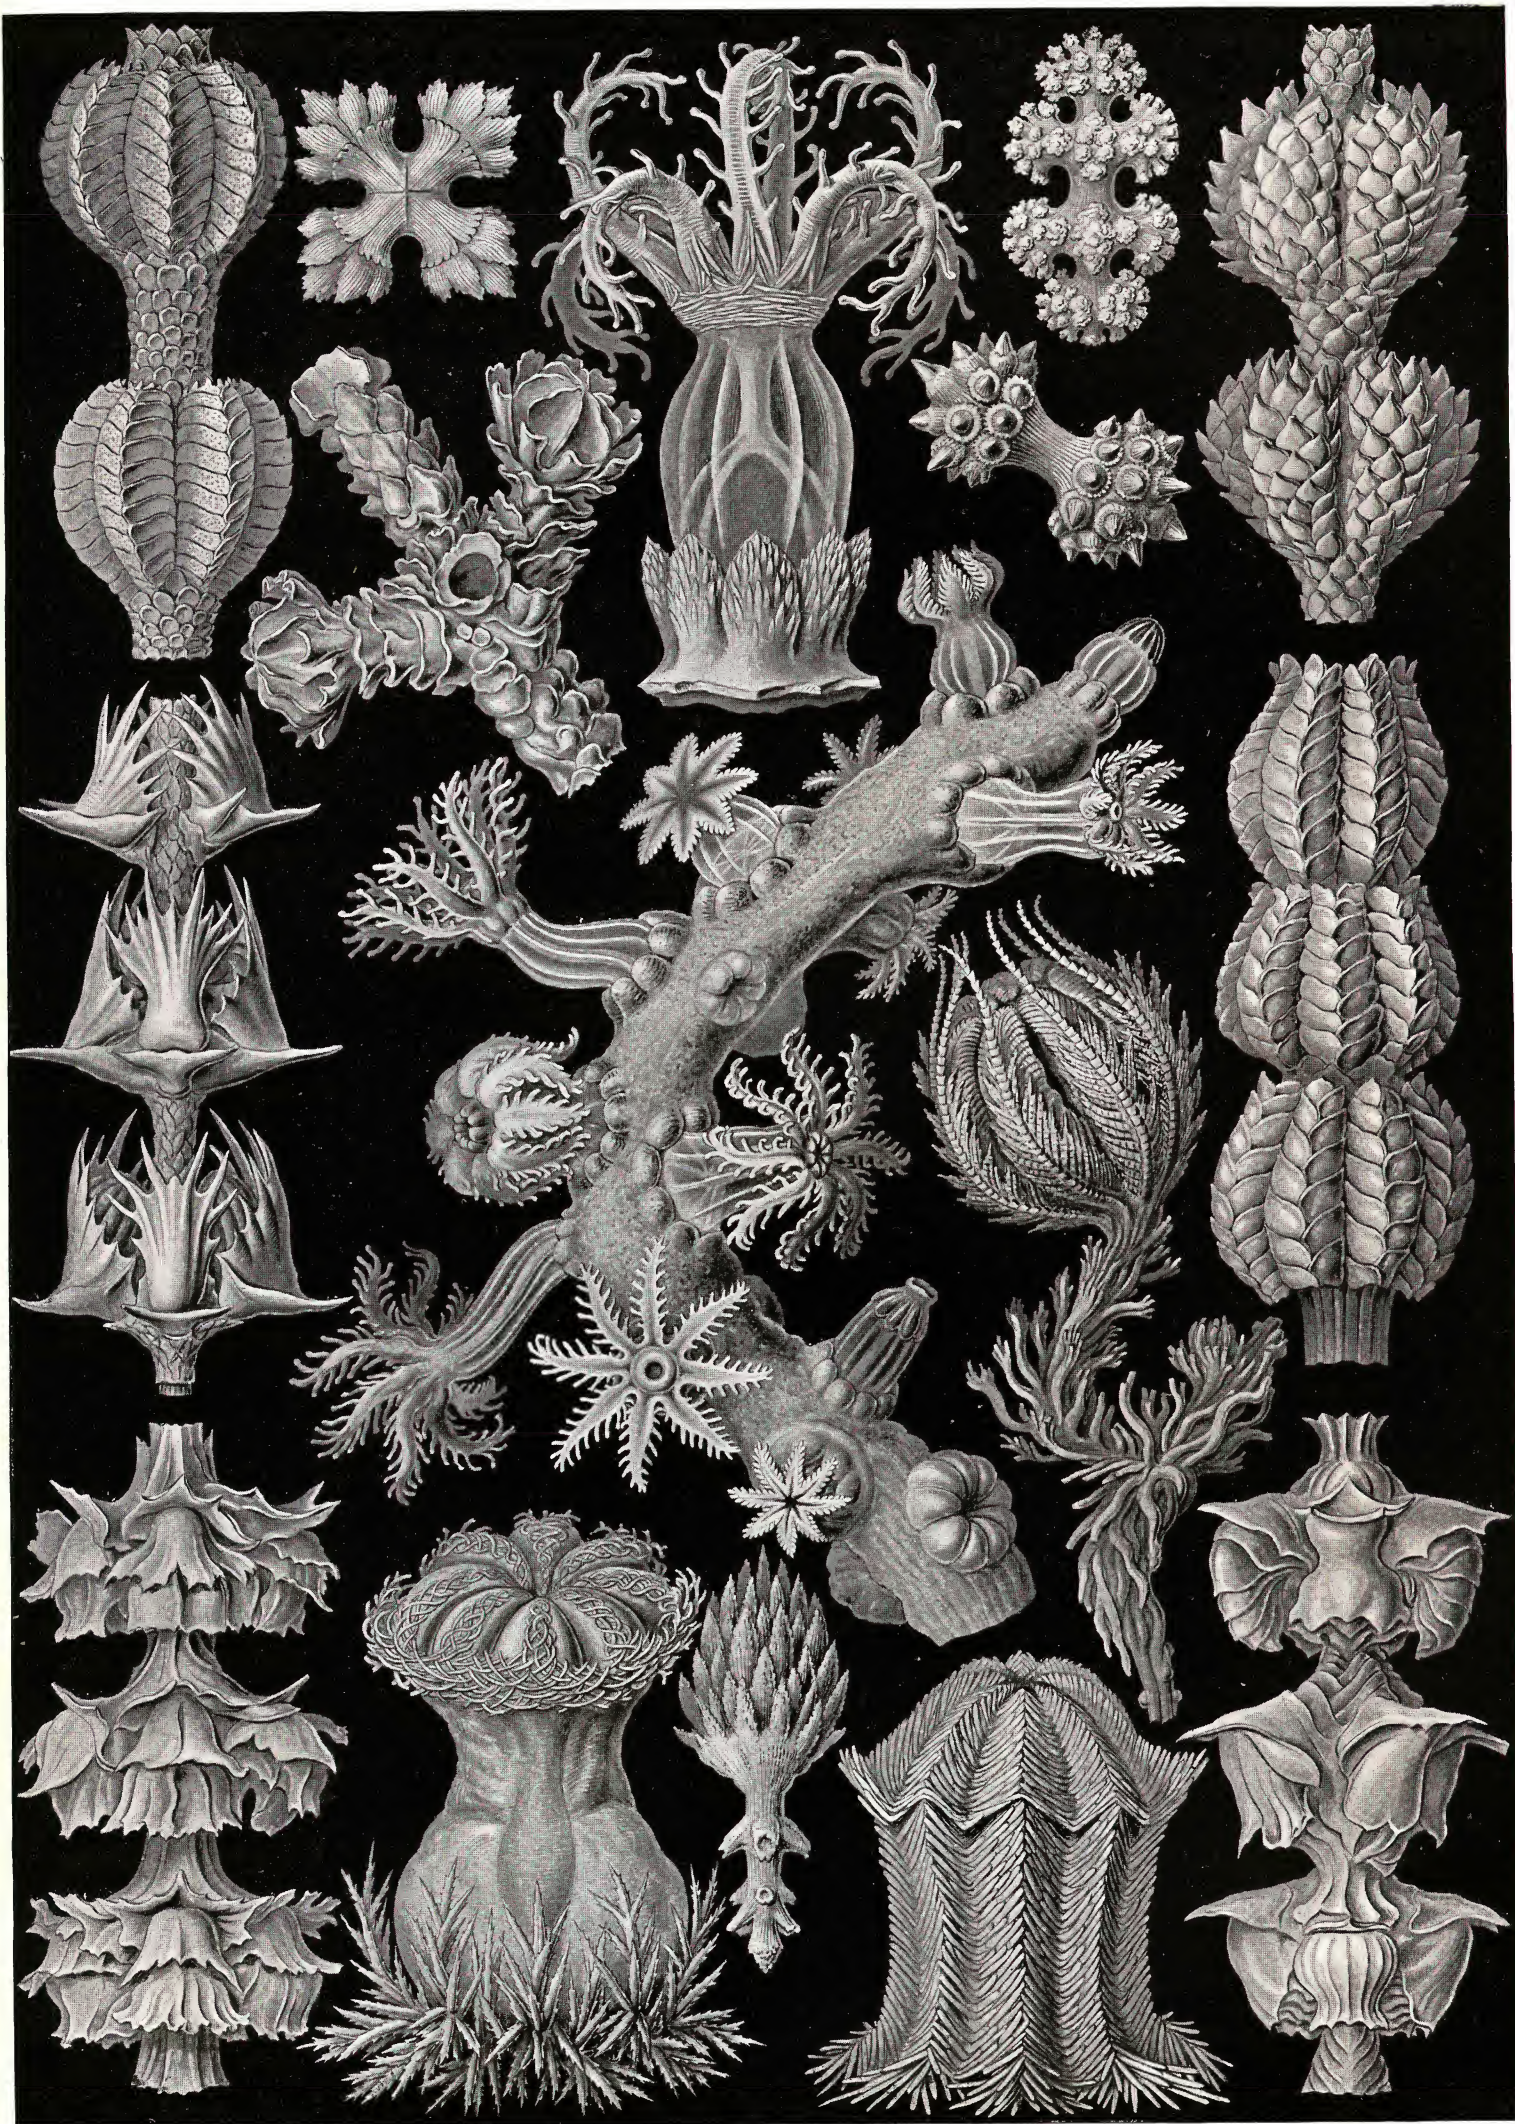

Leptomedusae. — Falttenquassen.

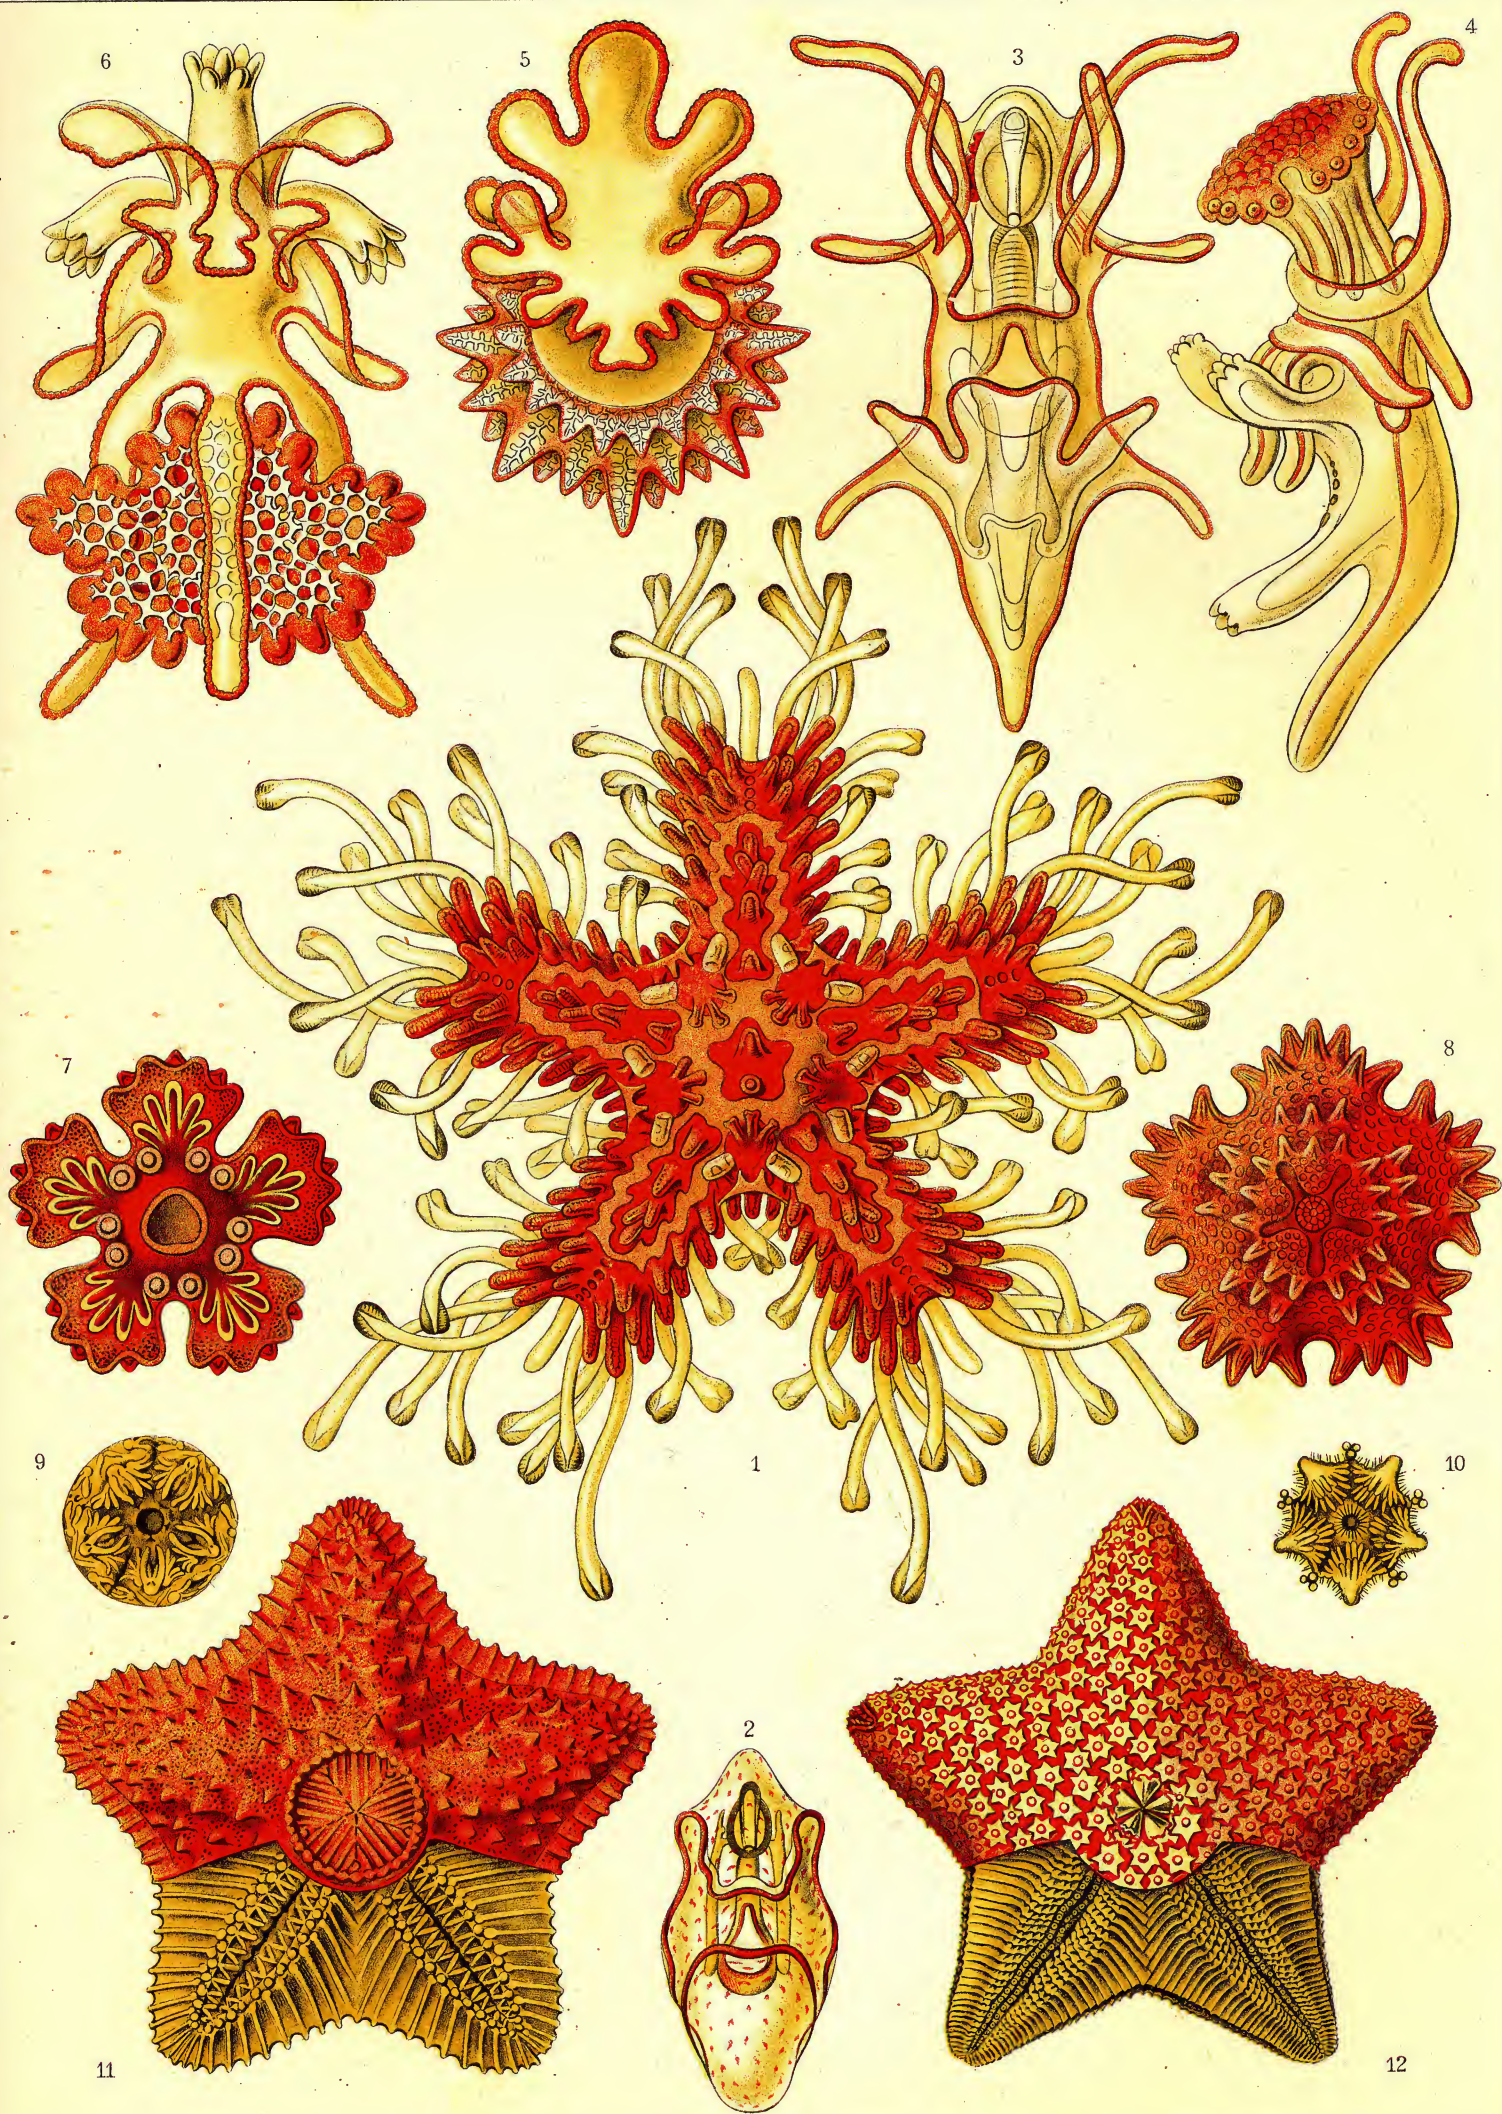

Siphonophorae. — Staatsquassen.

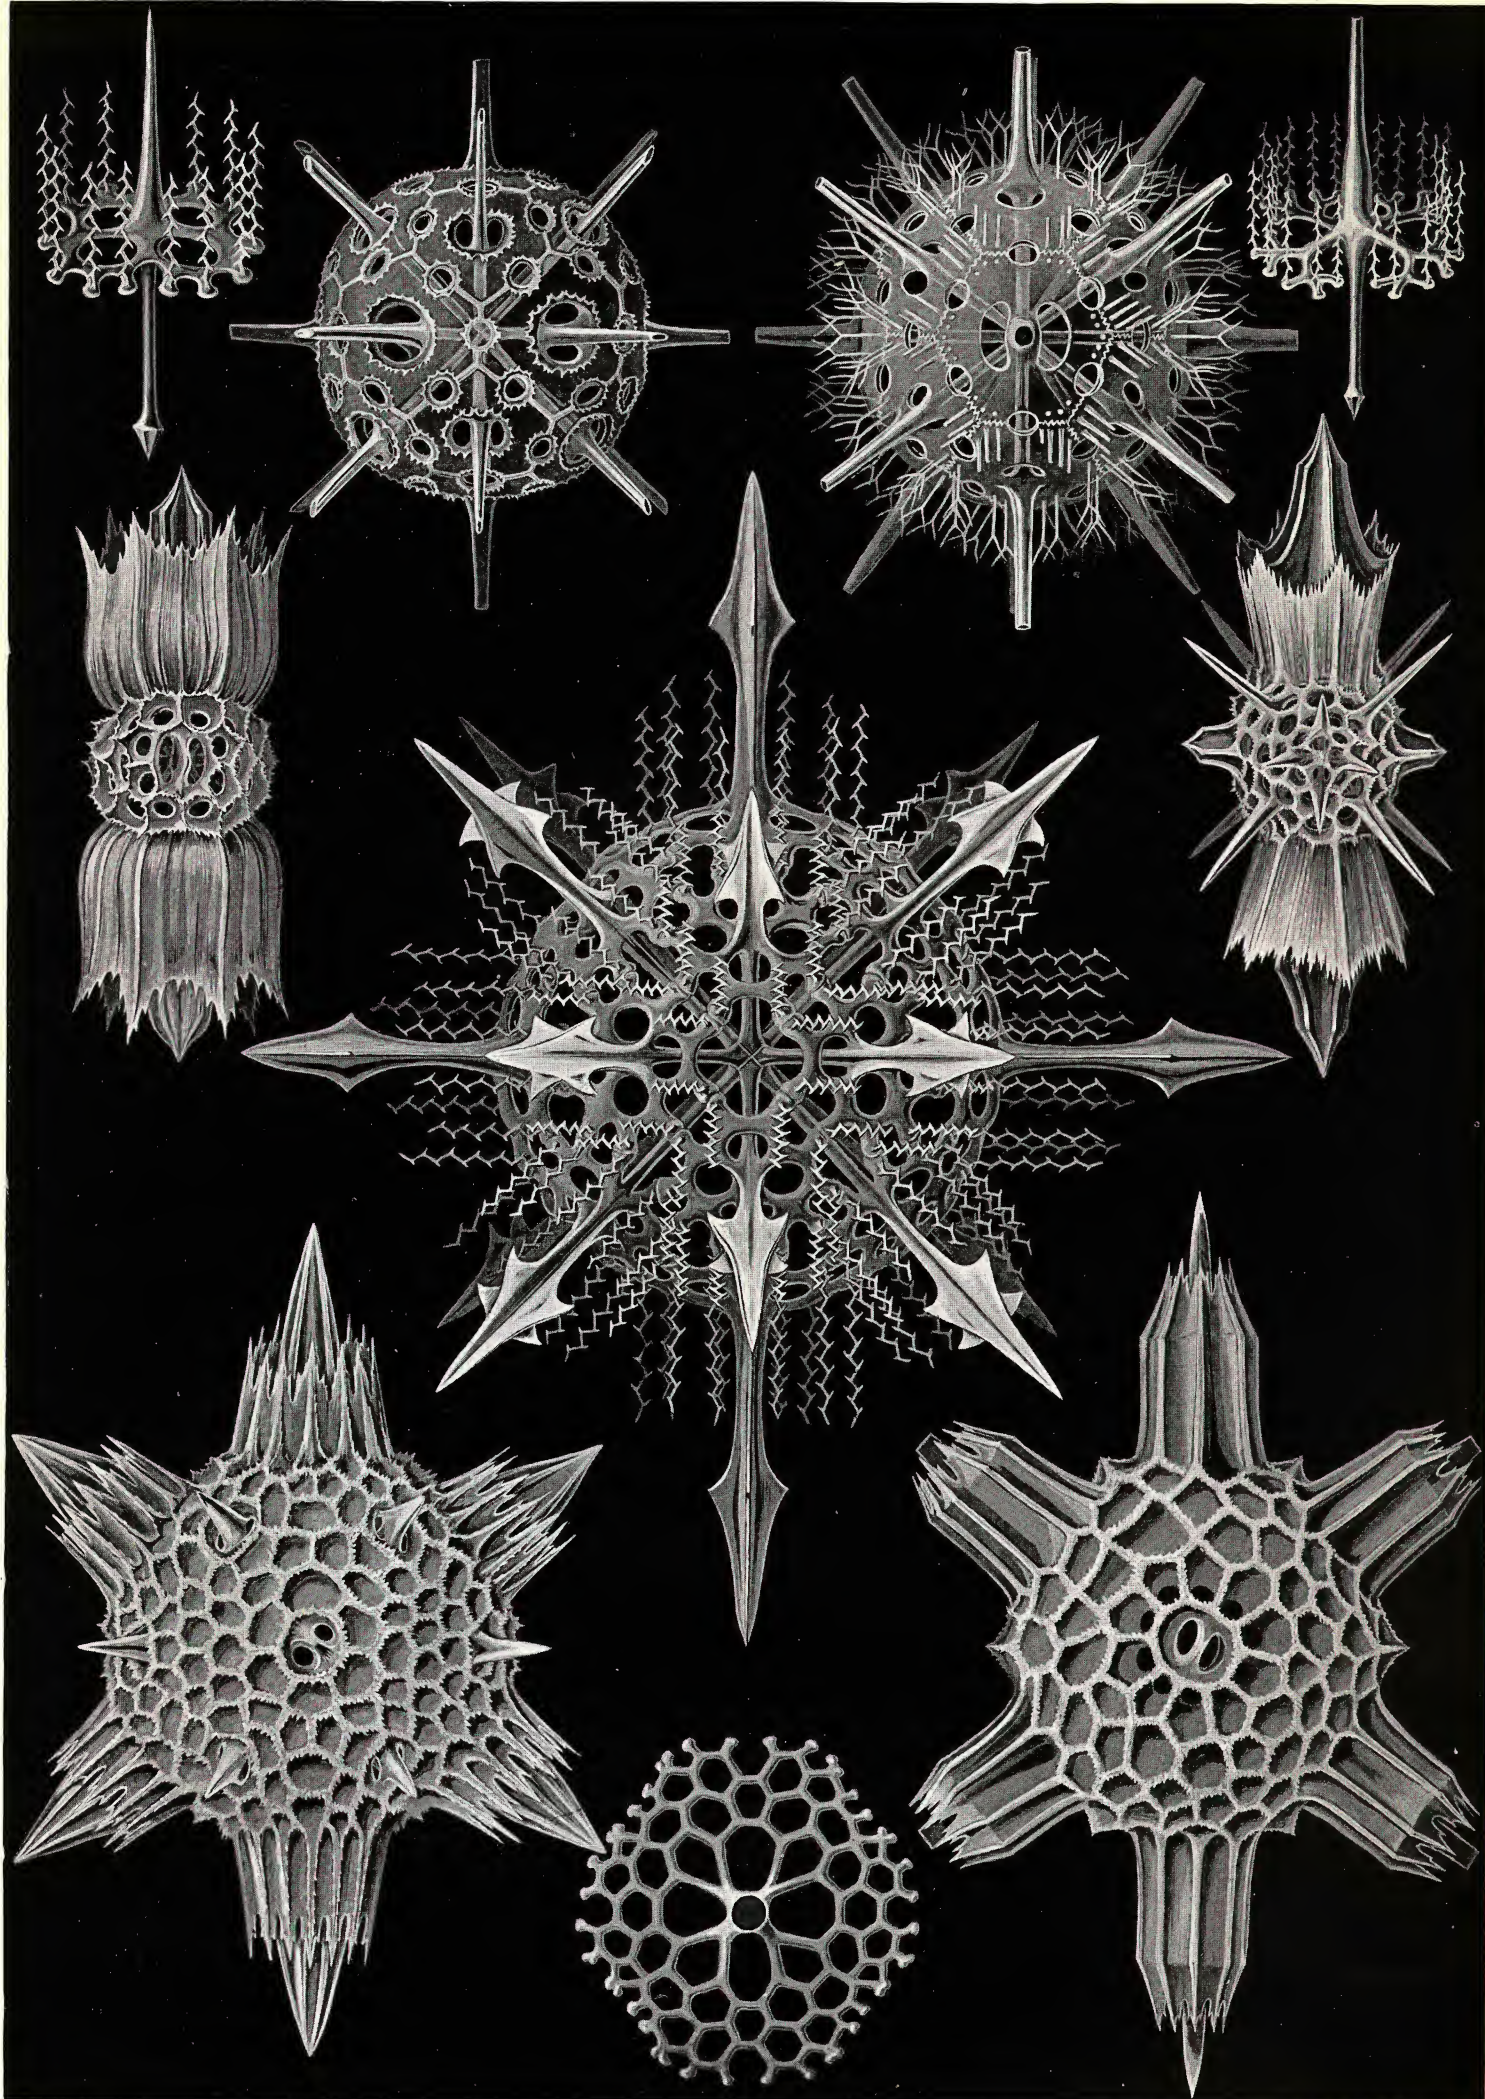

Peromedusae. — Taschenquassen.

Gorgonida. — Ständenkorallen.

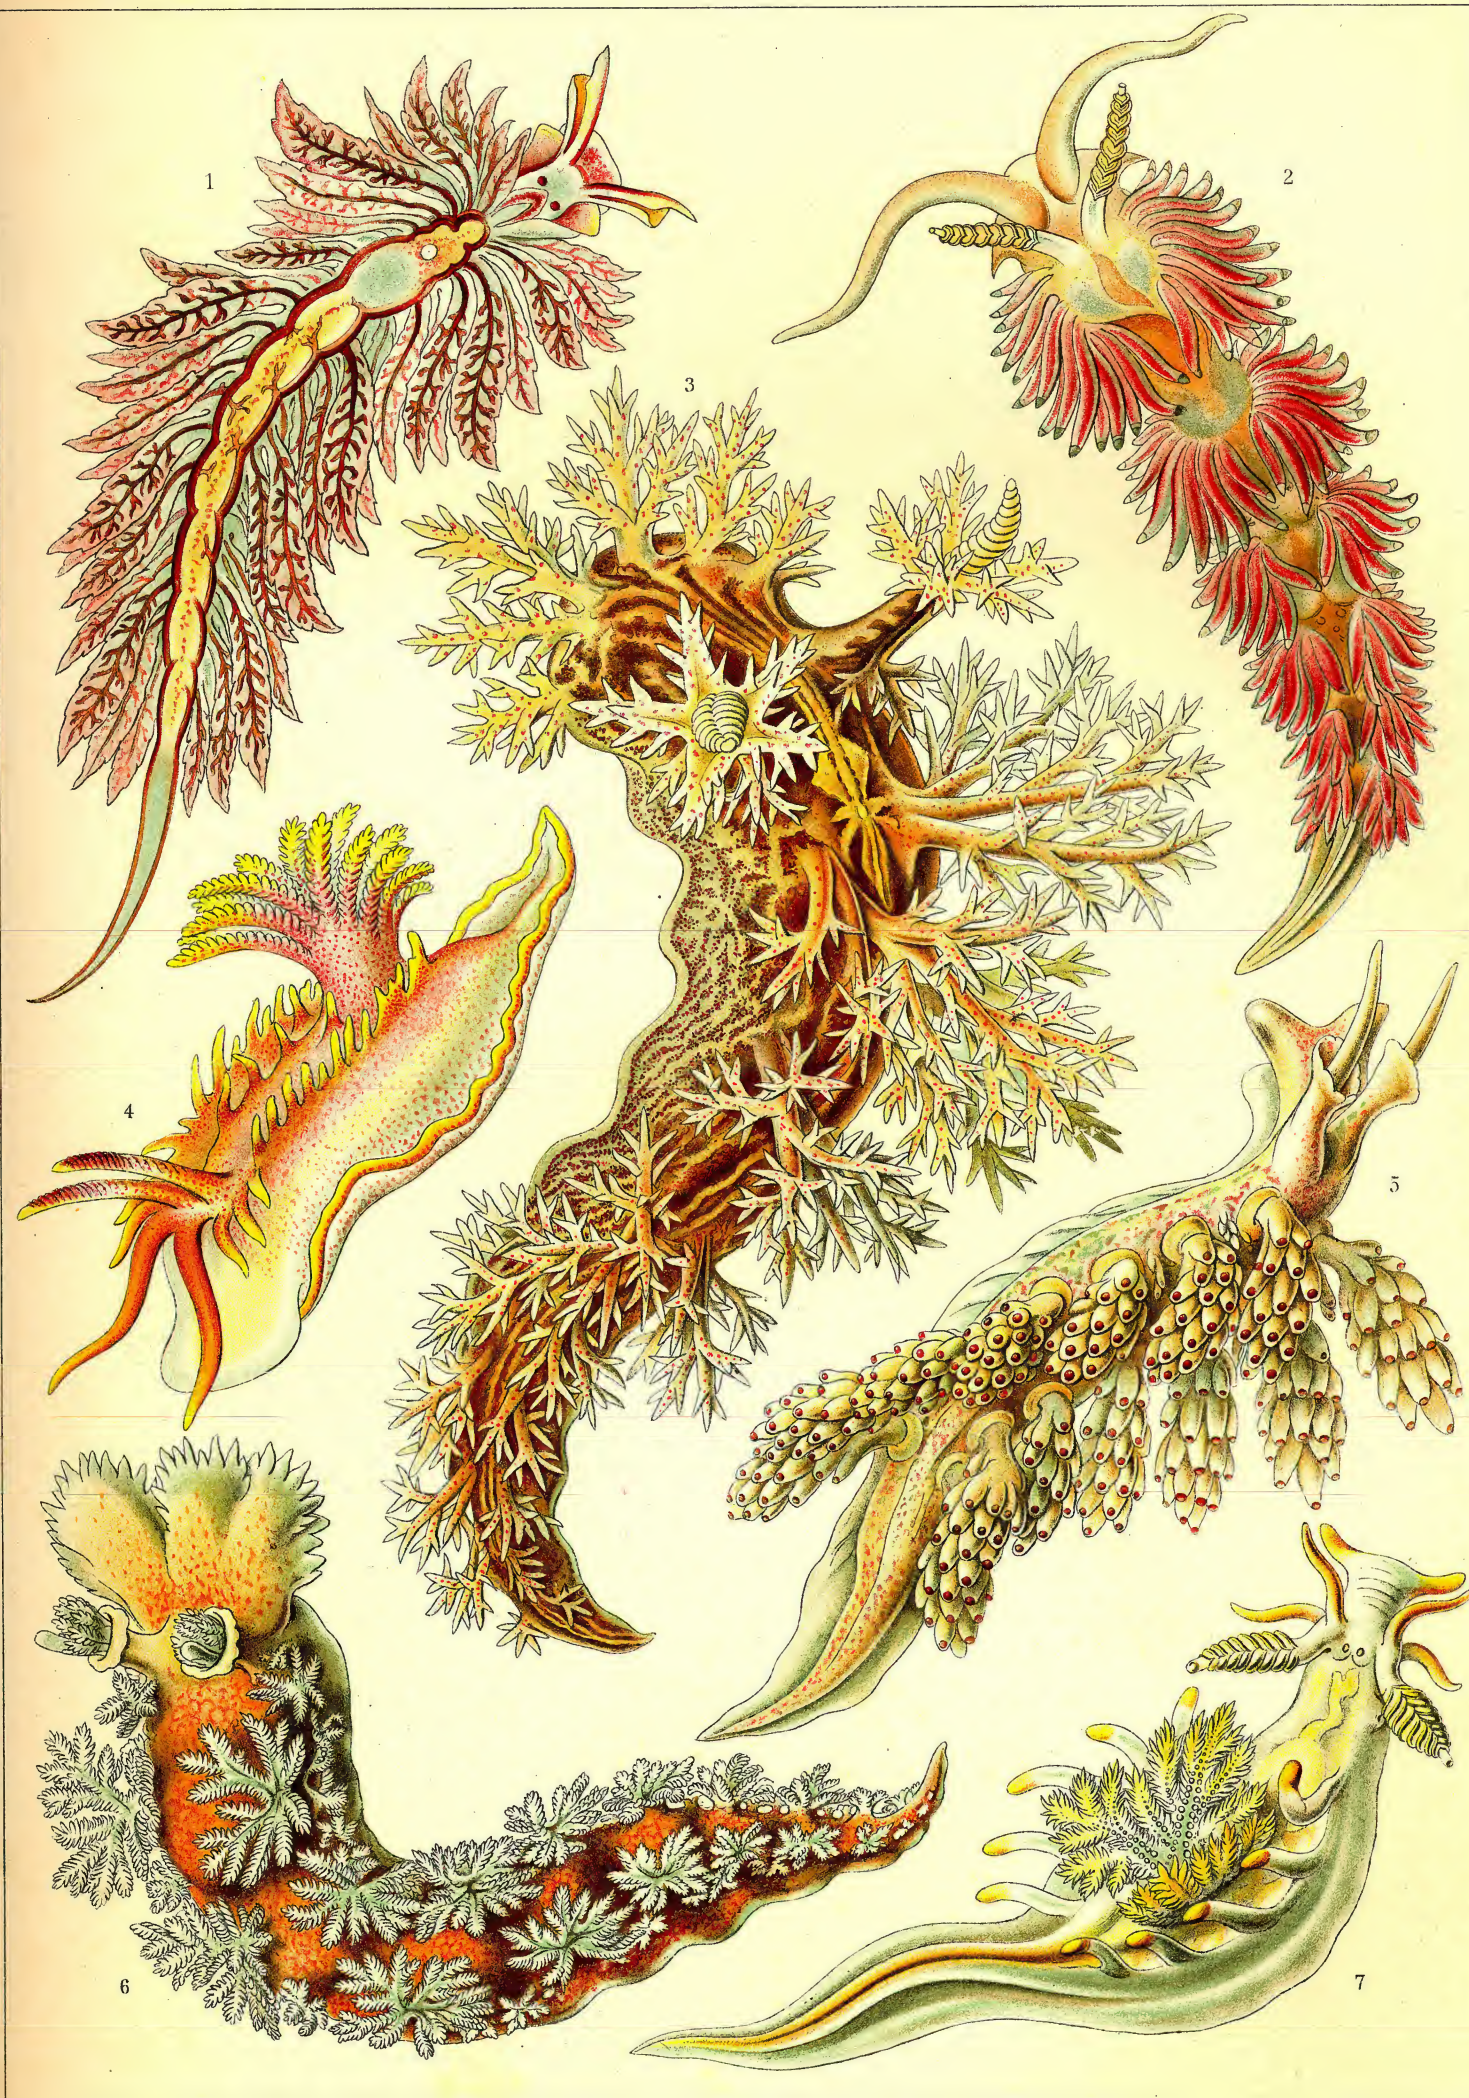

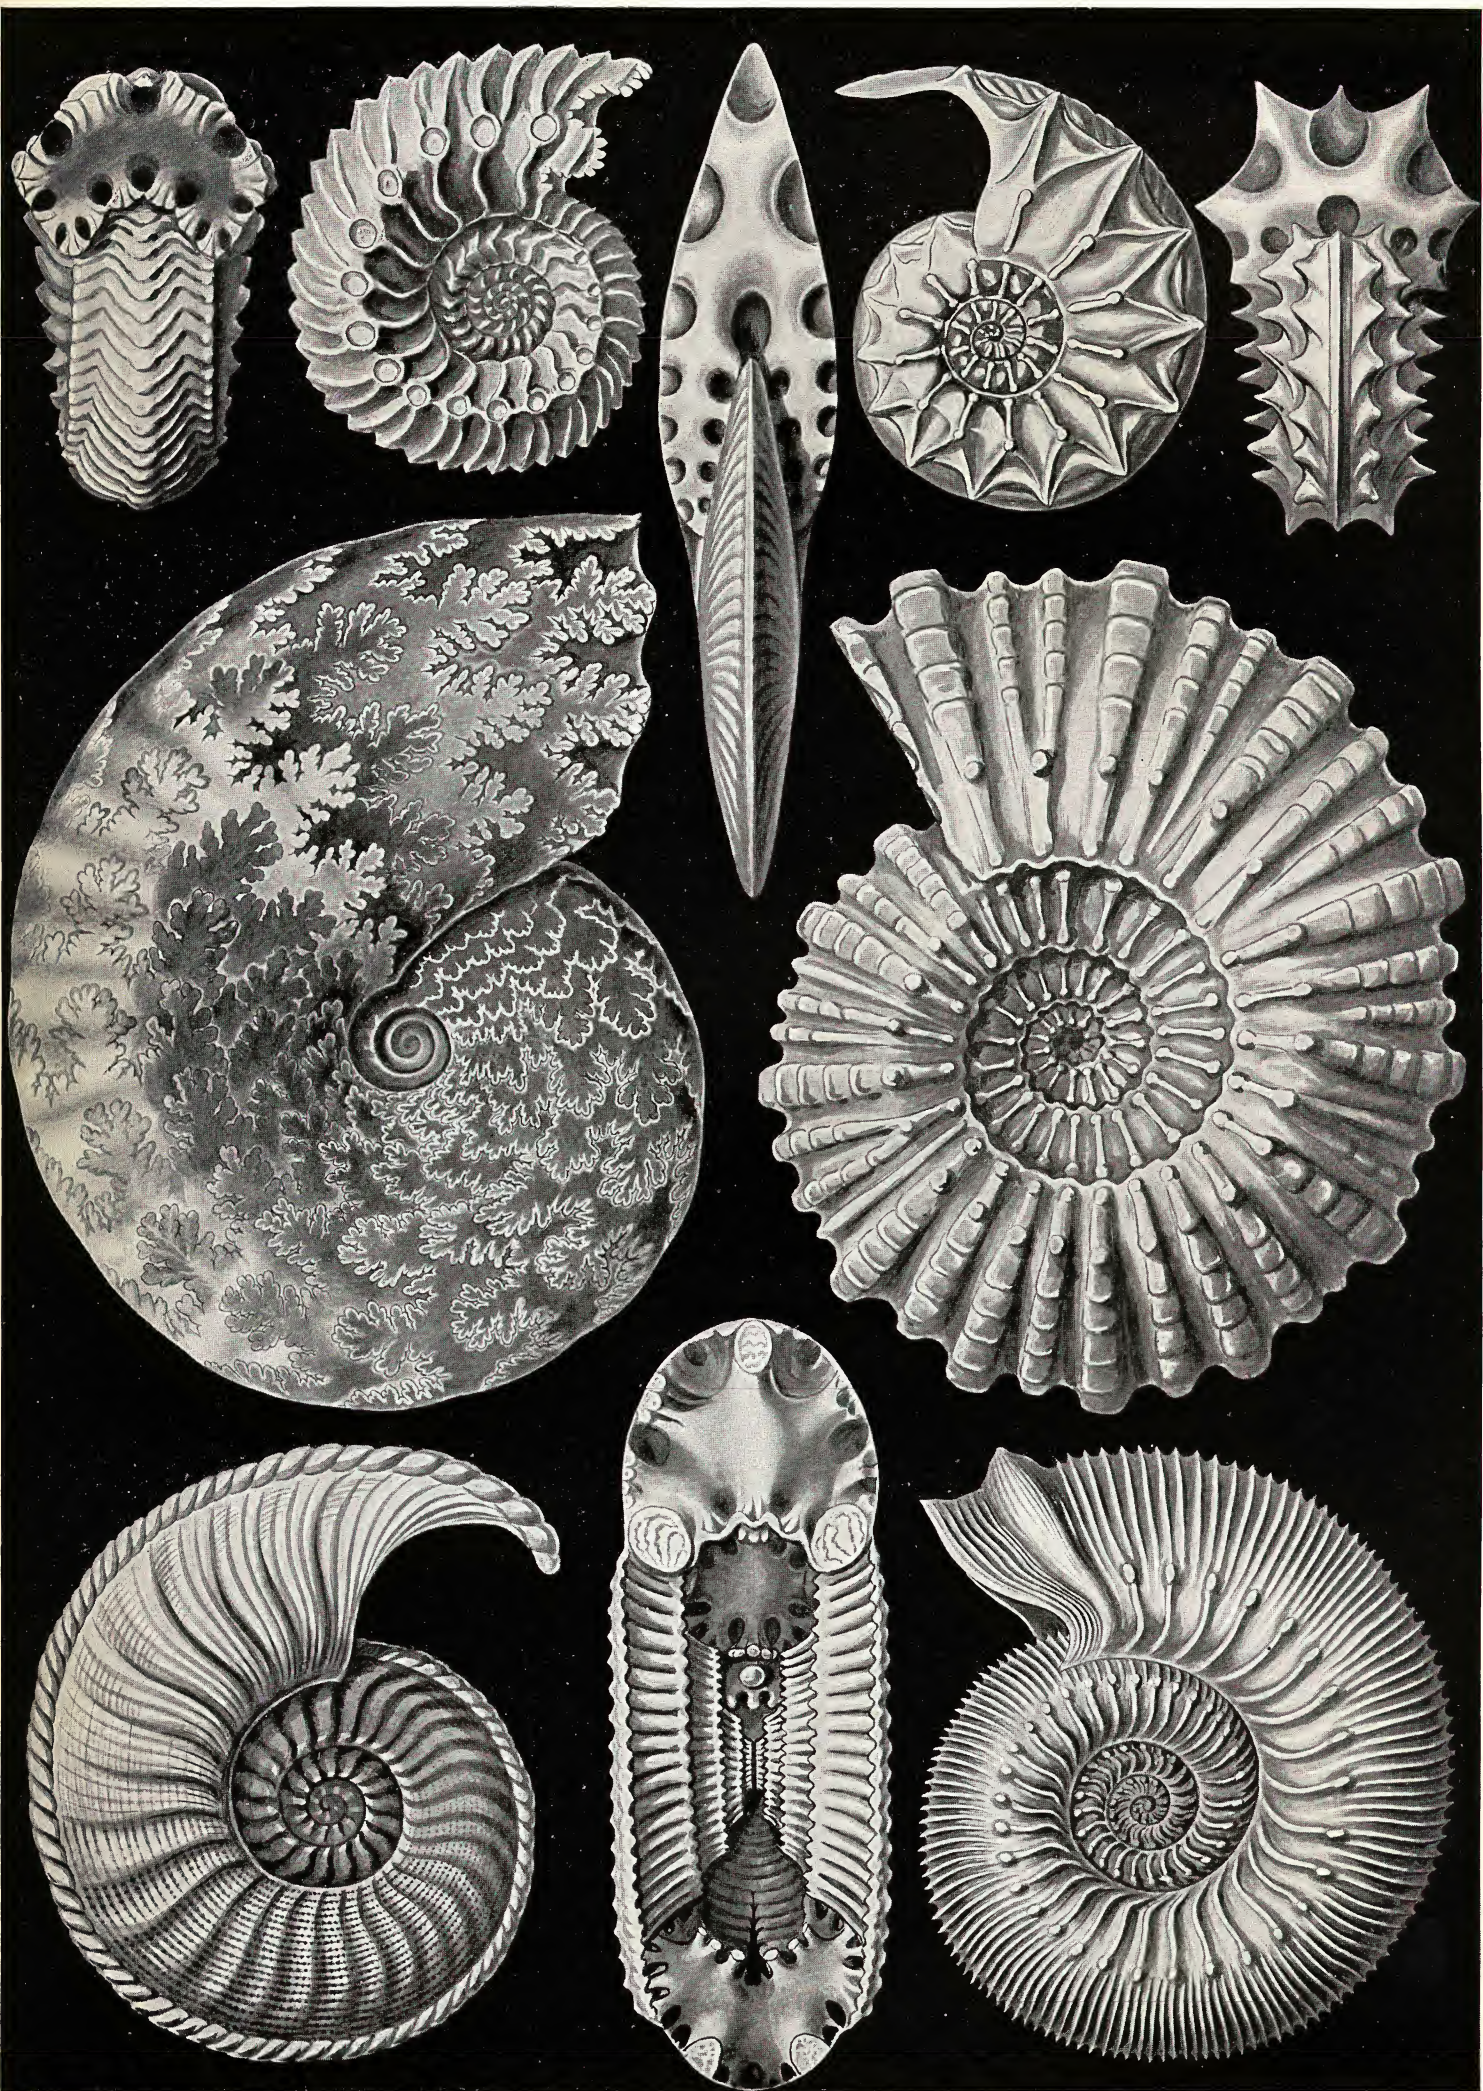

Acanthophracta. — Wunderstrahllinge.

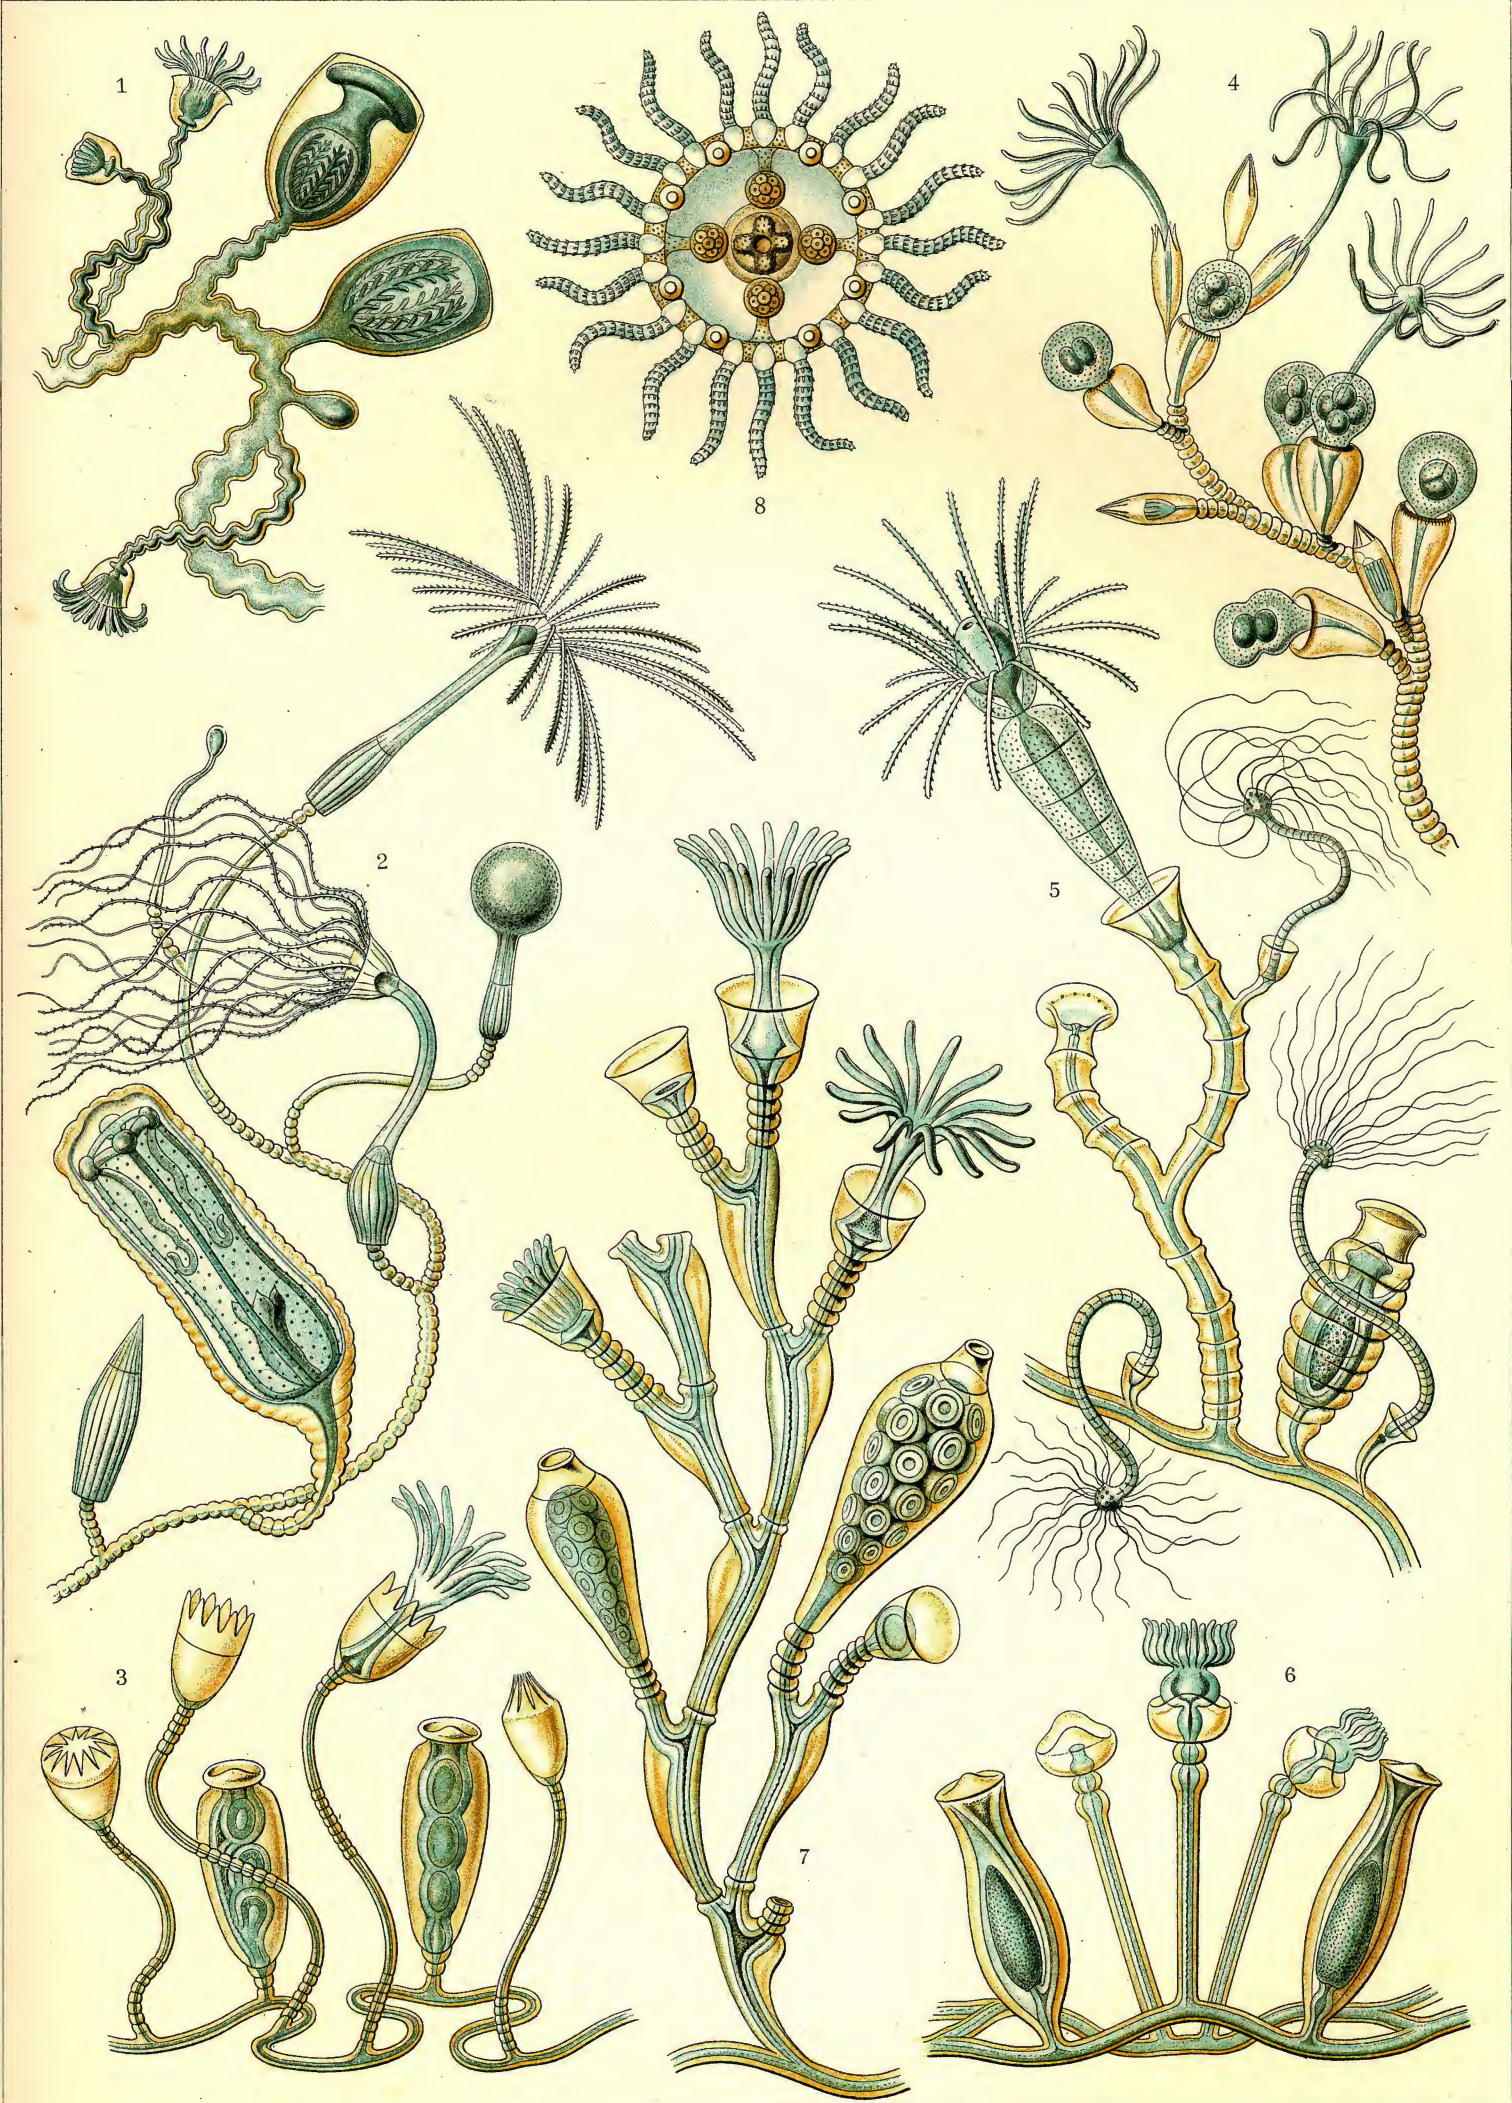

Ostraciontes. — Kofferrische.

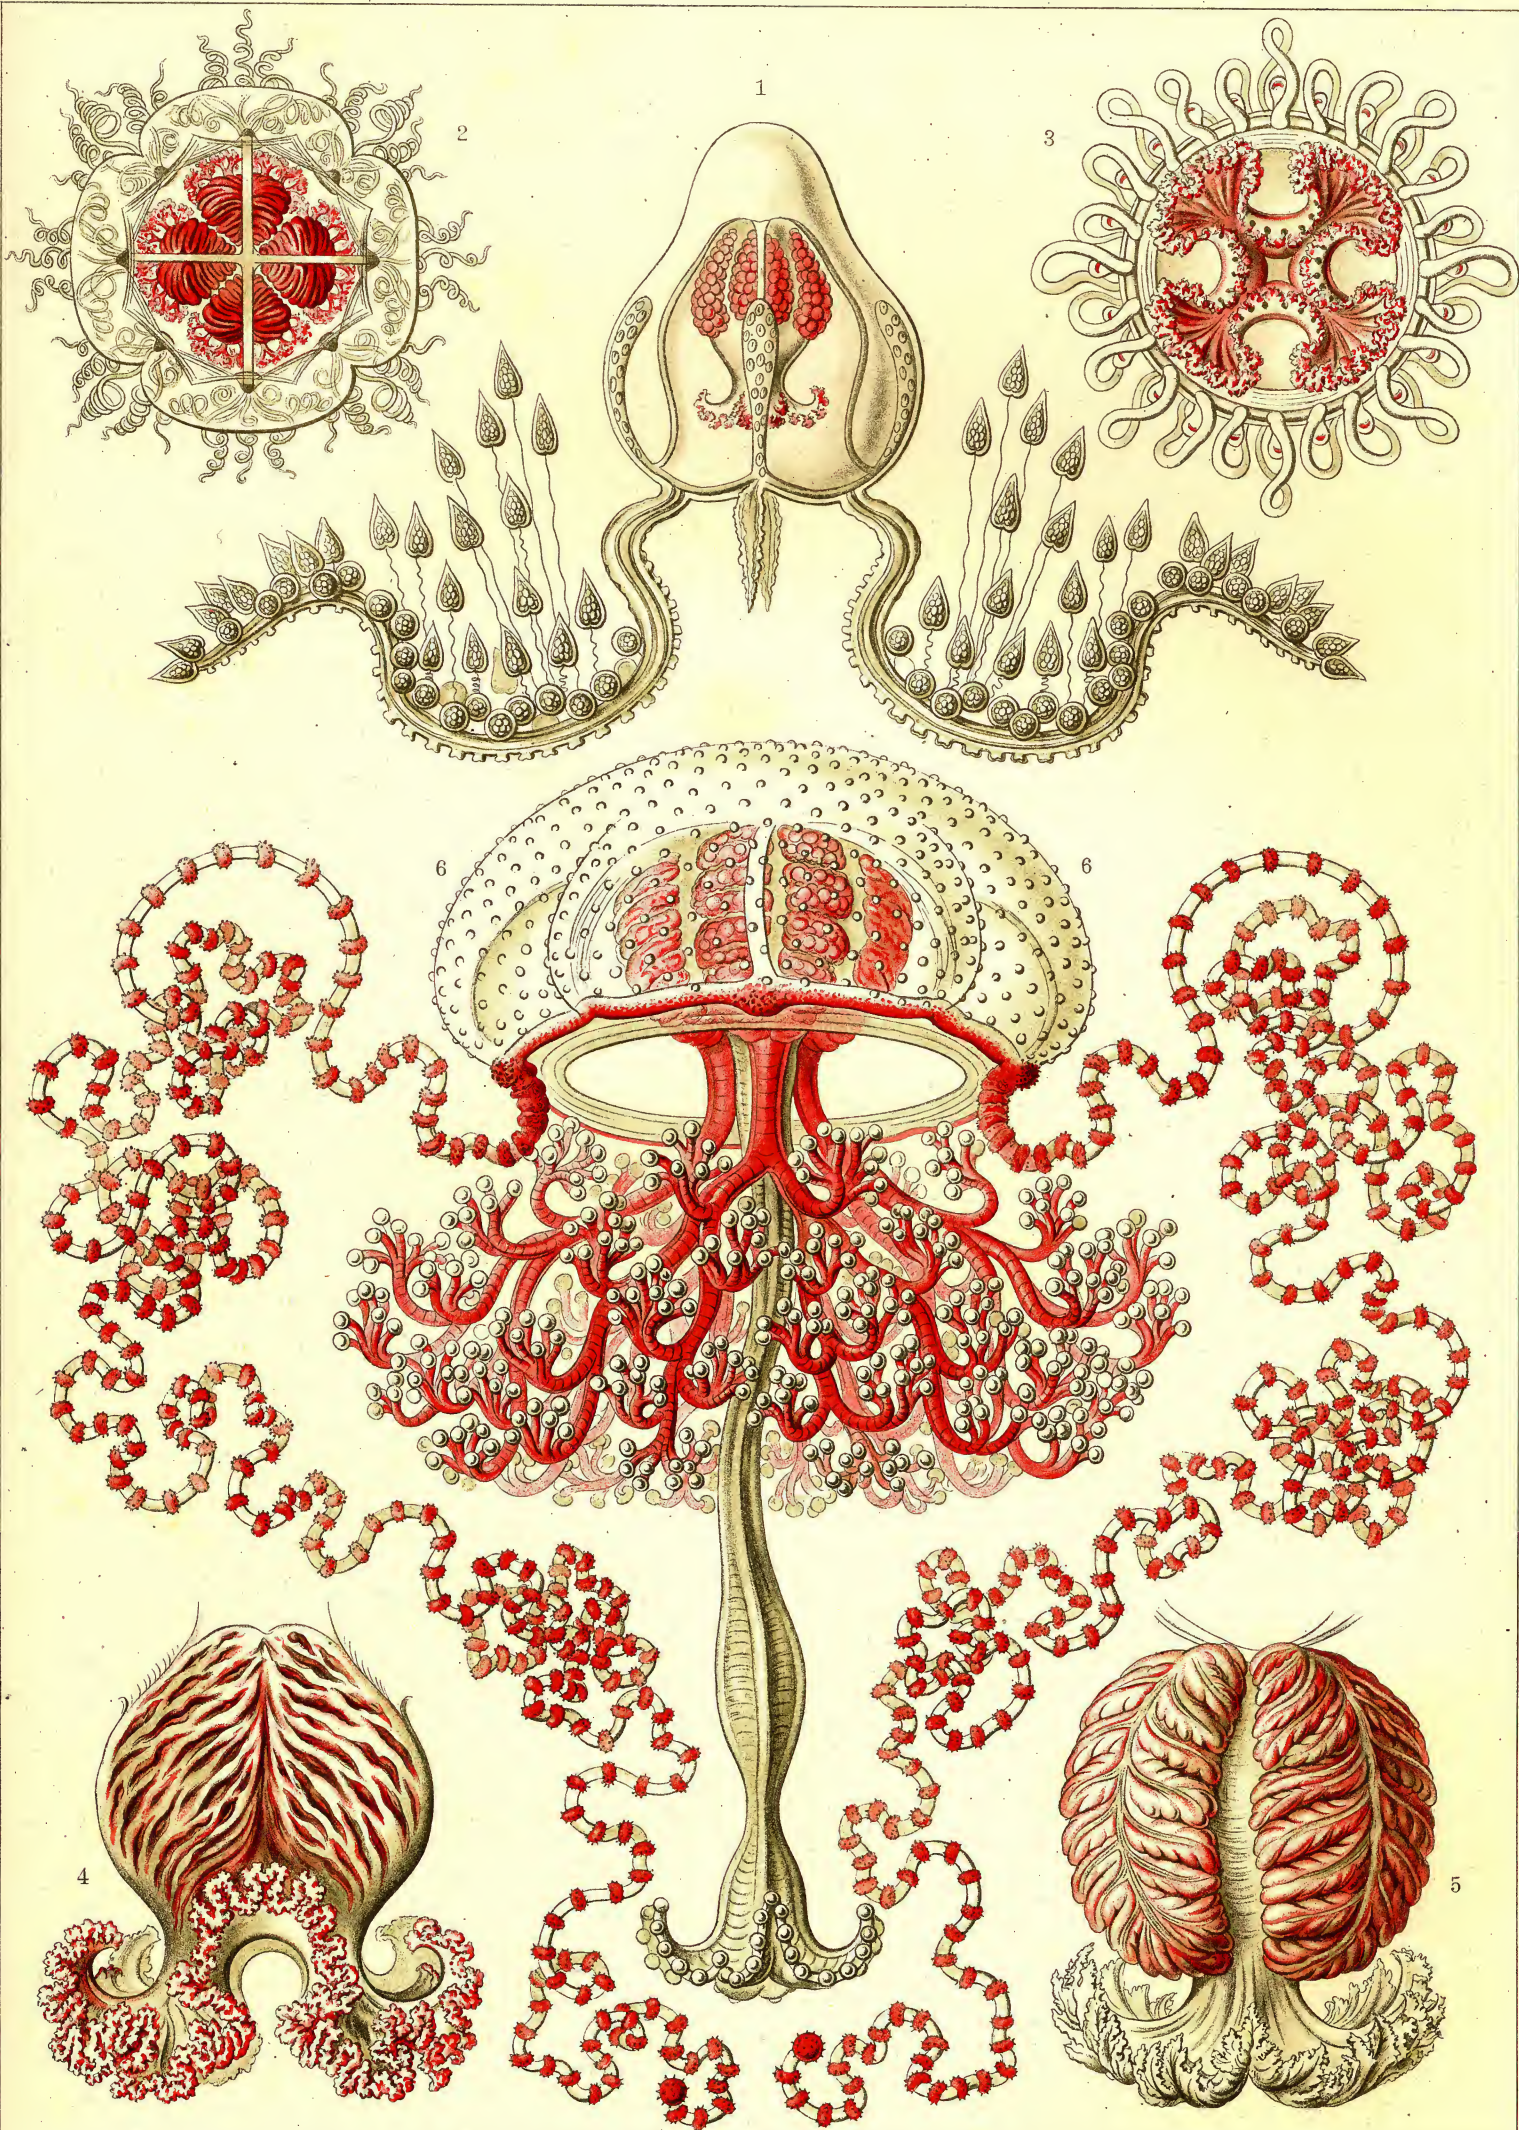

Nudibranchia. — Nacktkiemer-Schnecken.

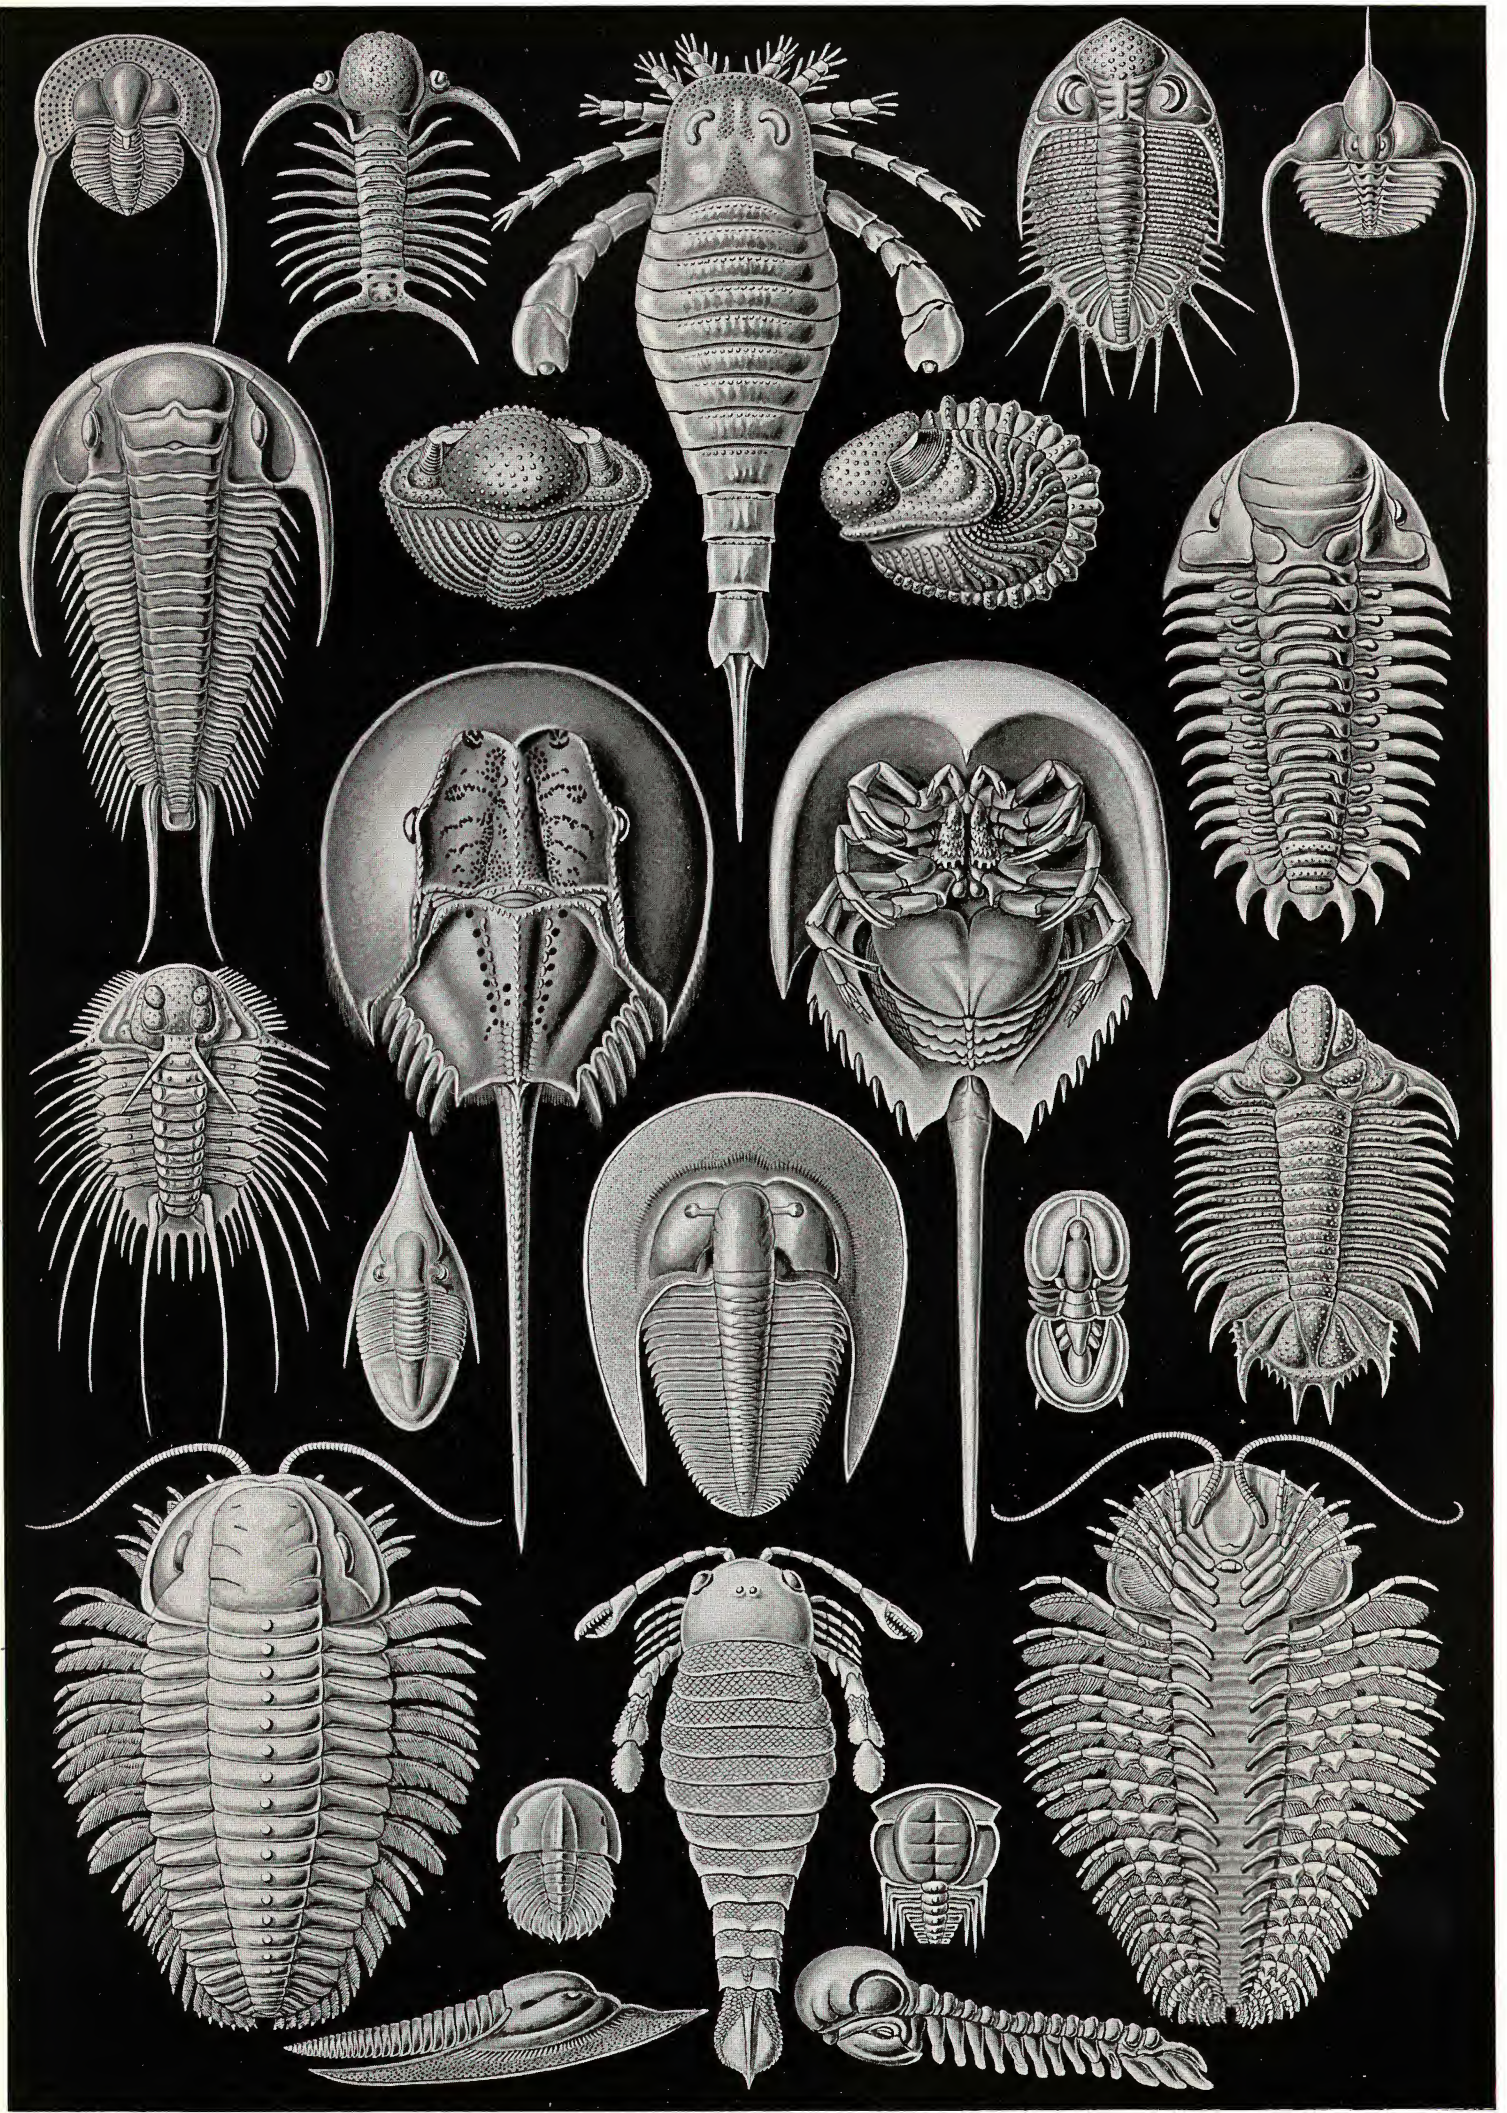

Ammonitida. — Ammonshörner.

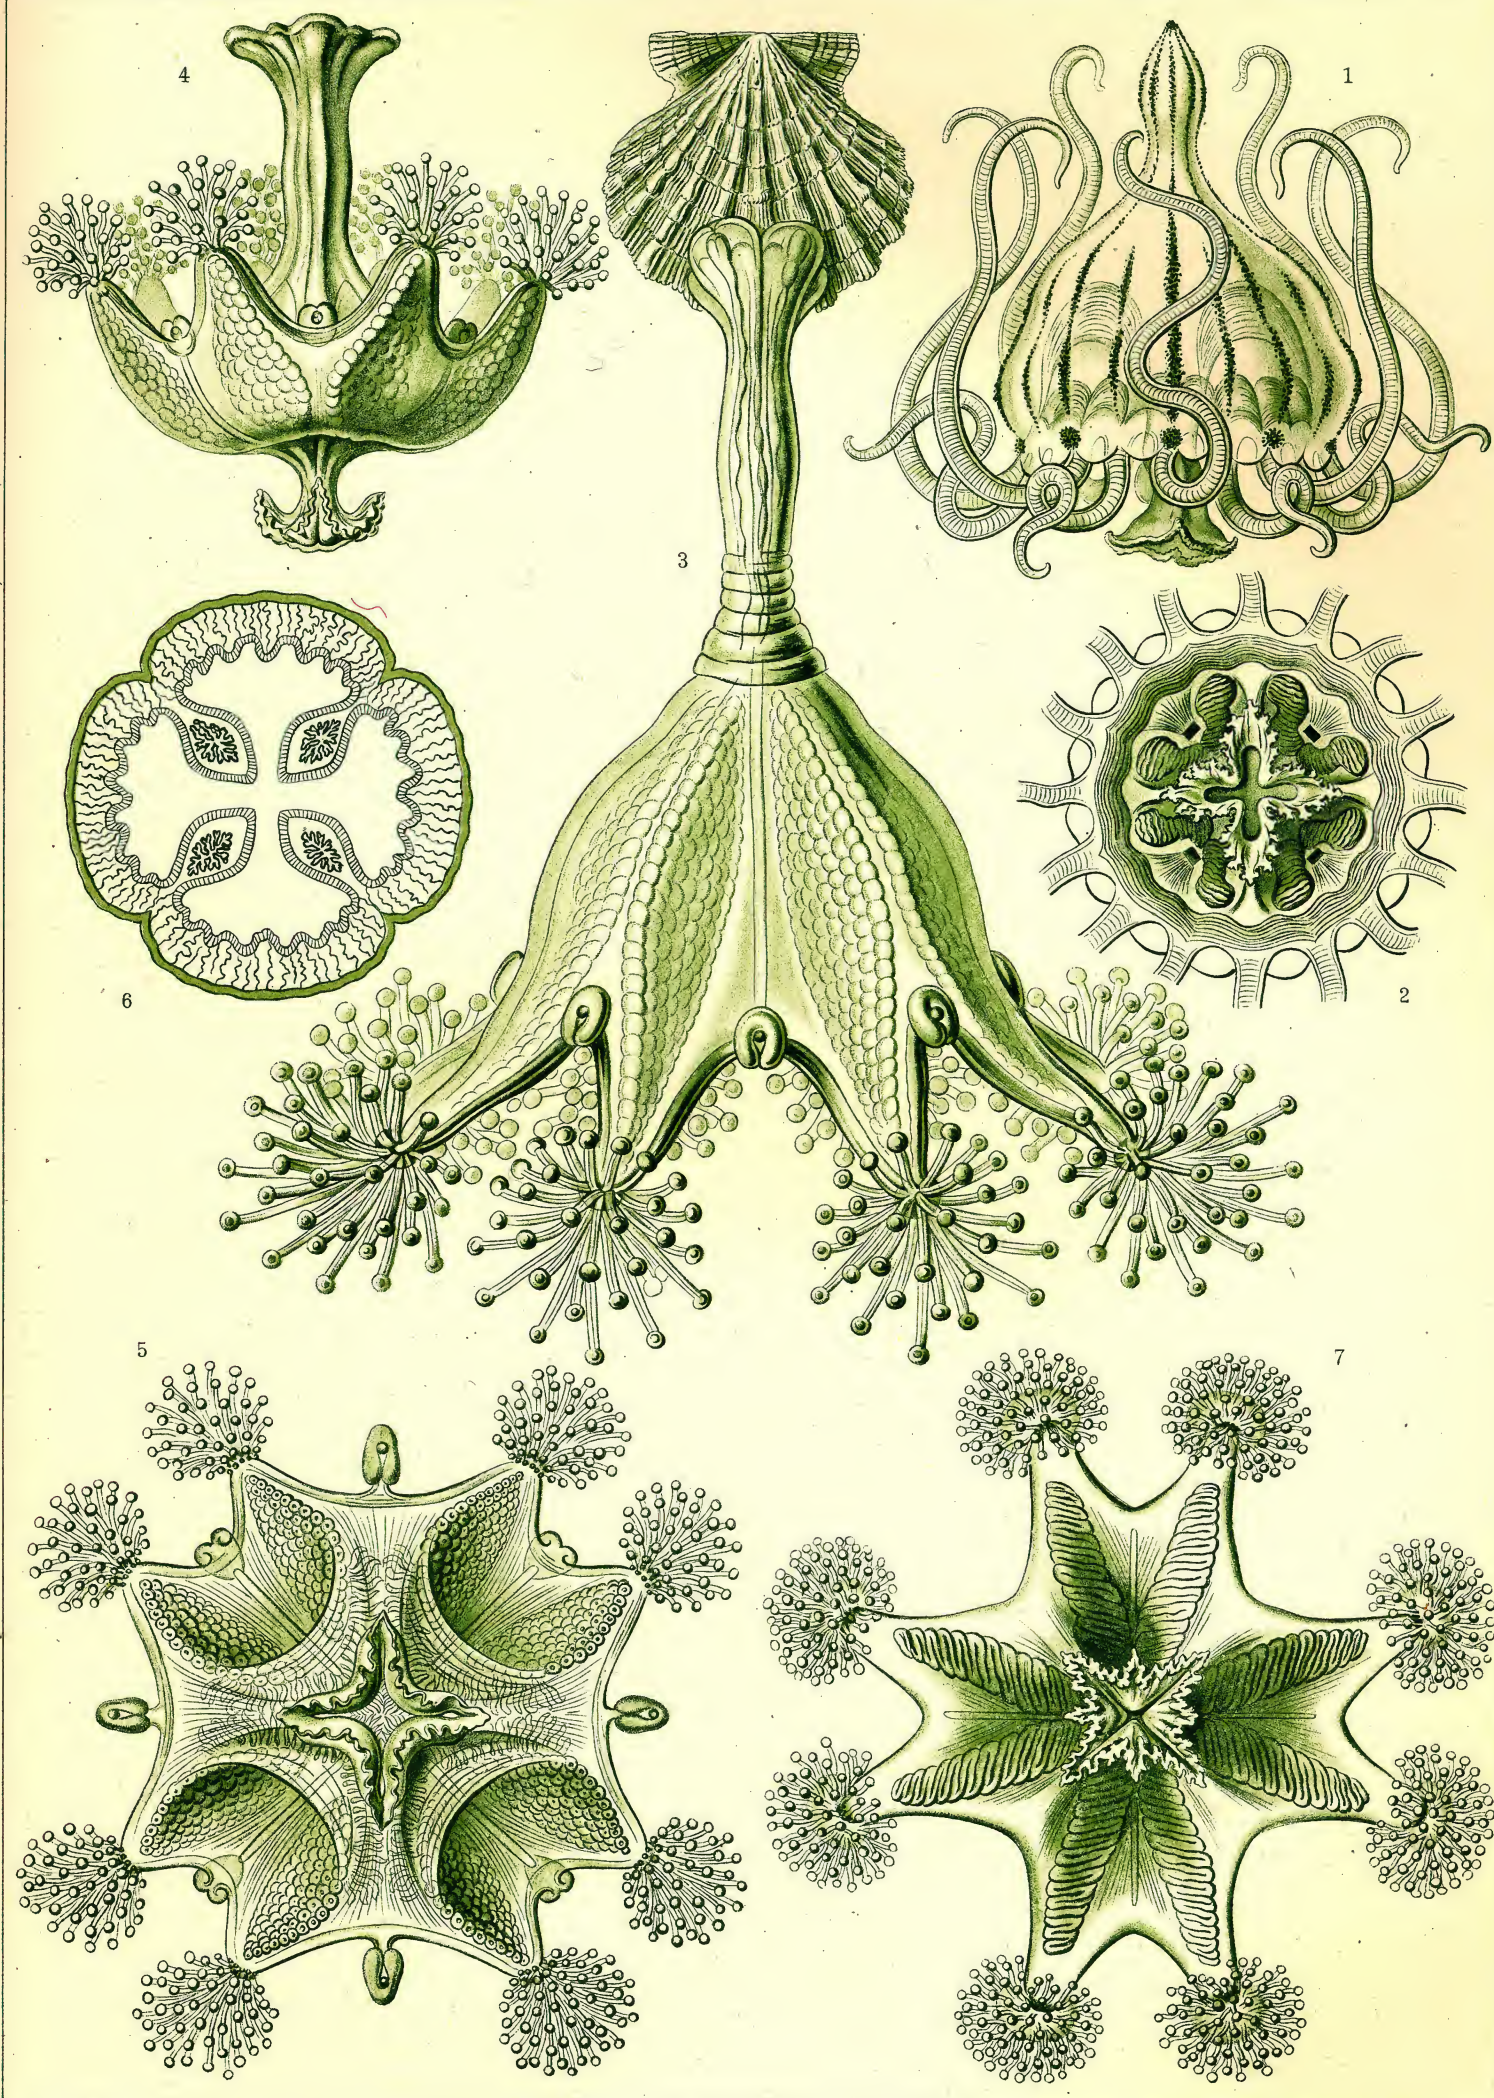

Campanariae. — Glockenpolypen.

Anthomedusae. — Blumenquassen.

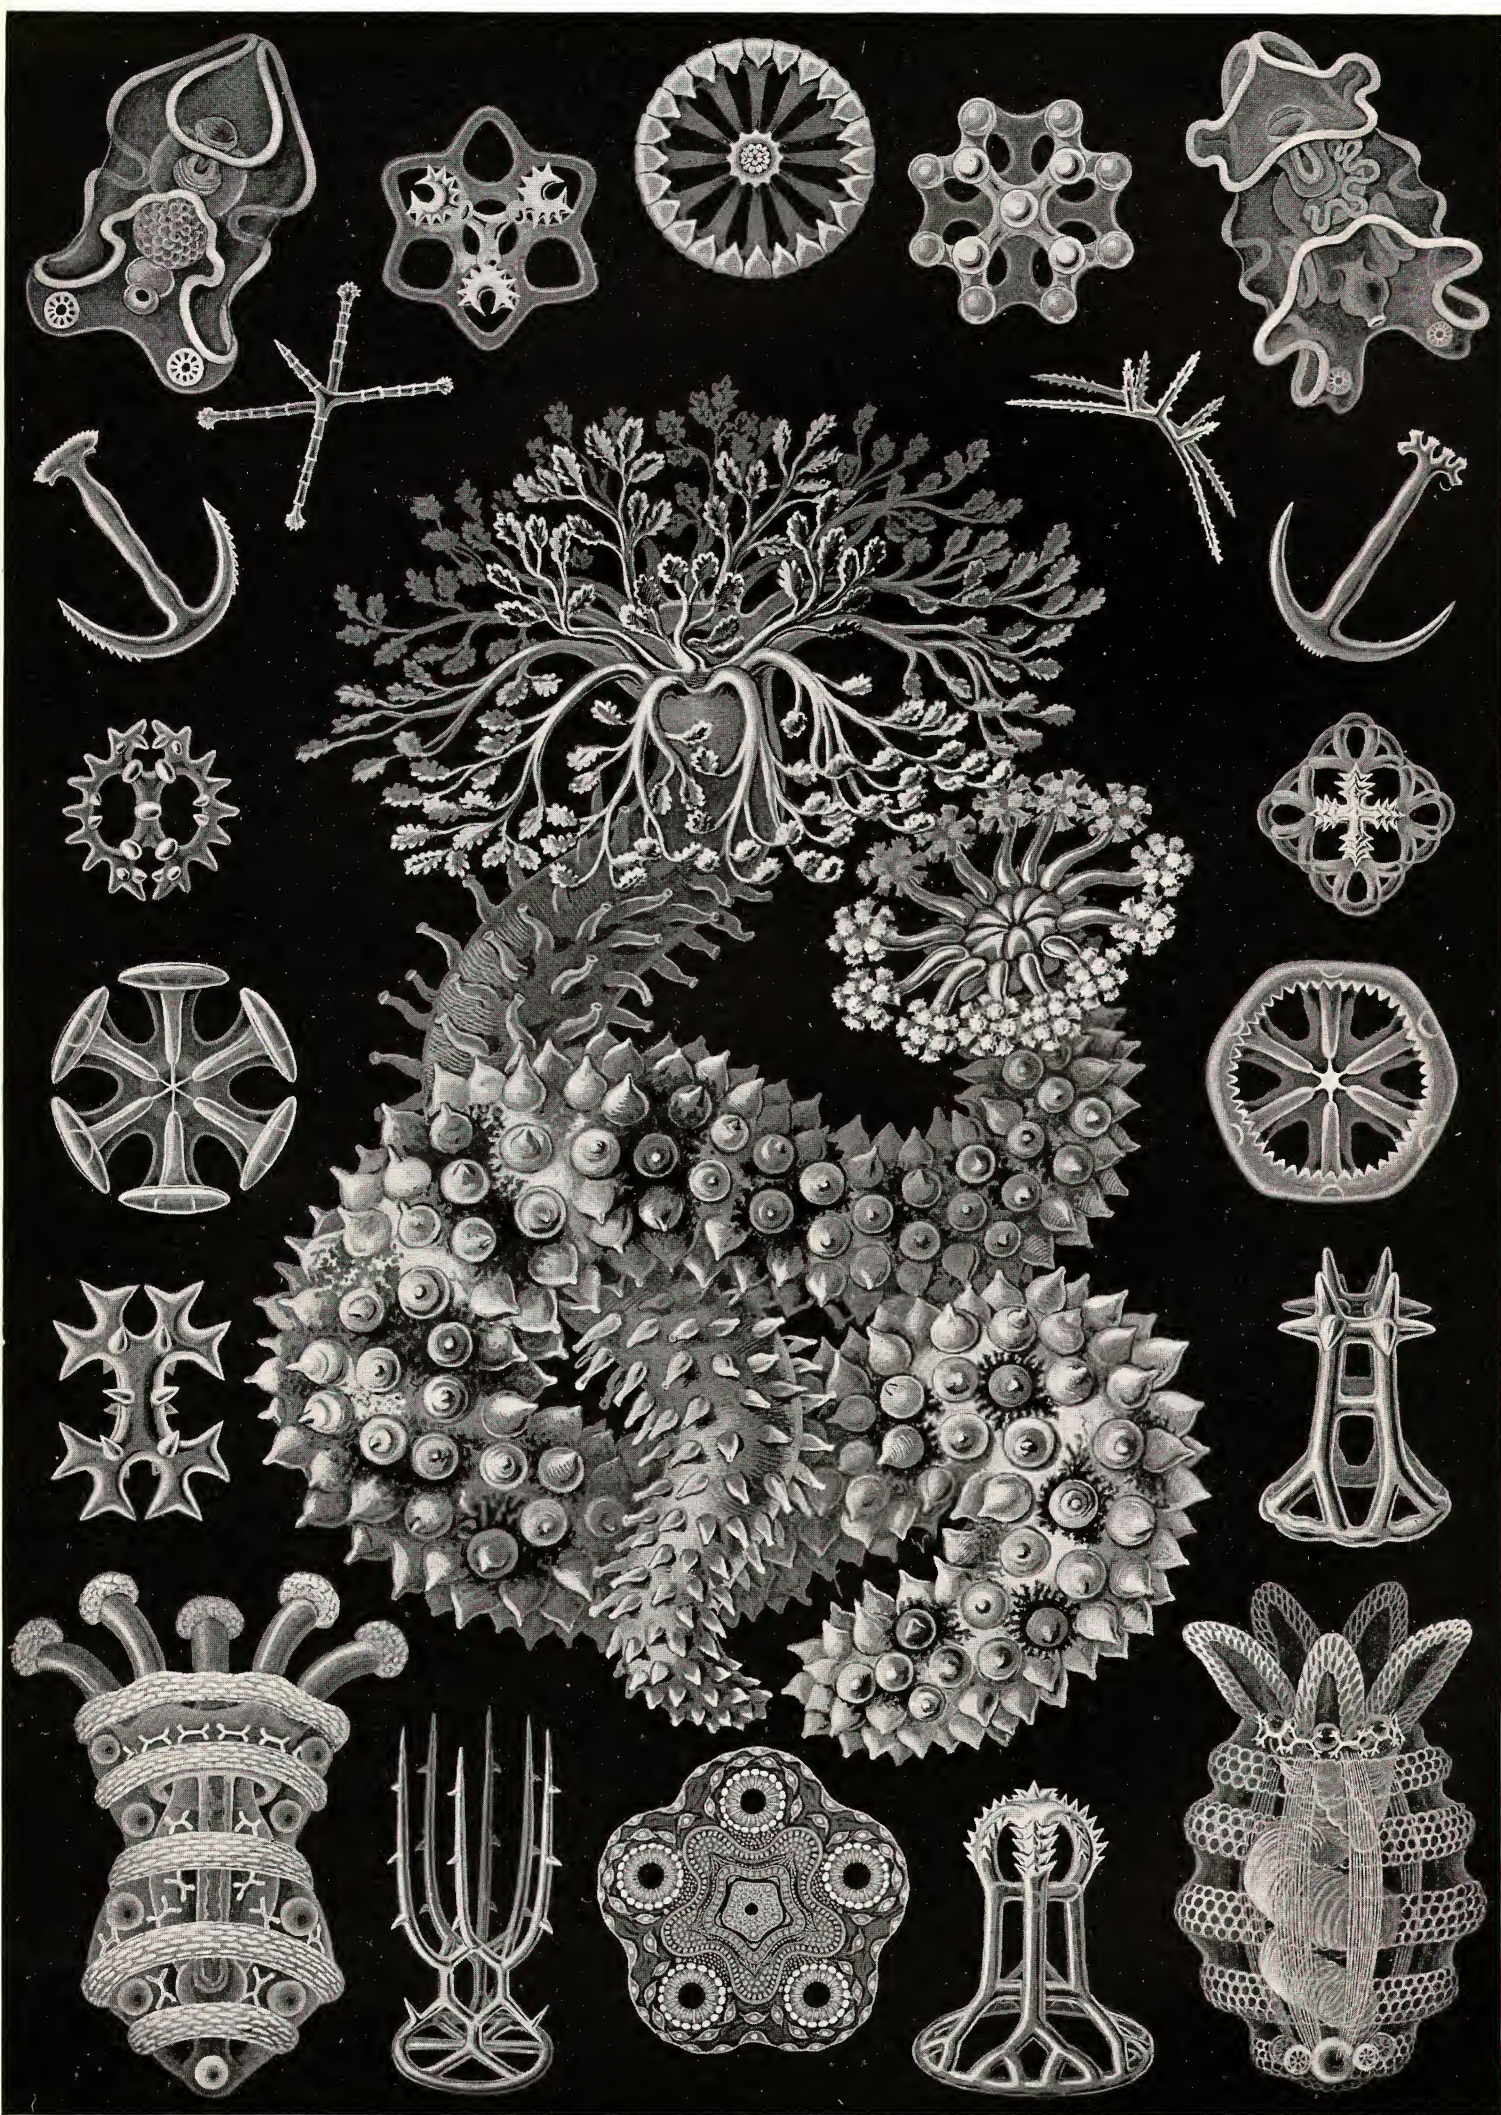

Aspidonia. — Schildtiere.

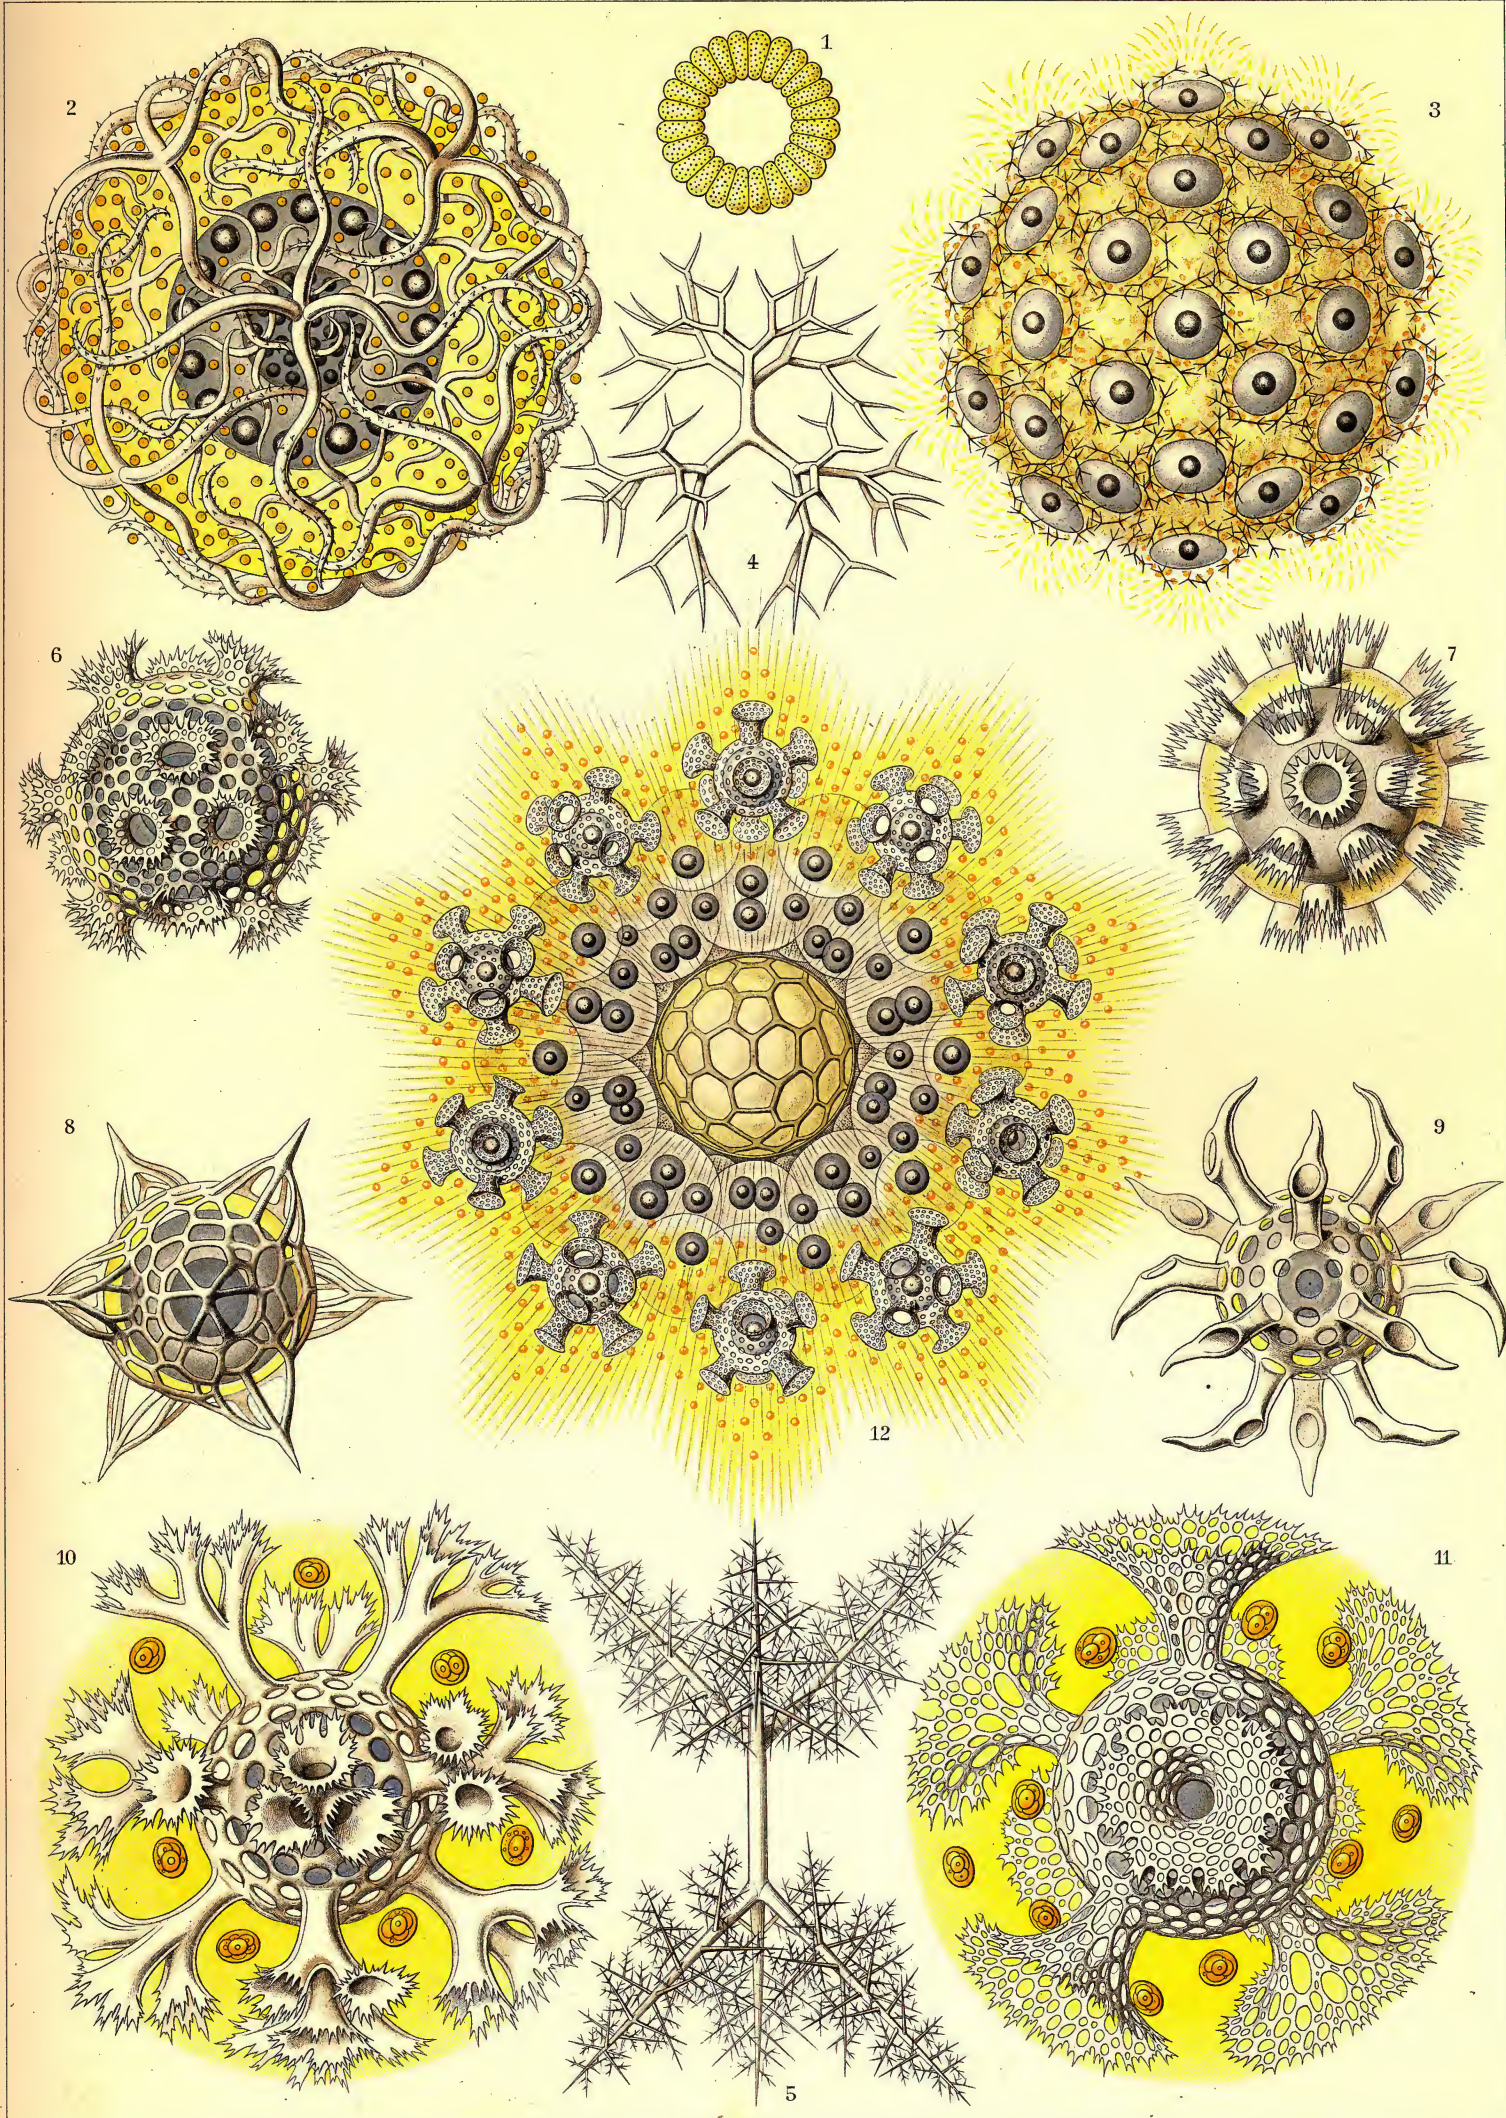

Stauromedusae. — Becherquassen.

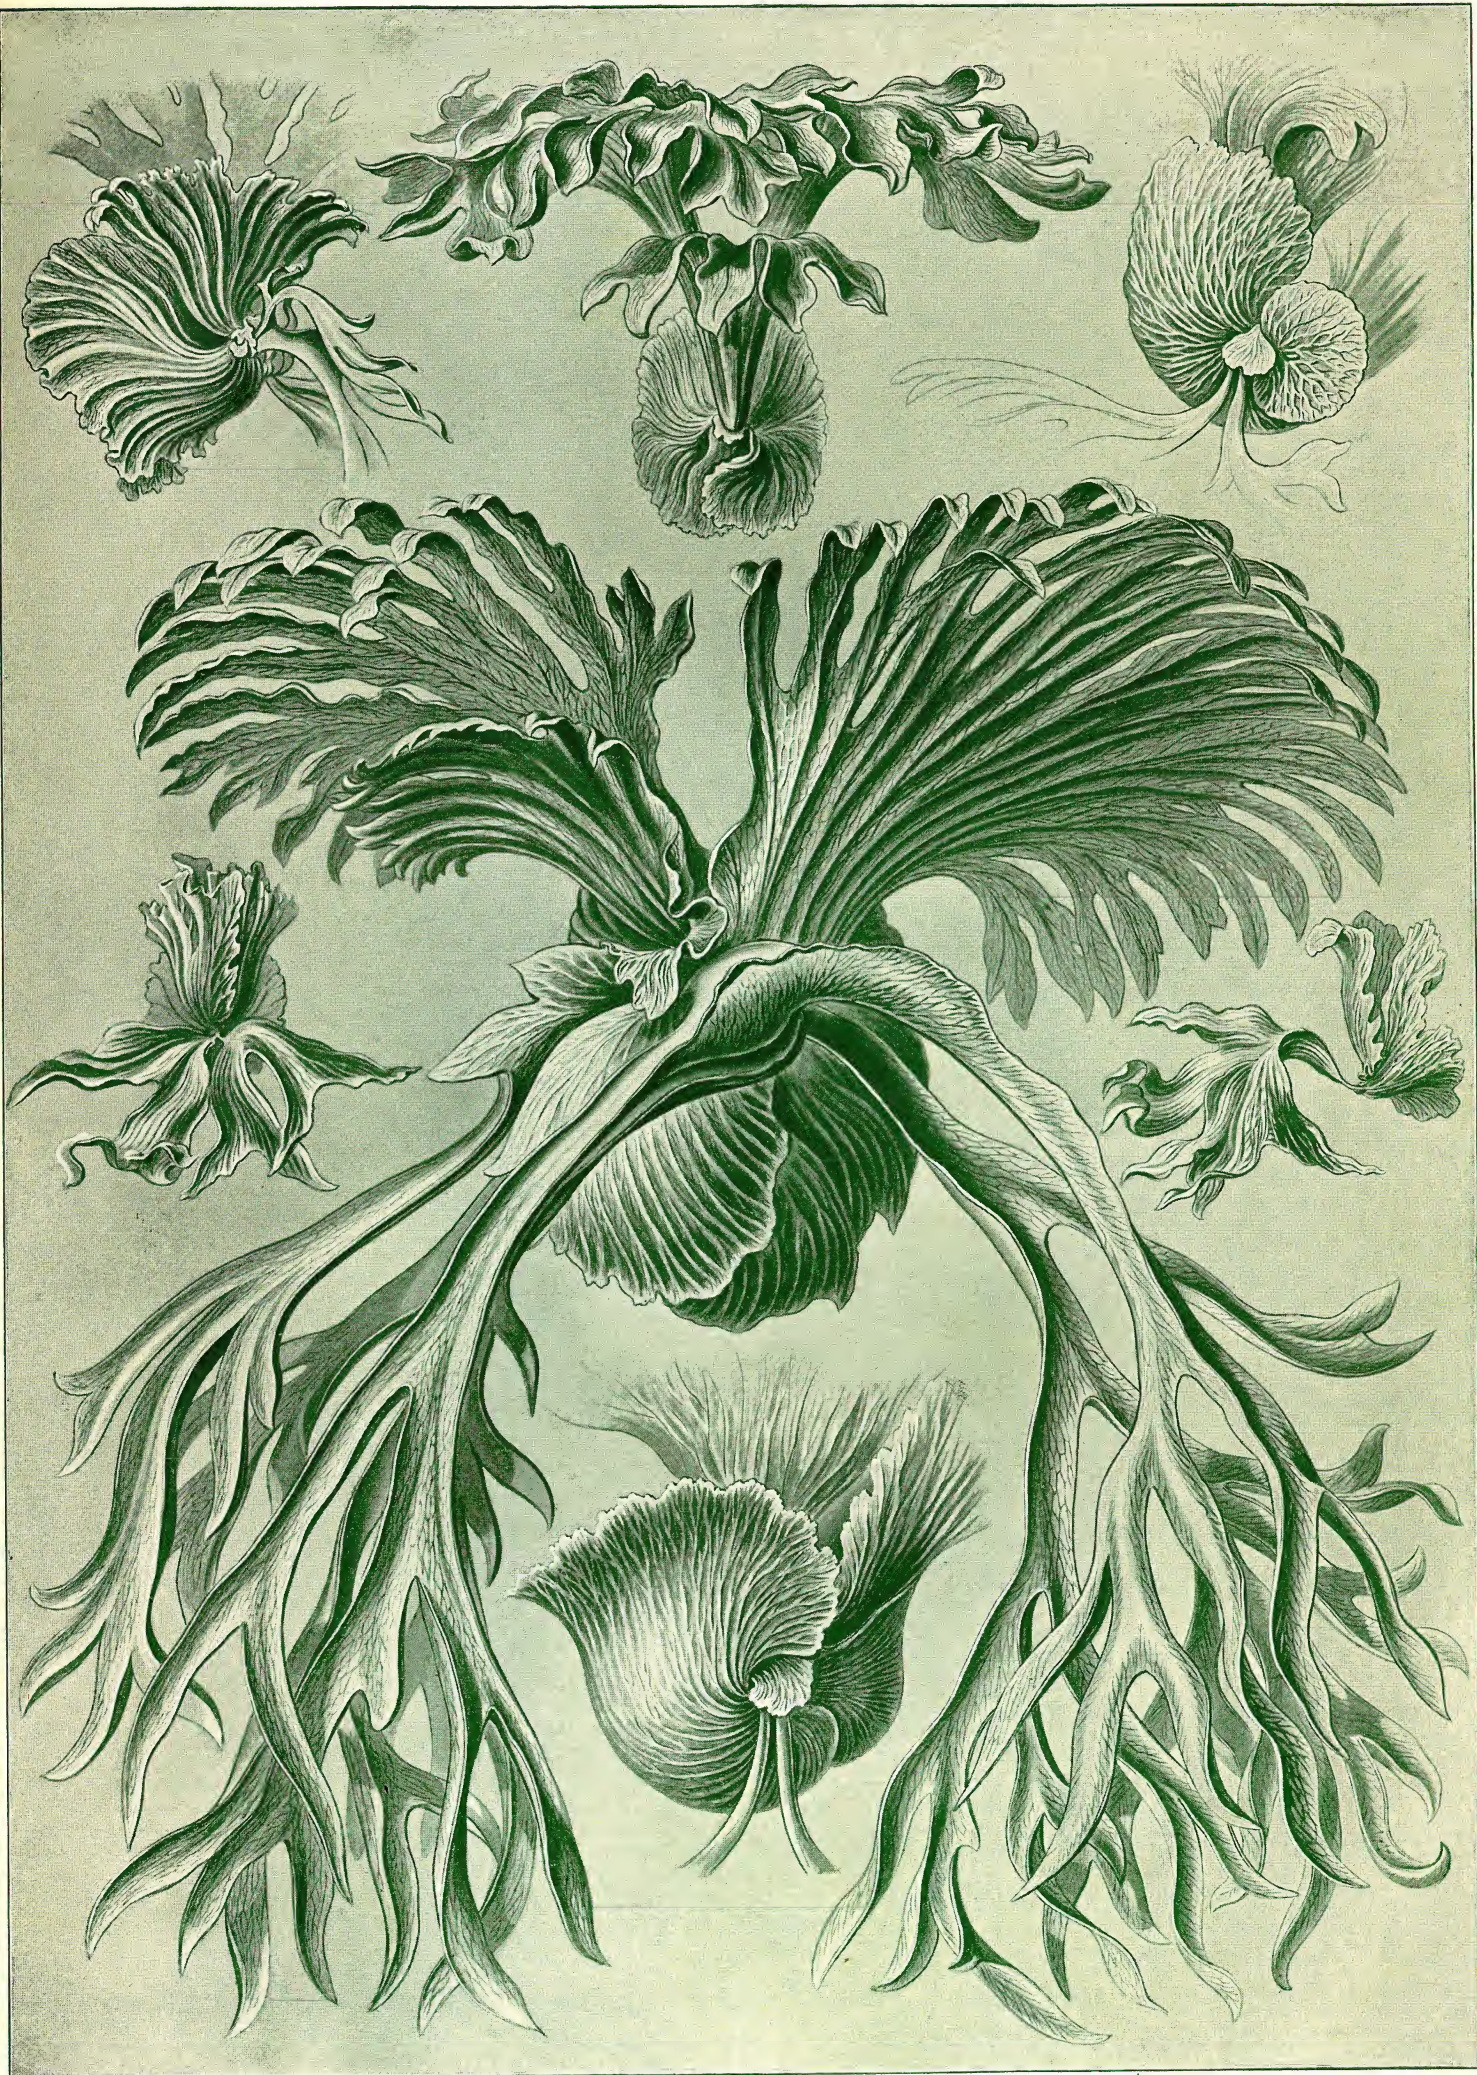

Actiniae. — Seeanemonen.

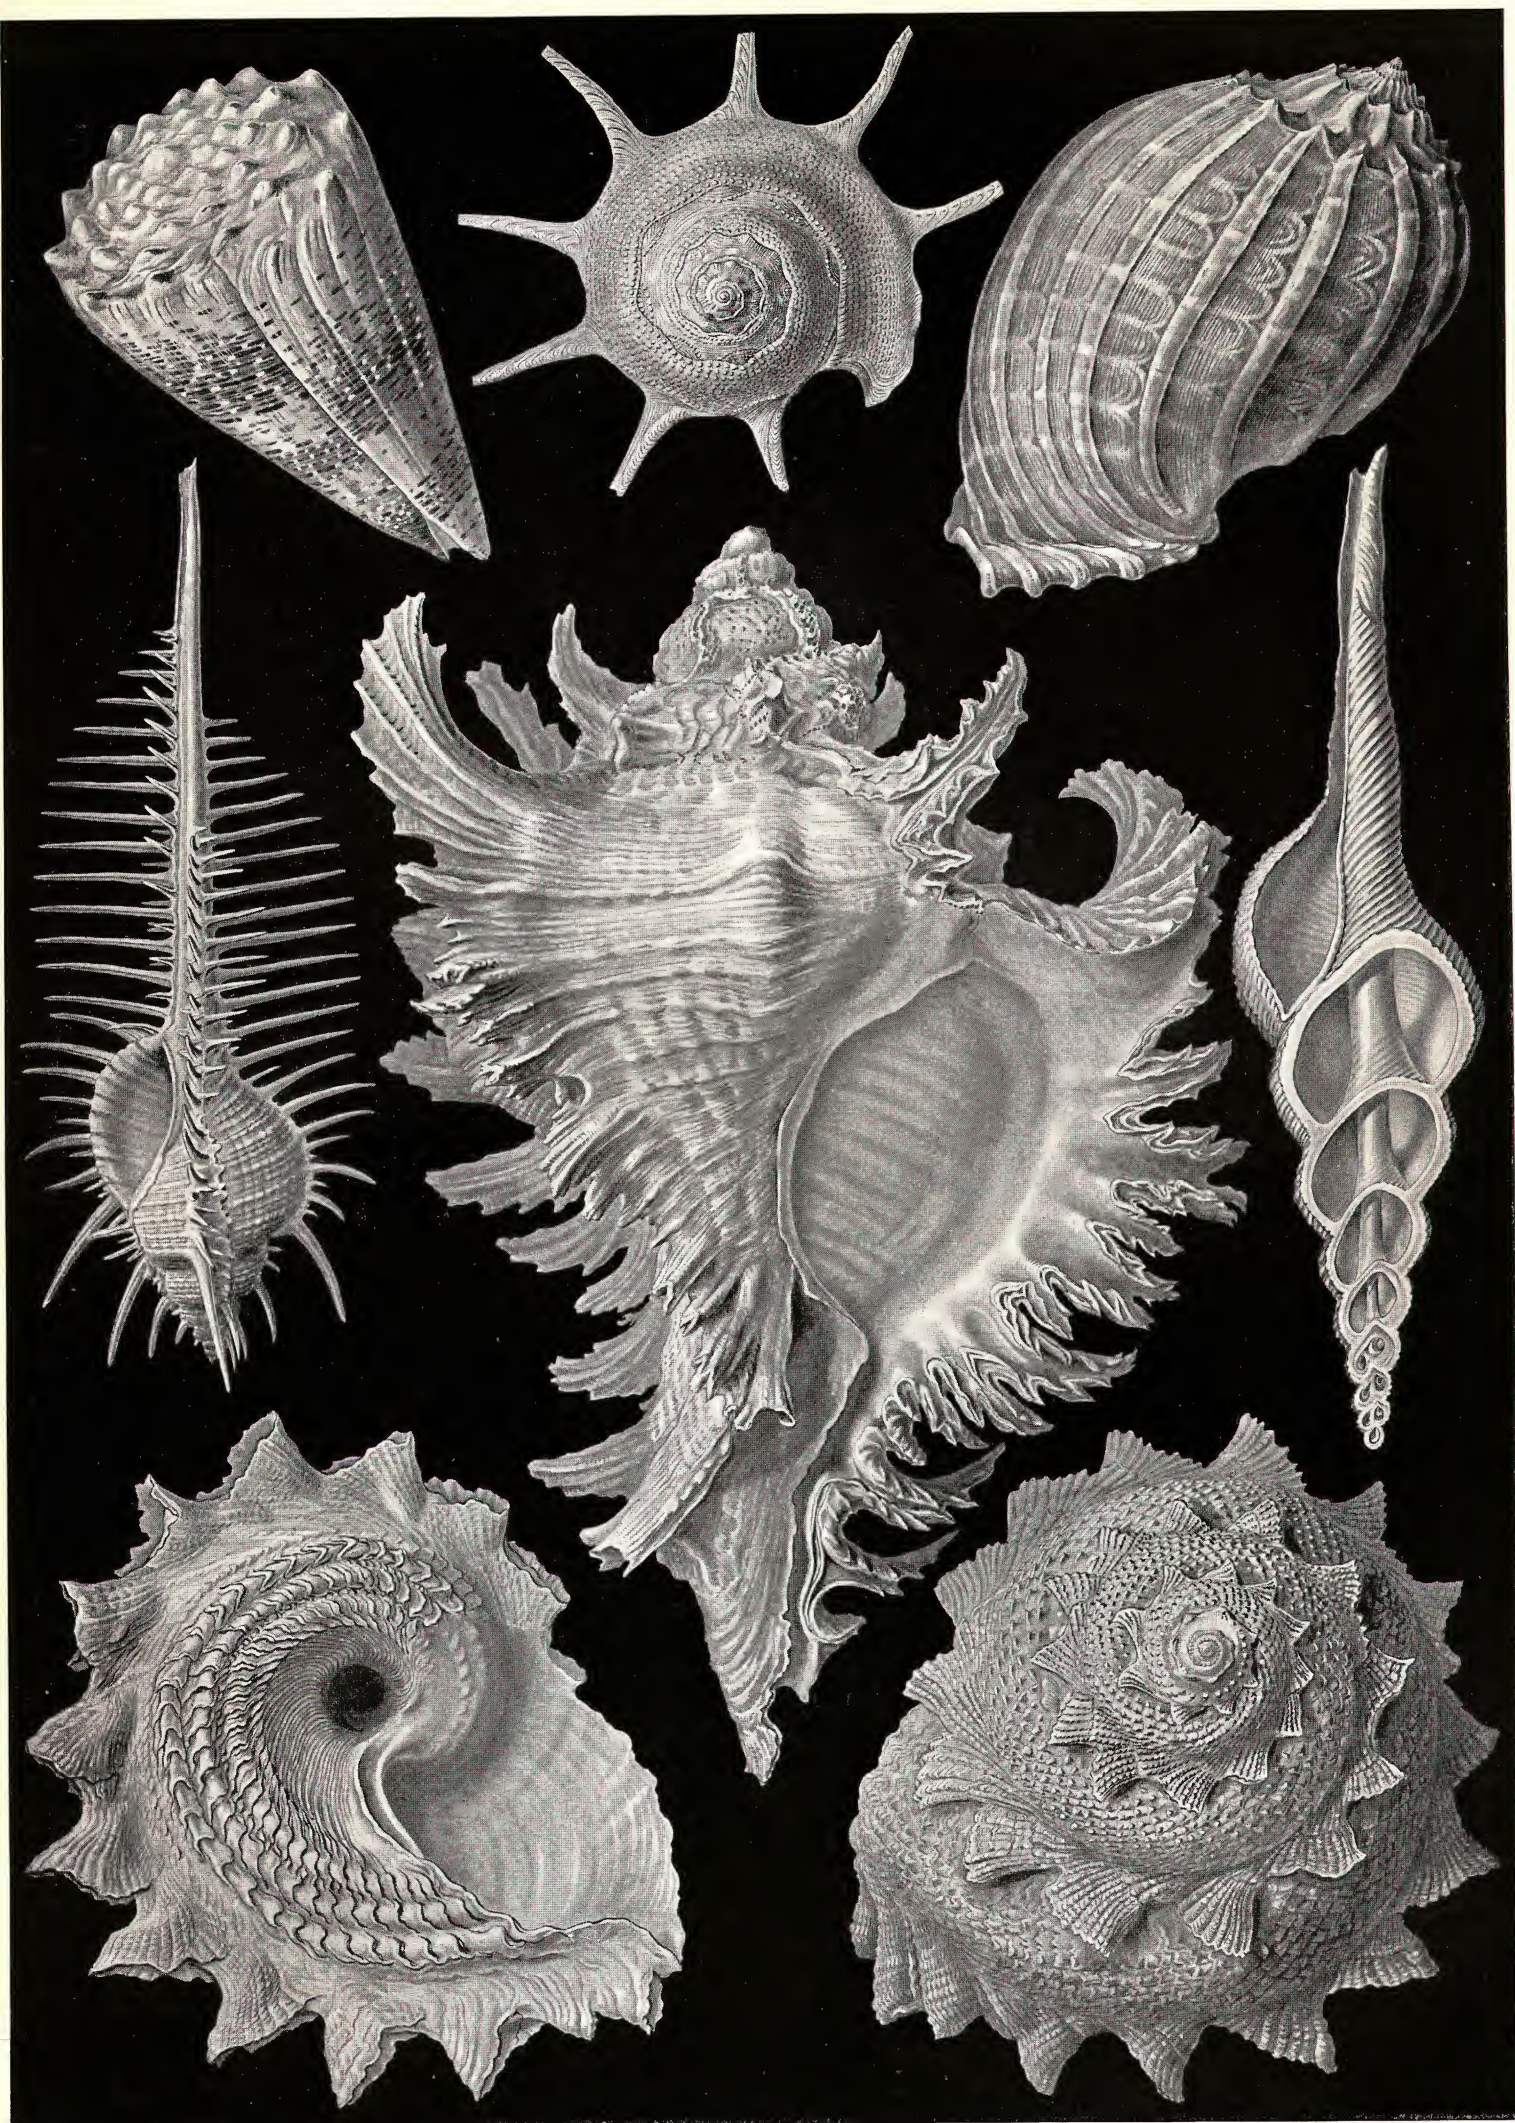

Thuroidea. — Gurkensterne.

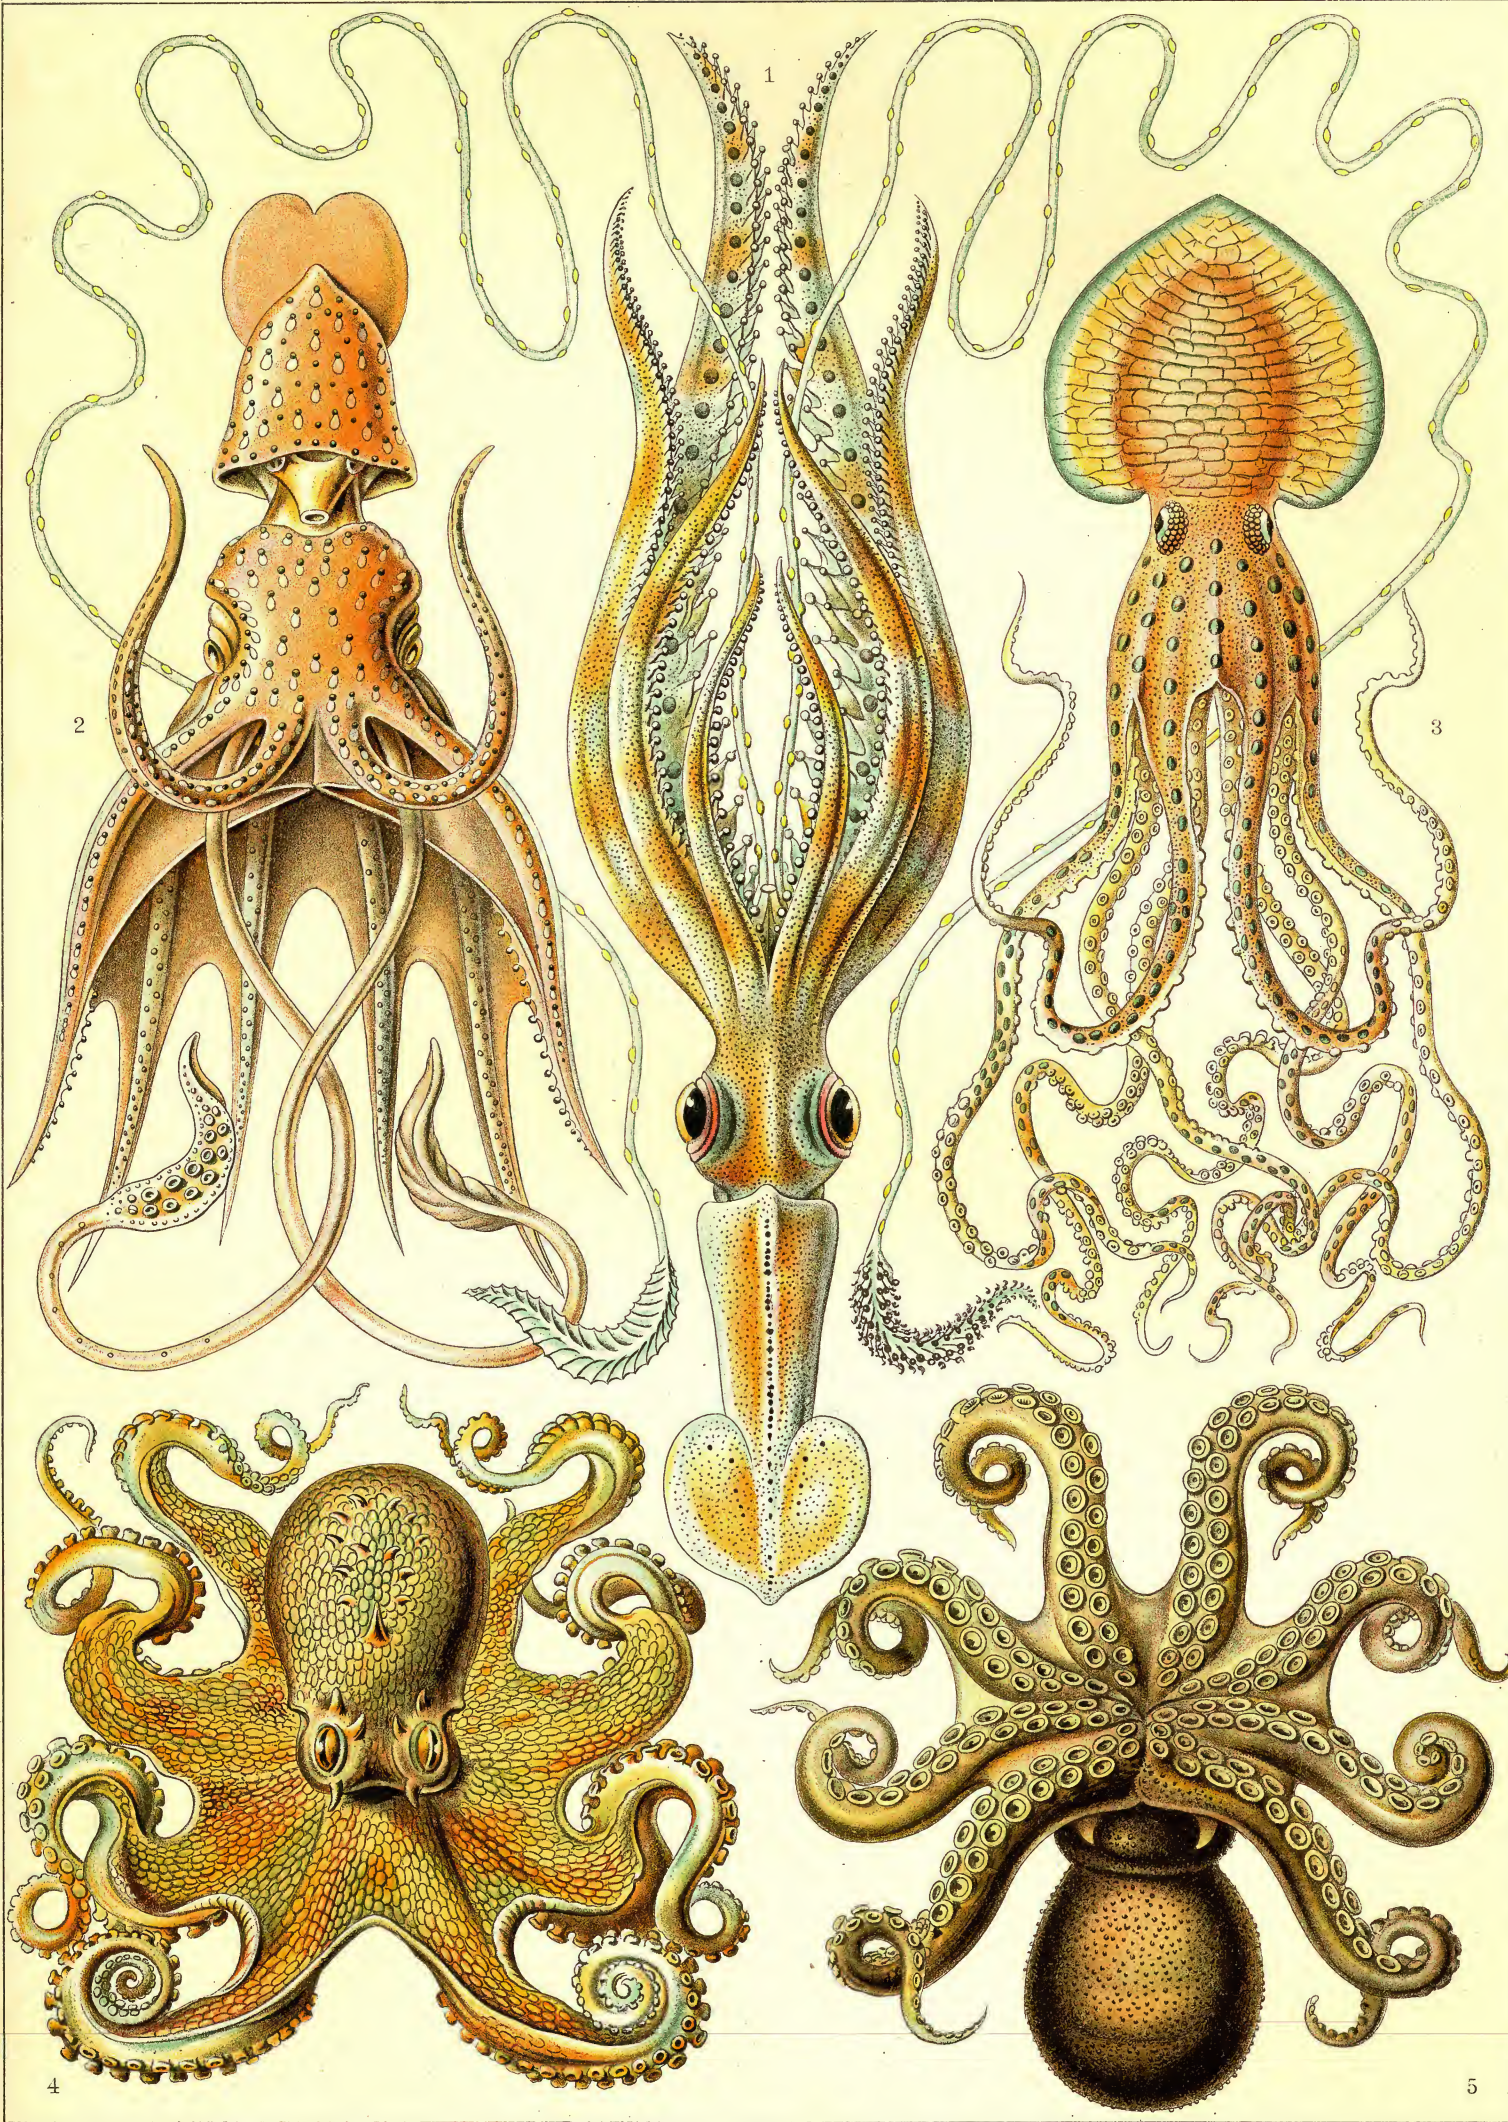

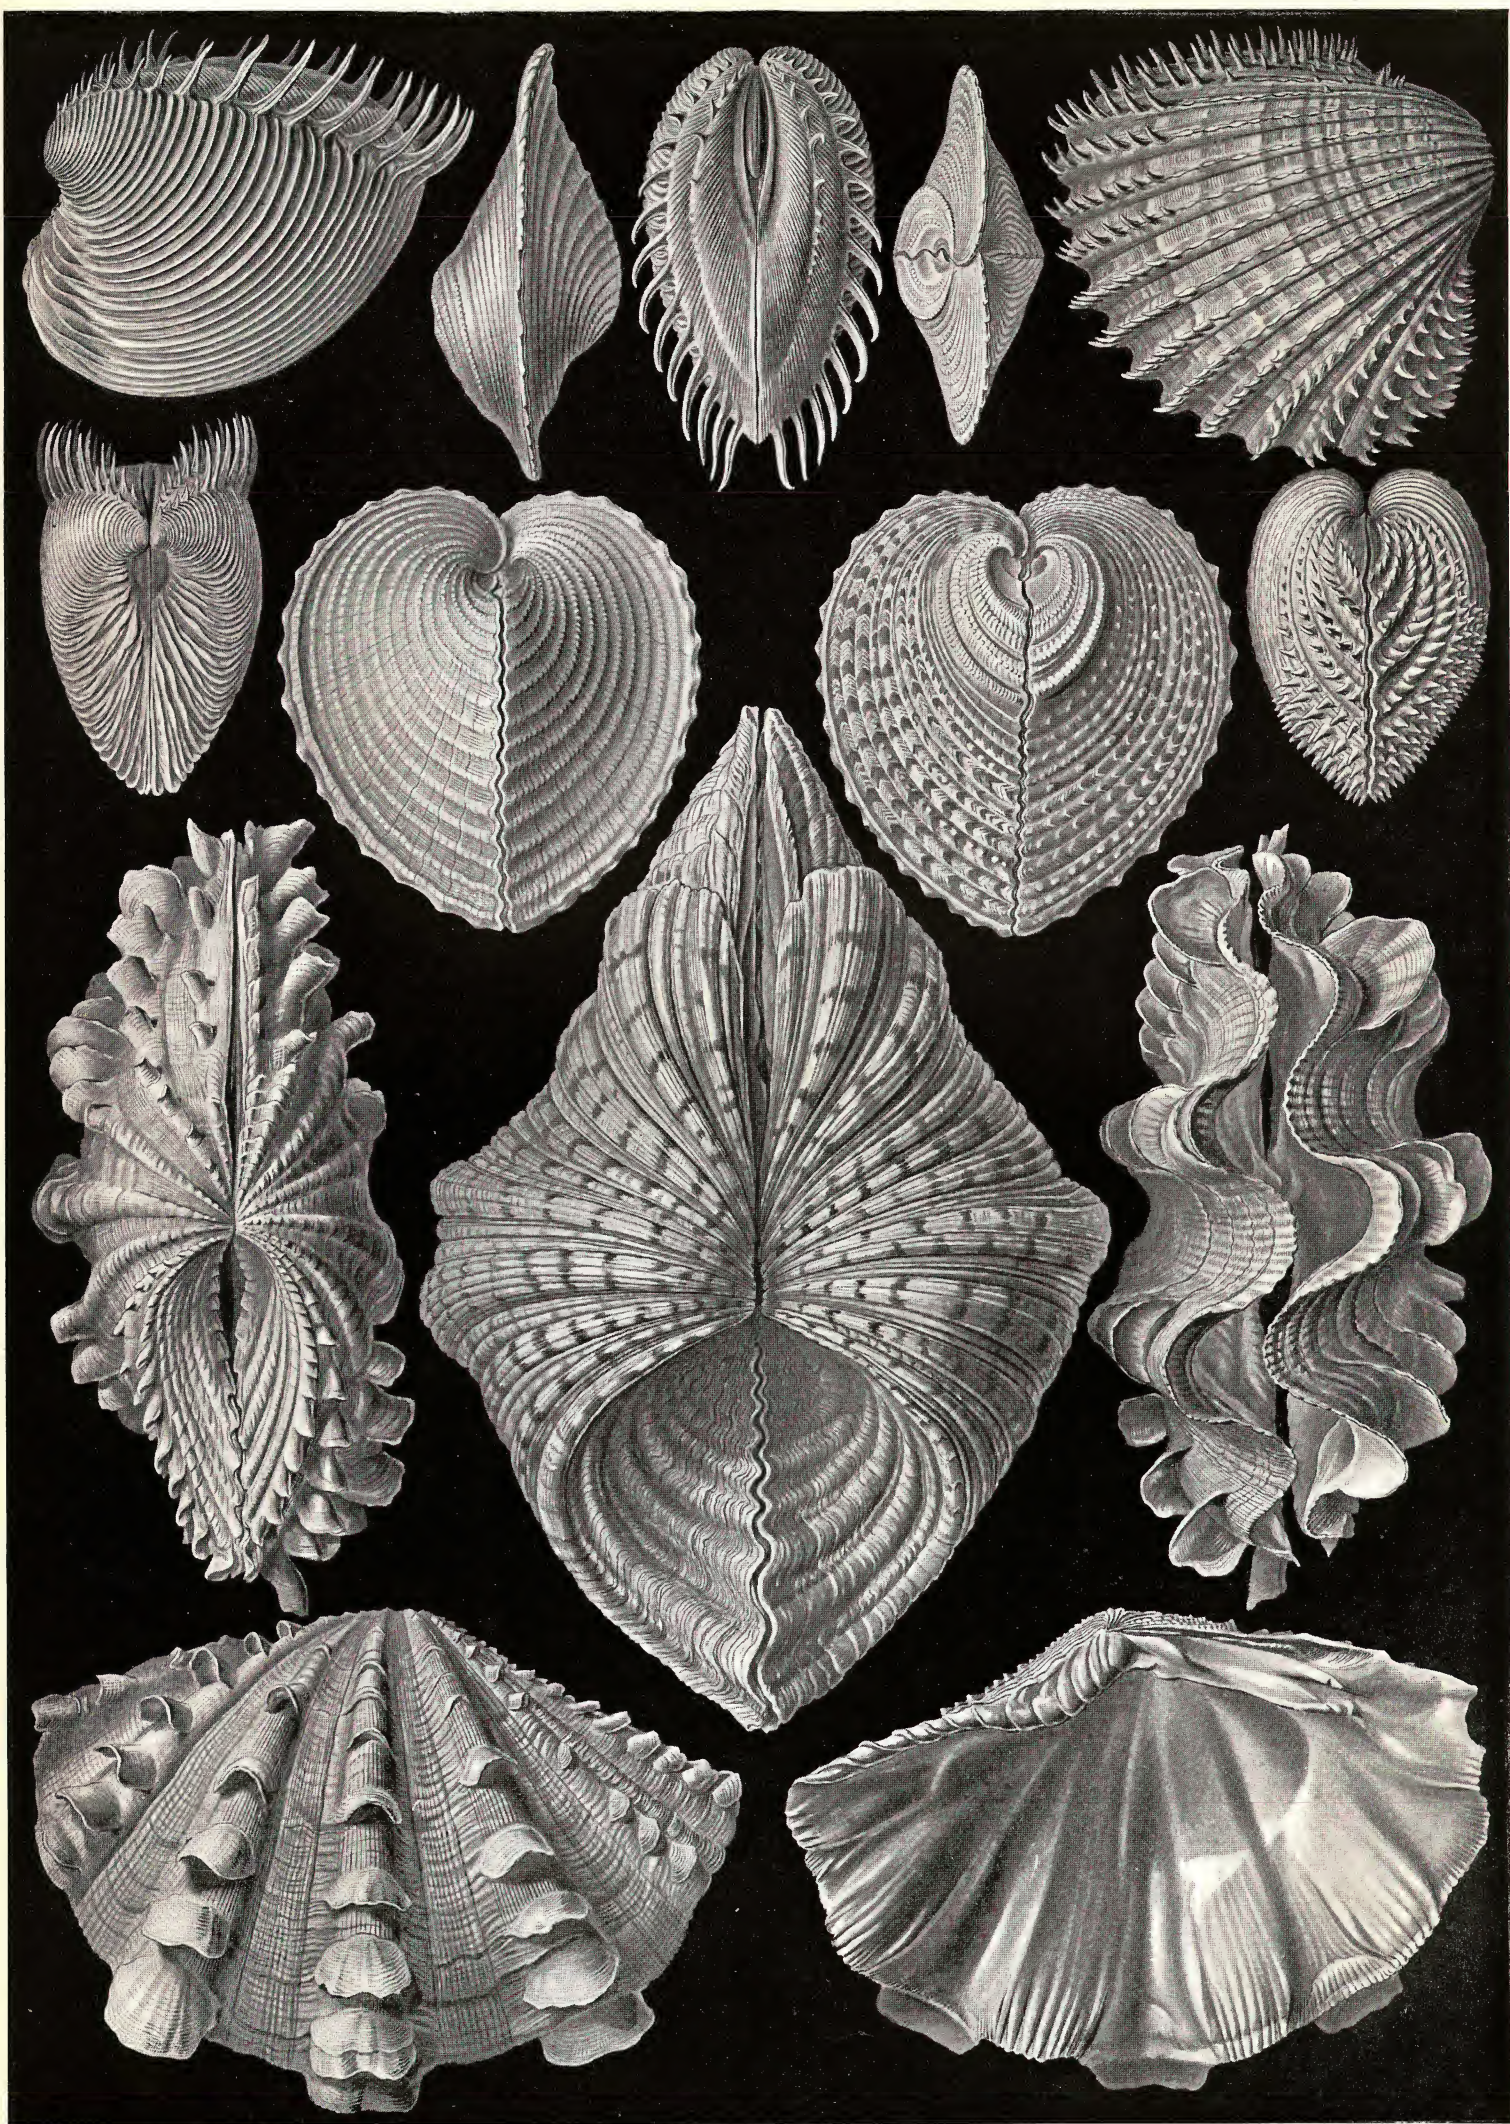

Filicinae. — Laubfarne.

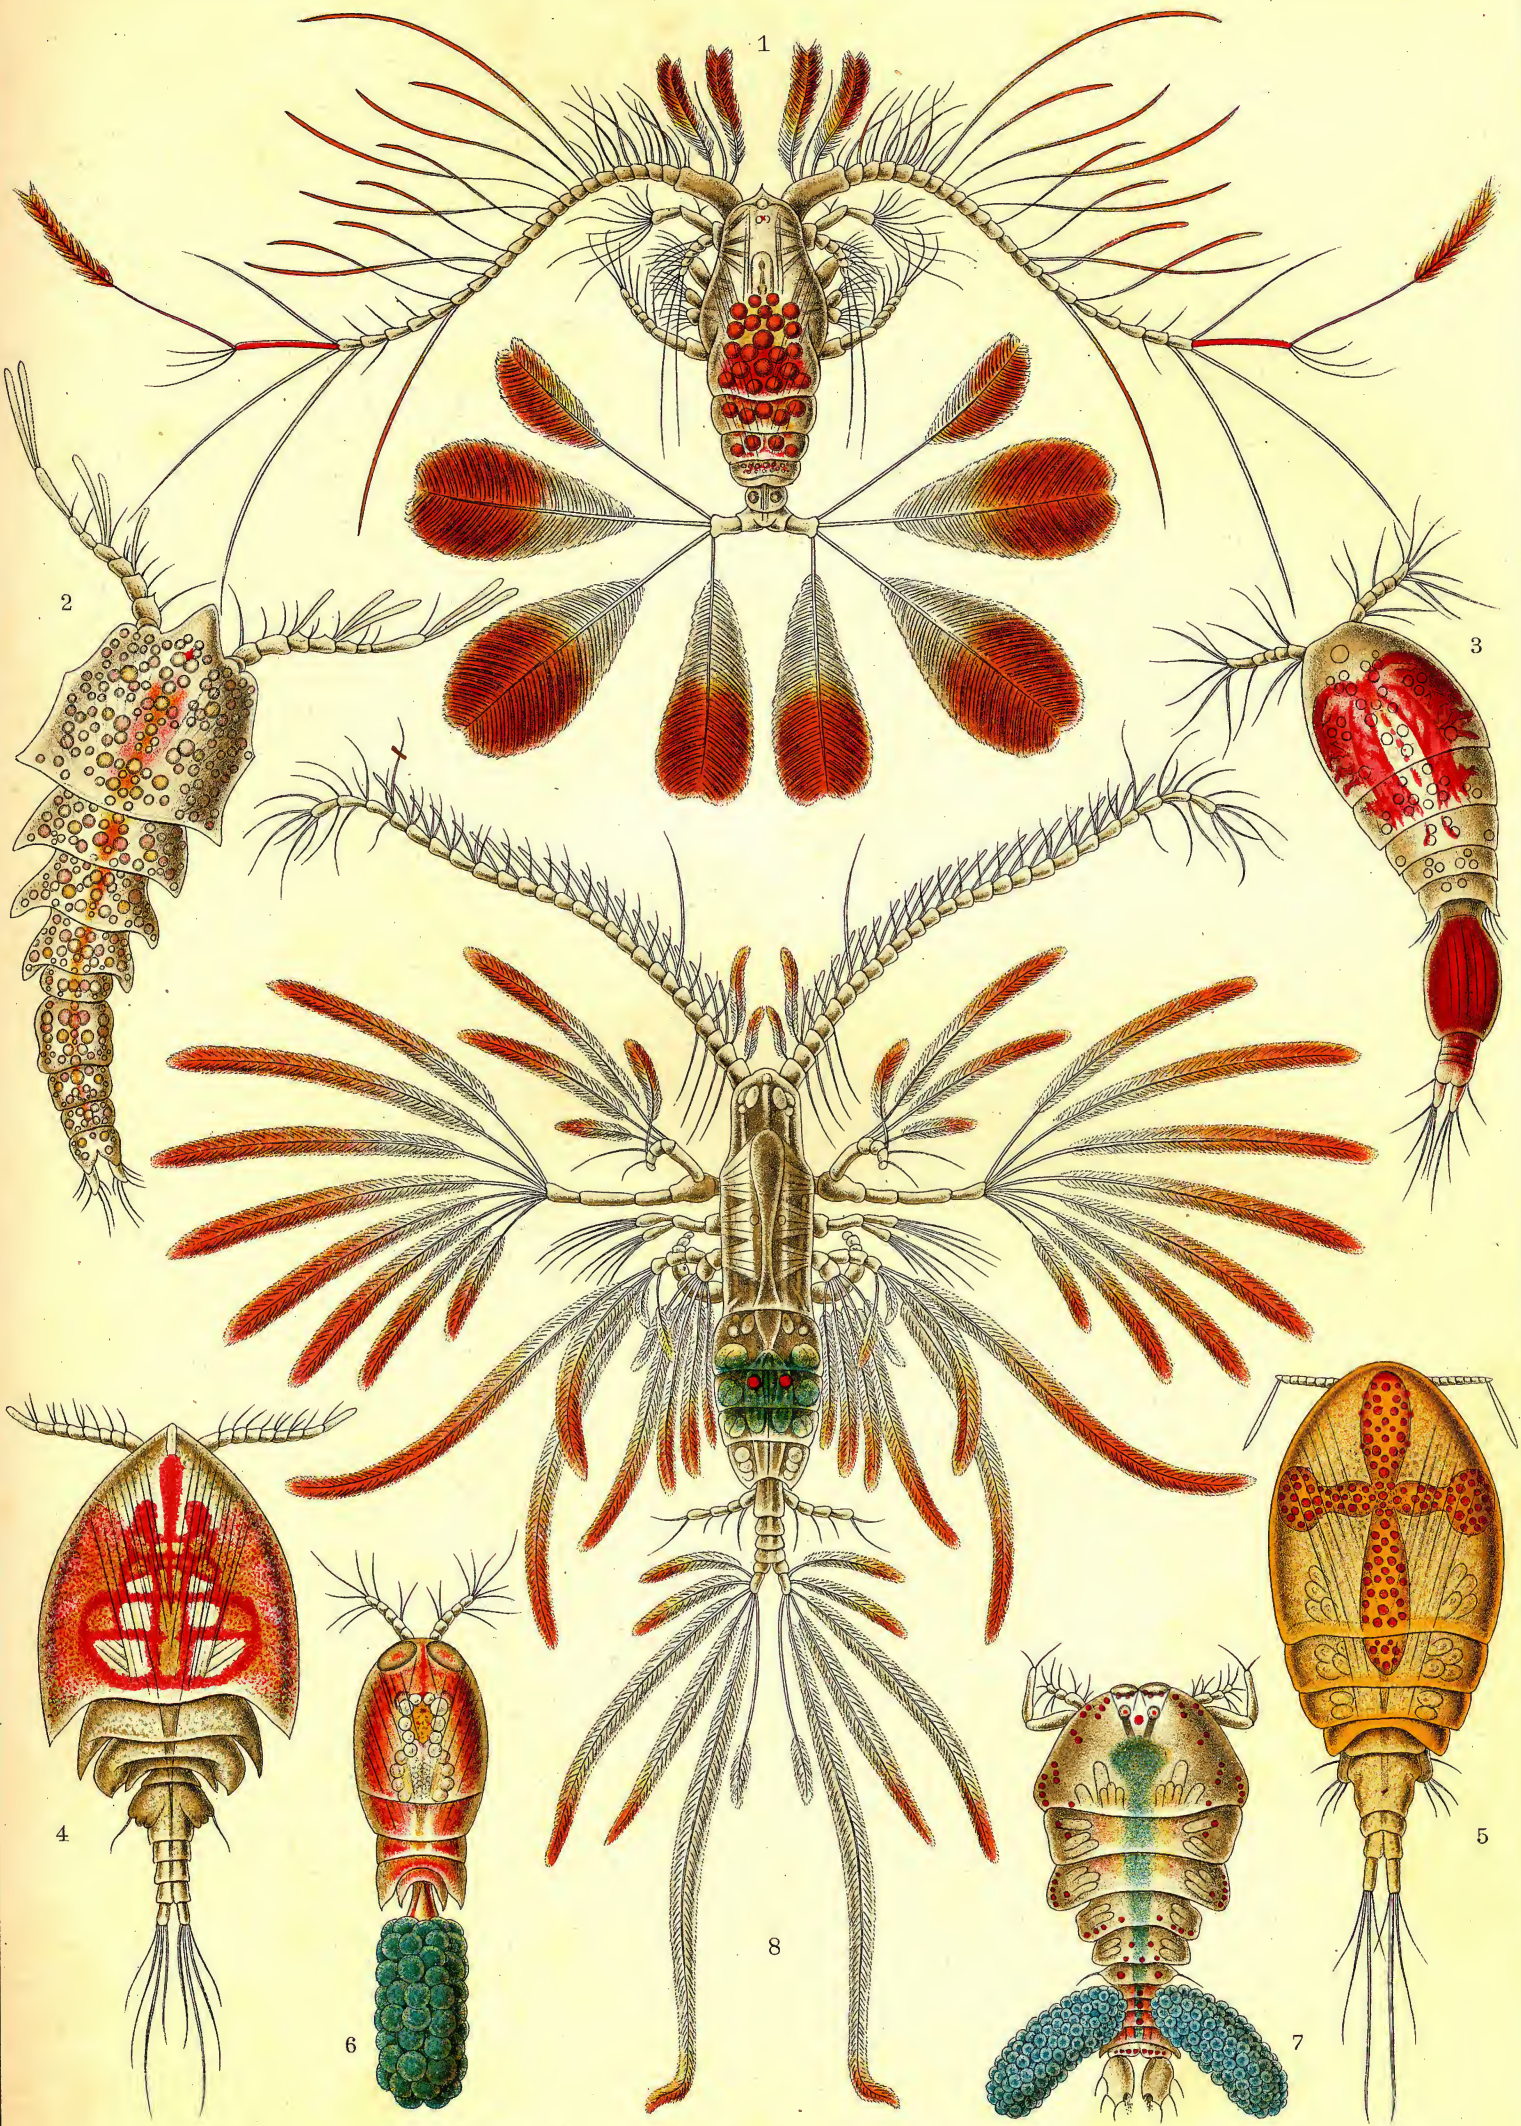

Prosobranchia. — Vorderkiemen-Schnecken.

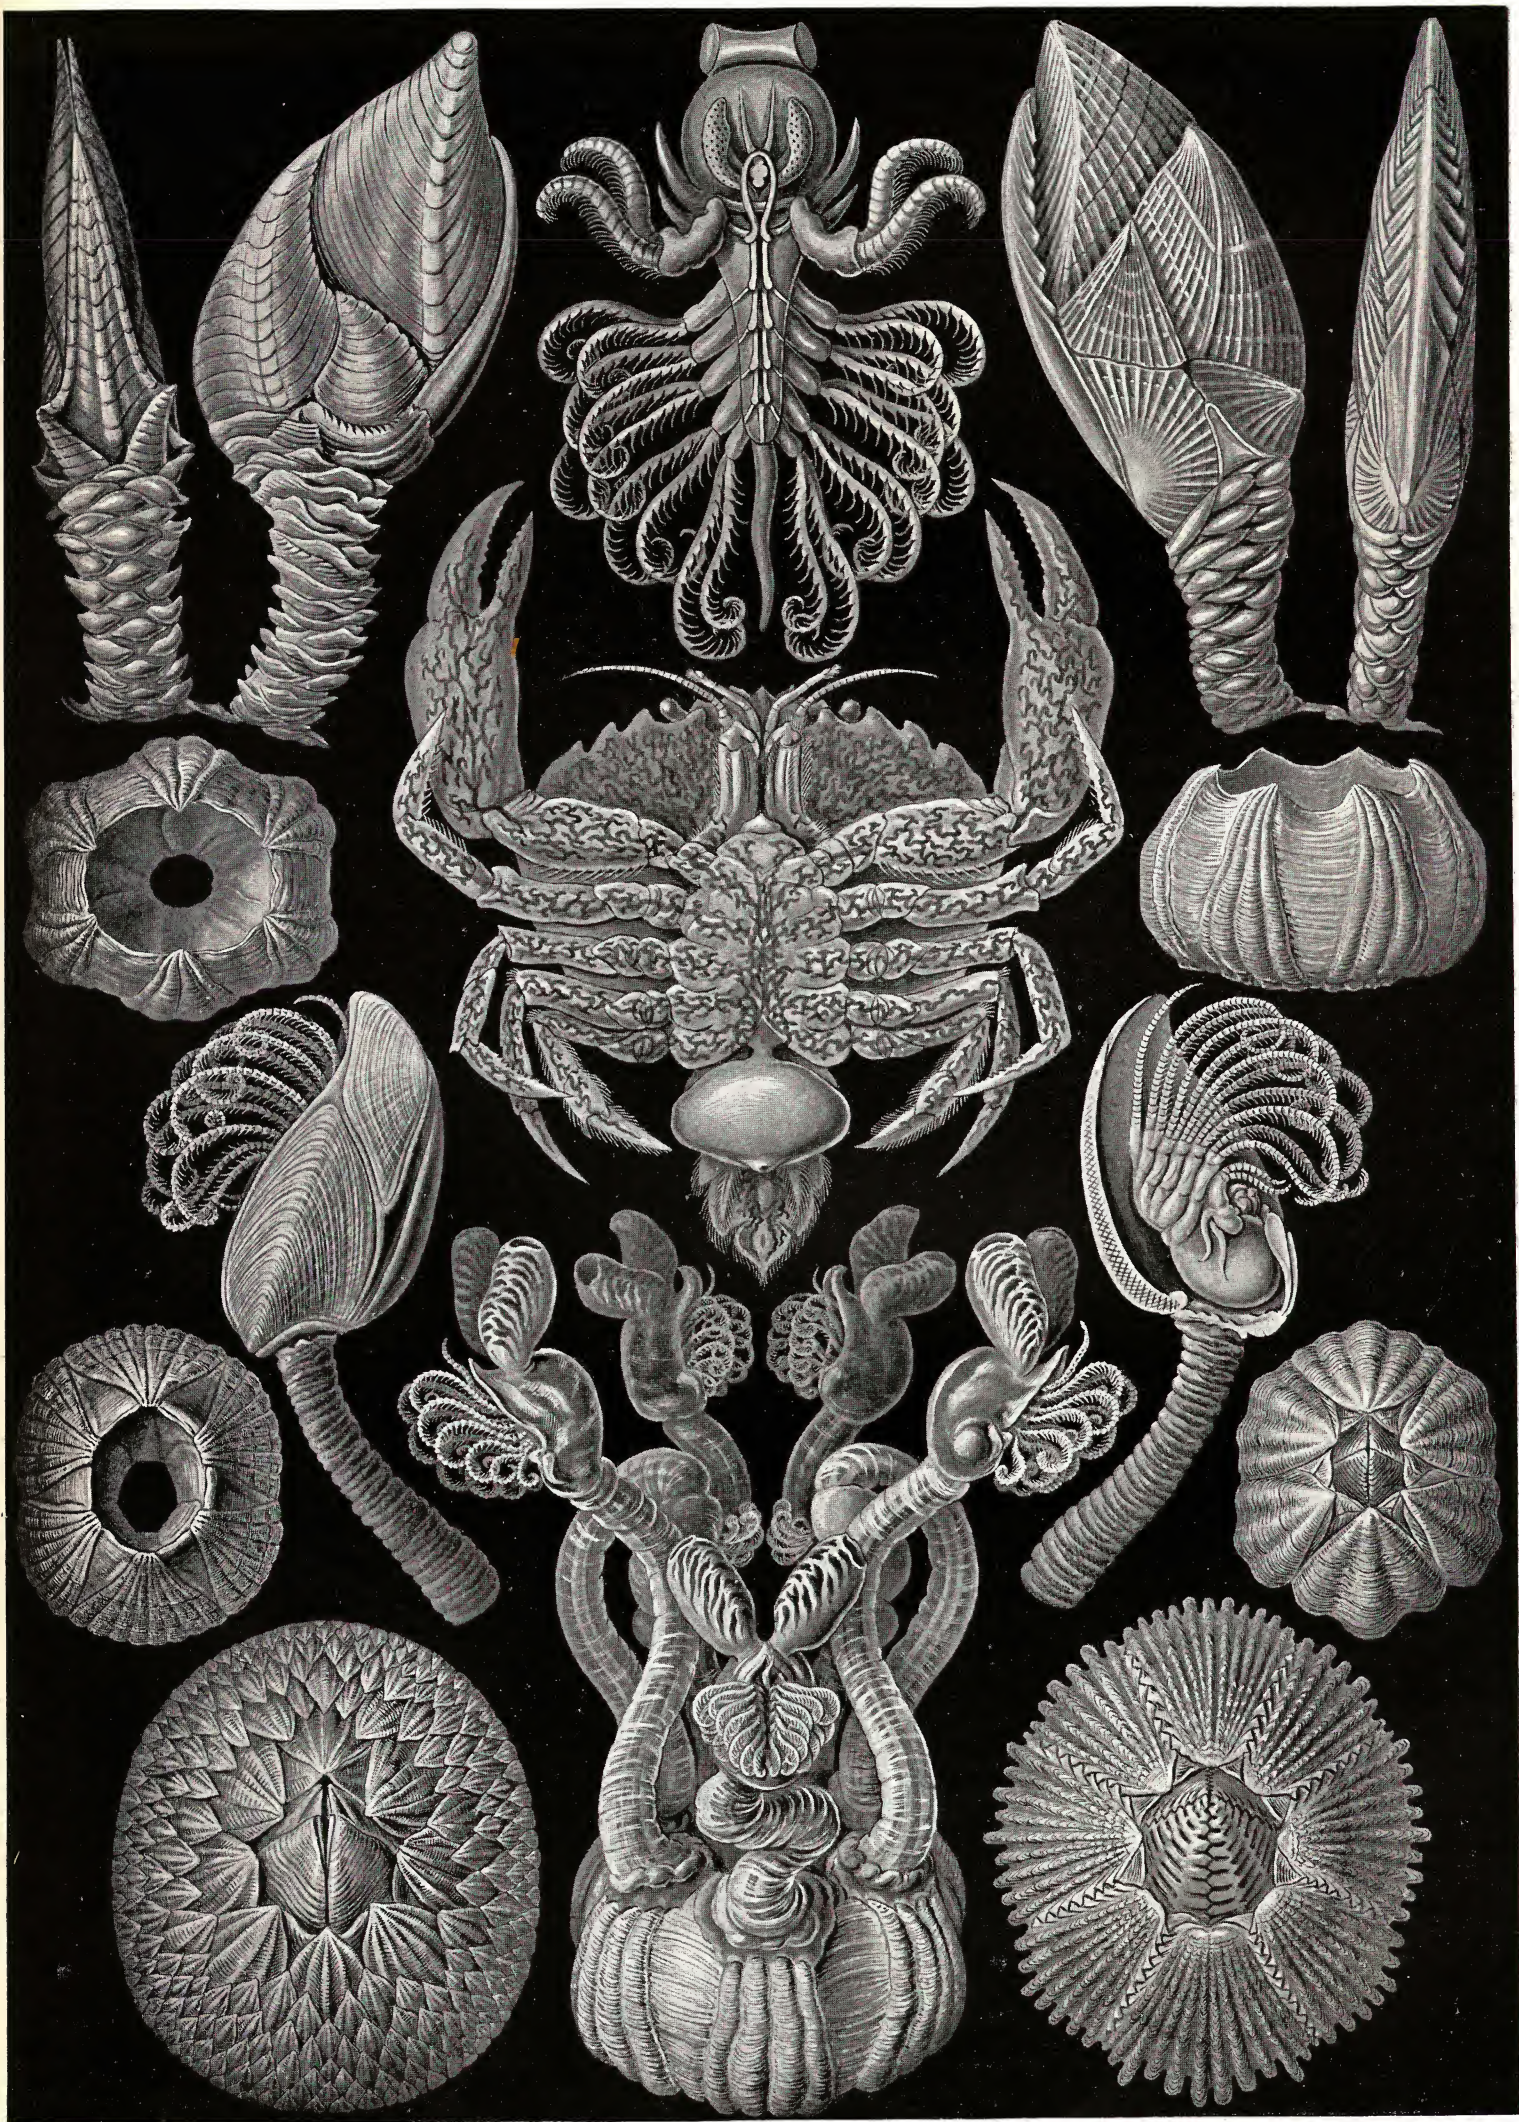

Gamochonia. — Trichterkraken.

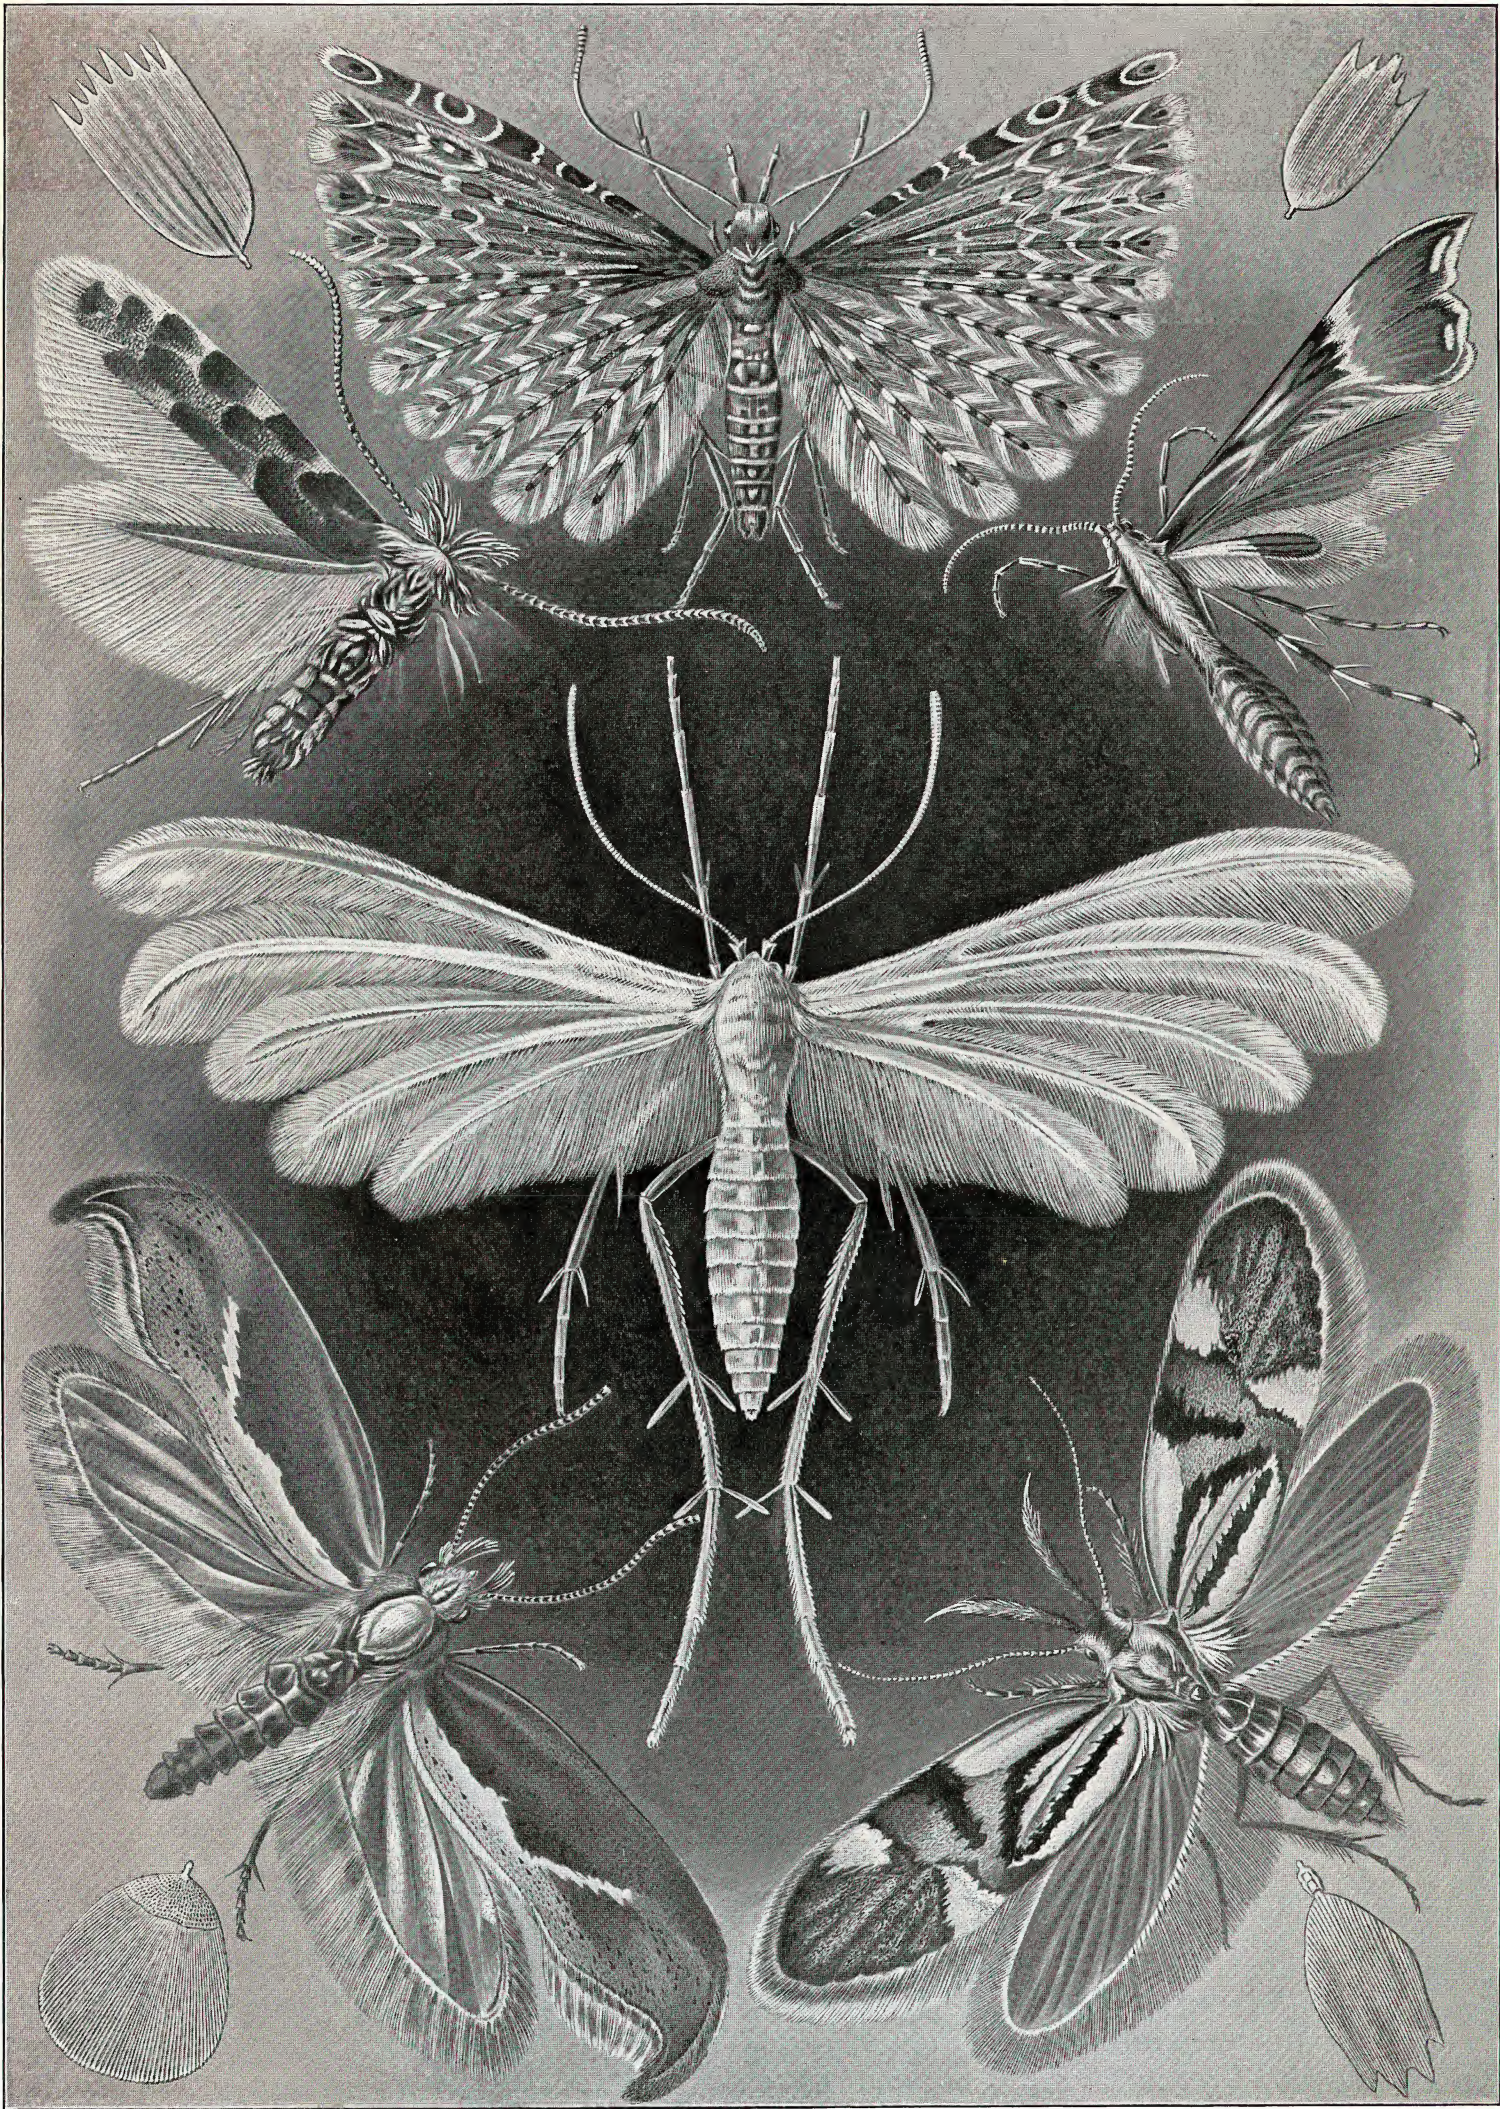

Acephala. — Muscheln.

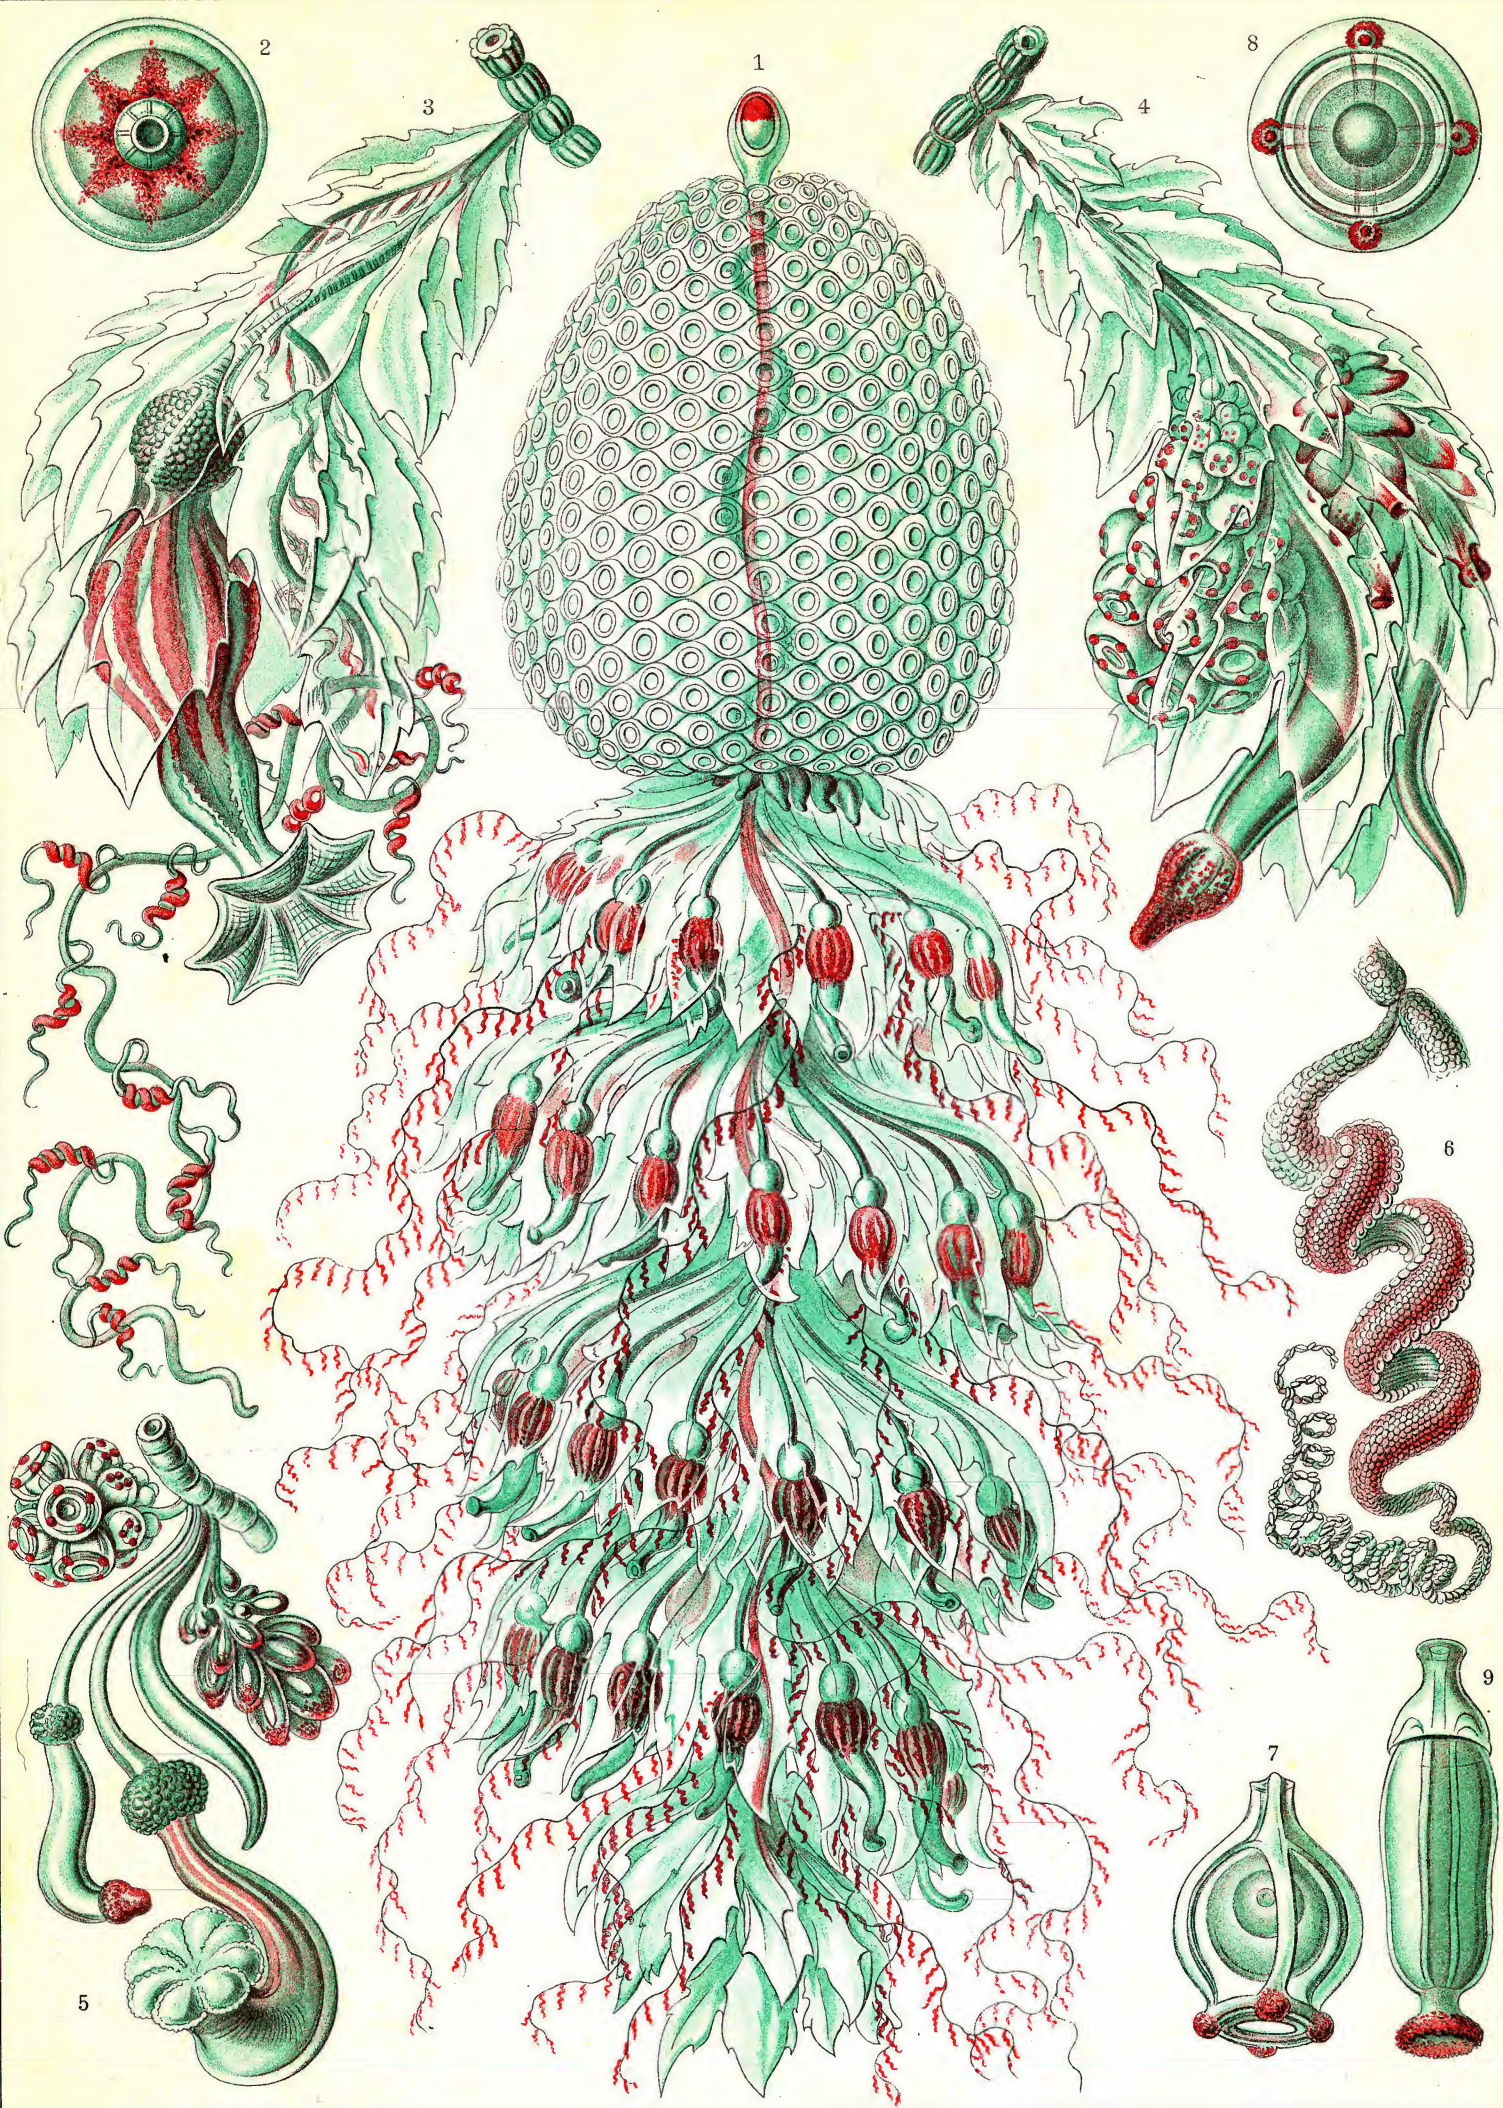

Copepoda. — Zuderkrebsse.

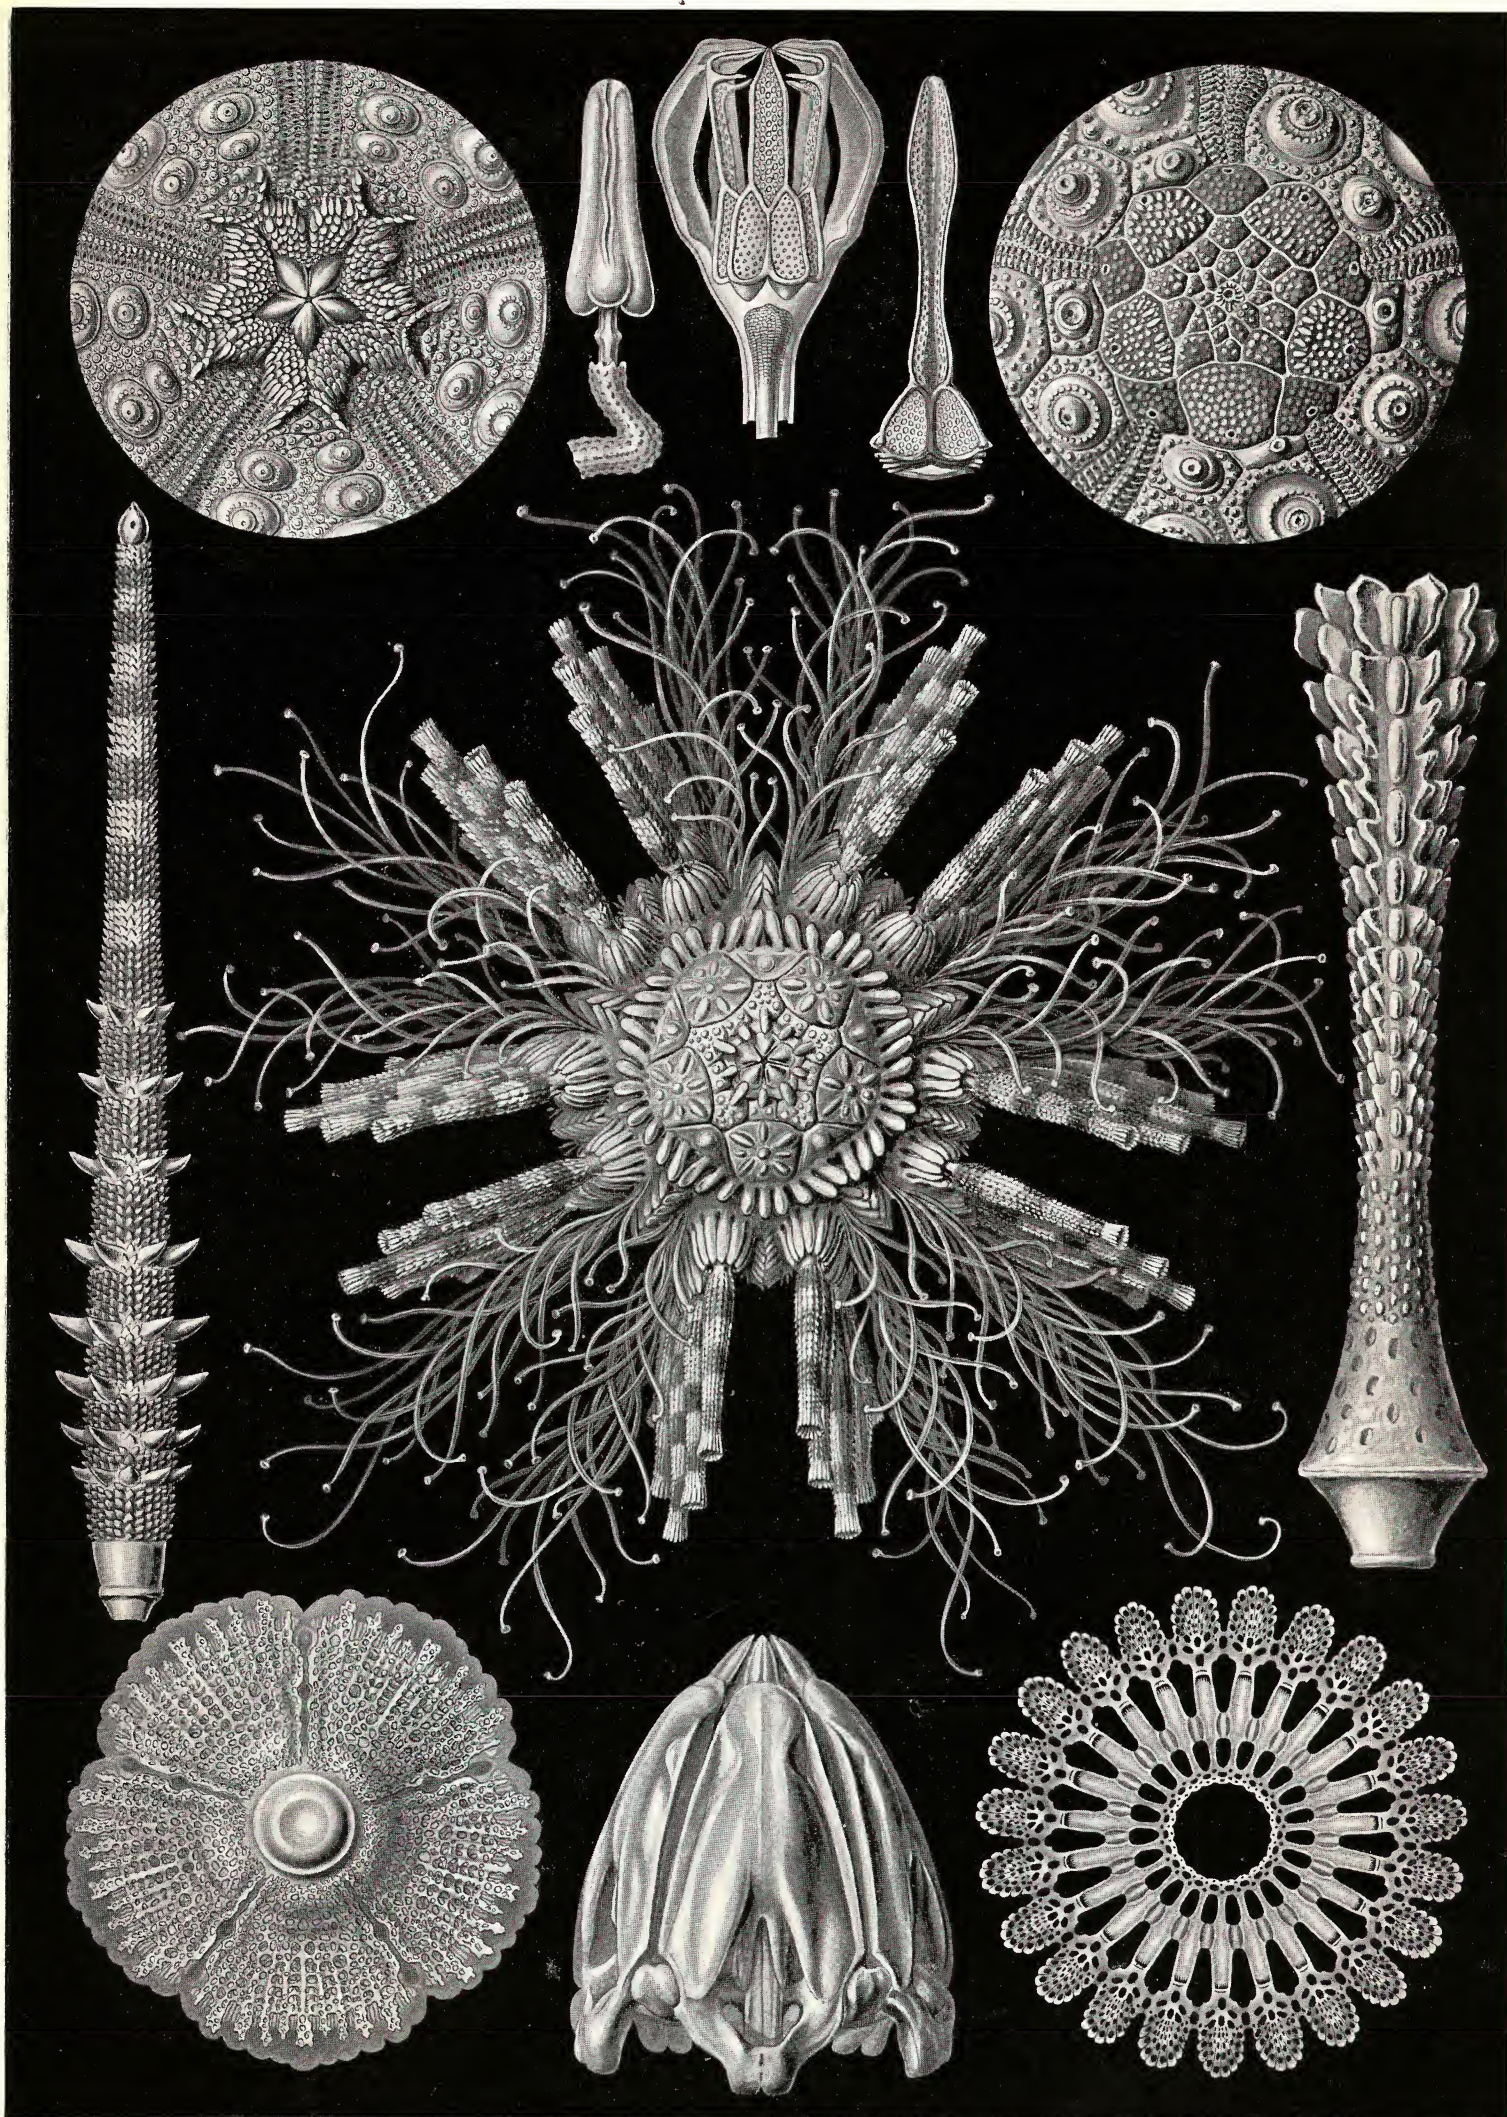

Cirripedia. — Rankenkrebse.

Tineida. — Motten.

Siphonophorae. — Staatsquallen.

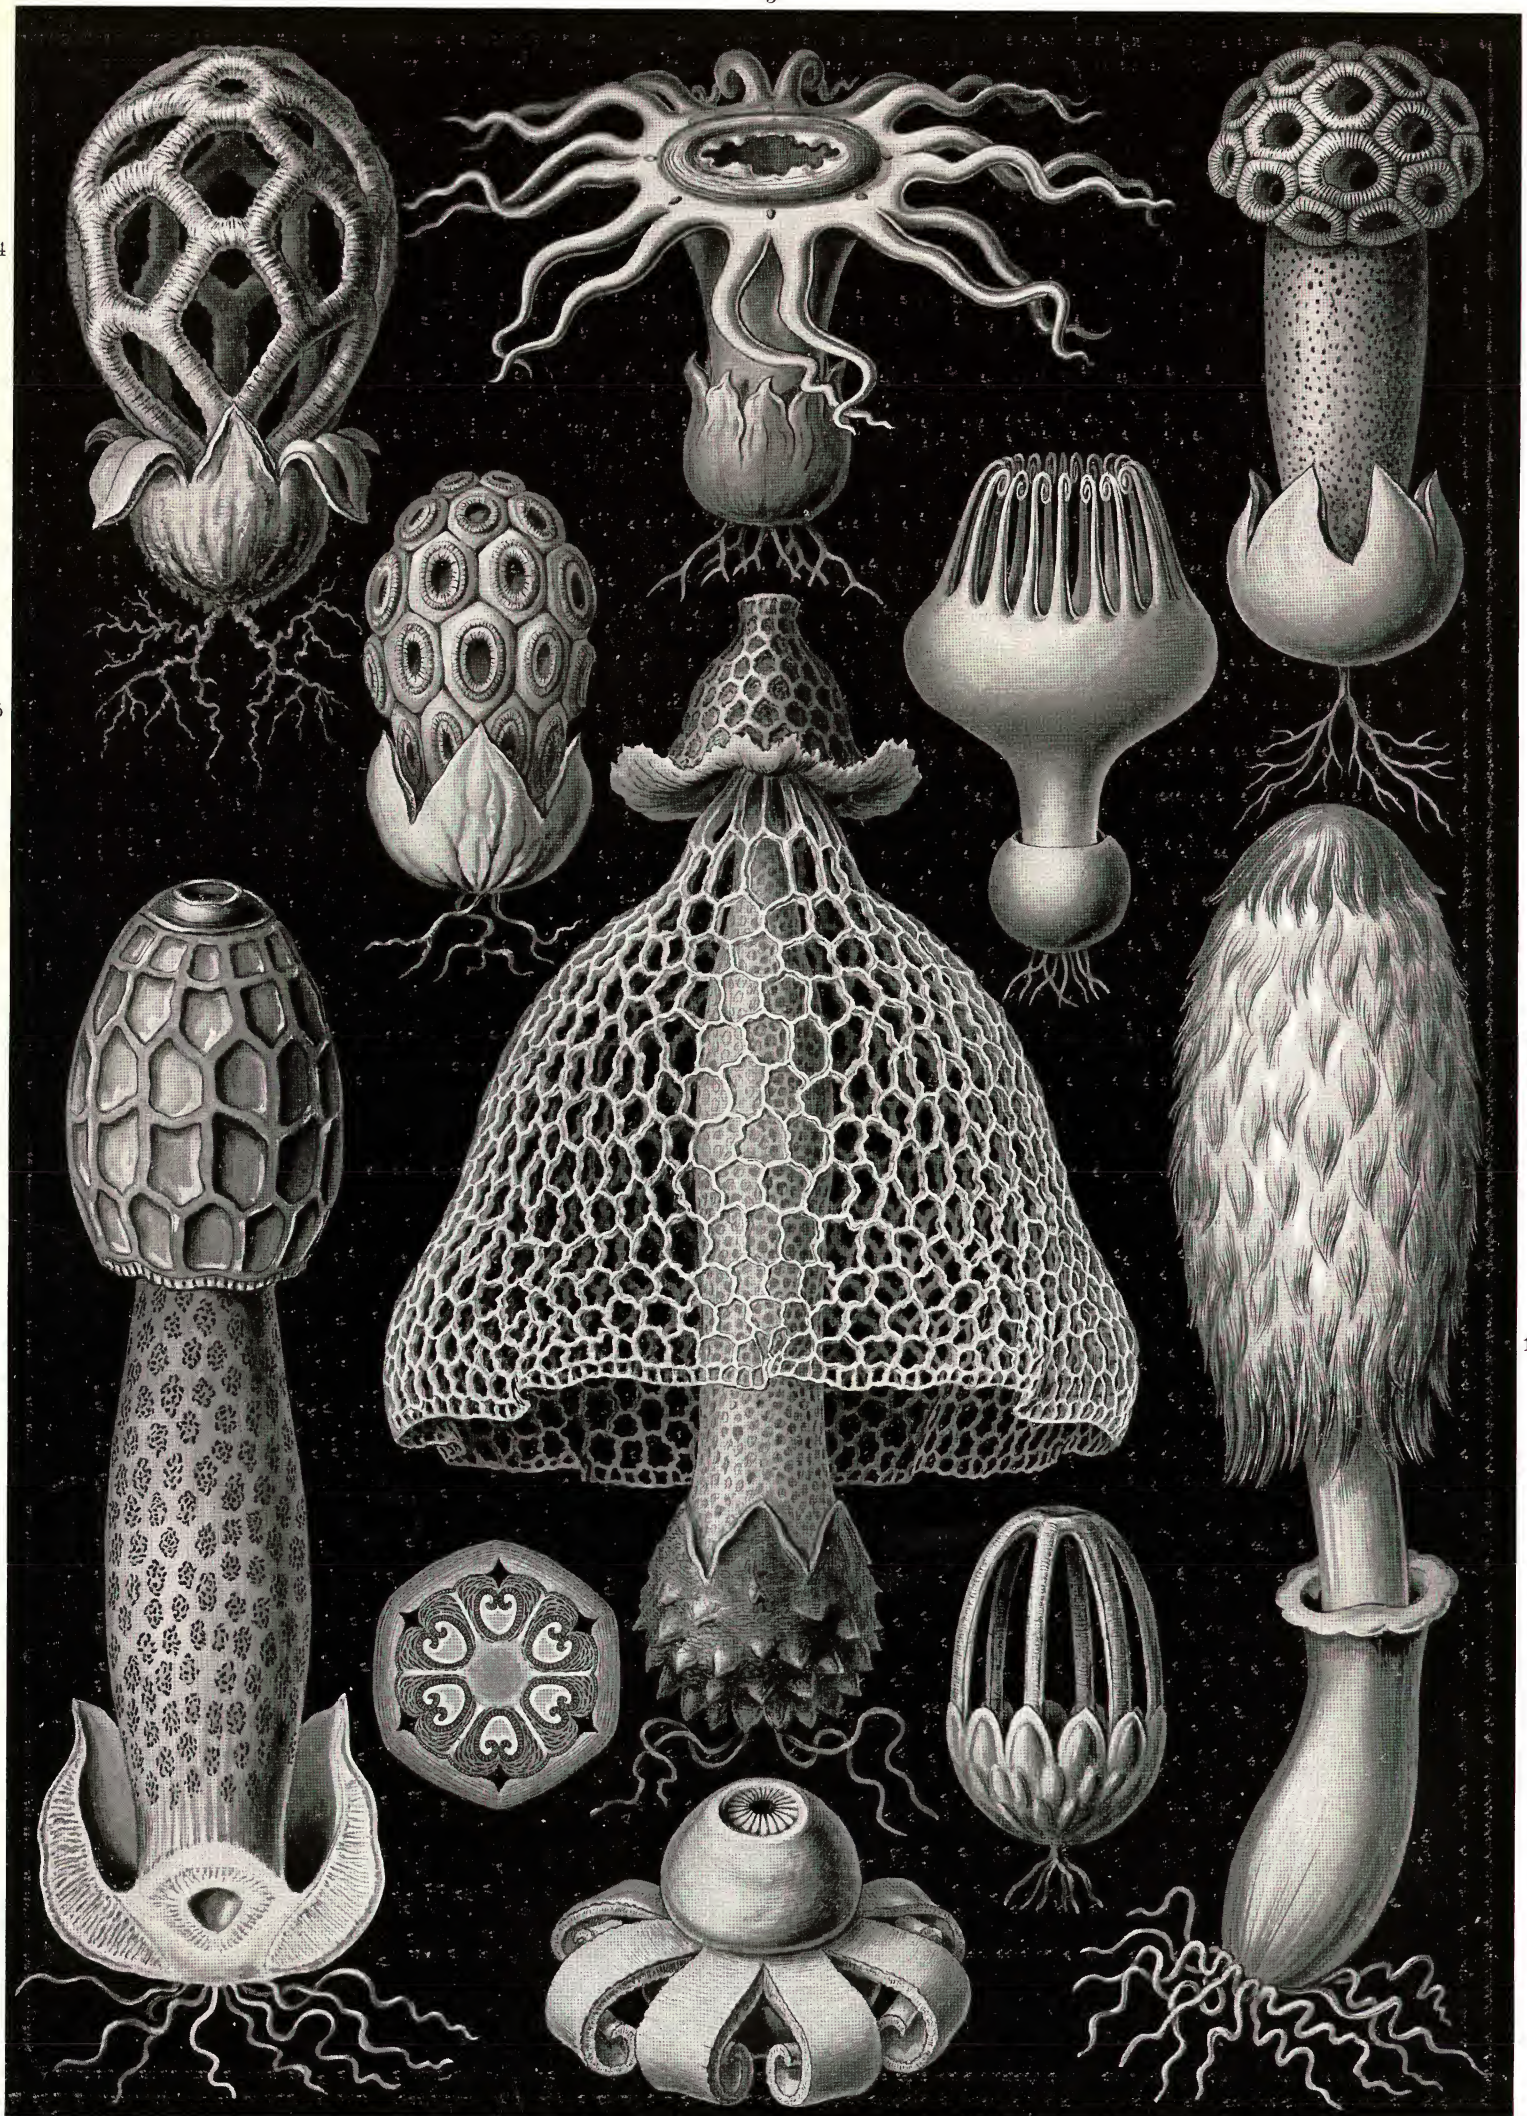

Echinidea. — *Ägelfterne*.

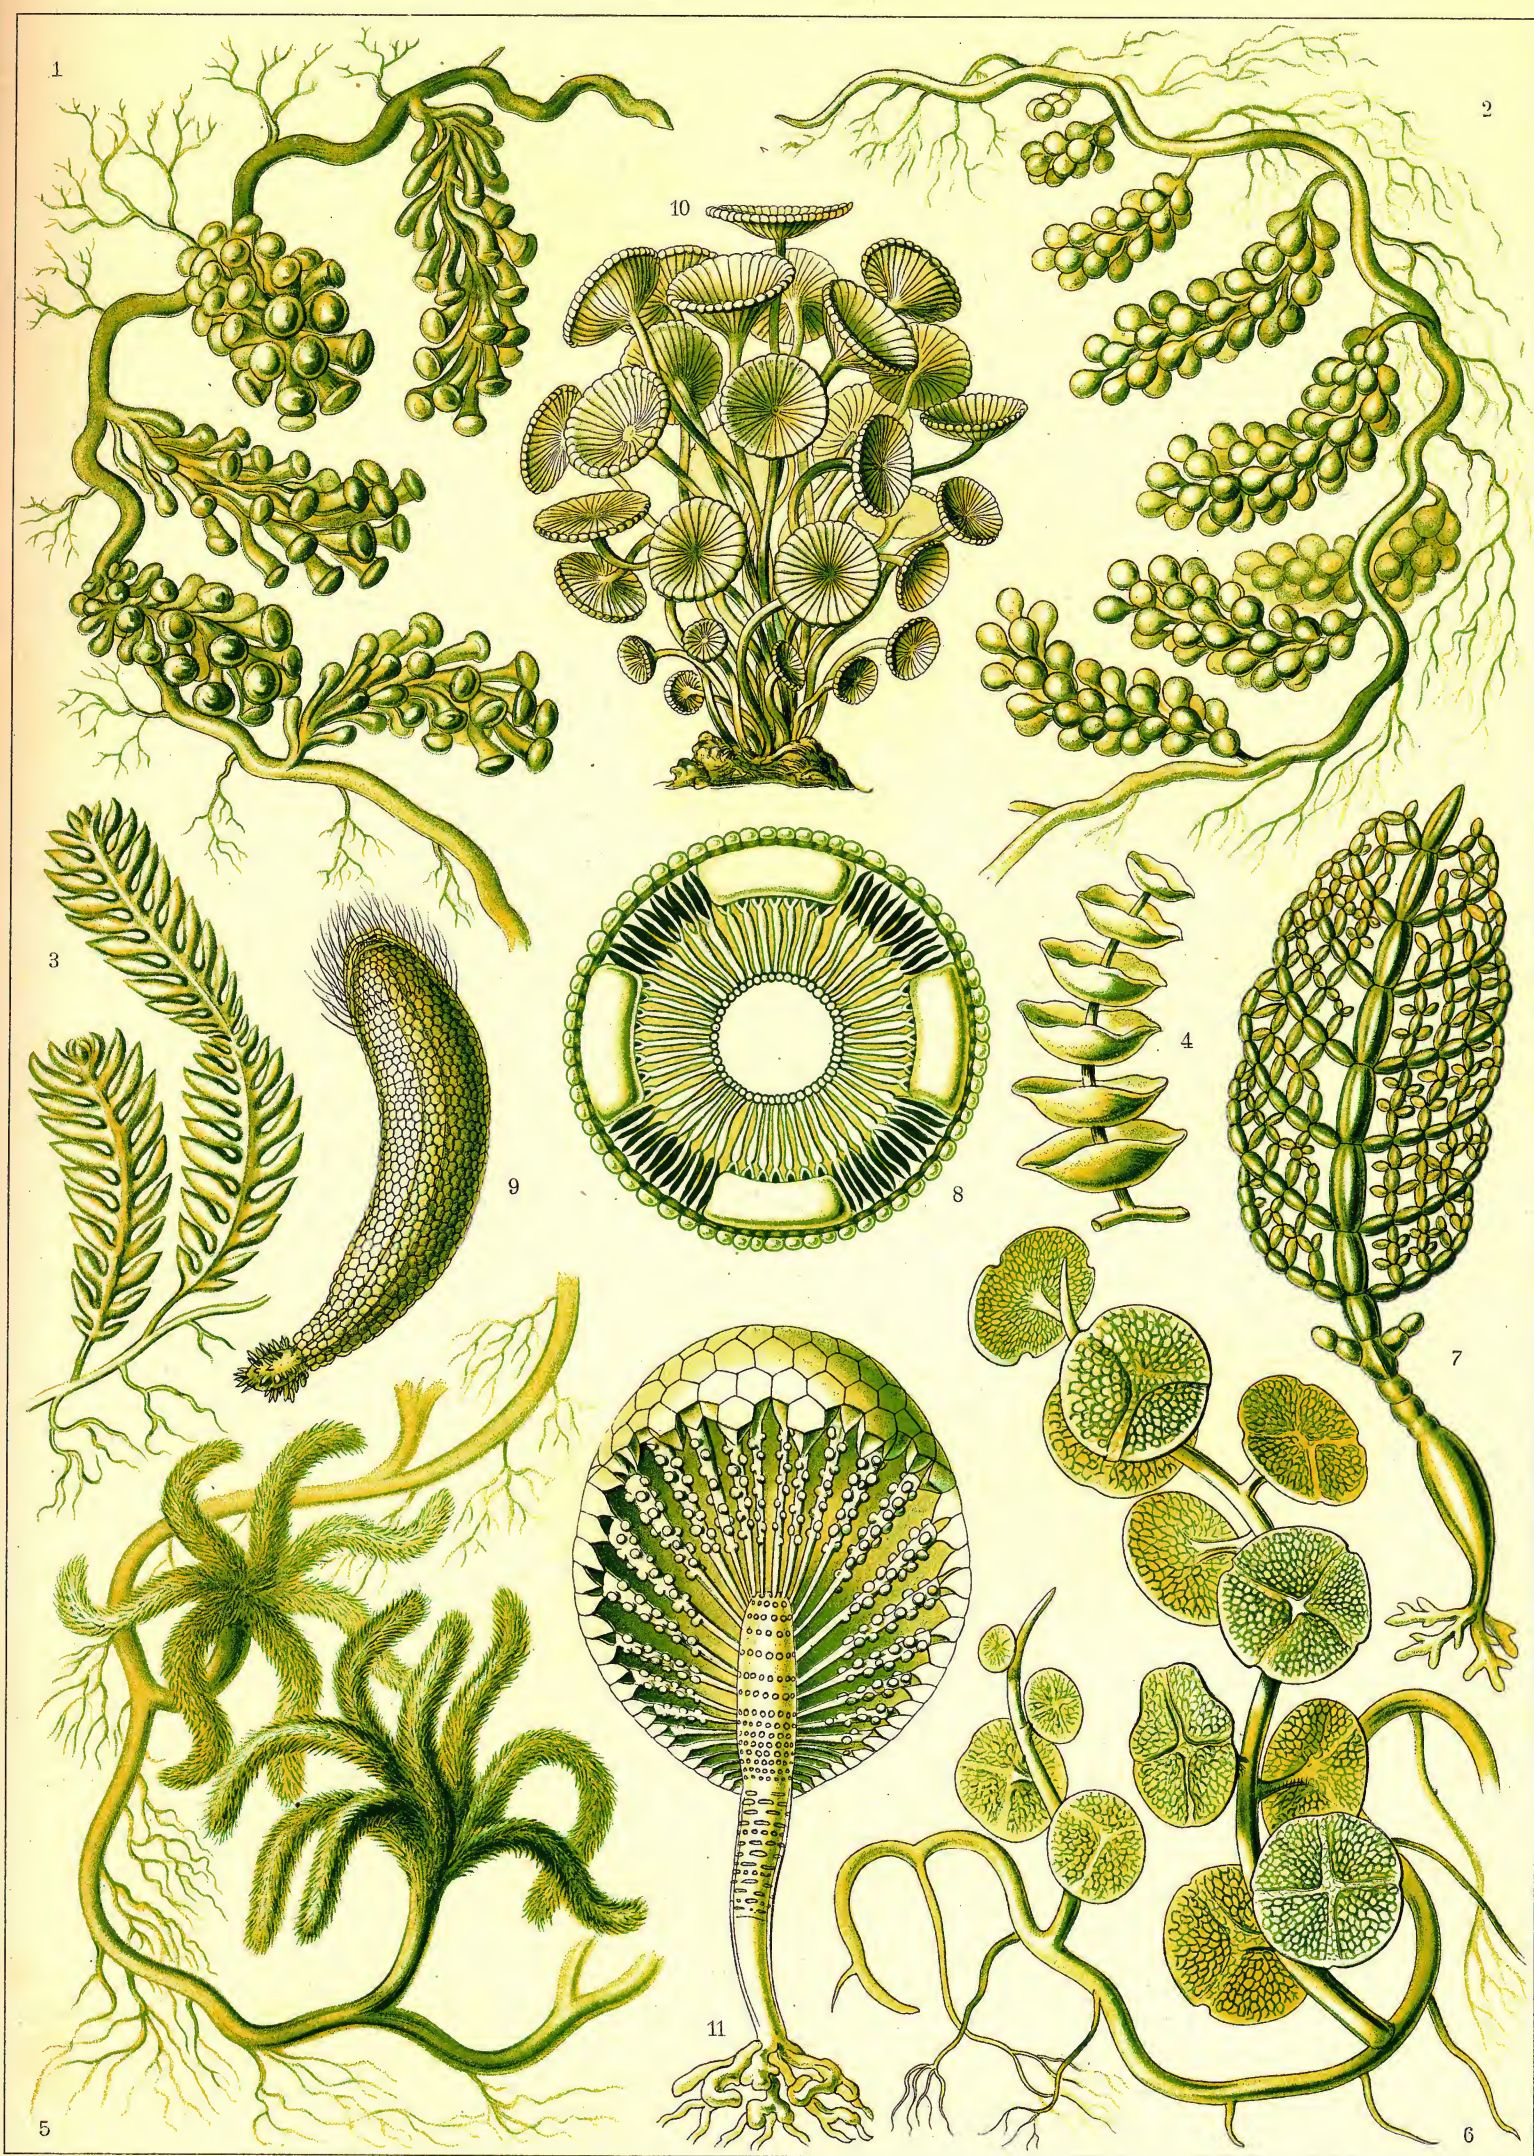

Phaeodaria. — Rohrstrahlänge.

Nepenthaceae. — Farnpflanzen.

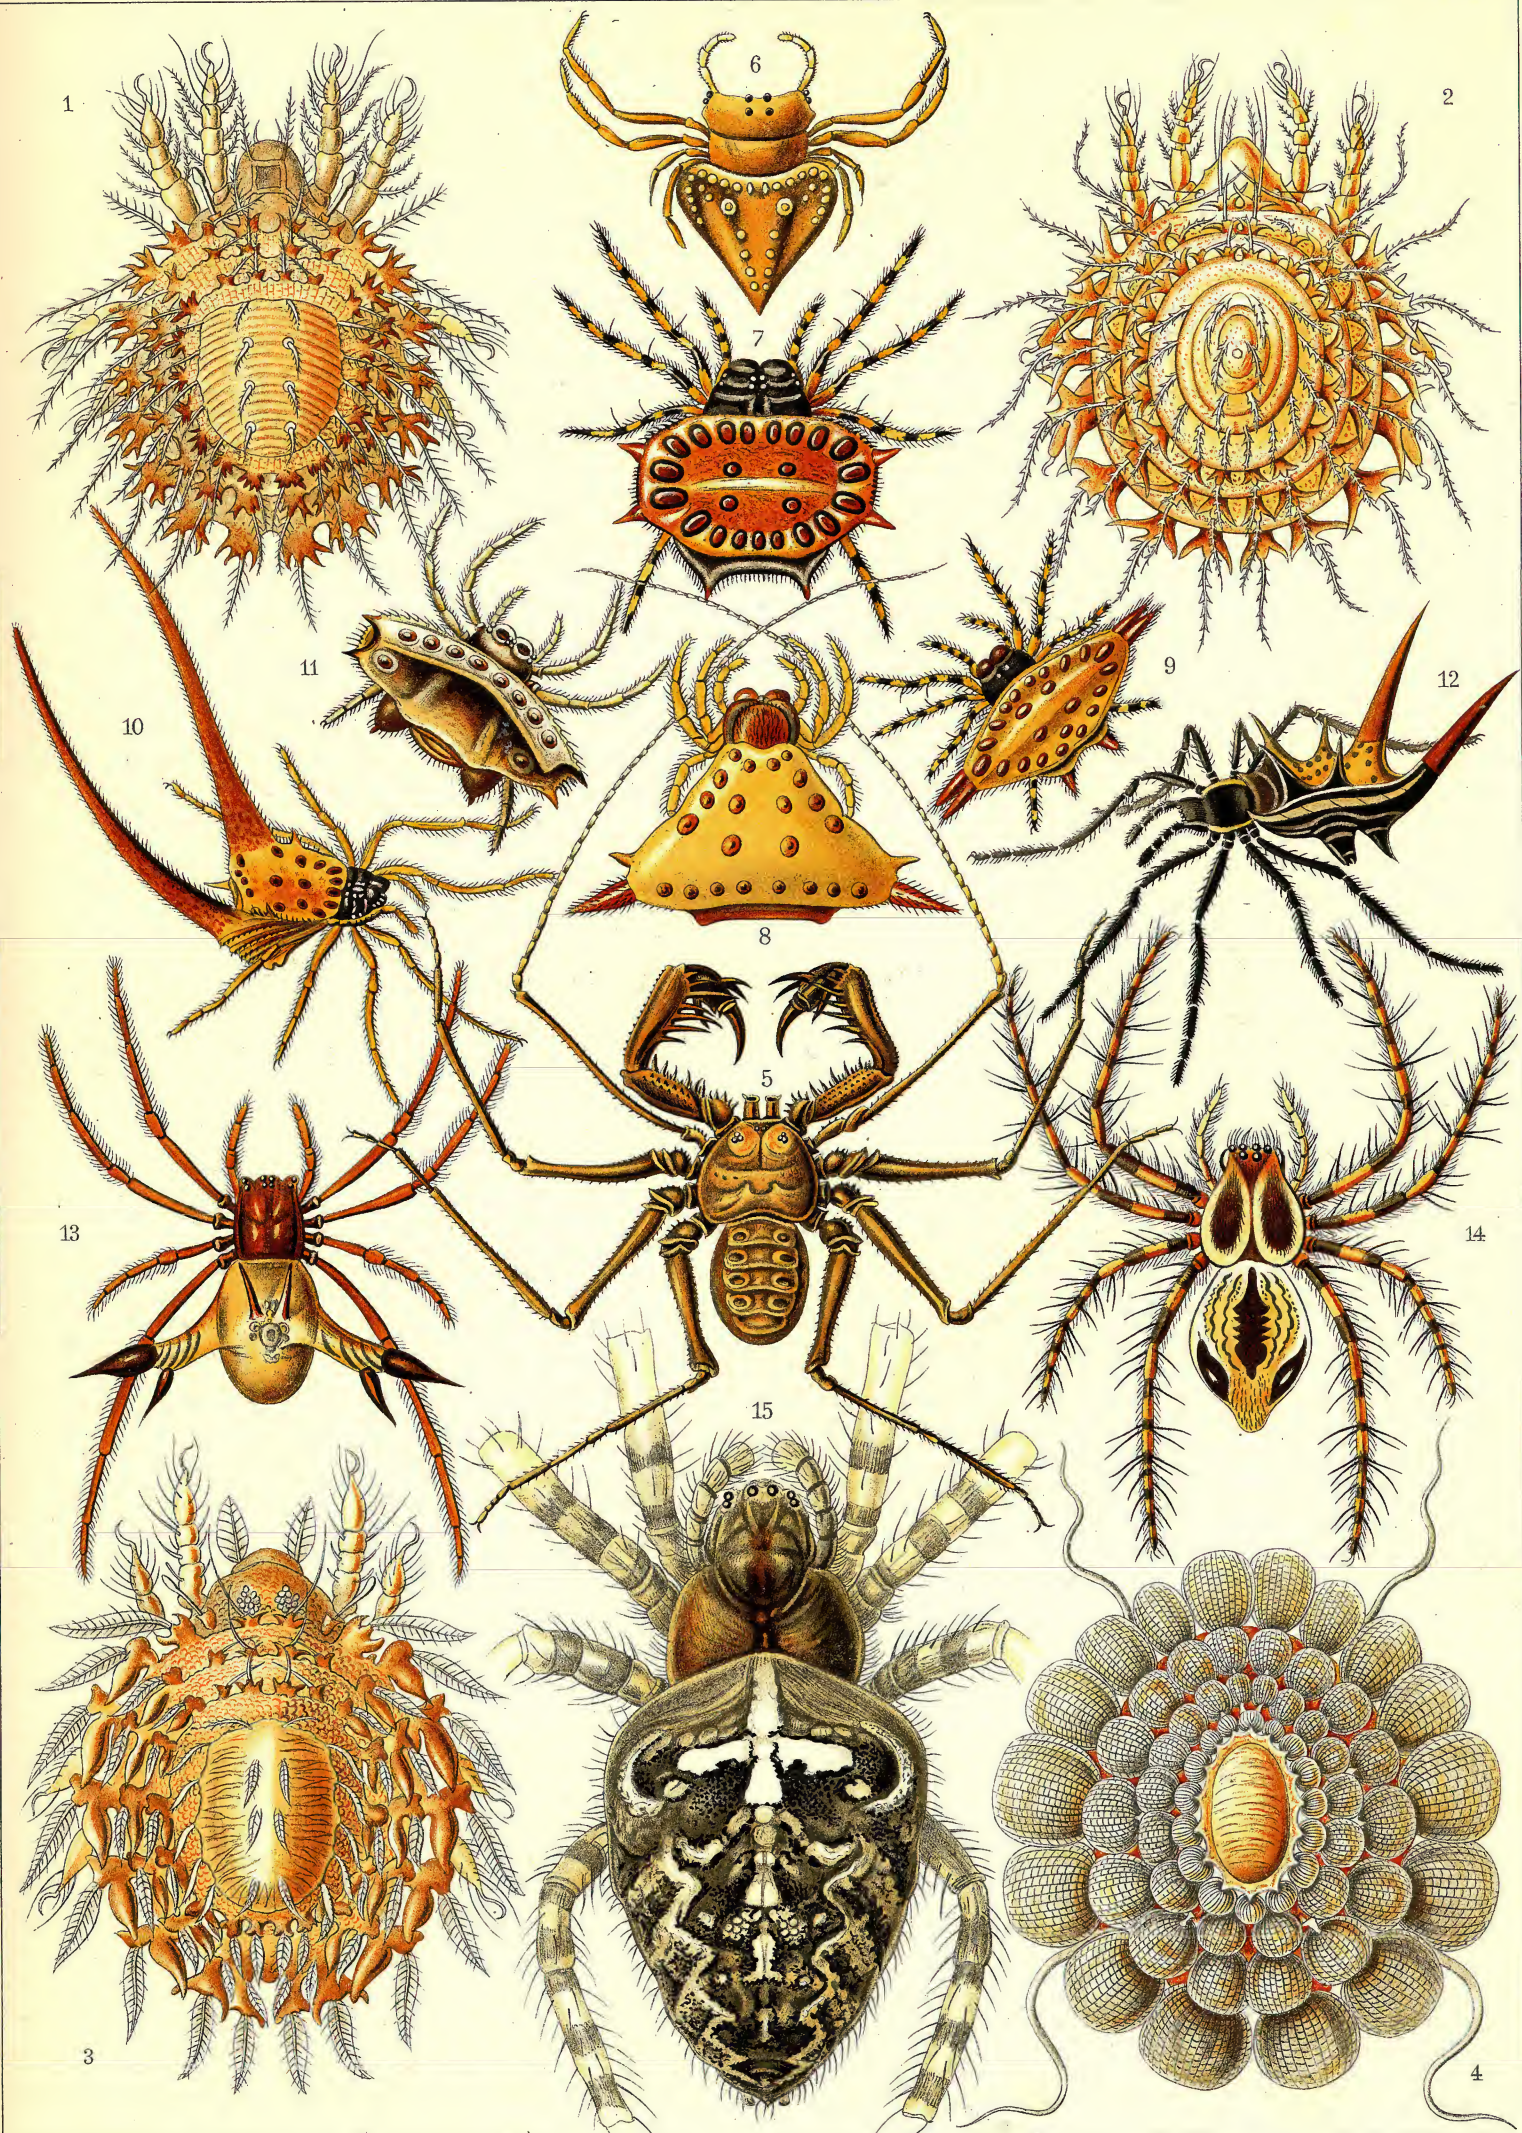

Basimycetes. — Schwammpilze.

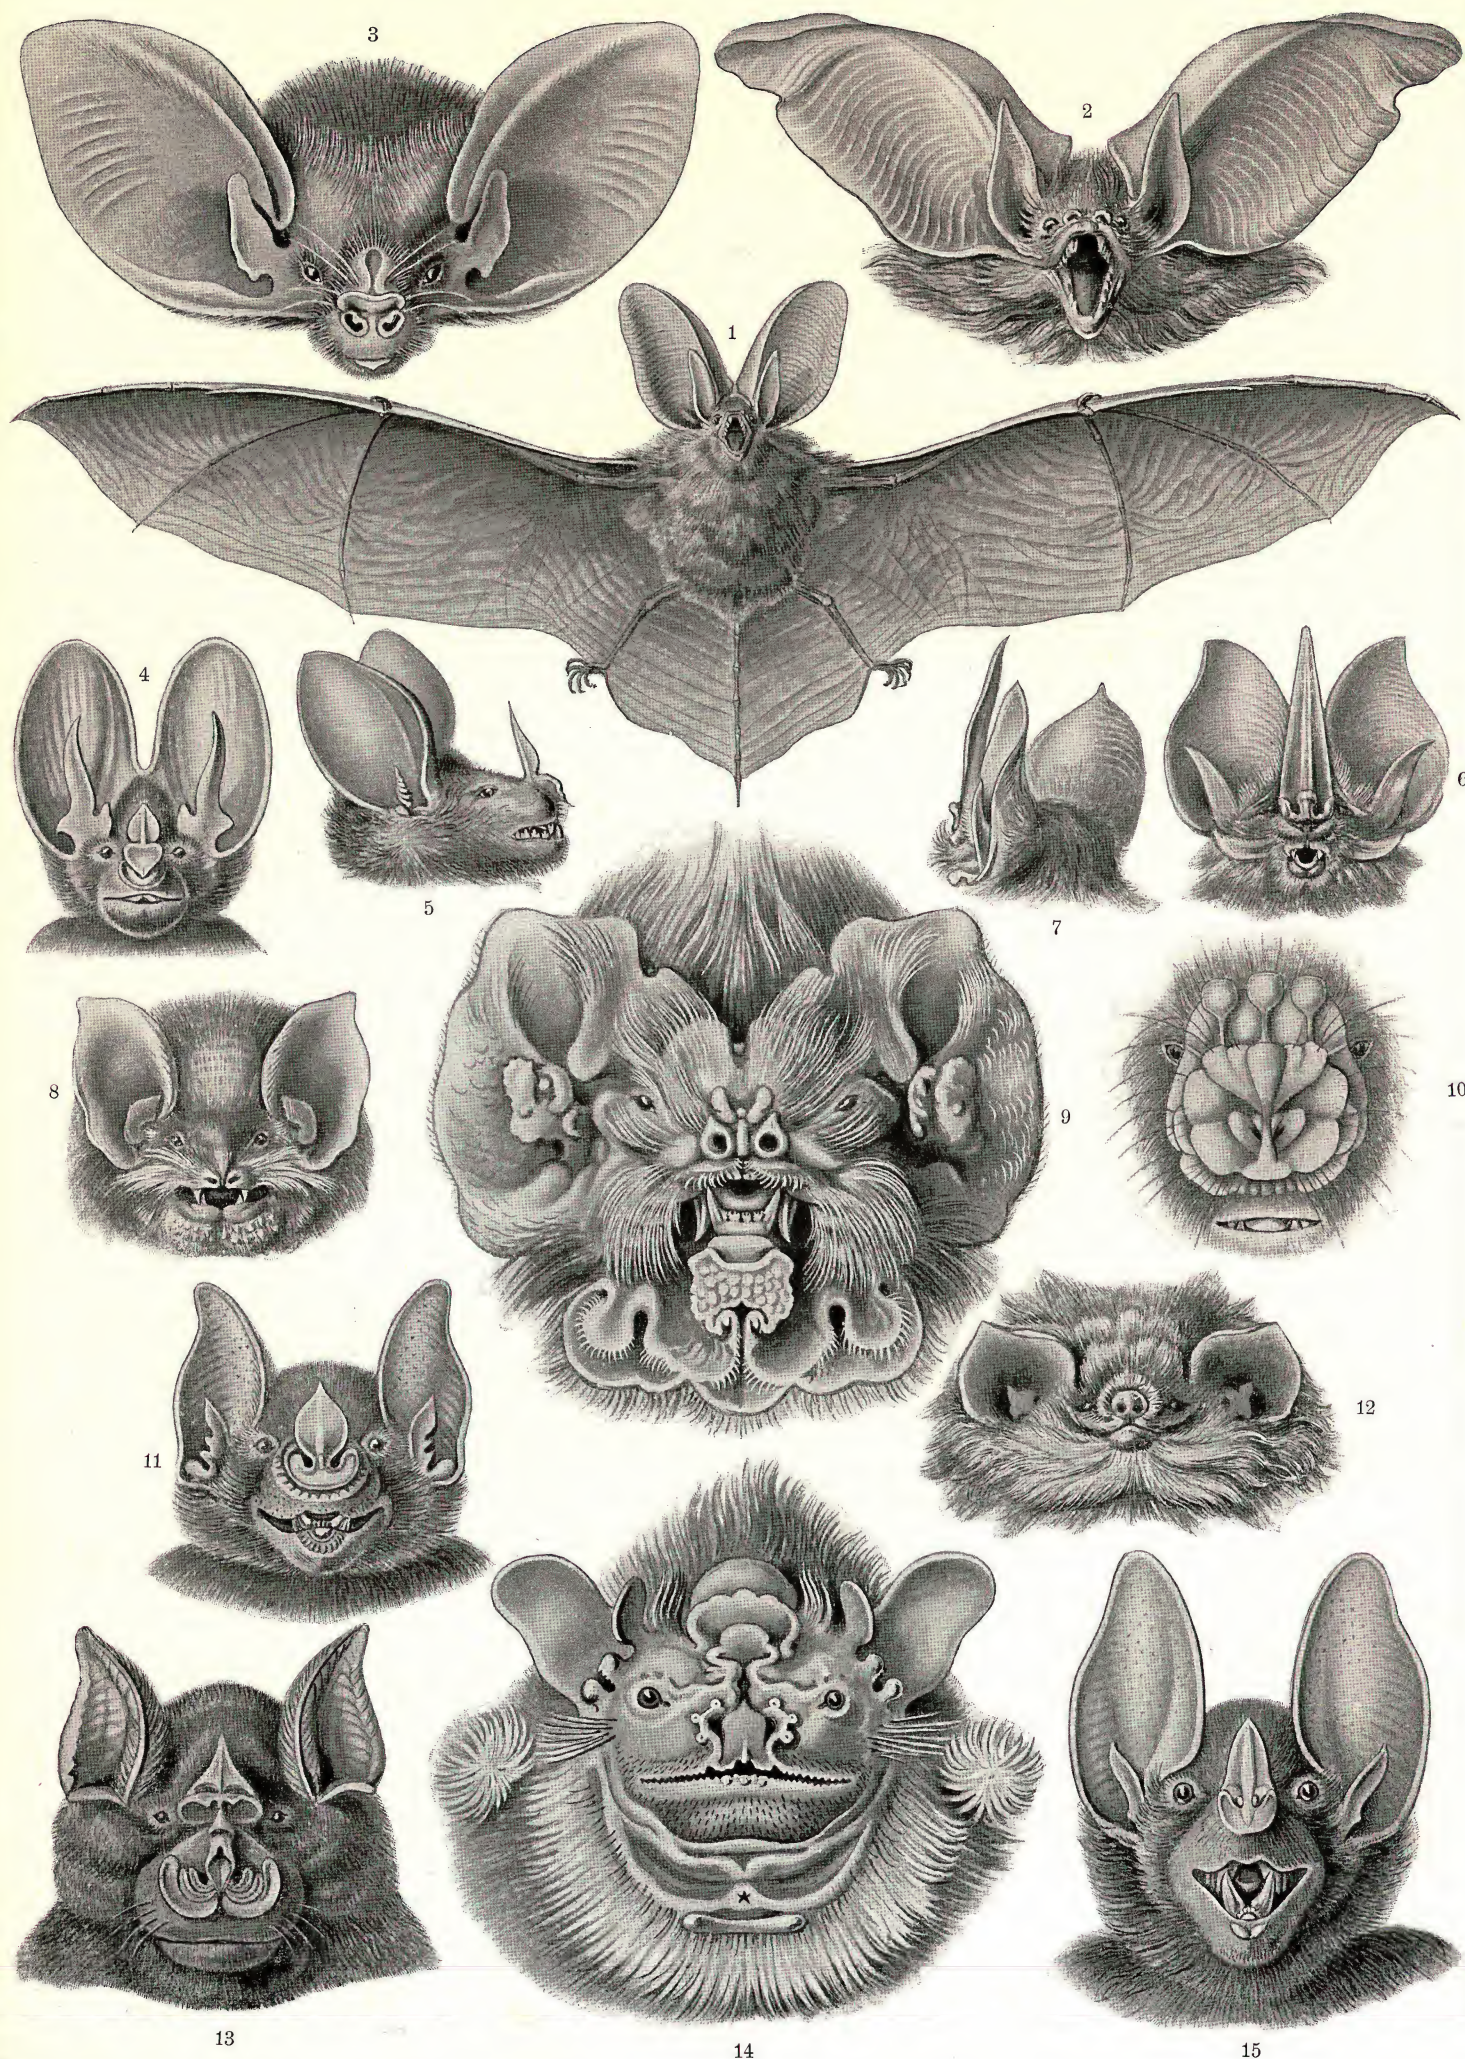

Siphoneae. — Riesen-Algeten.

Florideae. — Rotalgen.

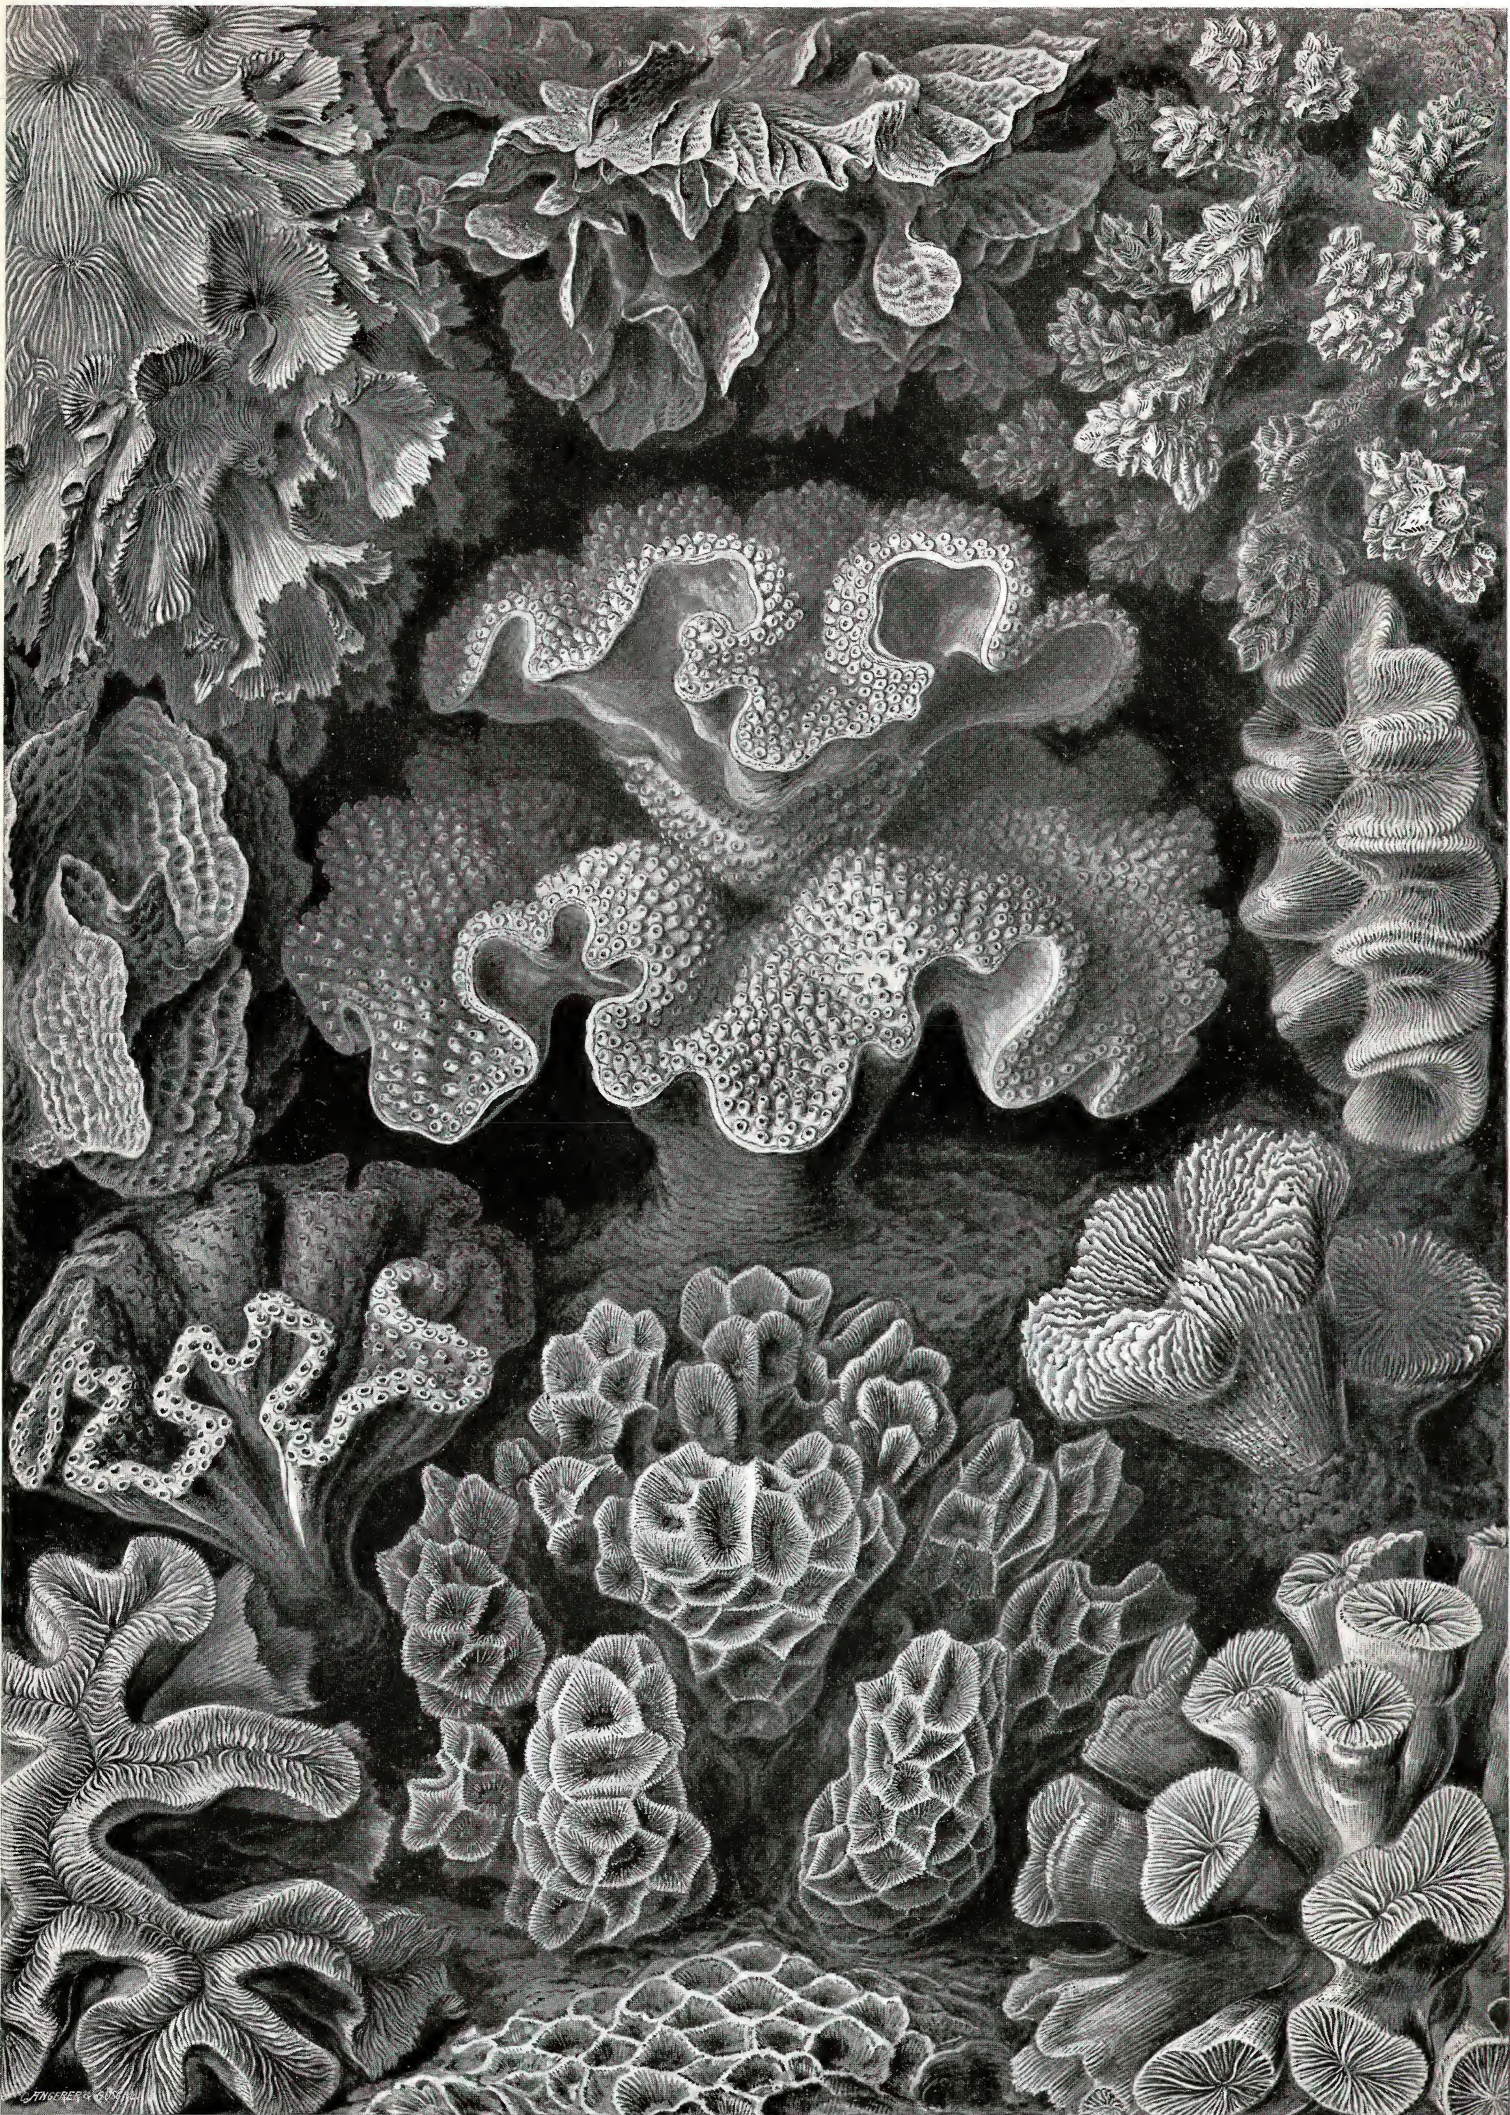

Arachnida. — Spinnenfiere.

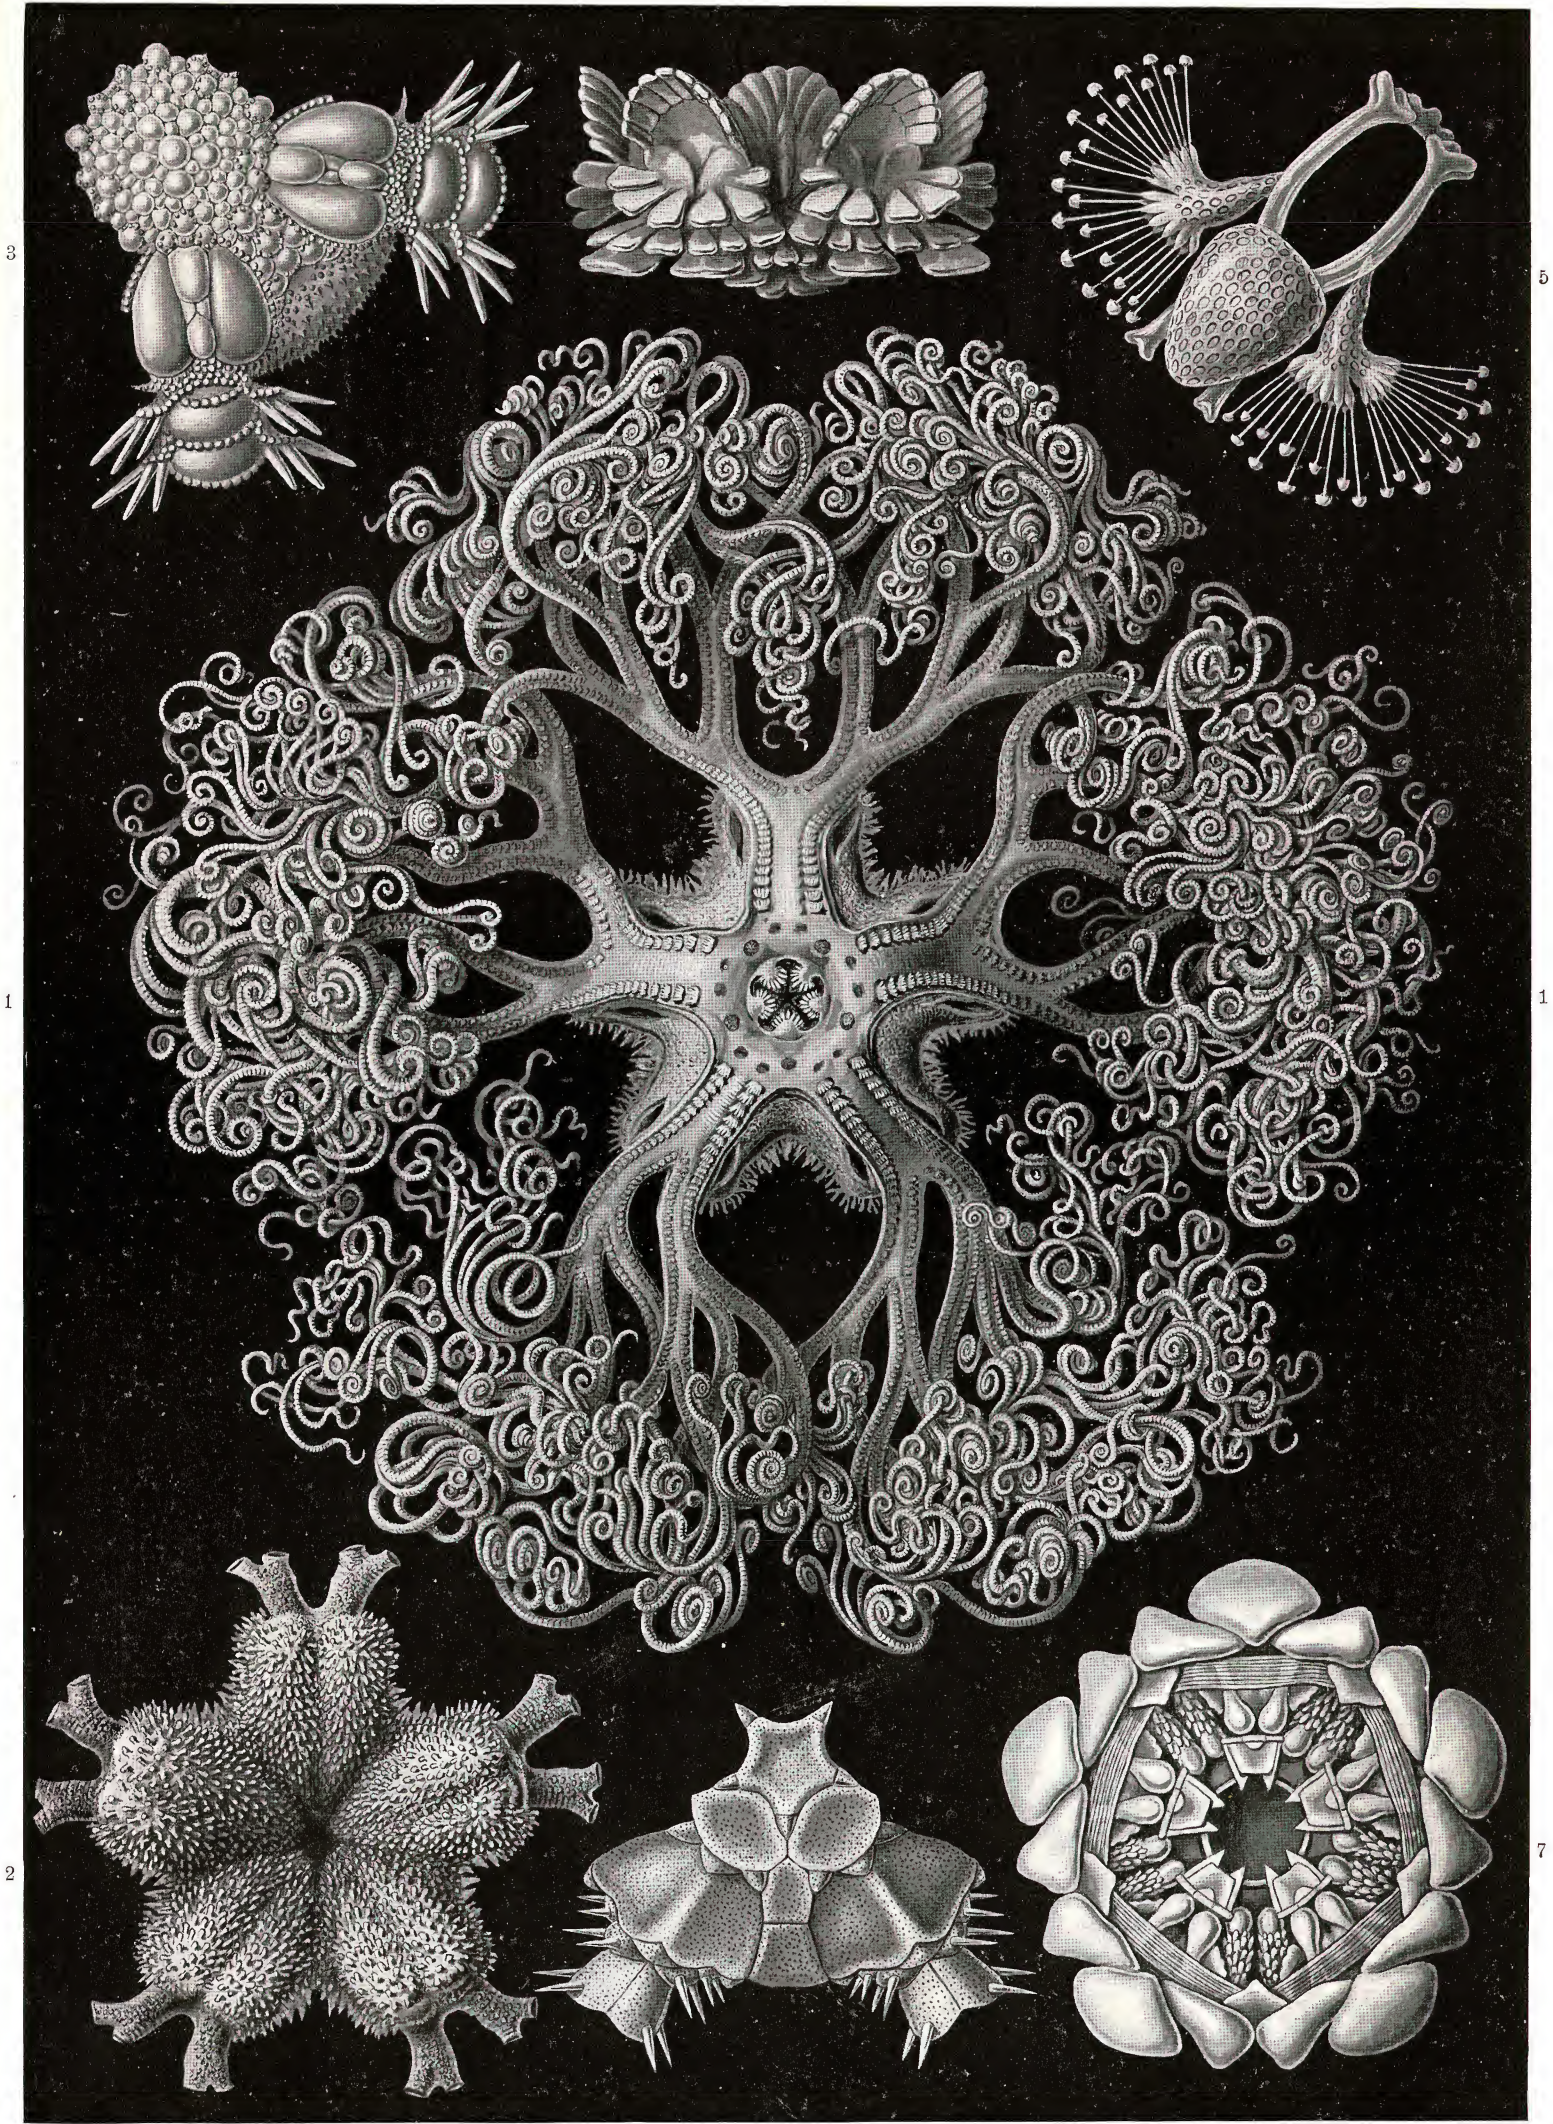

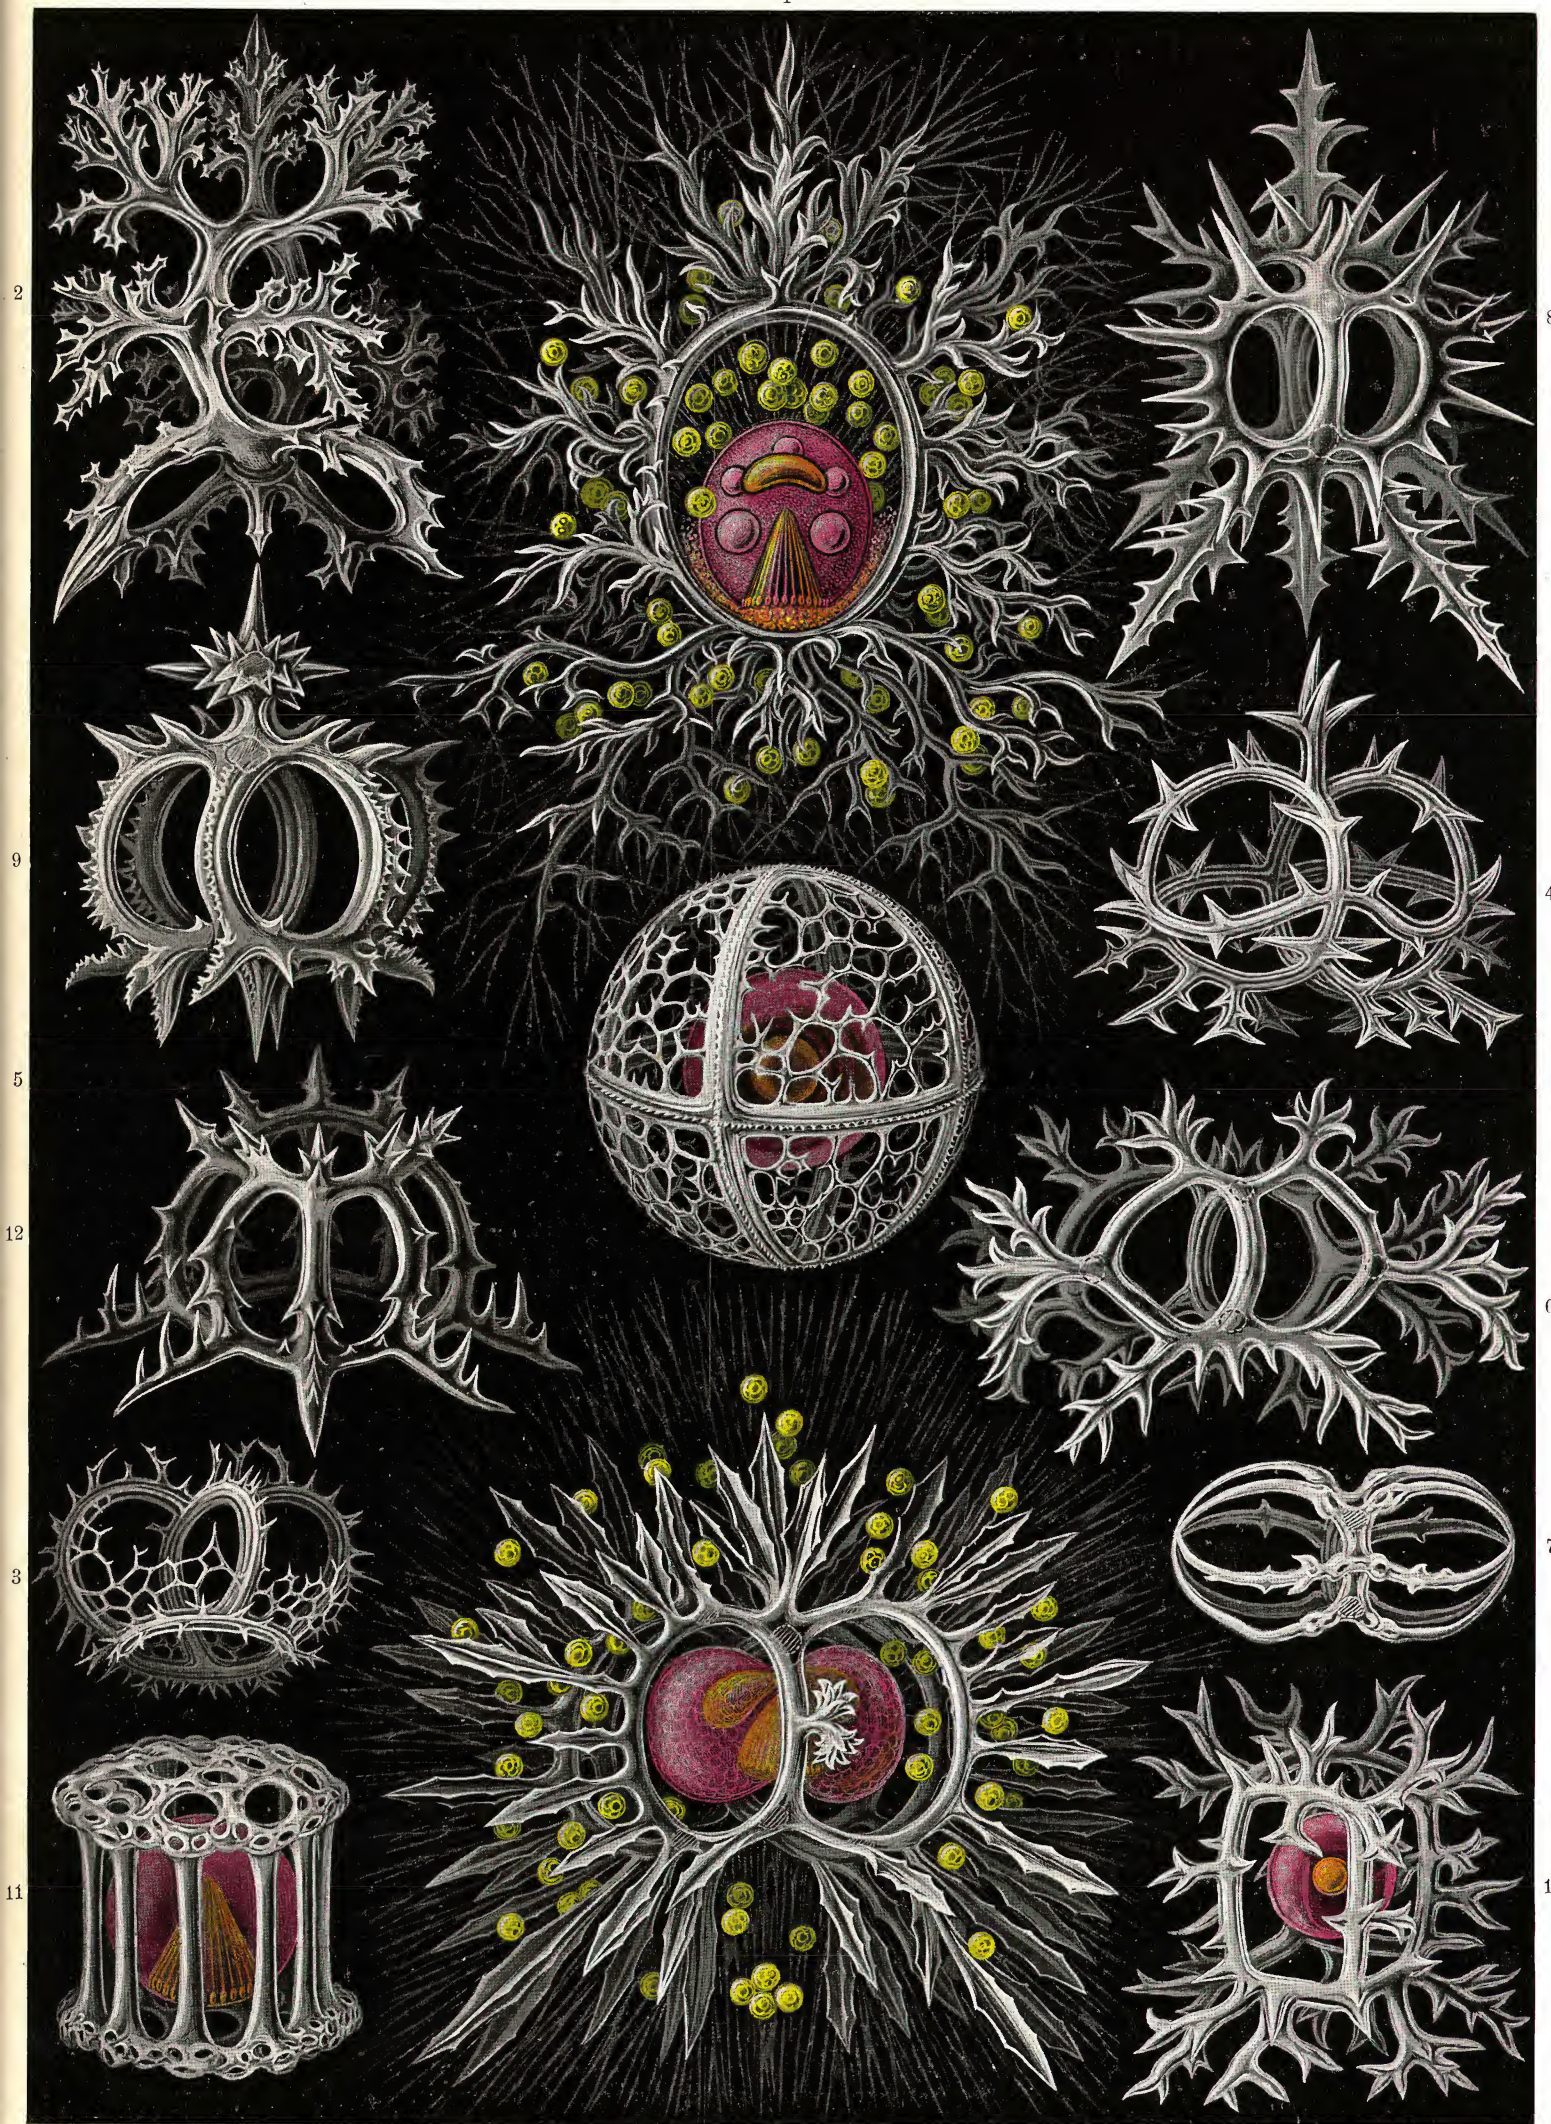

9
Batrachia. — Frösche.

Hexacoralla. — Sechsstrahlige Sternkorallen.

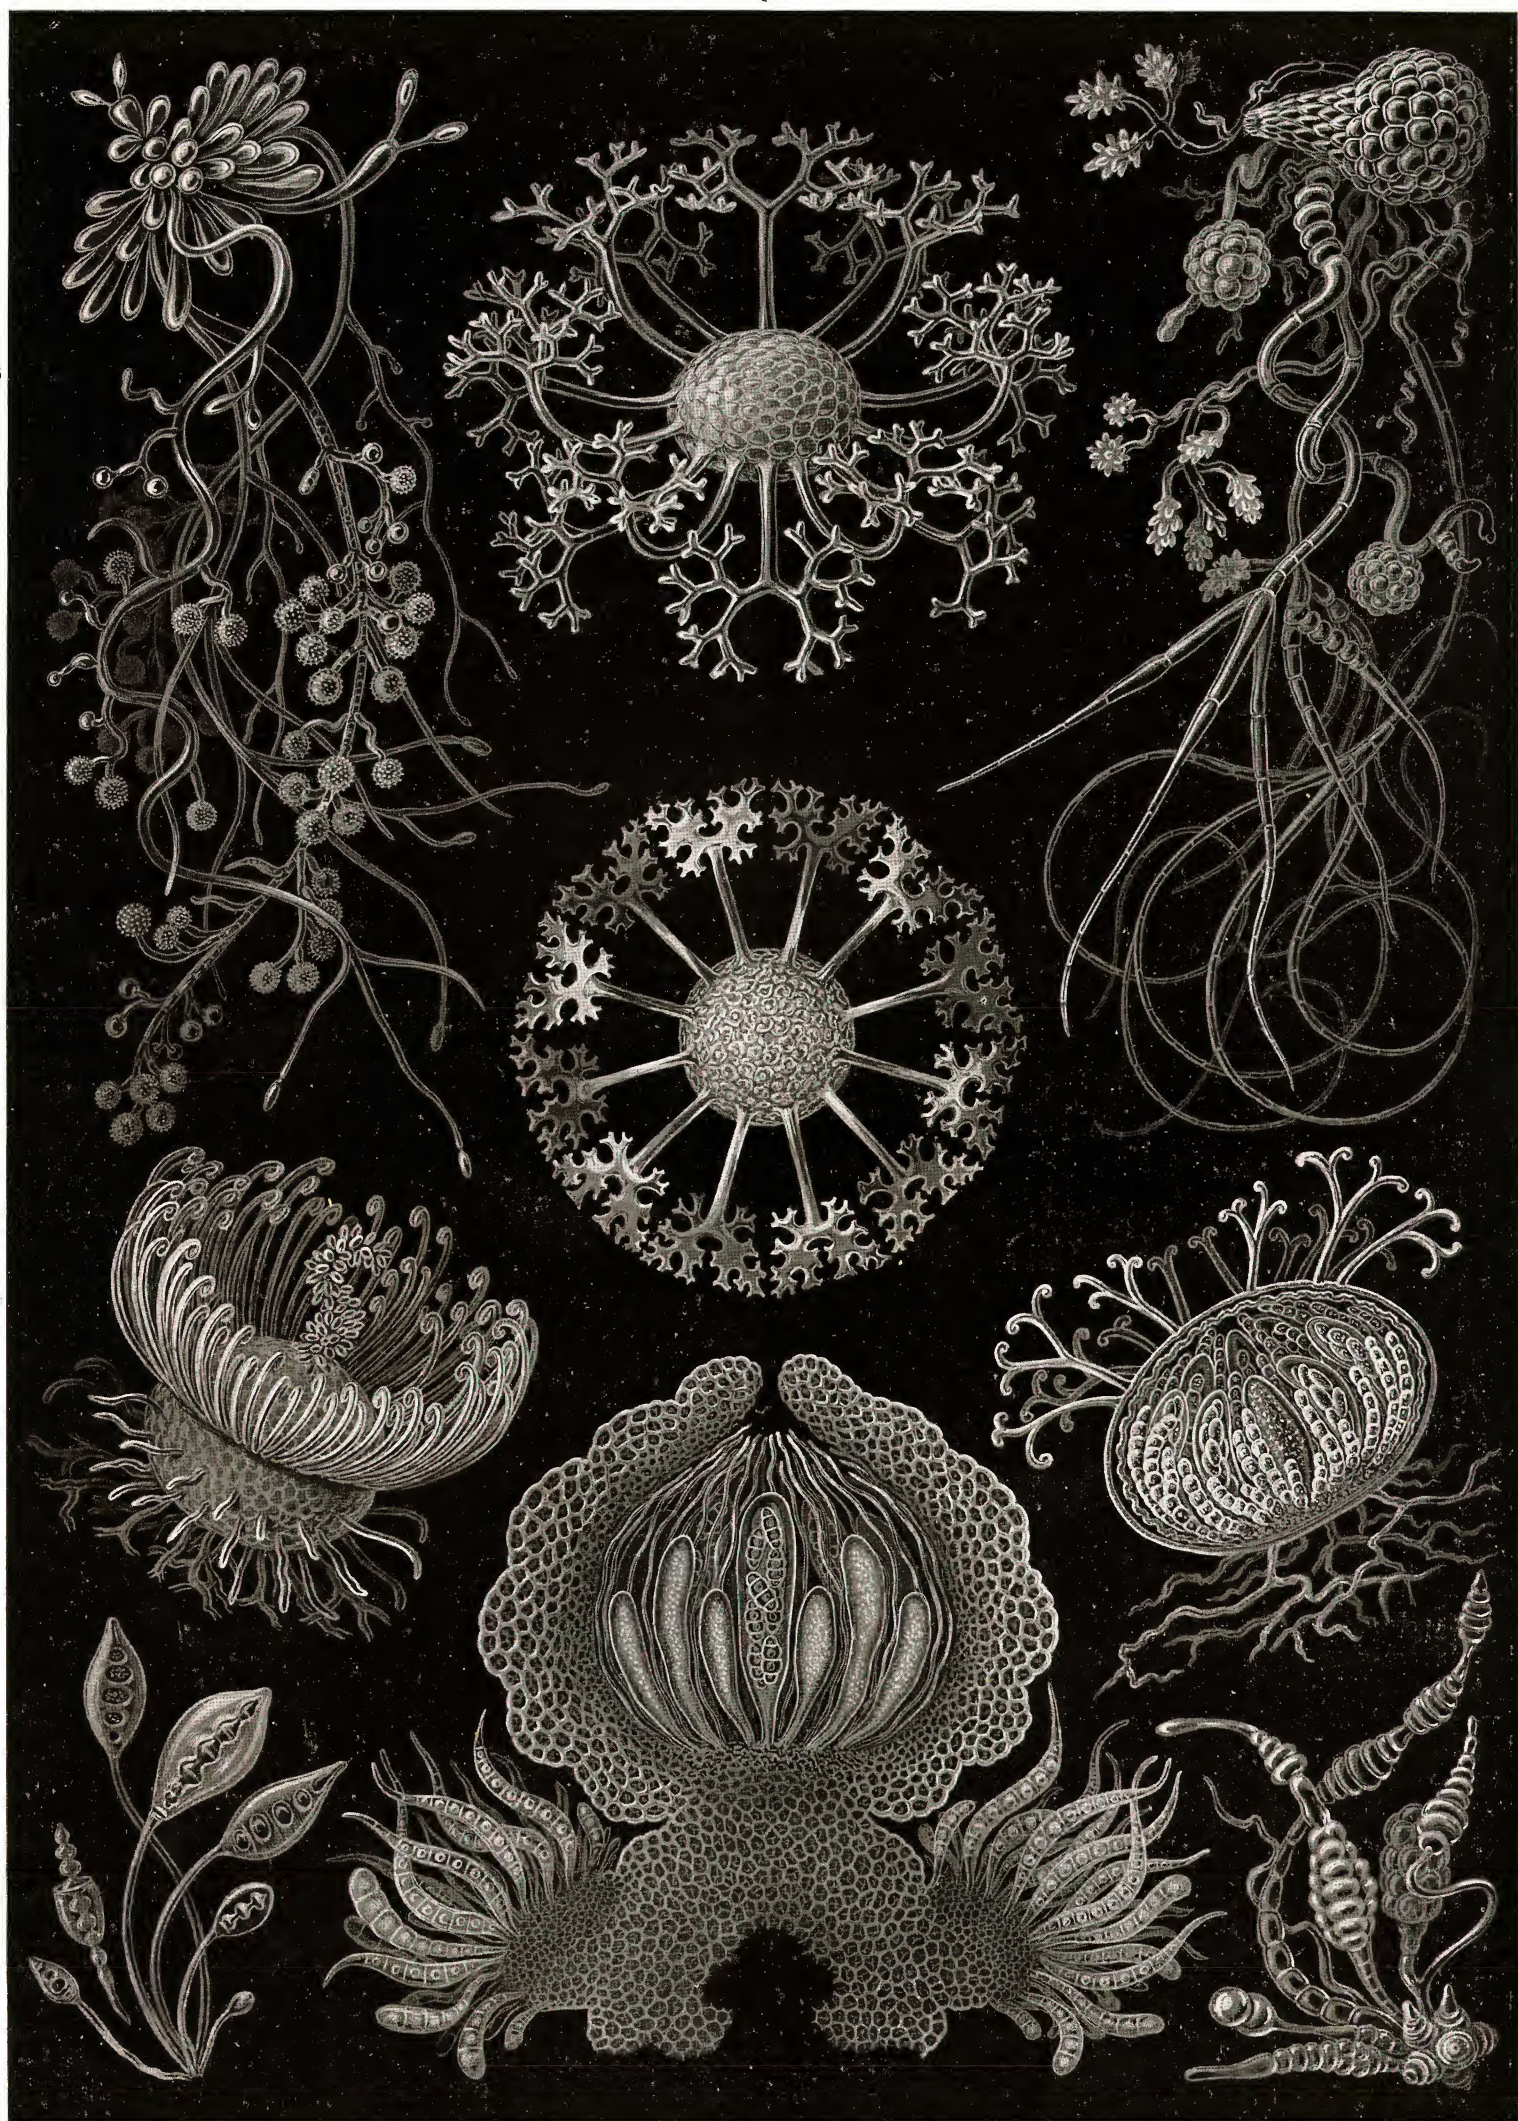

Ophiodea. — Schlangensterne.

Muscinae. — Laubmoose.

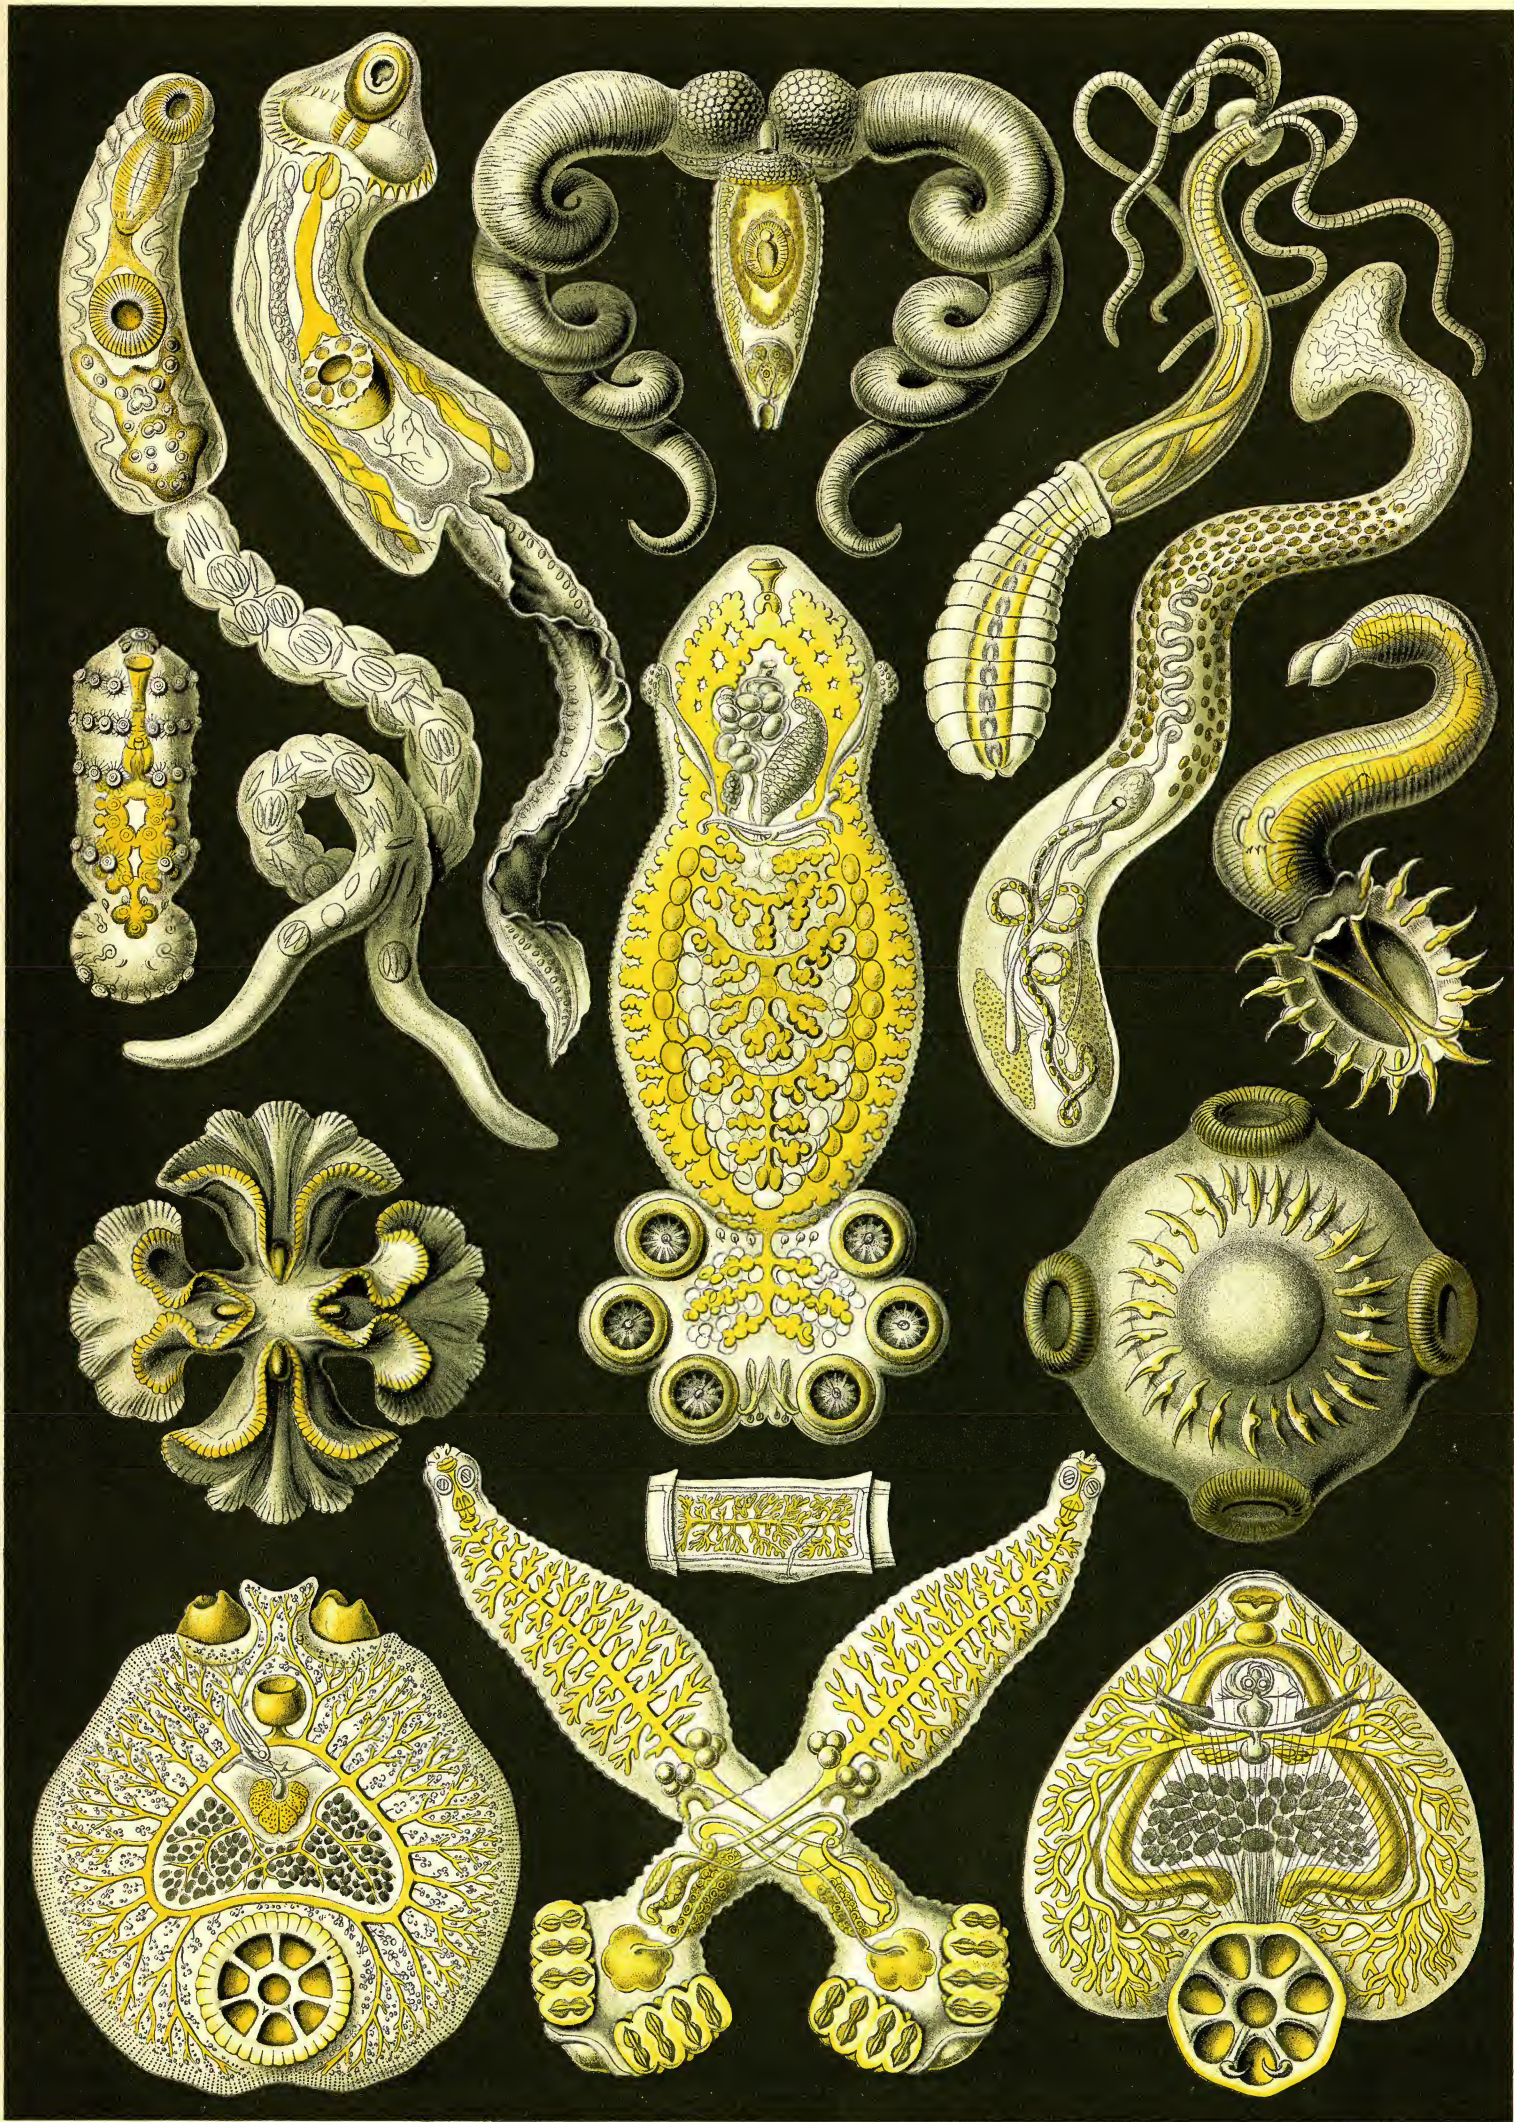

Ascomycetes. — Schlauchpilze.

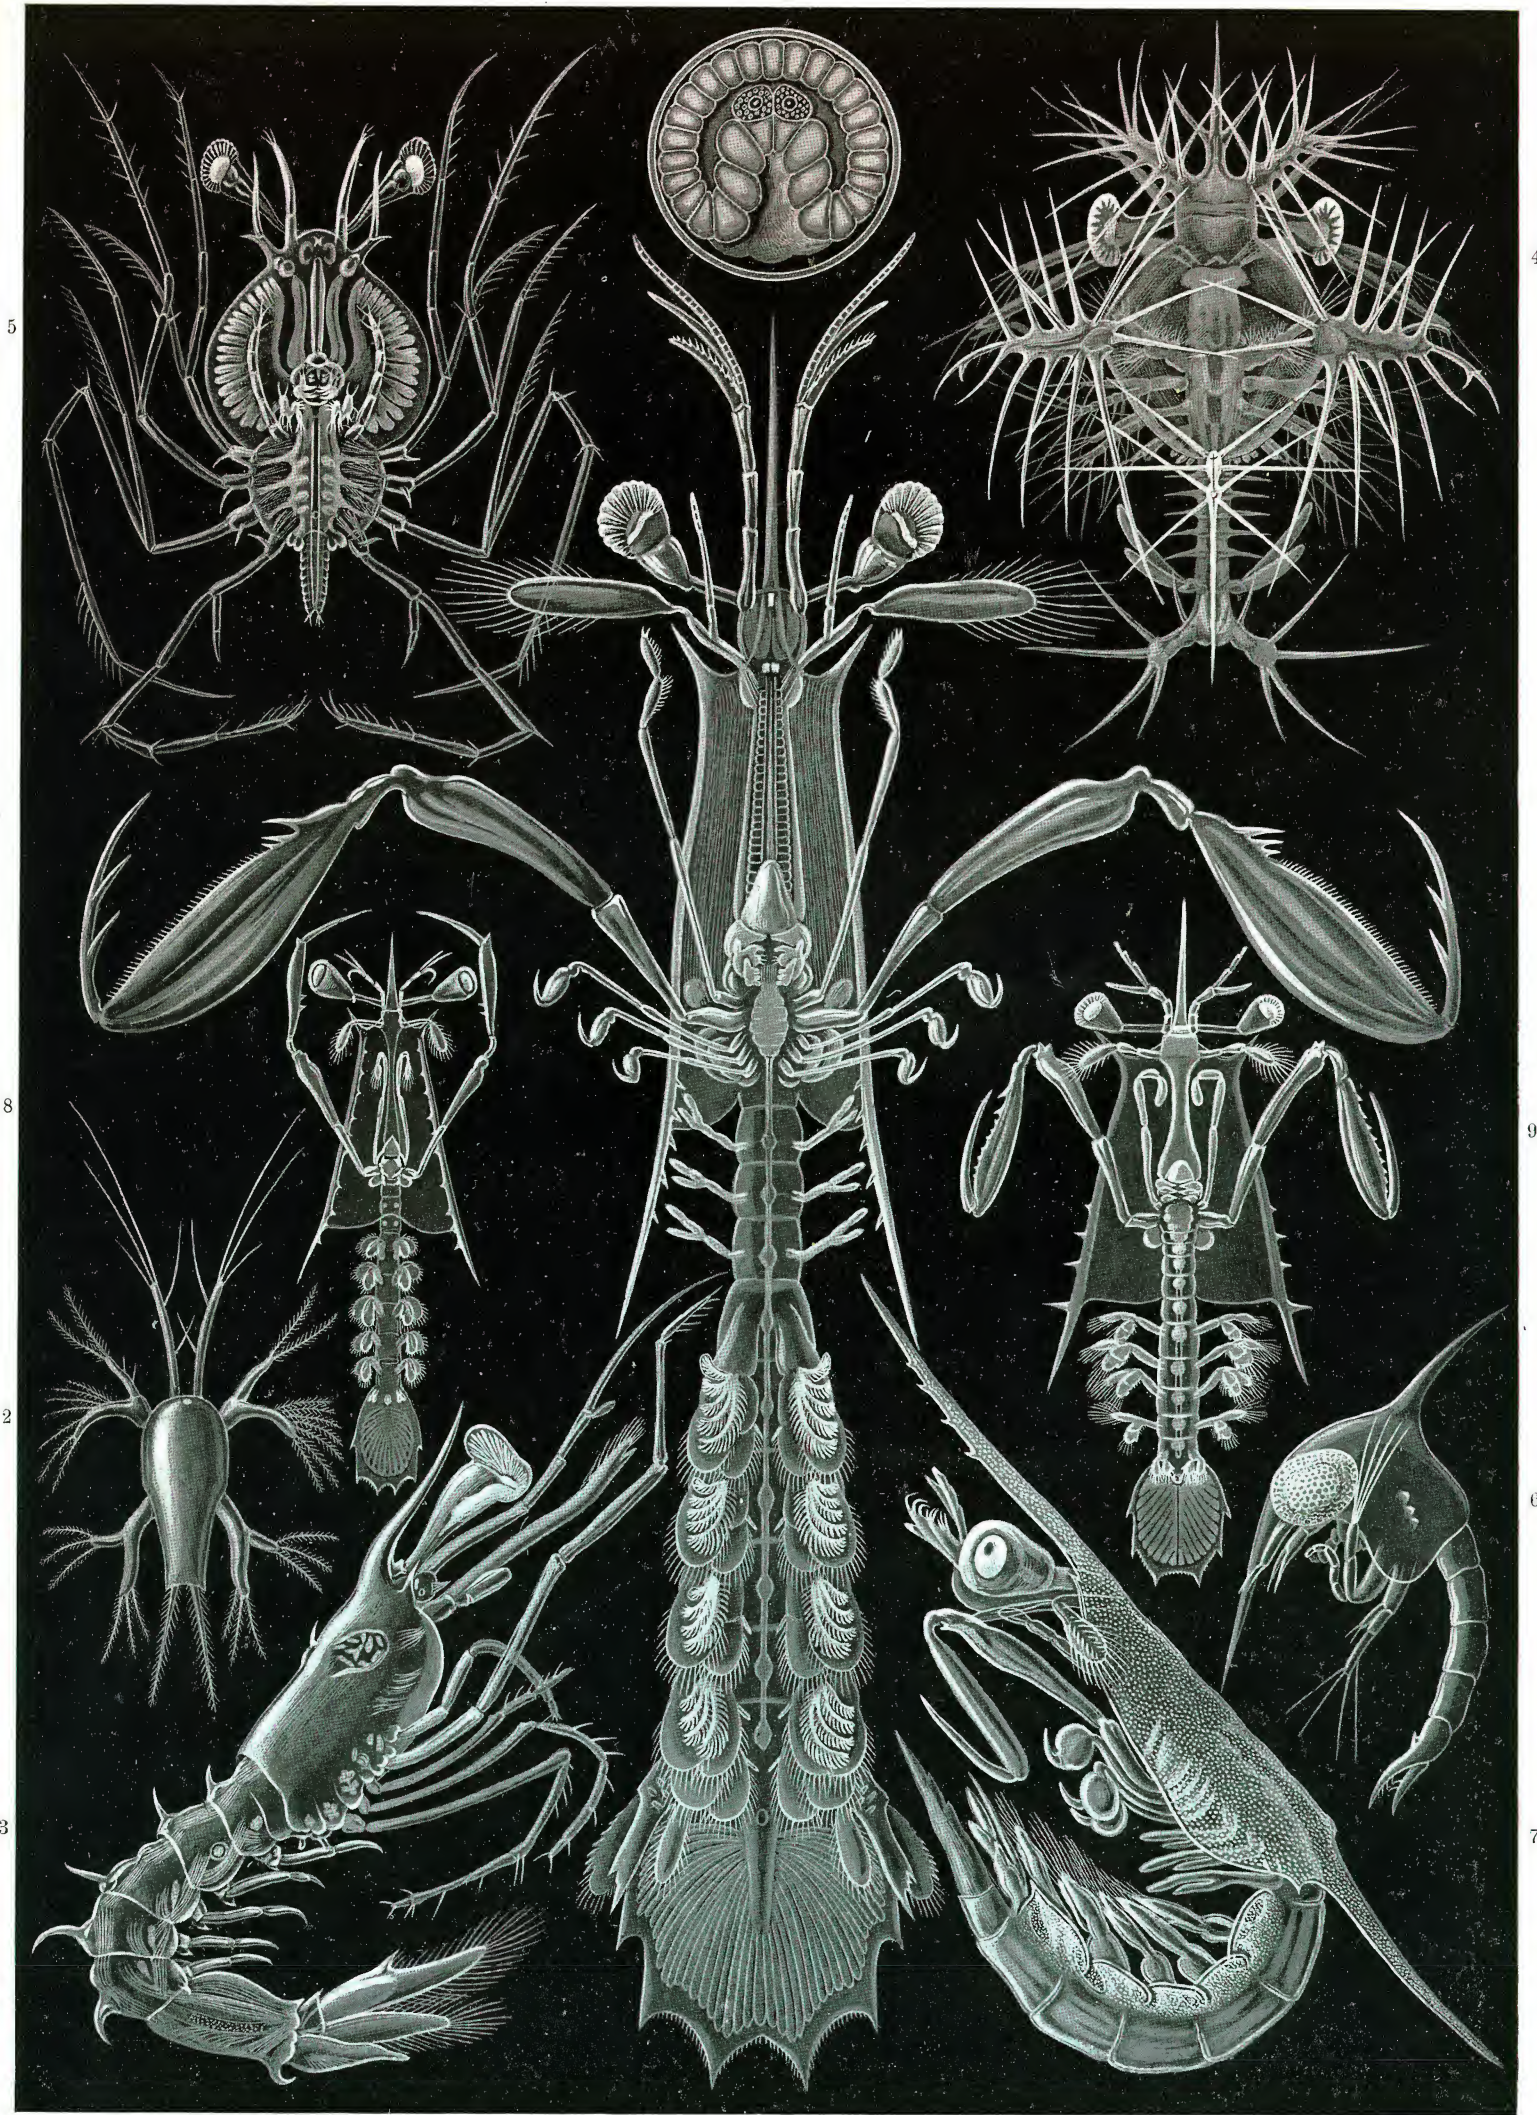

Orchideae. — Venusblumen.

BRESLAUER
No 1

Platodes. — Plattentiere.

10
Thoracostraca. — Panzerkrebse.

Cubomedusae. — Würfelquassen.

Lacertilia. — Eidechsen.

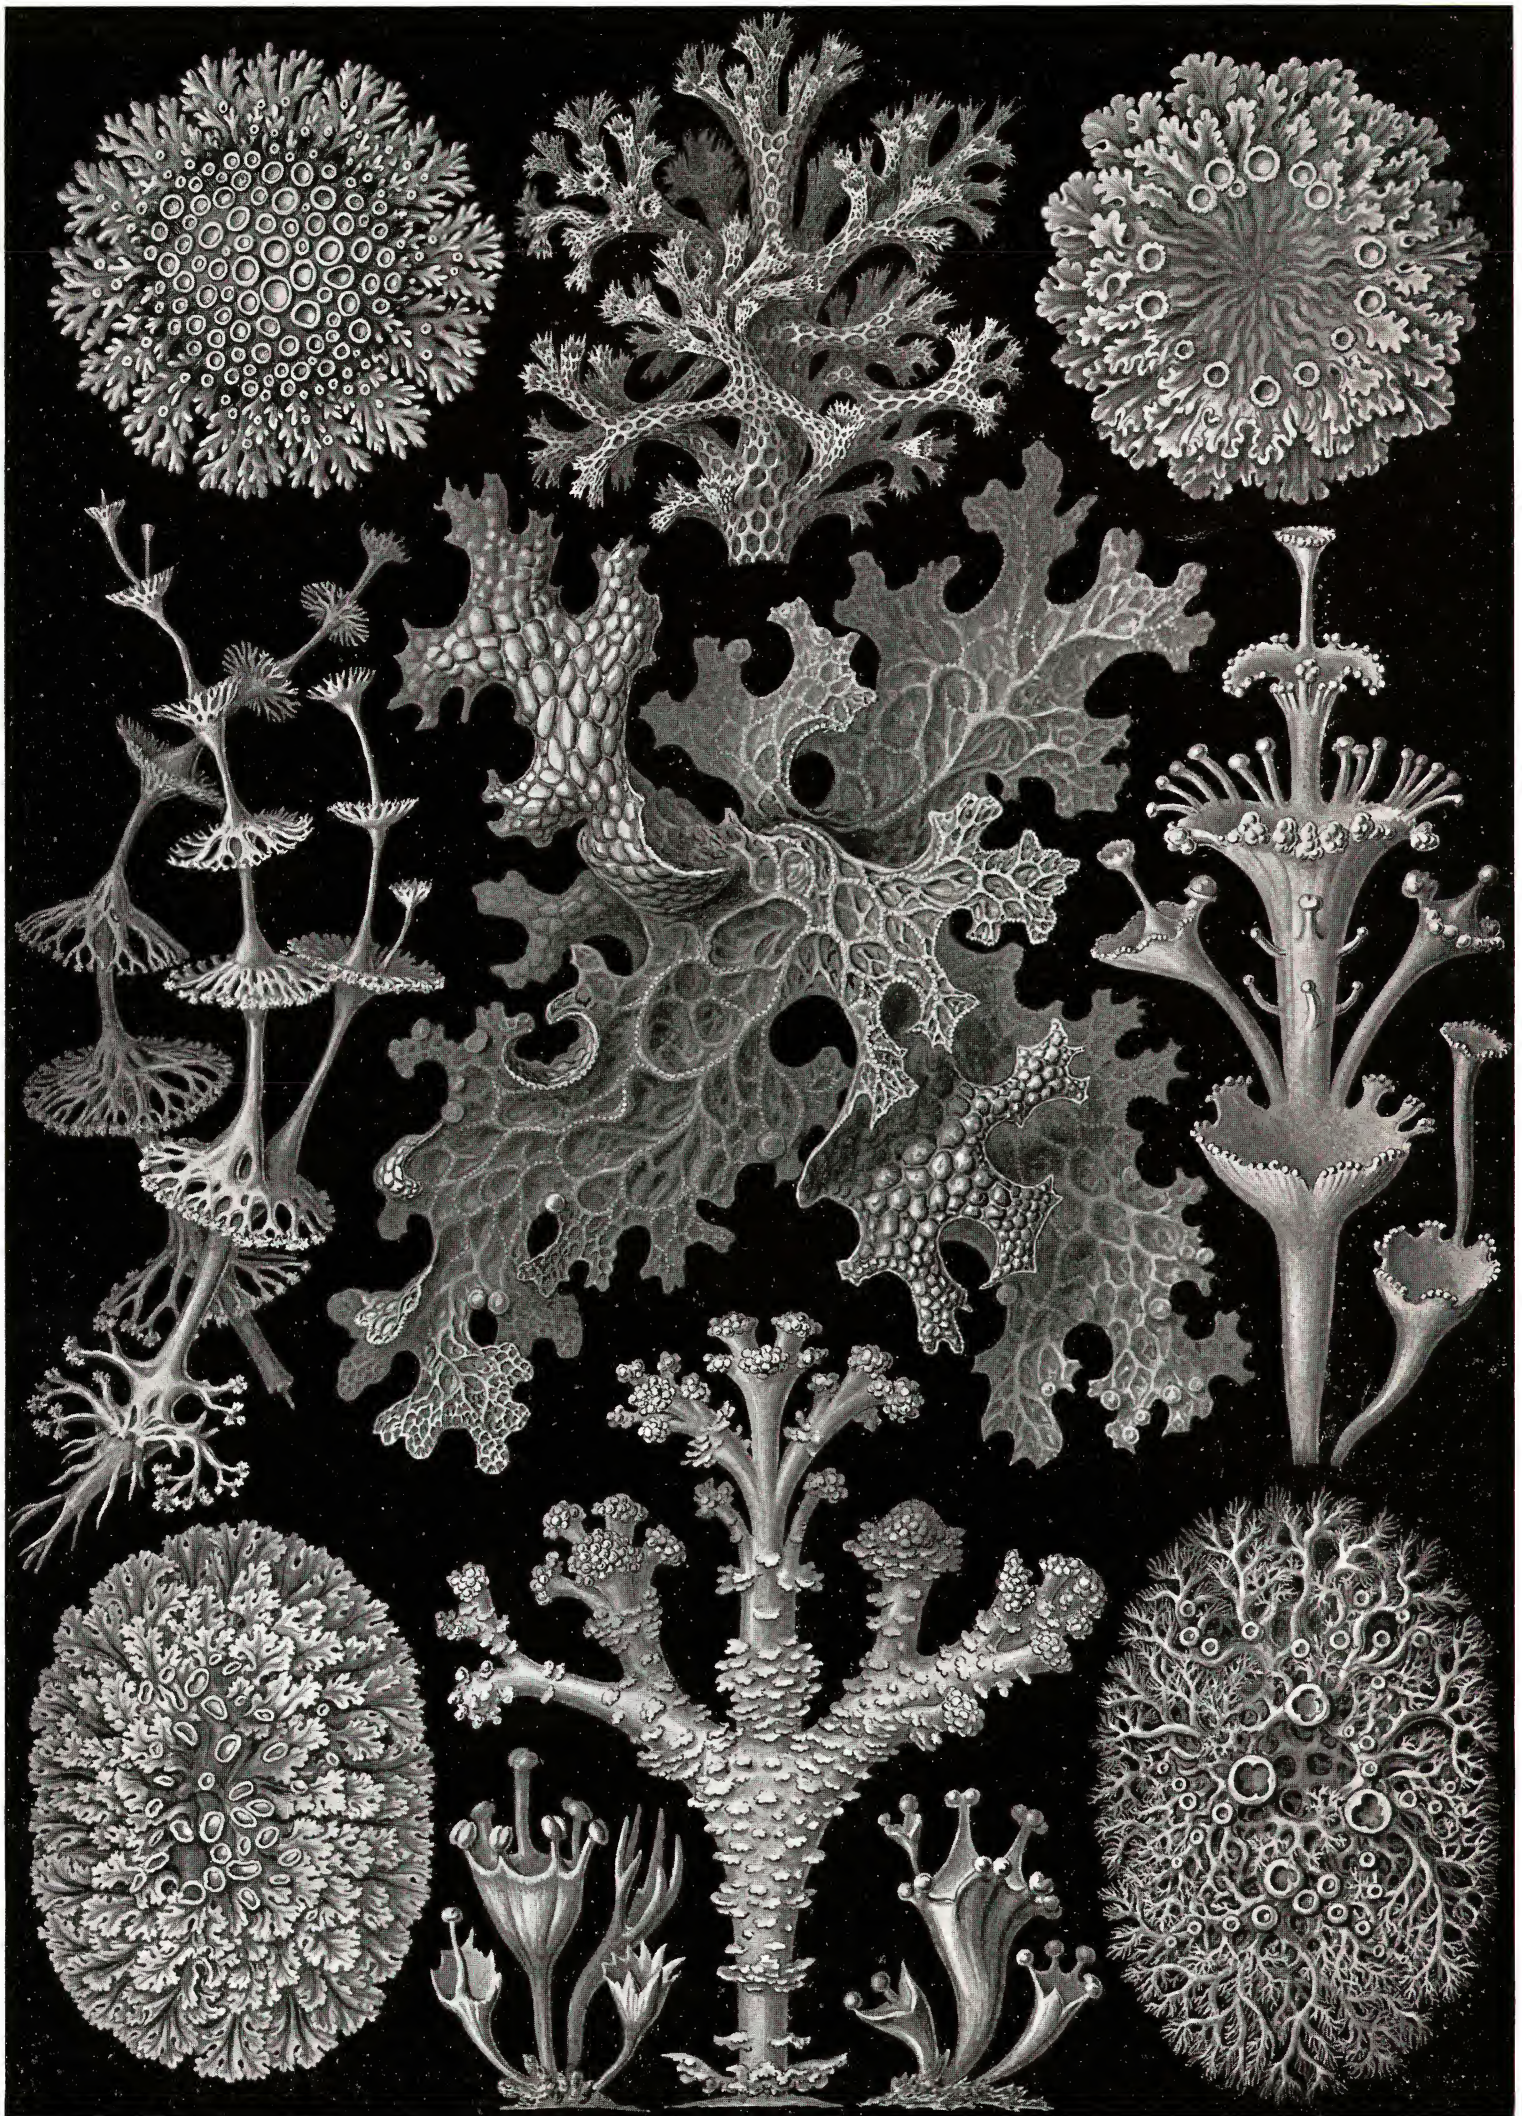

Blastoïdea. — *Änospensterne*.

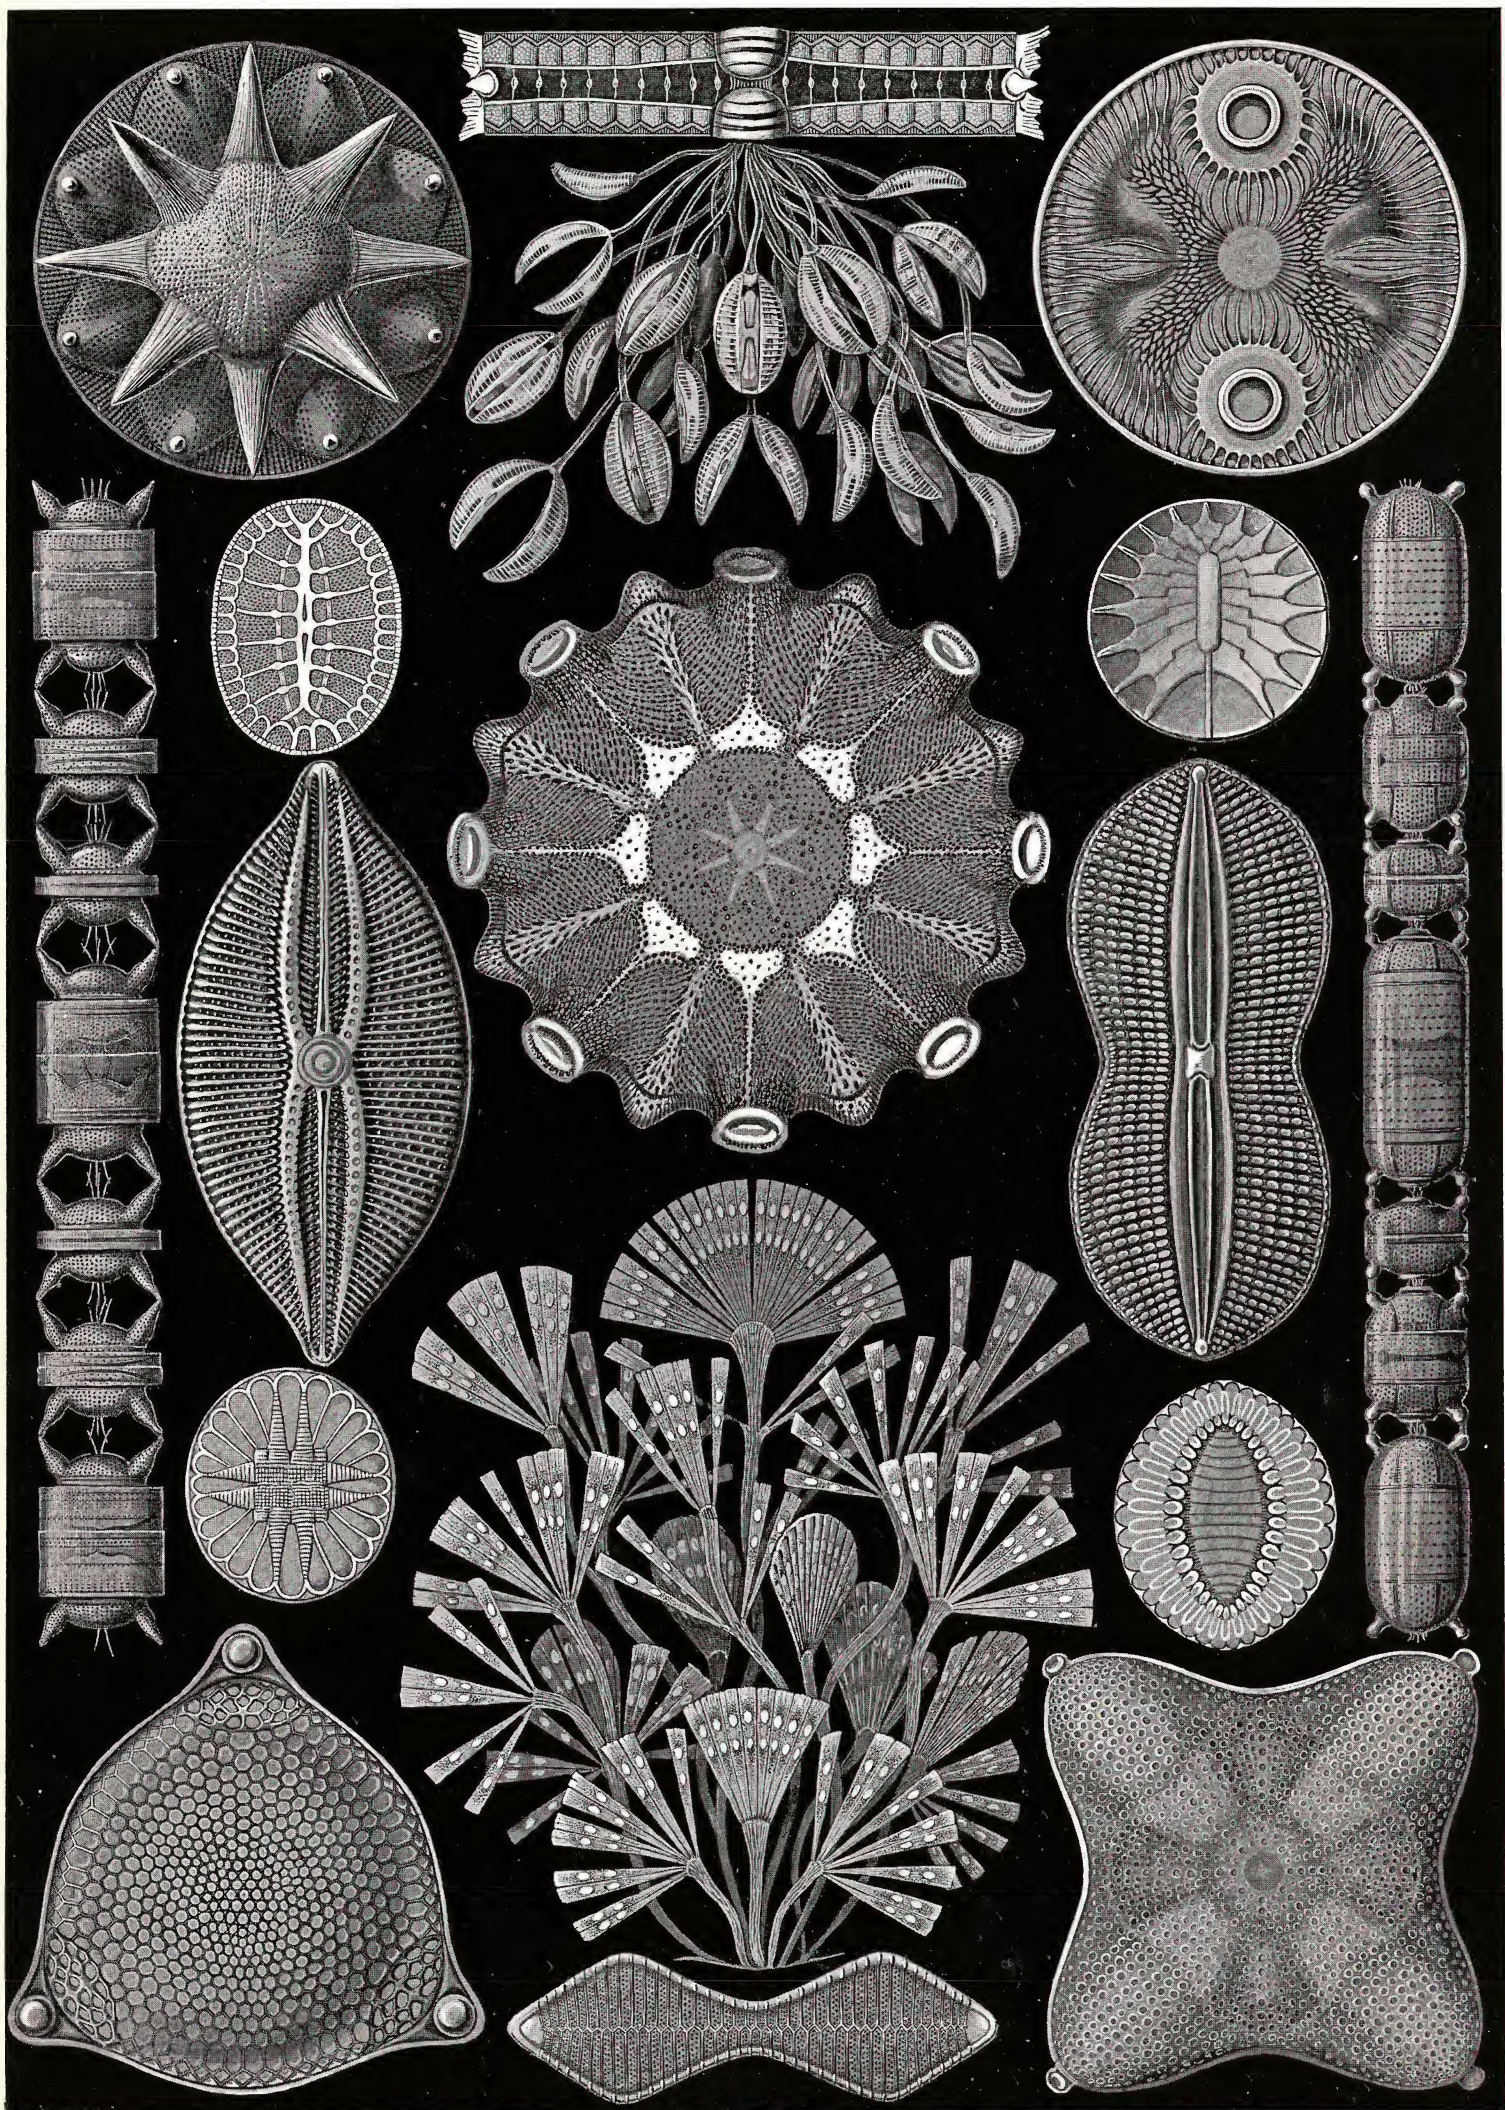

Thalamophora. — Kammerlinge.

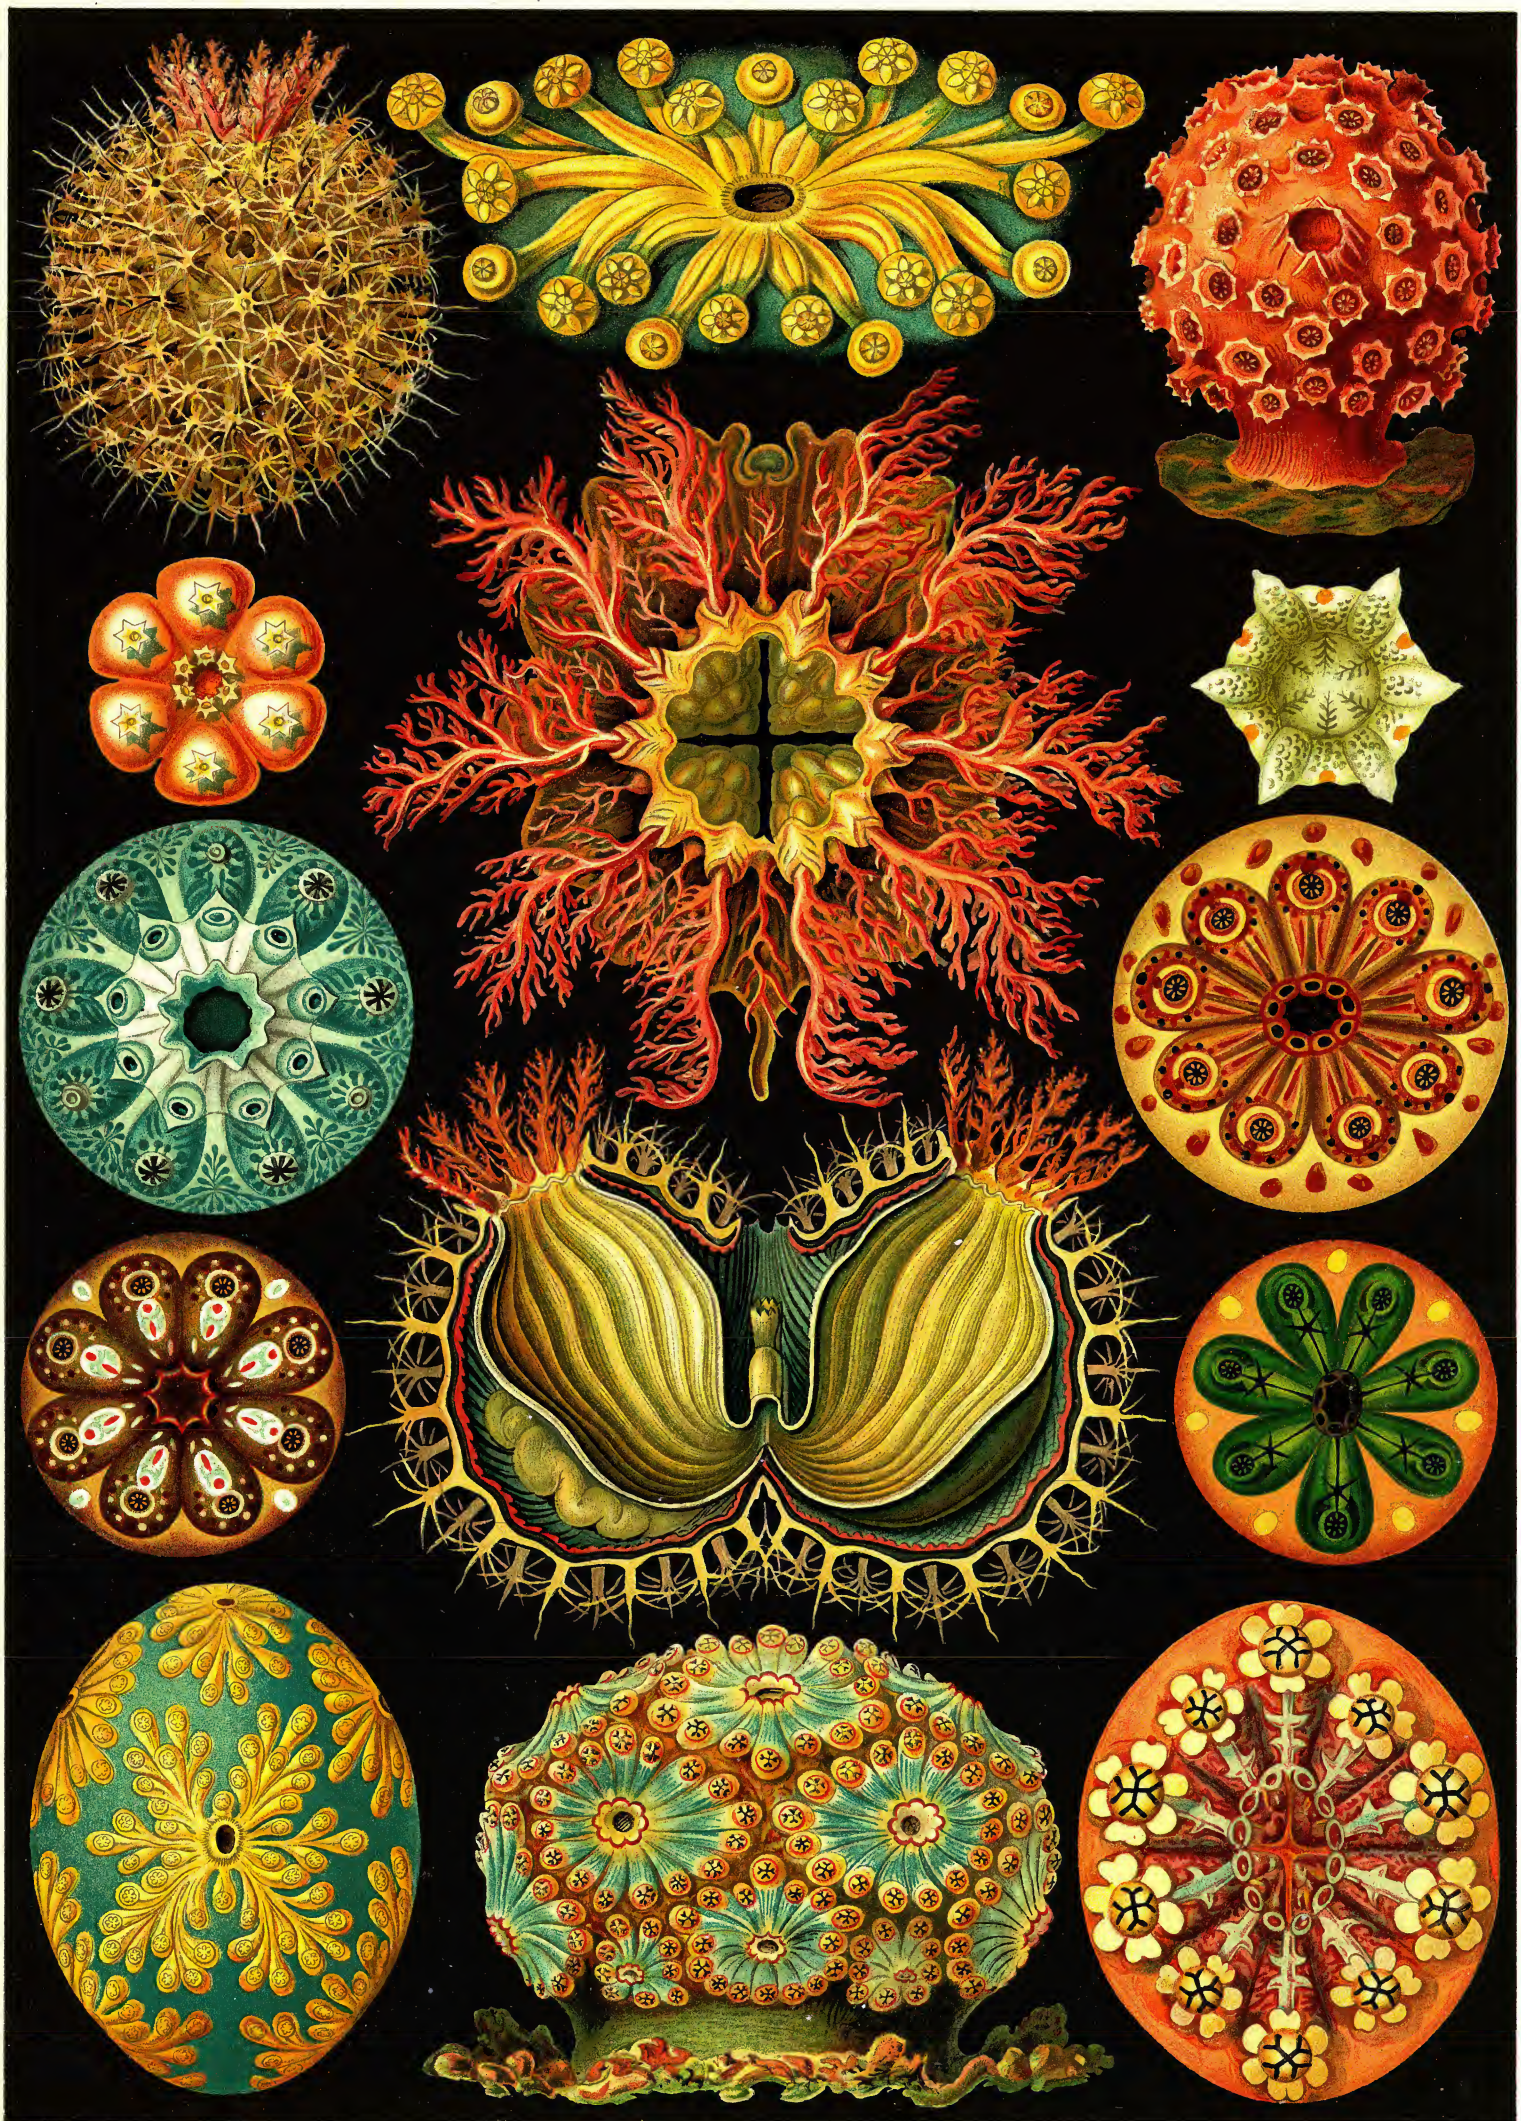

Hepaticae. — Lebermoose.

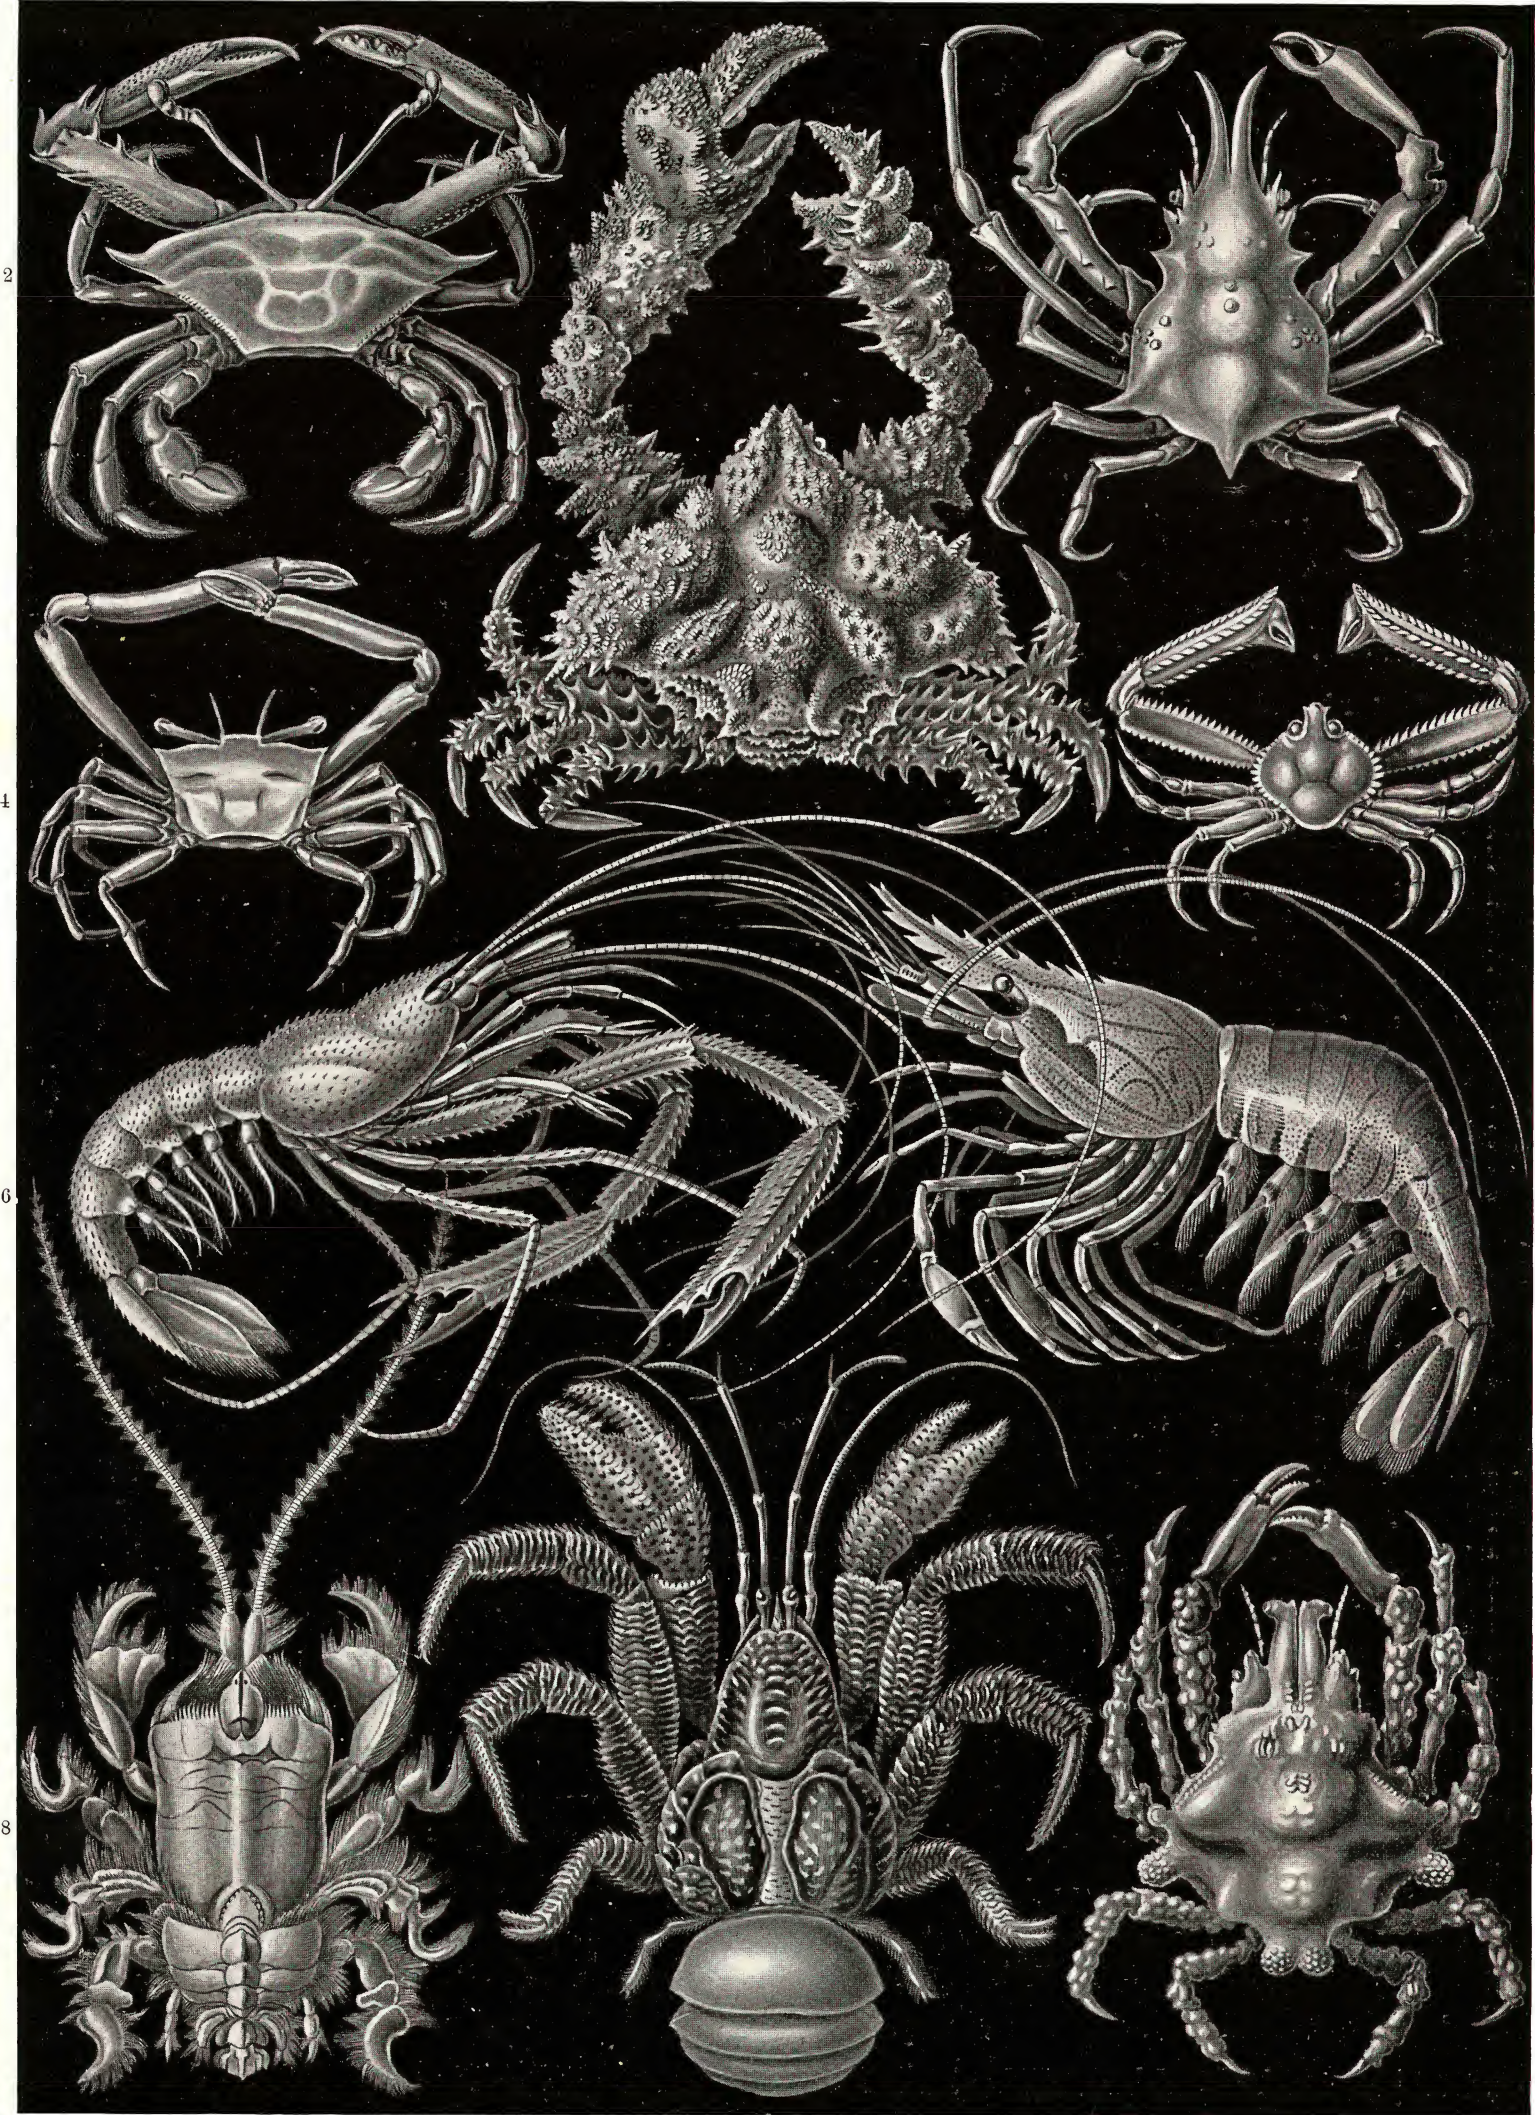

Lichenes. — Flechten.

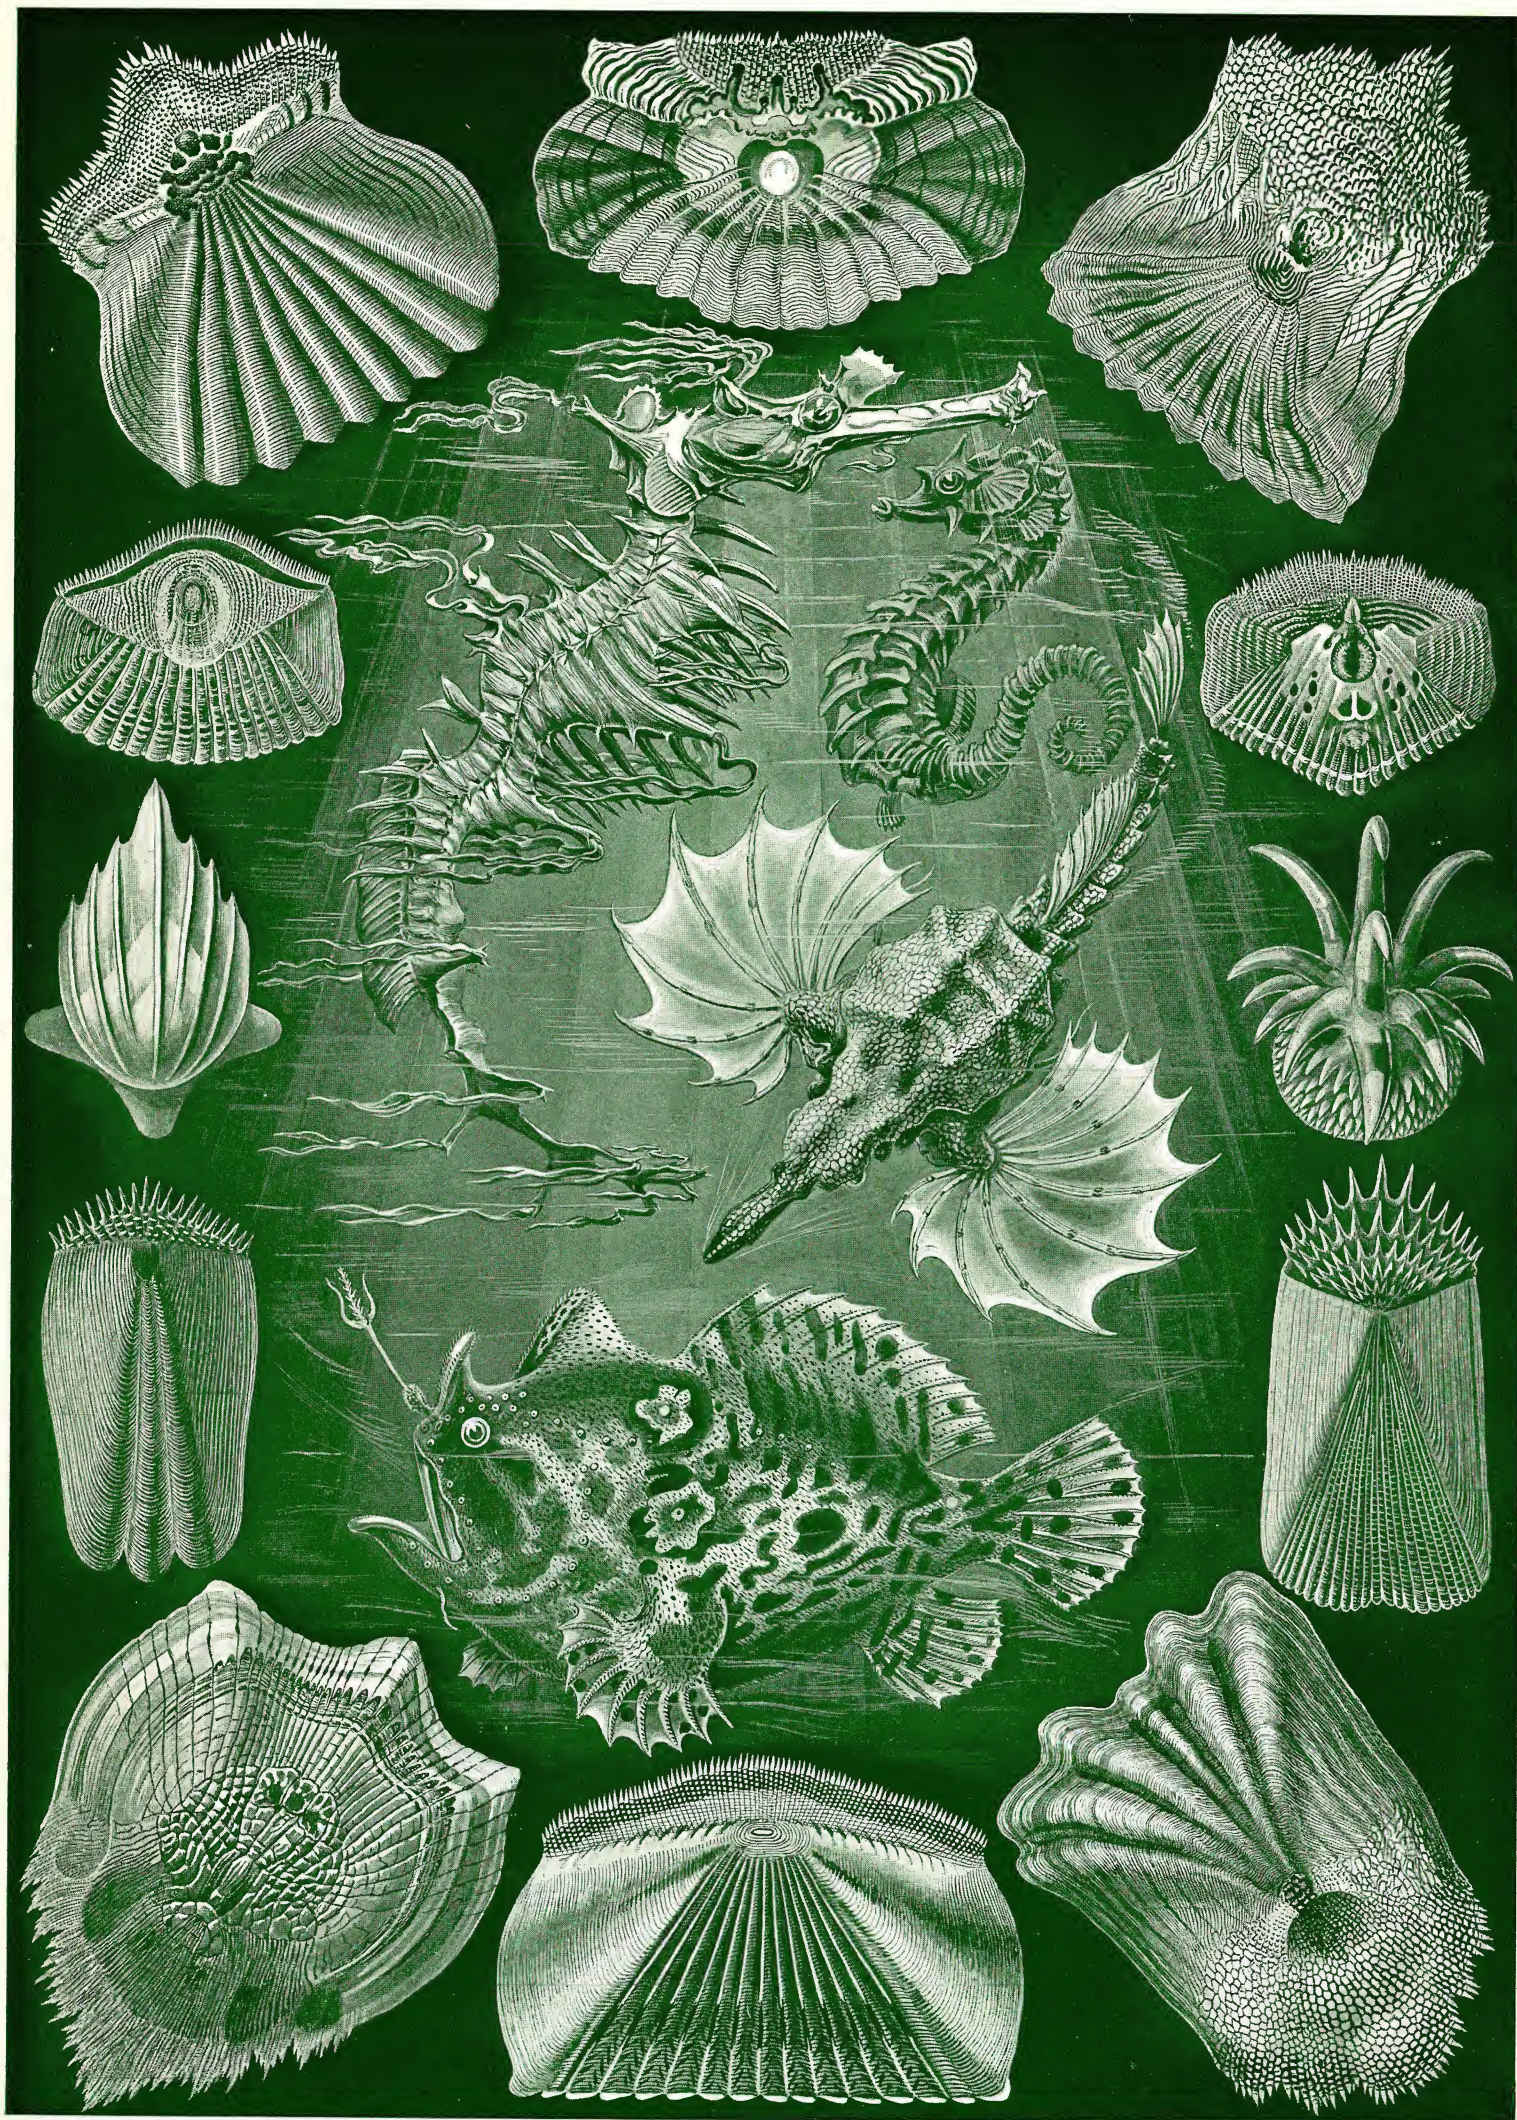

Diatomea. — Schachtellinge.

Ascidiae. — Geescheiden.

Chelonia. — Schildkröten.

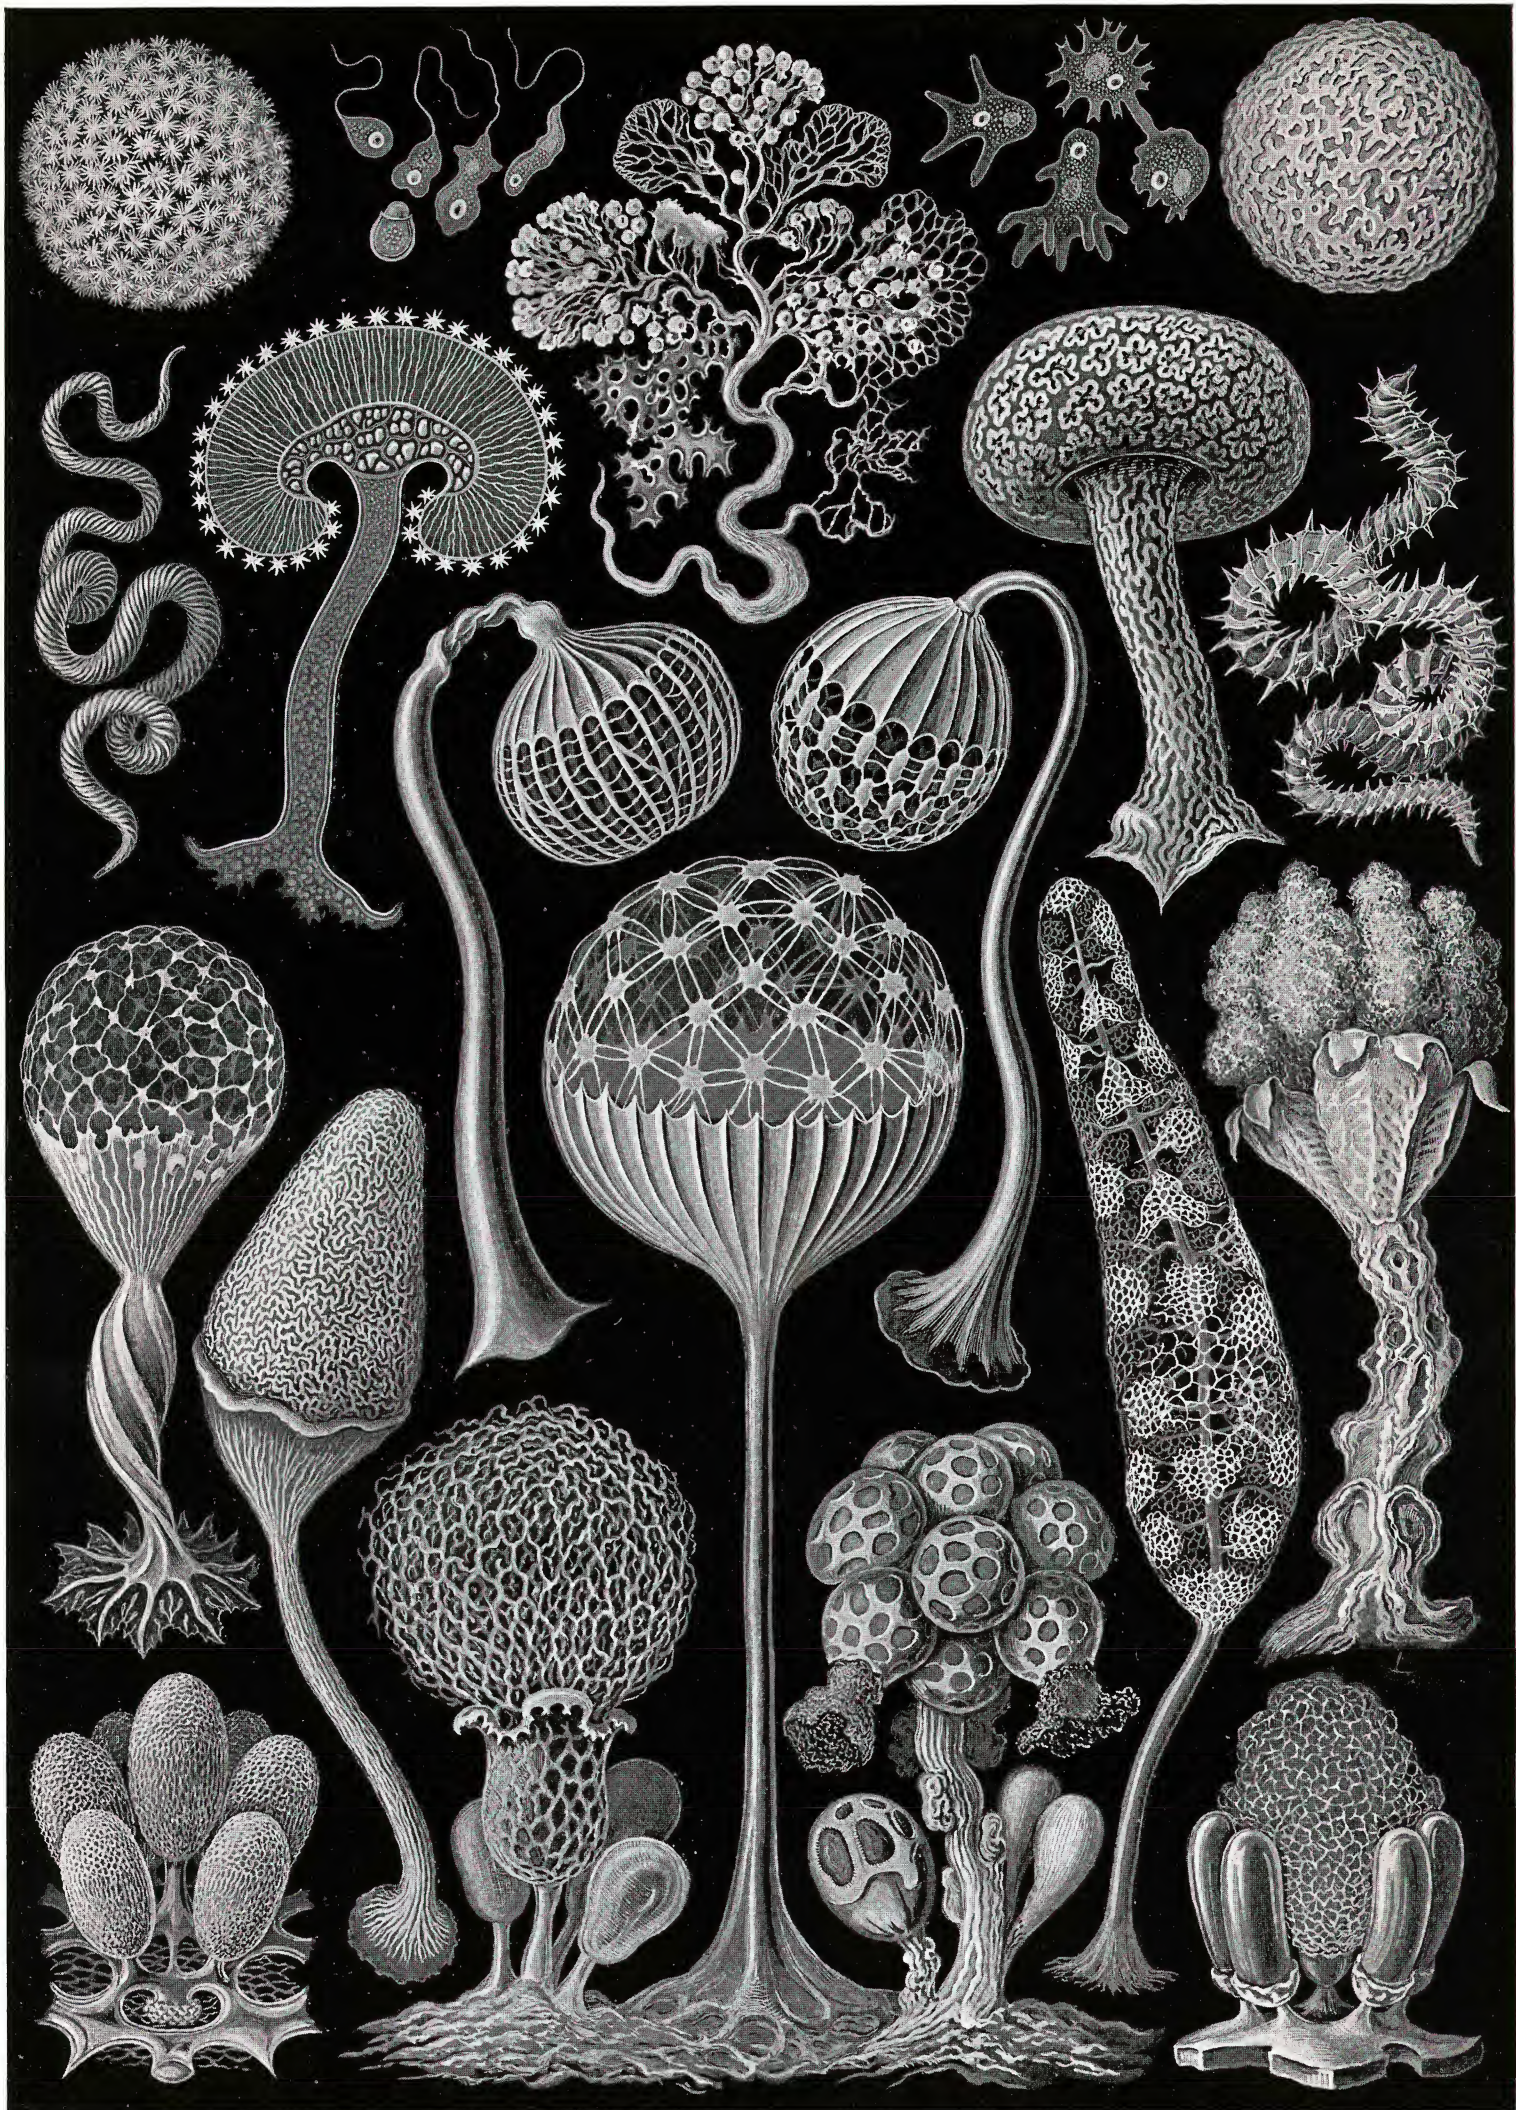

Cystoidea. — Beutelfferne.

Spumellaria. — Schaumstrahllinge.

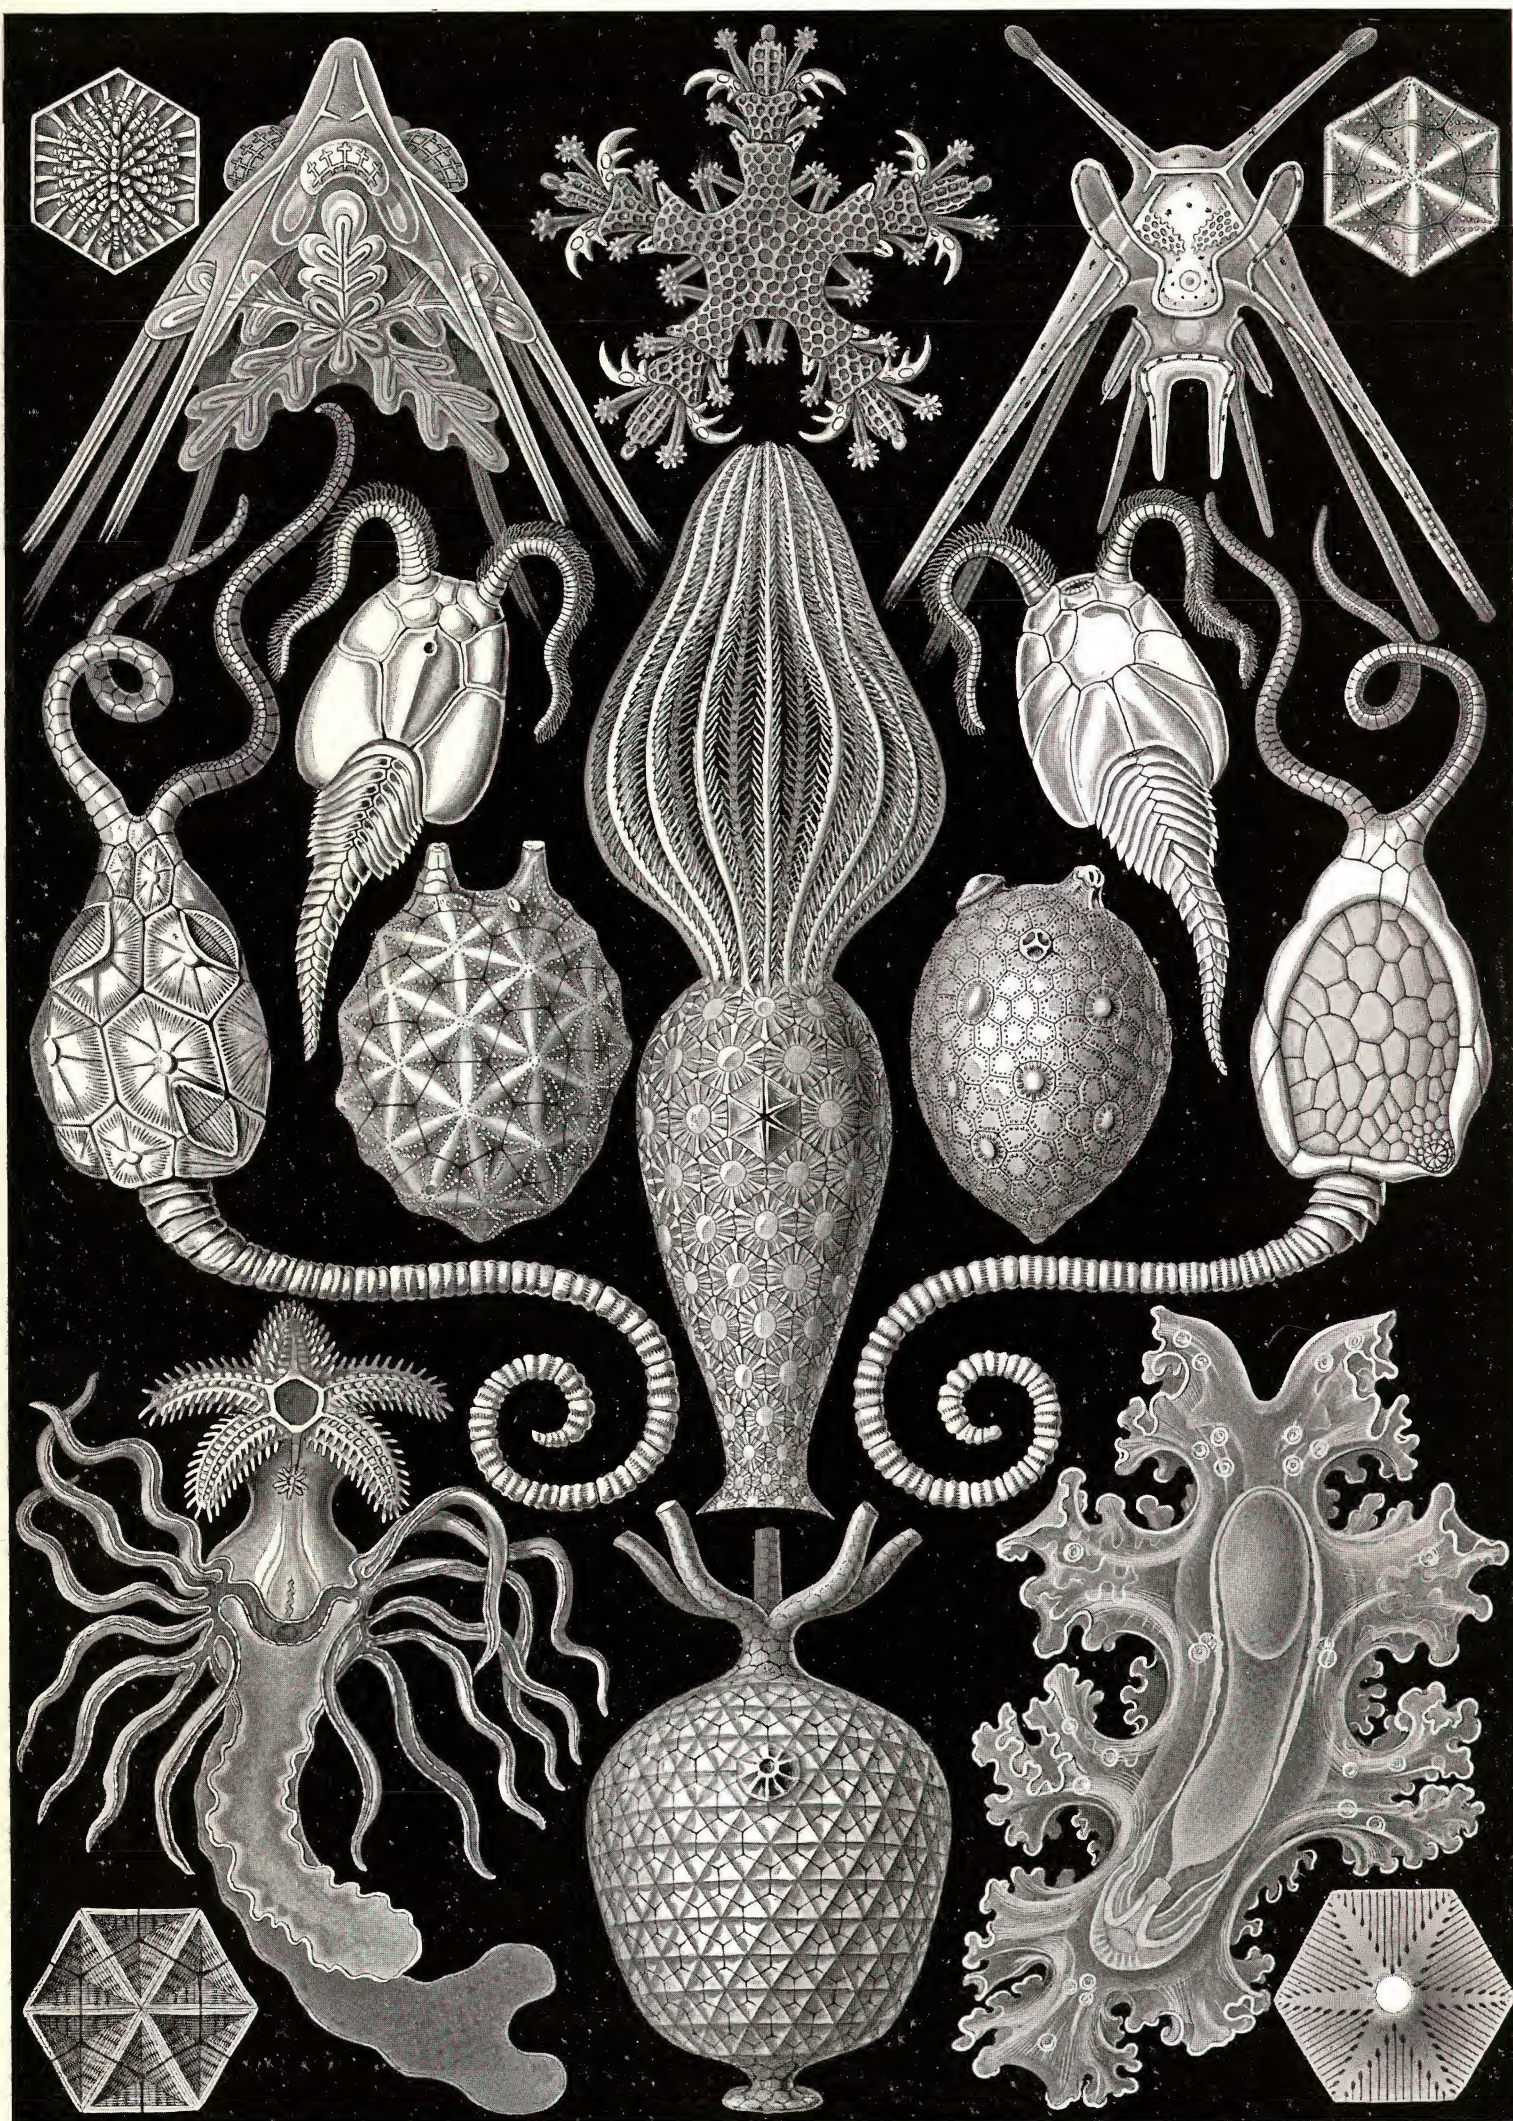

Filicinae. — Laubfarne.

Mycetozoa. — Pilztiere.

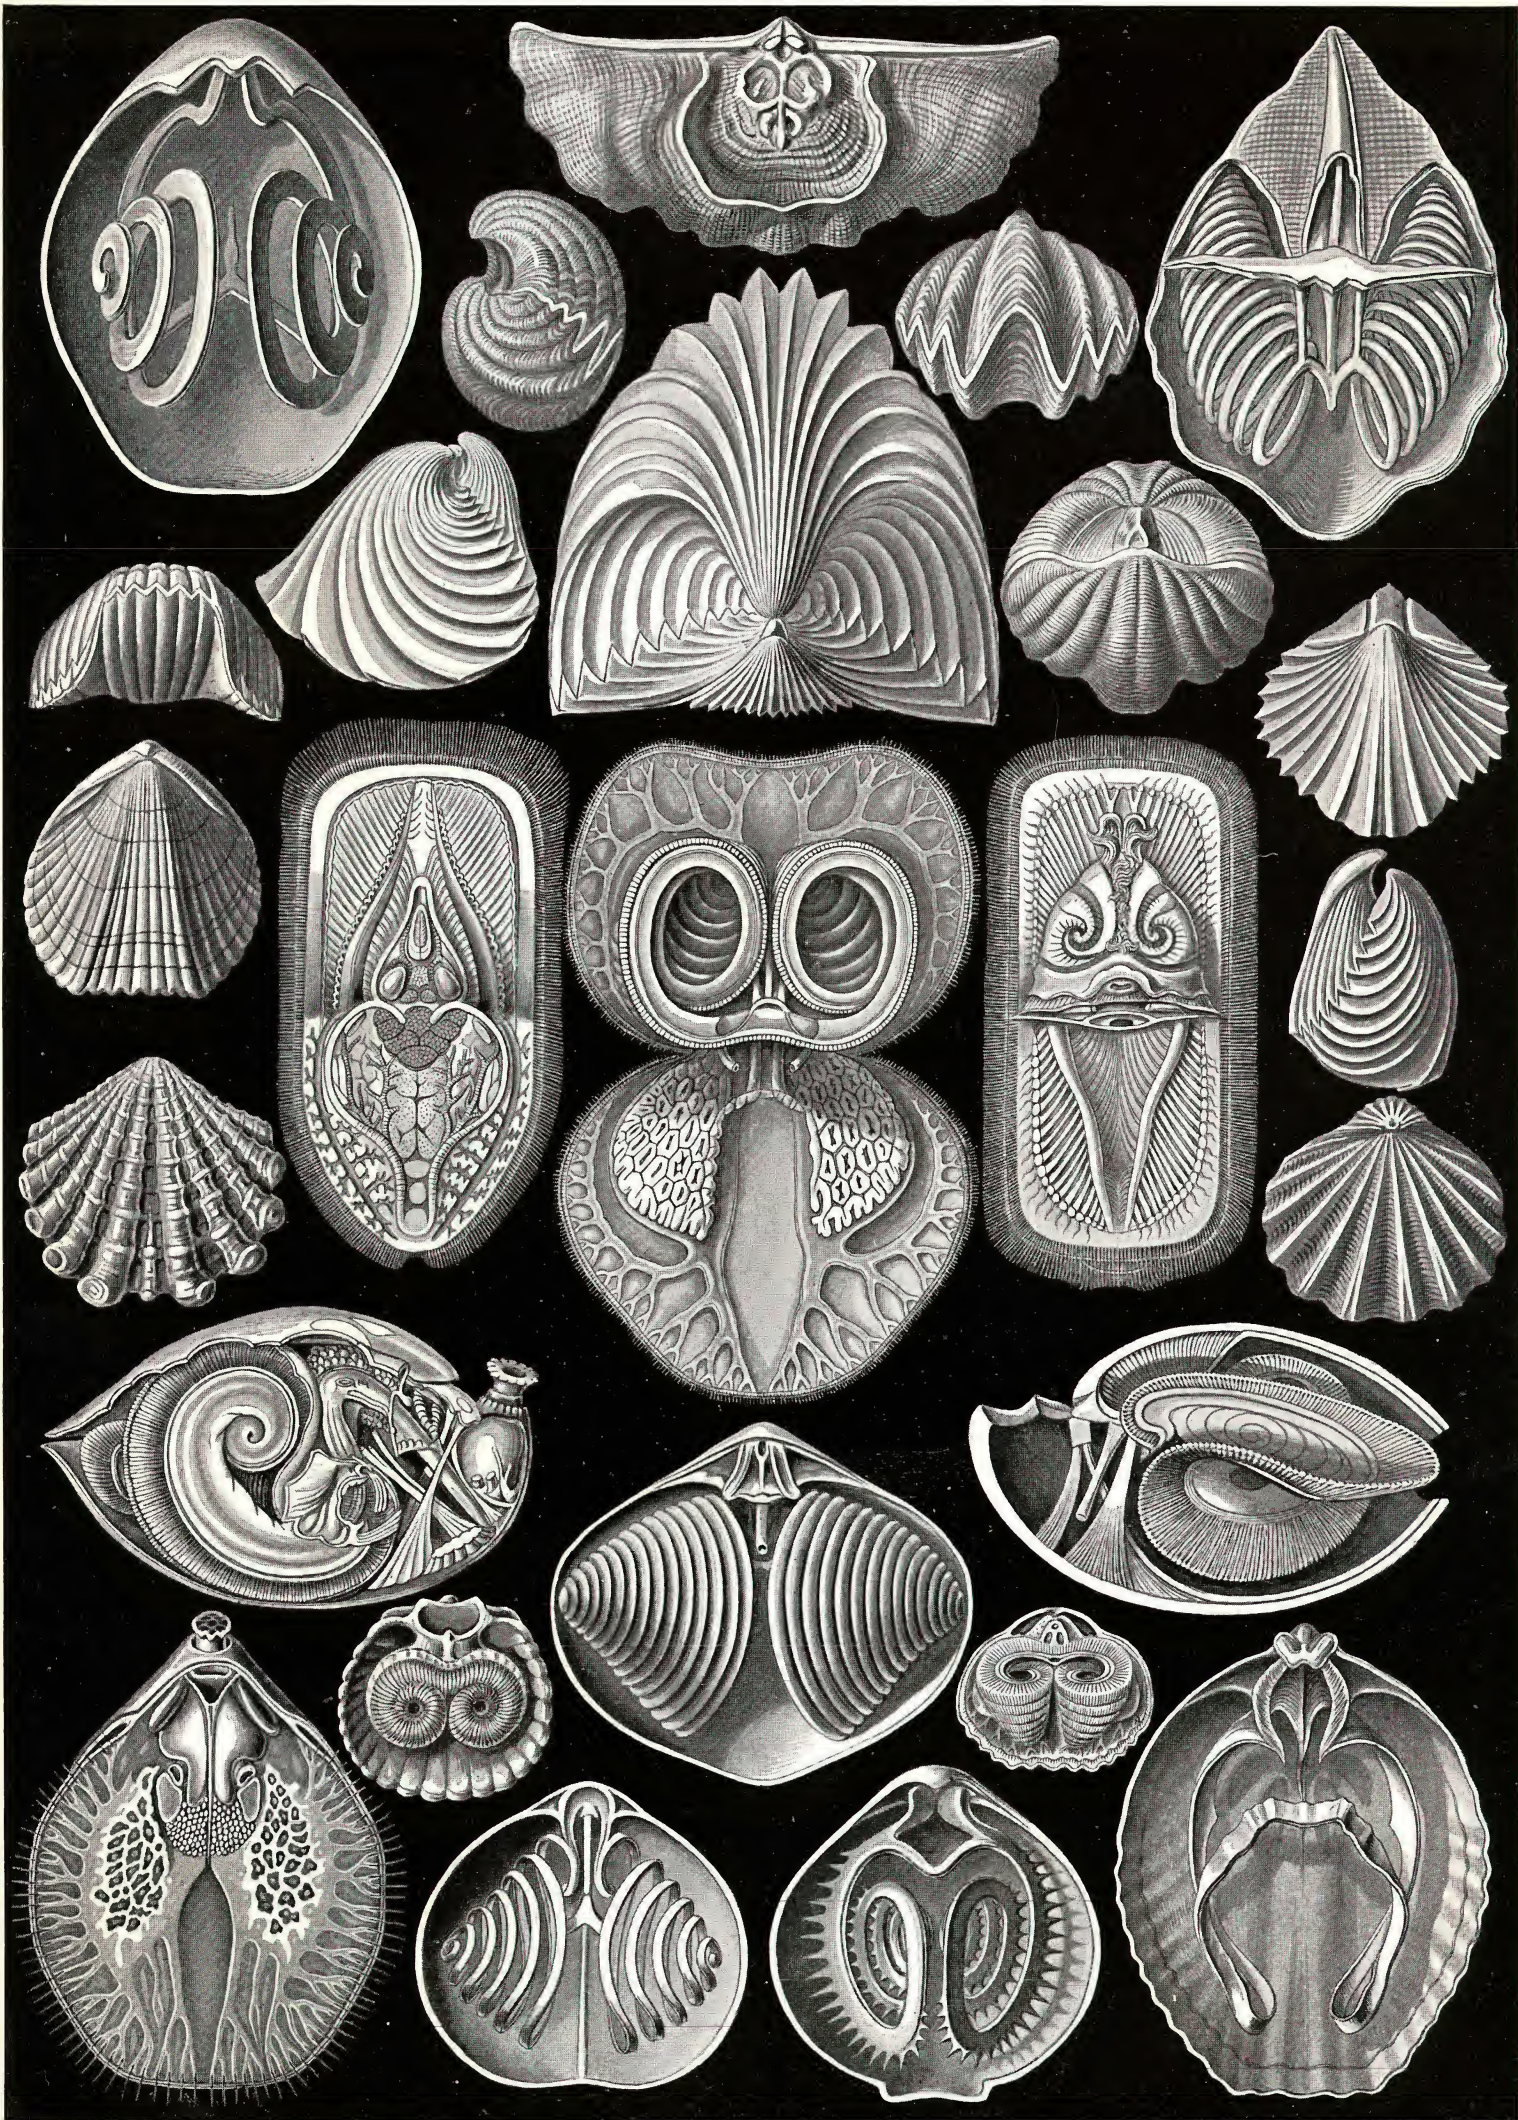

Coniferae. — Zapfenbäume.

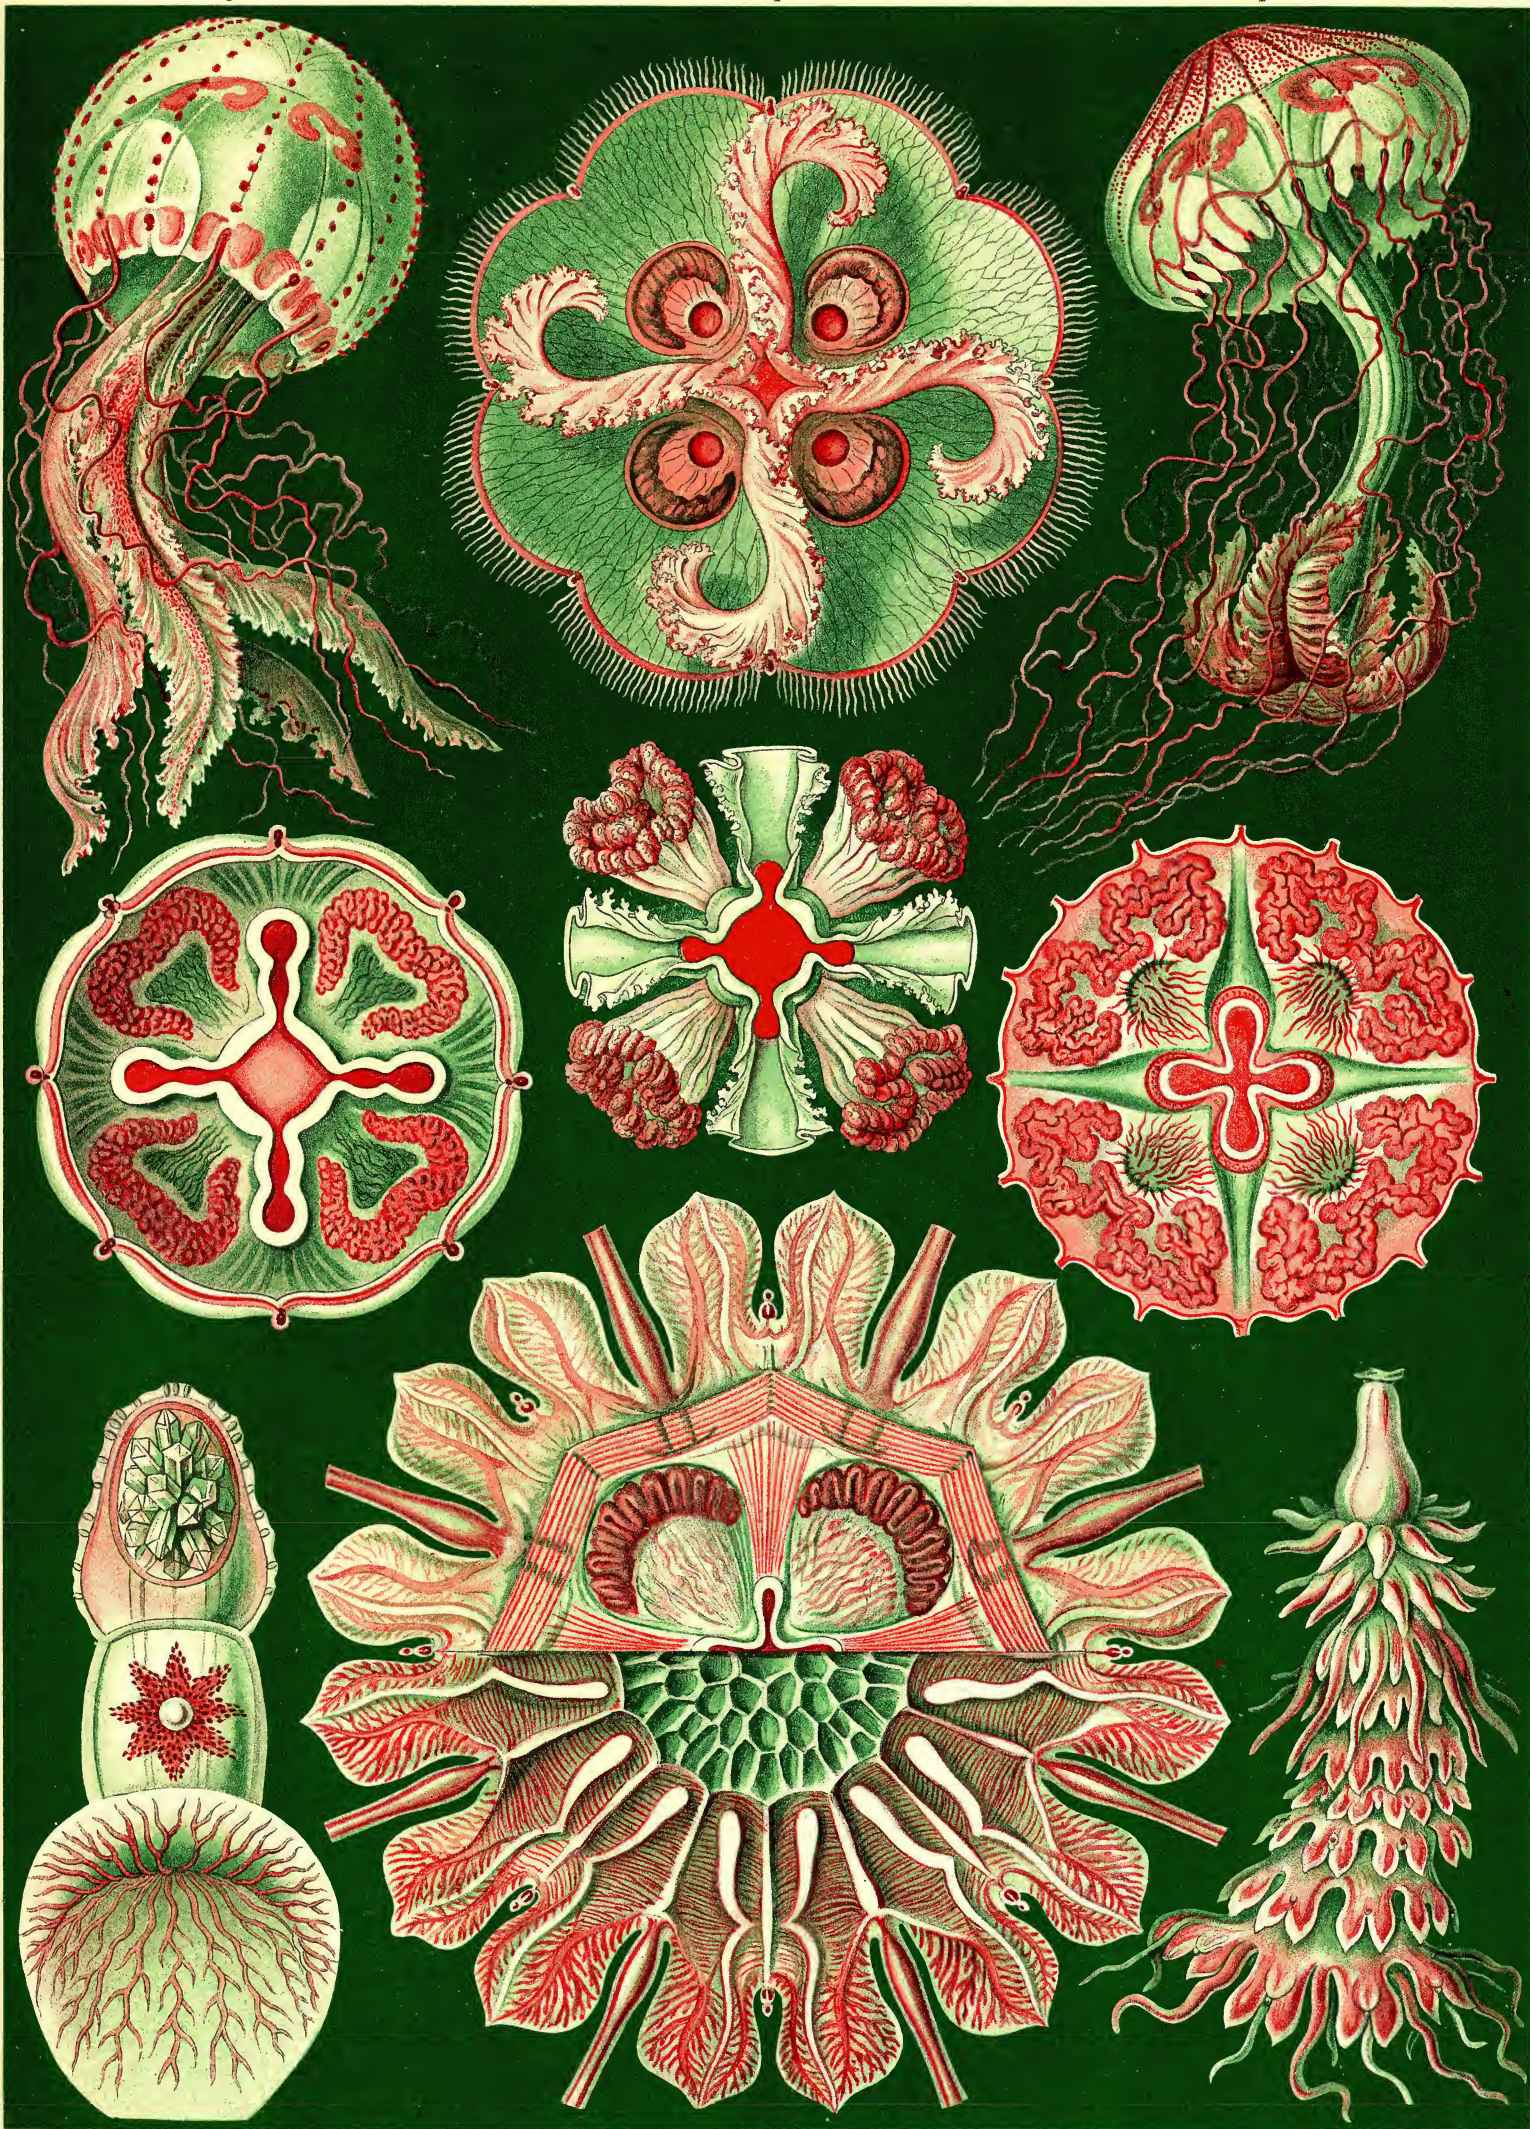

Amphoridea. — Urnensterne.

Spirobranchia. — Spiralkiemer.

Discomedusae. — Scheißenquassen.

Trochilidae. — Kolibris.

Antilopina. — Antilopen.
